There is a second reason why such a provision is not justified, particularly at this time. H.R. 4169 limits loan commitments for fiscal year 1982 by more than $550 million below the amount actually available. Currently, $1.6 billion in loan guarantee authority remains available under this title XI program. This appropriations bill limits the total loans which may be guaranteed in 1982 to $1.05 million. As budgetary reductions increasingly strain the industry, any reduction in this program deserves far more consideration than is being given here. The Omnibus Budget Reconciliation Act passed this summer anticipates a reduc-

[2] The phrase "resolution of disapproval duly adopted in accordance with the applicable law of the United States" is plainly broad enough to include a joint resolution, which is a constitutionally appropriate means for the exercise of legislative power since it involves adherance to the plenary legislative process and thus is consistent with the highest law of the land. See Art. I, section 7, Cls. 2 and 3; Enactment of a Law, S. Doc. No. 15, 96th Cong., 1st Sess. 2 (1979). On the other hand, the quoted phrase also could comprehend a resolution adopted by less than the plenary legislative process, such as a simple resolution passed by one House of Congress or a concurrent esolution adopted by both Houses of Congress, when such a resolution is purportedly authorized by statute.

[3] 37 Op. A.G. 56, 61 (1933). The Attorney General concluded that Congress could not constitutionally condition an appropriation for refunds of erroneously collected taxes on a requirement that a joint Congressional committee decide the amount of each refund to be granted.

tion in construction differential subsidy funding. In view of the "shrinking pie" of Federal ship construction subsidies, the amount of title XI loan commitments available for the fishing industry and ocean thermal energy projects have been under attack. The Budget Reconciliation Act did reduce the total authorized title XI loan commitments for fishing and ocean energy program. A new limitation on title XI authority for the merchant marine would only produce renewed pressures on these other programs.

Finally, this self-sustaining program has been one of the most successful under the Merchant Marine Act of 1936. Its total costs, including salaries of the MarAd staff employed in the merchant ship financing program, are underwritten by fees which are paid by users. The insurance premiums and guarantee fees go into the Federal ship financing fund, a revolving fund which may be used for payment of any defaults.

Since the inception of the title XI program, only 11 companies have defaulted.

During fiscal year 1980, the Federal ship financing fund had a net income of $42,219,628.

Mr. WEICKER. Mr. President, I find the points made by Senator GORTON to be useful and persuasive. I know that the House is quite adamant on deleting this title XI limitation in conference. It is important that the total figures for obligations in programs such as title XI be brought on-budget. If the offending provision were to be rewritten to reflect the authorized amount, it would read as follows: "During 1982, total commitments to guarantee loans shall not exceed $1,600,000,000 of contingent liability for loan principal." Would this satisfy the concerns of the authorizing committee as well as the individual Senators for whom you have been speaking?

Mr. GORTON. That would be acceptable.

Mr. WEICKER. In that case, I would support such a change in conference.

THE NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION (NTIA)

Mr. STEVENS. Mr. President, section 393 of the Communications Act of 1934 authorizes appropriations for the public telecommunications facilities program (PTFP). This program was established to assist public telecommunications entities in the acquisition of facilities to serve the American public with noncommercial, educational, and instructional programs. Section 393 establishes the priorities for the expenditure of funds appropriated for support of the program. Specifically, section 393 provides that 75 percent of the funds available must be expended to extend delivery of public telecommunications services to areas not receiving such services.

This provision is clear and unambiguous—in approving applications for funds under this program, applications from entities seeking to serve those areas not currently receiving public telecommunications services, are to be given priority. For example, we know that almost 35 percent of the population receives absolutely no public radio service. Many States have large areas that are not served by public radio or public television.

Section 393 further provides that the remaining 25 percent of the funds available for the facilities program can be used for three other purposes in the following order: First, for the expansion of existing service areas; second, for the development of facilities owned by minorities and women; and, third, for the improvement of existing facilities. Priority is to be given those applicants seeking to serve those areas not currently served by public telecommunications. The other purposes were clearly secondary.

Much to my surprise, Mr. President, I have read the report of the Appropriations Committee on H.R. 4169 (Rept. No. 97–265), and it appears to rewrite section 393's "extension-of-service" concept to include the upgrading of facilities.

The Appropriations Committee was concerned that, even though communities are receiving public telecommunications services, there is a question as to the adequacy of this coverage. My concern is that the report of the Appropriations Committee on H.R. 4169 should not be construed to reorder the priorities enacted into law. Am I corrrect in my assumption, Mr. Chairman, that the Appropriations Committee report does not reorder section 393's priorities for the public telecommunications facilities program?

Mr. WEICKER. The Senator from Alaska is correct. The Appropriations Committee report, as it relates to the PTFP, is not intended to reorder the section 393 priorities. The report merely expresses the concern of the committee that the National Telecommunications and Information Administration, in the administration of this program, will not overlook the upgrading of existing facilities to improve services to communities already covered.

Mr. STEVENS. The Appropriations Committee report also requires NTIA to use 16 employees to implement the PTFP. However, Bernard Wunder, Assistant Secretary for Telecommunications and Information, has indicated that this program can be adequately administered by fewer employees. Secretary Wunder is responsible for the program's administration. He is well aware of congressional intent in creating this program and has stated that the act can be administered by fewer employees. We must and will hold NTIA accountable for the performance of its duties under this program to insure that the job gets done. But it seems that at a time of budgetary restraint, we cannot impose unnecessary employee levels on Federal agencies.

Would the Senator consider requiring NTIA to use no less than 12 employees as opposed to 16?

Mr. WEICKER. That is fine. The committee's only concern is that NTIA not be deprived of the requisite number of employees to process applications and award grants under the program. If the Assistant Secretary determines that the job can be done by no less than 12, then that is fine. I just want to insure that we get these grants out in a timely fashion. As you know, no fiscal year 1981 grants were obligated prior to the end of fiscal year 1981, even though $19.7 million was appropriated for this program in that year.

ON EDUCATIONAL AND CULTURAL AFFAIRS, INTERNATIONAL COMMUNICATION AGENCY

Mr. COCHRAN. Mr. President, I should like to congratulate the subcommittee chairman, Mr. WEICKER, for the funding level contained in this bill for the academic exchange programs under the International Communication Agency. These programs make vital contributions both to understanding across international borders and to the international trade of U.S. products. These programs provide a vehicle for the development of deep and long-lasting ties between our country and other participating countries using the best ingredients available—the minds of our youth. Our student exchange programs will bear fruit as these students take leadership roles in the areas of government, business, and education. There are so many tangible benefits that flow to all nations, but particularly the United States, from these important programs.

I believe that this body should make clear that we want ICA to maintain a priority for educational and cultural affairs at least as high as that reflected in the Senate Appropriations Committee report. The report includes nonprofit private sector programs which take fullest possible advantage of the multiplier effect they generate through volunteer energies and private financial support. all made possible by citizen exchange organizations.

The committee report also addresses itself to the strengths of the academic exchange programs administered by ICA, such as the Fulbright and Humphrey fellowships.

In closing, Mr. President, I would simply like to reiterate the views expressed in the committee report by stressing that our Nation has much to offer, and to gain, and to share educationally, culturally, and socially from these programs. We should strive to expand programs such as these which strengthen mutual understanding between our people and others.

Mr. HOLLINGS. Mr. President, the Appropriations Committee's report indicates that the committee expects the FCC to devote adequate resources to the work of the Temporary Commission on Alternative Financing for Public Telecommunications, which was just established by the Congress in August. What level of support is estimated?

Mr. WEICKER. Although the Temporary Commission was authorized well after the Congress received the FCC's budget requests and the President's revised proposals, Public Law 97–35 calls on the FCC to house and support its work:

> Upon request of the (Temporary) Commission, the FCC shall furnish the (Temporary) Commission with such personnel and support services as may be necessary to assist the (Temporary) Commission in carrying out its duties and functions . . .

It was clear in the legislative hearing which bore on this Temporary Commission that the Congress expects the FCC

to be the conduit for financing the work of this short-term effort. I understand that the Temporary Commission has a budget which requires $400,000, to be matched by a like value in-kind support to be contributed by the FCC and other public and private members of the Commission. It is our intent that $400,000 should be made available as necessary by the FCC for the research, survey, and analytic work of the Temporary Commission.

Mr. HOLLINGS. I thank the Senator for that information, I am concerned that without this support the work of the Temporary Commission could not be accomplished as we have asked in the law establishing it. This Commission was established as a unified effort to look for additional funding for public television and radio, even as we in Congress had to reduce the Federal financial commitment. But we asked that there be a tremendous amount of work done and reports filed in very short order, and without this kind of support, as the committee has recommended, that important work could not be accomplished, and we would end up not serving the long-term services of public telecommunications which we seek to preserve.

Mr. WEICKER. I agree with the Senator, and I thank him for his remarks and interest. This Temporary Commission is the focus of Federal analysis of the needs of public broadcasting, and its results will be guiding us in the next session and the next Congress. This appropriation via the FCC will insure that we have that information when we need it.

UP AMENDMENT NO. 609—RELATING TO MISSING CHILDREN

● Mr. MATTINGLY. Mr. President, I am pleased that the Senate has acted yesterday to accept S. 1701, a bill which I cosponsored along with Senator HAWKINS and a number of my colleagues, as an amendment to the Commerce, Justice, and State, the judiciary and related agencies appropriations bill, 1982. As Senator HAWKINS pointed out when she presented the amendment, the problem of missing persons, particularly missing children, is one of the most grievous our Nation faces.

I am acutely aware of the pressure and anxiety that families and entire communities face as a result of months and even years of uncertainty concerning their loved ones. The story of missing and murdered black youths in the city of Atlanta is one with which citizens throughout this Nation are familiar. But highly publicized cases such as this represent only a fraction of those that actually occur each year. In fact, approximately 150,000 children are reported missing annually.

I am grateful, as are all the citizens of Atlanta, that the people of this Nation united to aid in the search for the missing children in my own State. Citizens from many States gave hours of time on weekends to form search parties which combed the landscape in Atlanta. The President made available monies through the Justice Department's Office of Juvenile Justice and Delinquency Prevention to assist law enforcement officials. Other Federal agencies, with coordination by Juvenile Justice, also offered financial support. As a result of these efforts, all but one of the missing youths have been accounted for.

Unfortunately, unlike the tragedy in Atlanta, the majority of these cases goes unpublicized and little or no assistance is provided. This nightmare does not need to exist. The technology is available now which could enable law enforcement agencies to solve a large number of these cases.

The amendment presented today will utilize effectively this technology. It will require the Attorney General to assist State and local law enforcement agencies in collecting and disseminating information on missing persons. Additionally, the amendment will establish a national clearinghouse on the unidentified dead.

It is an incredible irony that, in this great Nation, we have employed our technological know-how to devise a comprehensive, nationwide system for locating and identifying stolen automobiles, but no comparable system exists for the location of kidnapped and missing children. I implore my colleagues, Mr. President, to act to rectify this wrong and to vote in favor of this amendment.

In Atlanta, the anxiety is subsiding. But Darron Glass, who disappeared at the age of 10 in October 1979, is still missing. Until all avenues are explored which might lead to his location, the tragedy in Atlanta will not be behind us. And we, as U.S. Senators, will not have done all in our power to serve our fellow Americans.●

MISSING CHILDREN ACT

● Mr. RIEGLE. Mr. President, as a cosponsor of S. 1701, the Missing Children Act as introduced by Senator HAWKINS, I am very pleased with the Senate decision to include this act as an amendment to H.R. 4169, the Departments of Commerce, Justice, and State appropriations bill. The Missing Children Act will extend the use of modern computer technology in an area of concern to all of us; the protection of our Nation's children.

Creating a national clearinghouse for information on missing children will provide a much-improved system for obtaining and maintaining information about all missing children in an effort to aid local law enforcement officials and parents in their search for these children.

Since access to the system would be available as soon as a child is reported missing, the FBI could help to expedite the efforts of parents and police in locating and identifying missing children, helping to prevent further harm. In addition, centralizing and improving the records of unidentified bodies will prevent parents from suffering through years of anguished waiting for information and may increase the speed at which these cases can be solved.

It is a tragedy of modern society that conditions exist which lead to the disappearance of 150.000 children each year. It is imperative that, while working to find solutions to these larger problems we take advantage of opportunities such as those provided by a centralized computer system to reduce the trauma and suffering caused by the absence or loss of a child.●

THE FULBRIGHT EDUCATIONAL EXCHANGE PROGRAM

● Mr. PRYOR. Mr. President, I would like to take a moment to congratulate the Appropriations Committee on restoring and adding to the funding for educational and exchange programs of the International Communications Agency. Funds for these programs had been cut by the House of Representatives at the request of the administration.

Under the administration's proposal, the academic program in fiscal year 1982 would be cut by 53 percent. That drastic a cut would eliminate educational exchanges in all but 59 of the 125 countries in which the program now operates. The number of students served by the program would be cut by 40 percent. Host country contributions would drop sharply in accordance with the U.S. cuts. Programs in 27 private organizations would be dissolved.

Mr. President, I take a special interest in these academic programs, which were the creation of one of my predecessors, J. William Fulbright, who served the State of Arkansas brilliantly during 30 years in the Senate.

I hope my colleagues will bear with me a moment while I review the origins and successes of the Fulbright program. In 1946, while this Nation was beginning to recover from the upheaval of World War II, Bill Fulbright recognized the value of international exchanges to promote understanding between nations and to create or strengthen ties on an individual as well as governmental level.

He introduced legislation authorizing our Government to use proceeds from the sale of surplus war property outside the United States to finance the exchange of students and teachers. Under the Fulbright Act these funds were made available for the first time to finance grants to foreigners to teach and study in the United States, thus creating a two-way street that has served us well. Soon, private organizations and universities joined in a partnership with the Government. Over the years the act was amended several times and the funding and scope of the program expanded considerably.

In its 36 years of existence the program has supported more than 130,000 students—45,000 from the United States and 85,000 from other countries. Total U.S. Government appropriations have been $600 million, with non-U.S. Government sources contributing over $50 million. Participating countries have increased from 30 in 1950 to 125 in 1980.

Unfortunately, support for the program waned slightly in the late 1960's and the 1970's, and when we adjust for inflation, we find that present funding levels are at only 60 percent of the pre-1968 level. In 1950 the program financed foreign study for 3,800 grantees from the United States and 20 other countries. Today, 125 countries participate, but the

number of students has remained the same.

Mr. President, the Senate must not allow any further erosion of this program.

If I may, I would like to pass along a few comments which Bill Fulbright made recently in a letter to President Reagan in support of the international exchange program:

My reason for believing that this program is worthy of your attention is my conviction that it has a direct relation to the security of our country, a matter which is of deep concern to you and to all Americans.

The transnational exchanges create interest and relationships among people of different countries and ideologies, which inspire the desire and the will to find an alternative to nuclear conflict as a way to reconcile their differences.

Nominally the educational exchange is an academic matter, but in reality it also affects the basic ingredient of our political relations with other countries, through the individuals who determine governmental decisions directly and indirectly.

There are several lessons to be drawn from these remarks. I am firmly convinced that by promoting understanding between nations we are actively reducing the basis for many of the antagonisms that can lead to armed conflict. People around the world have some strange ideas about the United States and our way of life, and, I must say, U.S. citizens harbor their full share of misconceptions about other nations. Foreign study increases our knowledge of other nations, eliminates specific prejudices and misconceptions, and makes us more tolerant of other points of view. It is not difficult to stir up bad feelings against an abstract vision of another country. It is much more difficult to build up antagonisms where there has been substantial contact with individuals from that other country. The more ties we create abroad, the easier it is to keep the peace.

If some of my colleagues are worried about the "payoff" associated with this program, let me assure them that the "payoff" under Fulbright is real. We are talking about the education of the leaders of tomorrow, just as the program in the past has financed the foreign study of many of today's leaders. Obviously, it will always be to our advantage to deal with foreign leaders who have sympathetic ties with our own country. We have seen at least one nation whose government is more or less in the hands of a group of officials who received their education in this country, and our relations with that nation, not coincidentally, have been excellent.

A recent survey by the Board of Foreign Scholarships revealed that 33 heads of state and 378 cabinet-level ministers had studied or visited in the United States under the aegis of educational exchange program. Among those participants we find such leaders as Prime Minister Margaret Thatcher of Great Britain, President Julius Nyerere of Tanzania, Chancellor Bruno Kreisky of Austria, Chancellor Helmut Schmidt of West Germany, and Prime Minister Indira Gandhi of India. In addition, our own Senators PAT MOYNIHAN and JACK SCHMITT have studied abroad under a Fulbright grant.

The Senate Appropriations Committee has taken a firm stand on the question of funding exchange programs. Not only did it refuse to go along with the House in cutting the program, but it added enough money for a slight increase in some program operations. The committee has added its voice to that of the Senate Foreign Relations Committee, which has called for substantial increases in exchange programs over the next several years. I am grateful to the committee and congratulate its members on their foresight in appreciating the benefits which are bound to follow from increased international contact.

It seems to me that the program which Bill Fulbright established is the most effective way we have found to promote international understanding and achieve good will toward the United States among future leaders abroad. In view of the very strong reaction around the country opposing the proposed cuts, I am hopeful that the Senate position will prevail in conference. I urge the Senate conferees to do their utmost to see that the full Senate figure is adopted in the end.●

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business, the time to not extend beyond 4:15 p.m., and that Senators may speak therein for not to exceed 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

NUCLEAR BLACKMAIL

Mr. THURMOND. Mr. President, large crowds organized by leftwing activists recently rallied in Bonn, London, and Rome to "protest" the so-called U.S. nuclear arms buildup in Western Europe. One of the arguments advanced by the demonstrators is that by keeping U.S. nuclear weapons out of Western Europe, the Soviets will be less likely to fire their SS-20 missiles at U.S. targets.

It is ironic that these Europeans take this position, because without a strong U.S. military presence, the Soviets are more likely to fire upon a vulnerable Western Europe knowing that existing missiles in Western Europe cannot reach the U.S.S.R.

As Congress studies the Reagan program for an upgraded national defense, may we also realize our responsibility as a world power to be ready to protect our North Atlantic Treaty Organization allies in Western Europe.

For the protection of Western Europe, the United States, and ultimately the entire free world, I believe that it is imperative that the United States have a strong military presence in Western Europe.

Our purpose is not to provoke a nuclear war, but to prevent one. The only way to keep Russia in check is to maintain our military strength. Deploying U.S. nuclear missiles in Europe will serve as a deterrent to Soviet aggression—a growing malignancy that threatens the free world.

Mr. President, I am pleased that an editorial which appeared in the October 2, 1981, edition of the Greenville, S.C., News shares my concerns regarding Western Europe and its defense relationship with America. In order to share this excellent article with my colleagues, I ask unanimous consent that it appear in the RECORD at the conclusion of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

NUCLEAR BLACKMAIL

The United States will be at a disadvantage on Nov. 30 when negotiations begin with the Soviet Union on limiting nuclear weapons in Europe. The reason is two-fold:

The Soviet Union's SS-20 missiles, already deployed, can devastate Western Europe on short notice, but none in Western Europe can reach the U.S.S.R.

Widespread vocal dissent, apparently well coordinated, in key Western European countries aims to prevent placement of similar weaponry in the West to counter the Soviet nuclear arsenal.

Therefore, the United States will be negotiating from a position of relative weakness, unless NATO countries express determination to match weapon with weapon.

Over-all American capability—or threat of all-out nuclear war in event of an attack on Europe—may be sufficient deterrence, but only if the Soviet leadership is convinced the United States can and will respond. And that exposes the "window of vulnerability" in this country's nuclear defense policy: uncertainty about American capability.

The chilling thing about the gap in Western Europe's nuclear position is evidence that the Soviet Union is daring the West to match its weaponry. It's a form of nuclear blackmail which is enjoying some success in growing anti-American and anti-weapons sentiment in several NATO nations.

That's the danger of dealing with the Soviet Union from any position other than solid, clearly-understood strength. And that's the reason for a sense of urgency about restoring the perceived effectiveness of America's armed forces.

REMARKS BY ATTORNEY GENERAL WILLIAM FRENCH SMITH BEFORE THE FEDERAL LEGAL COUNCIL

Mr. THURMOND. Mr. President, recently, Attorney General William French Smith spoke before the Federal Legal Council on the proper role of the judiciary. In his comments, the Attorney General presented a concise restatement of the problem of judicial activism and indicated the posture which the Reagan administration will take to help reinforce the traditional role of the judiciary.

Mr. President, I have always been impressed with the qualifications of Attorney General Smith, and I believe that this speech clearly underscores that this man is one of the finest attorneys to hold this position in modern times. Rarely in recent history has there been a chief legal officer who understood the Constitution as well as this great lawyer and who could so cogently express the fundamental principles on which this Nation was founded.

In addition to recounting the evolution of judicial usurpation of policymaking through artificial analysis and implied rights, the Attorney General ex-

plained how the Reagan administration plans to respond to the American people by reemphasizing the traditional constitutional roles of the three branches of the Federal Government. Attorney General Smith also makes it clear that this administration is unalterably dedicated to insuring that the executive branch upholds its responsibility under the Constitution, rather than preempting legislative prerogatives by using discretion in determining which laws it will support and defend.

Mr. President, in order to share this excellent speech with my colleagues, I ask unanimous consent that the complete text of the address by Attorney General Smith be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF THE HONORABLE WILLIAM FRENCH SMITH, ATTORNEY GENERAL OF THE UNITED STATES

It is a special pleasure for me to be here this morning and to open this first gathering of the men and women who direct the Reagan Administrations legal machinery. Most of us are here because of an election that occurred last November, and I want to use this occasion to outline what that election means to us as the Government's lawyers. Simply put, consistent with the Constitution and the laws of the United States, the Department of Justice intends to play an active role in effecting the principles upon which Ronald Reagan campai ned.

Already, there have been many significant changes. We have proposed a comprehensive crime package of more than 150 administrative and legislative initiatives that would help to redress the imbalance between the forces of law and the forces of lawlessness. We have proposed a new approach to immigration and refugee policy designed to reassert control over our own borders. We have brought the Government's antitrust policies back to the real economic world by focusing upon truly anticompetitive activities rather than outmoded and exotic theories. We have firmly enforced the law that forbids federal employees from striking. We have opposed the distortion of the meaning of equal protection by courts that mandate counterproductive busing and quotas. We have helped to select appointees to the federal bench who understand the meaning of judicial restraint.

As significant as all these changes are, however, they represent only a beginning. Today, I will discuss the next stage in this process. We intend, in a comprehensive way, to identify those principles that we will urge upon the federal courts. And we intend to identify the cases in which to make our arguments—all the way to the Supreme Court. We believe that the groundswell of conservatism evidenced by the 1980 election makes this an especially appropriate time to urge upon the courts more principled bases that would diminish judicial activism. History teaches us that the courts are not unaffected by major public change in political attitudes. As the great jurist Benjamin Cardozo once wrote:

"The great tides and currents which engulf the rest of men do not turn aside in their course and pass the judges by."

Consider for a moment the 1900 Presidential election. That year, a burning issue of the campaign was whether or not the protections of the Constitution automatically attached to the territories annexed after the Spanish-American War. Paralleling the public opinion expressed in the election, in 1901 the Supreme Court held in the four Insular Cases that it did not. In explaining that result, the columnist Finley Peter Dunne caused his fictitious Irish bartender Mr. Dooley to speak the following prophetic words:

"No matter whither th' Constitution follows th' flag or not, th' Supreme Court follows th' illicition returns."

Federal judges in 1931—as in 1901—remain free from direct popular control. Nevertheless, basic changes in public sentiment can still portend changing judicial philosophy. Various doubts about past conclusions have already been expressed in Supreme Court opinions, concurrences, and dissents—which makes the next few years inviting ones to urge modifications upon that Court and other federal courts.

We intend to do exactly that. Solicitor General Rex Lee is already working with our Assistant Attorneys General to identify those key areas in which the courts might be convinced to desist from actual policy-making. In some areas, what we consider errors of the past might be corrected. In other areas, past trends might at least be halted and new approaches substituted. Today, I want to outline some of those areas upon which we are focusing.

It is clear that between *Allgeyer* v. *Louisiana* in 1897 and *Nebbia* v. *New York* in 1934 the Supreme Court engaged in—and fostered—judicial policy-making under the guise of substantive due process. During this period, the Court weighted the balance in favor of individual interests against the decisions of state and federal legislatures. Using the due process clauses, unelected judges substituted their own policy preferences for the determinations of the public's elected representatives.

In recent decades, at the behest of private litigants and even the Executive Branch itself, federal courts have engaged in a similar kind of judicial policy-making. In the future, the Justice Department will focus upon the doctrines that have led to the courts' activism. We will attempt to reverse this unhealthy flow of power from state and federal legislatures to federal courts—and the concomitant flow of power from state and local governments to the federal level.

Three areas of judicial policy-making are of particular concern. First, the erosion of restraint in considerations of justiciability. Second, some of the standards by which state and federal statutes have been declared unconstitutional—and, in particular, some of the analysis of so-called "fundamental rights" and "suspect classifications." And third, the extravagant use of mandatory injunctions and remedial decrees.

Article III of the Constitution limits the jurisdiction of the federal courts to the consideration of cases or controversies properly brought before them. Nevertheless, in recent years, a weakening of the courts' resolve to abide by the case or controversy requirement has allowed them greater power of review over government action. Often, the federal government itself has in the past moved courts to show less deference to the boundaries of justiciability—in particular, in environmental litigation. The Justice Department will henceforth show a more responsible concern for such questions. We will assert the doctrine in those situations that involve any of its four elements—standing, ripeness, mootness, and presence of a political question. Vindicating the principle of justiciability would help return the courts to a more principled deference to the actions of the elected branches.

Like the concept of judicial restraint itself, the constitutional requirement of justiciability limits the permissible reach of the courts irrespective of the desirability of reaching the underlying legal issues involved. The doctrine of justiciability therefore limits the possibility of judicial encroachment upon the responsibilities of the other branches or the states—even in those situations when the other branch or level of government has chosen not to act. Some responsibilities are entrusted solely to nonjudicial processes. In those instances, we intend to urge the judicial forebearance envisioned by the Constitution.

Just as courts have sometimes overstepped the proper bounds of justiciability, their analyses of equal protection issues have often trespassed upon responsibilities our constitutional system entrusted to legislatures. Through their determination of so-called "fundamental rights" and "suspect classifications," courts have sometimes succeeded in weighting the balance against proper legislative action.

In the 1942 case of *Skinner* v. *Oklahoma*, the Supreme Court first emphasized the concept of fundamental rights that invites courts to undertake a stricter scrutiny of the inherently legislative task of line-drawing. In the nearly forty years since then, the number of rights labeled "fundamental" by the courts has multiplied.

They now include the first amendment rights and the right to vote in most elections—rights mentioned in the Constitution. In addition, however, they include rights that—though deemed fundamental—were held to be only implied by the Constitution. The latter group—which has become a real base for expanding federal court activity—includes the right to marry, the right to procreate, the right of interstate travel, and the right of sexual privacy that, among other things, may have spawned a right—with certain liimtations—to have an abortion.

We do not disagree with the results in all of these cases. We do, however, believe that the application of these principles has led to some constitutionally dubious and unwise intrusions upon the legislative domain. The very arbitrariness with which some rights have been discerned and preferred, while others have not, reveals a process of subjective judicial policy-making as opposed to reasoned legal interpretation.

At the very least, this multiplication of implied constitutional rights—and the unbounded strict scrutiny they produce—has gone far enough. We will resist expansion. And, in some cases, we will seek to modify the use of these categories as a touchstone that almost inevitably results in the invalidation of legislative determinations. We will seek to modify especially the application of a strict scrutiny to issues whose very nature requires the resources of a legislature to resolve.

We shall also contest any expansion of the list of suspect classifications, which, once established by a court, almost inevitably result in the overturning of legislative judgments. Thus far, the Supreme Court has employed a strict-scrutiny test when legislative classifications turn upon race, national origin, or, in many instances, alienage. In addition, when classifications are based upon sex or legitimacy, the Court has on occasion conceived and applied a middle test somewhere between the special strict-scrutiny test and the normal rational-basis test.

Already, some limitations have been forged in the Supreme Court to temper these analyses of suspect and quasi-suspect classifications—for example, in the case of alienage.

The Department of Justice will encourage further refinement in these areas—in particular, by resisting increase in the number of suspect or quasi-suspect classifications and by tempering the strictness of the analysis applied to classifications based upon alienage. Throughout, as with the so-called fundamental rights, as we shall be guided by the principle that legislatures, rather than courts, are better suited both constitutionally and practically to make certain kinds of complex policy determinations. We shall, however, remain vigilant to the Civil War Amendments' explicit concern over classifications based on race.

The extent to which the federal courts have inappropriately entered legislative terrain can be seen most clearly—and felt—in their use of mandatory injunctions and attempts to fashion equitable remedies for perceived violations. Throughout history, the equitable powers of courts have normally reached only those situations a court can effectively remedy. Implicit within that historical limitation is the recognition that some kinds of remedial efforts require resources and expertise beyond those of a federal court—even one aided by special masters.

Nevertheless, federal courts have attempted to restructure entire school systems in desegregation cases—and to maintain continuing review over basic administrative decisions. They have asserted similar control over entire prison systems and public housing projects. They have restructured the employment criteria to be used by American business and government—even to the extent of mandating numerical results based upon race or gender. No area seems immune from judicial administration. At least one federal judge had even attempted to administer a local sewer system.

In the area of equitable remedies, it seems clear that federal courts have gone far beyond their abilities. In so doing, they have forced major reallocations of governmental resources—often with no concern for budgetary limits and the dislocations that inevitably result from the limited judicial perspective.

In many of these cases, the Department will also seek to ensure better responses to the problems at issue by the more appropriate levels and branches of government. We have already begun that process in the case of busing and quotas, both of which have largely failed as judicial remedies.

Thus far, I have discussed some of those things that the Department of Justice will do to further the goals of this Administration. Through legislation and litigation, we will attempt to effect the goals I have outlined. There are, however, some things that we cannot—and will not—do.

Throughout my remarks today, I have emphasized the importance of judicial restraint to the constitutional principle of separation of powers. The Constitution confides certain powers in the Legislative Branch and not in the Judicial Branch. In a similar fashion, the Constitution delineates the proper domain of the Executive and Legislative functions. The Constitution directs the President to ensure the faithful execution of the laws, which forms the basis of the Attorney General's litigating authority for the government as a whole. That constitutional command also requires the Executive branch to defend measures duly enacted by the Congress—even those with which the Administration does not agree.

Statutes with which we disagree are nevertheless the law of the land. As such, they must be defended against attack in the courts. They must also be fully enforced by the Executive Branch when their validity and meaning are clear. Some have suggested that this Administration intends to do less. Others have suggested that this Administration should do less.

In fact, the Department of Justice intends to do exactly what the Constitution requires—to enforce the laws duly and constitutionally enacted by the Congress. If we were to do less, we would ourselves be guilty of the same kind of transgressions that I have pledged we would combat on the part of the Judiciary. Under the Constitution, the Executive cannot unilaterally alter the clear enactments of Congress any more than the courts can. When it disagrees with a law, the Executive Branch can urge and support changes by the Congress. In the case of laws that are clearly and indefensibly unconstitutional, the Executive can refuse to enforce them and urge invalidation by the Courts. When reasonable defenses are available, we will defend a statute that does not intrude upon the powers of the Executive Branch. That is our responsibility under the Constitution irrespective of our views on substantive policy.

In the case of ambiguous laws, the Executive can in good faith urge and pursue those interpretations that seem most consistent with the intentions of the Congress, the policies of the Administration, and the other laws of the land. The Executive can do all of these things, but it can constitutionally do no more. No one should doubt that this Administration's adherence to the Constitutional principle of separation of powers will exact from us the same degree of obedience and moderation that we will urge upon the courts.

There is an old story about James Russell Lowell when he was the American Ambassador to the Court of St. James during the late nineteenth century. The French Ambassador of the time—who was himself a historian as well as a diplomat—approached Lowell with a question:

"Mr. Ambassador, how long will the American republic endure?"

The American Ambassador replied:

"As long as the ideals of its leaders reflect the ideals of the Nation's Founding Fathers."

This Administration intends to use every resource at its disposal to ensure that this government reflects the ideals of the Founding Fathers. Those principles have long enabled our Nation both to endure and to prosper. In the furtherance of those principles, however, we will not ourselves seek short-term successes at the expense of basic principles. We will demand of ourselves that same adherence to sound constitutional principles that we intend to demand of the other branches of government.

MEMORIAL COUNCILS AND THE NEED TO PREVENT GENOCIDE

Mr. PROXMIRE. Mr. President, on October 26, 1981, the Department of State served as host for the International Liberators Conference of the U.S. Holocaust Memorial Council. The Council is a nonpolitical organization created by President Carter, and enacted into law by a unanimous vote of both the House of Representatives and the Senate of the United States.

Its purpose is to make our citizens—and people everywhere—aware of the unspeakable crimes perpetrated systematically, and officially, against the Jewish people and humanity during World War II. Let me quote the chairman of the Council, the Honorable Elie Weisel, as to its purpose:

Our activities are manifold in nature and scope. The International Relations Committee, which coordinated this conference, is but one of the committees functioning within the Council. Another committee is in charge of gathering pertinent archives; another is preparing educational programs for elementary and secondary schools and universities. There is a committee to prepare the Annual Remembrance Day ceremonies, another to plan the museum, and yet another is engaged in raising funds to finance all these activities.

What we all have in common is an obsession not to betray the dead we have left behind or who left us behind. They were killed once; they must not be killed again through forgetfulness.

Mr. President, we have here a Council, created by the President of the United States, which serves as a reminder of man's inhumanity to his brothers and charges us never to forget this unprecedented crime against mankind. The holocaust is clearly one of mankind's blackest deeds, and the act of bringing together the liberators and the survivors, to remember and to remind, is one of great humanitarian value.

My question and challenge to the Senate is this, Mr. President: Will future Presidents need to create Memorial Councils for groups such as the Ugandans, Armenians, Cambodians, East Timors and other groups, yet to be named?

Would any of these groups have been spared their agonies if the Genocide Convention had been universally ratified?

Some would say no. I say even if all of these inhuman acts are not officially declared genocide, a united international voice against genocide would be a deterrent to such cruel acts in the future.

The ratification of the Genocide Convention would serve mankind well if it reduced even by one the need for future Memorial Councils.

I urge my colleagues to act, and ratify this treaty.

DEFERRAL OF CERTAIN BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT—PM 91

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which, pursuant to the order of January 30, 1975, was referred jointly to the Committee on Appropriations, the Committee on the Budget, and the Committee on Energy and Natural Resources:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report one deferral of $108 thousand in fiscal year 1982 funds.

This action is taken to restrain spending of funds made available by the Continuing Resolution, P.L. 97-51.

The deferral contained in this message is for the Department of Interior's Historic Preservation Fund.

The details of the deferral are contained in the attached report.

RONALD REAGAN.

THE WHITE HOUSE, *November 13, 1981.*

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2221. A communication from the Secretary of Agriculture transmitting, pursuant to law, a proposal for a national soil and water resource conservation program; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2222. A communication from the Administrator of the Environmental Protection Agency transmitting, pursuant to law, a plan for ground-water research and for the use of the results of such research; to the Committee on Environment and Public Works.

EC-2223. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Civil Service Reform After Two Years: Some Initial Problems Resolved But Serious Concerns Remain"; to the Committee on Governmental Affairs.

EC-2224. A communication from the Executive Secretary of the Federal Reserve Employee Benefits System transmitting, pursuant to law, the annual report for the retirement plan of the employees of the Federal Reserve System; to the Committee on Governmental Affairs.

EC-2225. A communication from the Administrator of the Energy Information Administration transmitting, pursuant to law, a report on the fourth annual survey of the Nation's proved crude oil, natural gas, and natural gas liquids reserves; to the Committee on Governmental Affairs.

EC-2226. A communication from the Secretary of the Senate, transmitting, pursuant to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under the proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in his possession from April 1, 1981 through September 30, 1981; ordered to lie on the table.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-579. A resolution adopted by the House of Representatives of the State of Louisiana; to the Committee on Agriculture, Nutrition, and Foresty.

"A RESOLUTION

"Whereas, for many years the sugar industry in the United States has operated under a system of federal price supports; and

"Whereas, the federal price supports have helped to stabilize the sugar market; and

"Whereas, a significant percentage of the farmers in Louisiana plant sugarcane and depend upon a stable sugar market for their livelihood; and

"Whereas, the income earned by sugarcane farmers contributes significantly to the economic well-being of this state; and

"Whereas, in recent months certain elements in the Congress have attempted to destroy the sugar price support system; and

"Whereas, the destruction of the sugar price support system would produce grave economic consequences to the sugarcane farmers and to the overall economic health of this state.

"Therefore, be it resolved by the House of Representatives of the Legislature of the State of Louisiana, That the United States Congress is hereby memorialized to take such actions as are necessary to preserve and strengthen the federal price support system for sugar.

"Be it further resolved, That a copy of this Resolution shall be transmitted without delay to the presiding officers of each house of the United States Congress and to each member of the Louisiana Delegation in Congress."

POM-580. A resolution adopted by the Southern Governor's Association, relative to the Mediterranean Fruit Fly; to the Committee on Agriculture, Nutrition, and Forestry.

POM-581. A petition from a citizen of Brattleboro, Vermont, urging congressional cooperation with President Reagan's efforts to strengthen the military; to the Committee on Armed Services.

POM-582. A resolution adopted by the Southern Governor's Association, relative to cost recovery for ports maintenance; to the Committee on Commerce, Science, and Transportation.

POM-583. A resolution adopted by the Texas and Southwestern Cattle Raisers Association, supporting Secretary James Watt for his management of public lands; to the Committee on Energy and Natural Resources.

POM-584. A resolution adopted by the Southern Governor's Association, relative to the United States Synthetic Fuels Corporation; to the Committee on Energy and Natural Resources.

POM-585. A resolution adopted by the Southern Governor's Association, relative to low-level radioactive waste management; to the Committee on Environment and Public Works.

POM-586. A resolution adopted by the Southern Governor's Association, relative to Clear Air Act Amendments; to the Committee on Environment and Public Works.

POM-587. A resolution adopted by the Southern Governor's Association, relative to forestry in the South; to the Committee on Finance.

POM-588. A resolution adopted by the Southern Governor's Association, relative to industrial development bonds; to the Committee on Finance.

POM-589. A resolution adopted by the Southern Governor's Association, relative to medicaid; to the Committee on Finance.

POM-590. A petition from a citizen of Milwaukee, Wisconsin, urging an end to deficit spending and wasteful government spending; to the Committee on Finance.

POM-591. A resolution adopted by the Southern Governor's Association, relative to State severance taxes; to the Committee on Governmental Affairs.

POM-592. A resolution adopted by the Southern Governor's Association, relative to Federal regulation of State and local pension systems; to the Committee on Governmental Affairs.

POM-593. A resolution adopted by the Southern Governor's Association, relative to limiting the number of refugees admitted to the United States to a number which can be supported by the Federal funds available; to the Committee on the Judiciary.

POM-594. A petition from a citizen of Lawrence, Kansas, relative to abortion; to the Committee on the Judiciary.

POM-595. A petition from a citizen of Palo, Iowa, supporting the Davis-Bacon Act; to the Committee on Labor and Human Resources.

POM-596. A petition from a citizen of Hunlock Creek, Pennsylvania, relative to outlawing monopoly bargaining in the Federal service; to the Committee on Labor and Human Resources.

POM-597. A petition from a citizen of San Mateo, California, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-598. A petition from a citizen of Santa Barbara, California, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-599. A petition from a citizen of Chillicothe, Ohio, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-600. A petition from a citizen of Presque Isle, Maine, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-601. A petition from a citizen of Tampa, Florida, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-602. A petition from a citizen of Clearwater, Florida, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-603. A petition from a citizen of New York, New York, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-604. A petition from a citizen of Muleshoe, Texas, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-605. A petition from a citizen of West Newton, Massachusetts, relative to union violence in America; to the Committee on Labor and Human Resources.

POM-606. A resolution adopted by the Southern Governor's Association, relative to Federal fiscal impact notes; to the Committee on Rules and Administration.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

Kenneth L. Adelman, of Virginia, to be a representative of the United States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate;

John Sherman Cooper, of Kentucky, to be a representative of the United States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate;

BENJAMIN A. GILMAN, U.S. Representative from the State of New York, to be a representative of the United States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate;

ANDY IRELAND, U.S. Representative from the State of Florida, to be a representative of the United States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate;

Jeane J. Kirkpatrick, of Maryland, to be a representative of the United States to the 36th session of the General Assembly of the United Nations, to which office she was appointed during the last recess of the Senate;

Bruce F. Caputo, of New York, to be an alternate representative of the United States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate;

George Christopher, of California, to be an alternate representative of the United States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate;

Charles M. Lichenstein, of the District of Columbia, to be an alternate representative of the United States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate;

William Courtney Sherman, of Virginia, to be an alternate representative of the United

States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate; and

Jose S. Sorzano, of Virginia, to be an alternate representative of the United States to the 36th session of the General Assembly of the United Nations, to which office he was appointed during the last recess of the Senate.

(The above nominations were reported from the Committee on Foreign Relations, with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BENTSEN:

S.J. Res. 128. A joint resolution designating the fourth Sunday in October as "National Mother-in-Law Day."; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BENTSEN:

S.J. Res. 128. Joint resolution designating the fourth Sunday in October as "National Mother-in-Law Day"; to the Committee on the Judiciary.

NATIONAL MOTHER-IN-LAW DAY

● Mr. BENTSEN. Mr. President, I am today introducing a Senate companion to House Joint Resolution 311, declaring a national Mother-in-Law Day. One of my reasons for introducing this resolution is that too often in the Senate we rush to pass legislation without remembering to mention the originators of the ideas we so diligently pursue. No, I am not going to try to claim credit for Mother-in-Law Day, but I do want to give credit where credit is due.

Gene Howe, a free-wheeling Amarillo, Tex. newspaperman entertained and amused the people of the Texas Panhandle for nearly three decades. His column "Tactless Texan," written under the pen name Erasmus Rookus Tack, was the most widely read, by actual count, of any in west Texas. Jack Alexander explained his style in the January 1, 1944, edition of the Saturday Evening Post:

> Publisher Howe's favorite stunt is to stir up a nice, human rumpus in his Tactless Texan column and then hide out at his ranch until the storm blows over.

One of those "nice, human rumpuses" he stirred up was Mother-in-Law Day. He wanted to show his "lasting affection for the wonderful lady" who shared his family, so he announced his intention to have a Mother-in-Law Day of his own. But being a newspaperman, he had trouble keeping it a private affair, and soon the Nellie Donald Mother-in-Law Club was formed.

So on March 5, 1934, the first Mother-in-Law Day was held in Amarillo. The date was convenient because the cattlemen's convention would be in town and there would be plenty of escorts to take the women to the movie that was planned as entertainment. But when 5,000 women appeared from five States to receive corsages provided by the publisher and free movie tickets, there were certainly not enough escorts.

The event was acclaimed by State Governors, Will Rogers, Arthur Brisbane, and the London Times. The cities of Atlanta, Cincinnati, and Seattle were soon holding similar celebrations.

In 1937 the club went national, and in 1938 First Lady Eleanor Roosevelt was the guest speaker. Governors from Texas, Oklahoma, New Mexico, and Kansas all attended, with their mothers-in-law. The parade was the longest ever staged in the Southwest.

Mr. President, it is our duty, as we consider making Mother-in-Law Day a national celebration, that we also honor the memory of Gene A. Howe, newspaper publisher, editor, television and radio pioneer. Howe held forth from page 2, column 1 of the Amarillo Globe-Times from 1924 to 1952. He was a master promoter, and his ingenius schemes often brought him national attention. Throughout his career he showed that a newspaper can operate with compassion, never sacrificing people for the story, and still show a profit. He built a communications empire on his philosophy that "A newspaper may be forgiven for lack of wisdom but never for lack of courage."

Mr. President, I want to close with the tribute to mothers-in-law written by Gene Howe on March 5, 1934:

> It takes a real woman, a woman with a heart and head and wisdom to see that her children are married right and then their home fires are kept burning and that the children that come along are brought up properly and given a chance. A mother-in-law is a mother who has made good.

I ask that the resolution be appropriately referred and that the committee considering it report the measure expeditiously.●

ADDITIONAL COSPONSORS

S. 1651

At the request of Mr. BENTSEN, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 1651, a bill to combat international terrorism.

S. 1701

At the request of Mrs. HAWKINS, the Senator from Arizona (Mr. DECONCINI), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Nebraska (Mr. EXON), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Michigan (Mr. LEVIN), the Senator from Maryland (Mr. MATHIAS), the Senator from Oklahoma (Mr. NICKLES), the Senator from Mississippi (Mr. STENNIS), and the Senator from Minnesota (Mr. BOSCHWITZ) were added as cosponsors of S. 1701, a bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children and other specified individuals.

S. 1808

At the request of Mr. PACKWOOD, the Senator from Hawaii (Mr. INOUYE), and the Senator from Wisconsin (Mr. KASTEN) were added as cosponsors of S. 1808, a bill to authorize an Under Secretary of Commerce for Economic Affairs.

SENATE RESOLUTION 238

At the request of Mr. BENTSEN, the Senator from Arkansas (Mr. PRYOR), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of Senate Resolution 238, a resolution to retain the deductability from personal taxes of interest paid on residential mortgages.

UP AMENDMENT NO. 609

At the request of Mrs. HAWKINS, the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of UP amendment No. 609 proposed to H.R. 4169, a bill making appropriations for the Department of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENTS SUBMITTED FOR PRINTING

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND RELATED AGENCIES APPROPRIATION ACT, 1982

AMENDMENT NO. 630

(Ordered to be printed and to lie on the table.)

Mr. WEICKER (for himself, Mr. STAFFORD, Mr. EAGLETON, Mr. LEAHY, Mr. HEINZ, Mr. RIEGLE, Mr. KENNEDY, Mr. BRADLEY, Mr. LEVIN, Mr. TSONGAS, and Mr. PELL) submitted an amendment intended to be proposed by them to the bill (H.R. 4560) making appropriations for the Departments of Labor, Health, and Human Services, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENT NO. 631

(Ordered to be printed and to lie on the table.)

Mr. WEICKER (for himself, Mr. STAFFORD, Mr. HATCH, Mr. RIEGLE, Mr. KENNEDY, Mr. FORD, Mr. LEVIN, Mr. CRANSTON, Mr. BAUCUS, Mr. RANDOLPH, Mr. WILLIAMS, Mr. JACKSON, and Mr. STENNIS) submitted an amendment intended to be proposed by them to the bill H.R. 4560, supra.

AMENDMENT NO. 632

(Ordered to be printed and to lie on the table.)

Mr. WEICKER (for himself, Mr. STAFFORD, Mr. HATCH, Mr. RIEGLE, Mr. KENNEDY, Mr. FORD, Mr. CRANSTON, Mr. BAUCUS, Mr. LEVIN, Mr. RANDOLPH, Mr. WILLIAMS, and Mr. JACKSON) submitted an amendment intended to be proposed by them to the bill H.R. 4560, supra.

AMENDMENTS RELATED TO CERTAIN GRANT AND ASSISTANCE PROGRAMS

Mr. WEICKER. Mr. President, I ask unanimous consent that these amendments be included in the CONGRESSIONAL RECORD at the appropriate point and that these amendments be printed.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

On page 36, line 10, strike out "1,650,000,000." and insert in lieu thereof "$1,850,000,000.".

On page 52, line 5, beginning with "$947,094,000" strike out through "$8,549,000" in line 6 and insert in lieu thereof "$991,845,000, of which $892,865,538 shall be for allotments under section 100 (b) (1), $6,134,462".

On page 51, line 21, strike out "$900,000,000" and insert in lieu thereof "$969,800,000".

NOTICES OF HEARINGS

SUBCOMMITTEE ON PRODUCTIVITY AND COMPETITION

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public that the Subcommittee on Productivity and Competition of the Senate Small Business Committee will hold a hearing on Tuesday, December 1, 1981, at 9:30 a.m., in room 424 of the Russell Senate Office Building.

The purpose of the hearing will be to examine "Federal Antitrust Policy: Implications for Small Business."

For additional information, contact Brian Hartman of the committee staff at 224–5175.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public that the nomination of Janet J. McCoy, of Oregon, to be High Commissioner of the Trust Territory of the Pacific Islands, has been added to the agenda of the full committee hearing scheduled for Thursday, November 19, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Gary Ellsworth of the committee staff at 224–7146.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. COHEN. Mr. President, I wish to announce that the Subcommittee on Oversight of Government Management, of which I am chairman, will conduct a hearing on United States-Canadian trade policies and their impact on border State industries on Tuesday, November 17, at 9 a.m., in room 6226 of the Dirksen Senate Office Building.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be authorized to hold a full committee hearing during the session of the Senate at 9:30 a.m. on Friday, November 13, to discuss S. 864, the Financial Integrity Act.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be authorized to hold a full committee hearing at 2 p.m. tomorrow, Friday, November 13, to discuss these nominations:

Lawrence W. Pierce, of New York, to be circuit judge for the second circuit court of appeals.

Clarence A. Beam, of Nebraska, to be U.S. district judge for the district of Nebraska.

Emmett R. Cox, of Alabama, to be U.S. district judge for the southern district of Alabama.

Cynthia Holcomb Hall, of California, to be U.S. district judge for the central district of California.

John Bailey Jones, of South Dakota, to be U.S. district judge for the district of South Dakota.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SUBCOMMITTEE ON THE CONSTITUTION

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on the Constitution of the Committee on the Judiciary be authorized to meet during the session of the Senate on Monday, November 16, to hold a hearing on Senate Joint Resolutions 110, 117, 118, and 119, resolutions dealing with abortion.

The PRESIDENT pro tempore. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations, of the Governmental Affairs Committee, be authorized to meet during the session of the Sentae at 9:30 a.m. on Tuesday, November 17, to discuss international narcotics trafficking.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations, of the Governmental Affairs Committee, be authorized to meet during the session of the Senate at 9:30 a.m. on Wednesday, November 18, to discuss international narcotics trafficking.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations, of the Governmental Affairs Committee, be authorized to meet during the session of the Senate at 9:30 a.m. on Thursday, November 19, to discuss international narcotics trafficking.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

A TRIBUTE TO MISS CLARA SWAN

● Mr. MITCHELL. Mr. President, I would like to take this opportunity to join with the many admirers of Clara Swan in paying her a tribute today. Miss Swan retired last summer from a 47-year career as an educator, coach, and administrator. She is a former vice president of Husson College, vice president of Plus-Gray School of Business and president of Casco Bay College.

A testimonial dinner will be held in her honor tomorrow evening in Portland, sponsored by the Business Education Association of Maine. In appreciation for her distinguished service, I ask to have printed in the RECORD an article from the Bangor, Maine, Daily News, which highlights her career.

The article follows:

PORTLAND TESTIMONIAL TO HONOR EDUCATOR

(By Wayne Reilly)

HAMPDEN.—Clara Swan was already an institution in business education when she left Husson College in 1973, after differences with the administration, to become vice president of Plus-Gray School of Business.

Unaware that the Portland junior college was nearly bankrupt, she later rejected an offer to become Husson's interim president with the support of petitions containing the names of more than 1,000 people.

In 1975 at the age of 63, the former Husson vice president and two colleagues bought the bankrupt college, and she became the first president of reorganized Casco Bay College.

The rest is a success story, a cap on a successful career in education and athletics for which Swan, who retired last summer, will be honored by the Business Education Association of Maine Saturday at a testimonial dinner in Portland. Her career in teaching, coaching and administration has spanned 47 years in classrooms from Dover-Foxcroft to Portland.

Swan, Priscilla Clark, a former Husson vice president, and Thelma Watson, a former head of the Husson business education program, added a night school program which attracted students to Casco Bay College. They regained the college's accreditation and restored its solvency. Last year, the institution enrolled more than 300 students and employed six full-time and 12 part-time teachers.

Swan's connection with Husson College dates back to 1933 when she received an associate's degree from the Maine School of Commerce, now Husson. After teaching and coaching for a few years at Mexico High School and Foxcroft Academy, and after getting a bachelor's degree from American international College, she began an association with Husson which lasted 34 years. She also picked up a master's degree from the University of Maine.

Swan is proud of the fact that during all those years as an administrator and later as president of Casco Bay College, she remained a part-time teacher.

"Teaching was more important to me than administration. I just fell into administration because I happened to be in the right place at the right time," she said during an interview at her home in Hampden.

Swan also made her mark as a basketball coach. In recognition of her 19 years as a Husson coach and other contributions to athletics, she became the third woman to join the Bangor Daily News Sports Hall of Fame in 1961. At Husson, she produced a record of 241 wins, 34 losses and seven ties.

Swan said she had never seen a basketball when she came to Brewer from Princeton as a high school sophomore. School officials wouldn't let her join the baseball team, so she decided to join the girls' basketball team instead.

Swan, who has an honorary doctorate from Fort Lauderdale College, was called "Miss Business Education of Maine" in 1971 when she received a distinguished service award from the University of Maine at Orono.

Her citation read, "In her 30 years at Husson, she has never forgotten that a student is an individual. Thousands of graduates of Husson feel a debt of gratitude to Clara Swan and recognize that part of their accomplishments are due to her teachings, her sense of organization and her administrative skill."●

JOHN RAKER: A DEDICATED AMERICAN

● Mr. HELMS. Mr. President, next Saturday in Lexington, N.C., a special, well-deserved tribute will be paid to a splendid citizen of my State, John Raker of Lexington. John Raker is a truly remarkable human being and a treasured friend.

Mr. President, I have known John Raker for many years. He is an outstanding American, Mr. President, with total dedication to God, to family, and to country.

John Raker never sacrifices principle for pragmatism; he never hesitates to choose the difficult course when it is the right course.

In addition to a successful career as a businessman, John Raker has quietly compiled a remarkable record of distinguished service to his community. He has never sought acclaim or recognition; he is instinctively a kind, generous, and compassionate man.

He is a Civitan, and he holds membership in the Royal Order of Redmen, the Oasis Shrine, the Scottish Rite Masons, and the Junior Order. His service in each organization has been marked by the same pattern of loyal and faithful particiaption.

John Raker has been active in politics for many years. He has attended every State and county GOP convention since 1920, a truly remarkable record.

Mr. President, John Raker has often declared that the smartest thing he ever did, at age 28, was when he persuaded Mable Bernice Ward to become his bride in 1924. Mrs. Raker was killed in a tragic automobile accident about a year ago. It has therefore been a sad, traumatic year for John Raker, but he has weathered it because his love for others has been reciprocated by those who love him.

Mr. President, I am so pleased that a public tribute will be paid to my dear friend, John Raker, a week from tomorrow. I wish I could be there; and, in spirit, I will be there—in a spirit of genuine admiration and days affection for one of nature's nobleman.●

PONZI MARCHES ON

● Mr. ARMSTRONG. Mr. President, the Denver Post just published what I believe is the best editorial yet written about efforts to save social security from almost certain bankruptcy.

The editorial, "Ponzi Marches On," is superb. It expresses so well what is on the hearts and minds of hundreds of Coloradans I have talked to: Save social security; do not let it become a football lobbed back and forth for political gain. Social security is the financial lifeline for 35 million Americans. It is foolish, as is wisely explained, to buy political popularity at the risk of social security's ultimate bankruptcy."

I urge my colleagues to spend a minute or two to read this insightful editorial. I ask that it be printed in the RECORD.

The editorial follows:

PONZI MARCHES ON

Millions of Americans inched closer to financial insecurity Wednesday when the House Ways and Means Committee refused to reform the U.S. Social Security System. Pressured by House Speaker Tip O'Neill, the Democratic majority voted to continue the present "Ponzi scheme" which buys political popularity at the risk of ultimate bankruptcy.

A Ponzi scheme is a sort of chain letter. A swindler named Ponzi once borrowed money and secretly used the borrowed capital itself to pay the lenders extravagant dividends. The purpose was to lure still more victims. Eventually Ponzi skipped town, leaving a few early investors with windfall gains and a massive number of destitute latecomers. The theory has lived on in such ploys as Glenn W. Turner's "Dare to be Great" pyramid sales scheme—and Social Security.

Of course, Social Security doesn't share Ponzi's dastardly *motive*. It was born with the noble goal of providing a financial floor under older Americans. But the method of financing *is* similar to Ponzi's—and subject to the same mathematical laws that eventually undermine all chain letters.

Political demagogues pretend the system is like a private pension plan, with retirees drawing benefits from trust established from their contributions. That isn't true. People pay in, all right, but that money isn't invested. Except for a relatively small reserve, it is paid out as fast as it comes in. Lately, outflow has been faster than income.

In 1938, an entire generation began to draw Social Security despite having paid in little or nothing. Each generation after that initial one has paid taxes to support the retirees ahead of it—counting on those born still later to keep the chain intact. That system worked well enough in the beginning because average life expectancy was about nine years less than today. At the start, there were about nine workers for every retiree, a light burden.

Today, longer life expectancies and lower births rates have dropped the ratio of active workers to retirees to 4–1. When the post-World War II "baby boom" reaches retirement age around the year 2010, there will only be two workers for each retiree. Then, the present system must either tax the next generation mercilessly—or go belly up. Even today, the Social Security tax is stiff—higher than income tax for many—and programmed to go higher.

There is a simple way to stave off Social Security bankruptcy—raise the retirement age to 68.

Because the underlying problem is long-term, that change could be phased in gradually so that people nearing retirement now don't have to upset long-laid plans. Raising the age for full benefits increases the number of active workers paying in while reducing the amount of benefits paid out. It also ensures that retirees can receive a decent sum.

Americans aren't "washed up" at 65—they're not only living longer, those extra years are healthier as well. That fact was recognized recently when Congress outlawed mandatory retirement at age 65. It's time to extend the same realism to Social Security.

The plan defeated Wednesday was a bipartisan effort drafted by Social Security subcommittee chairman J. J. Pickle, D-Texas, and senior Republican Barber Conable, R-N.Y. It would have ensured the system's future solvency in a number of ways including raising the basic retirement age. On O'Neill's orders, the plan was killed on a largely party-line vote of 18–14.

But, while Democrats may relish posing in the next election as the champion of Social Security benefits, the fact is that O'Neill's tactic undermined the financial security of every working American. Even those people drawing on the system now must wonder whether they can live out their days before the Ponzi scheme collapses under their feet.●

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, if the distinguished Senator from West Virginia is prepared to consider certain items, I shall ask that the Chair lay certain messages before the Senate.

MEMBERSHIP OF UNITED STATES HOLOCAUST COUNCIL

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1672.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1672) entitled "An Act to expand the membership of the United States Holocaust Memorial Council from sixty to sixty-five and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That the Act entitled "An Act to establish the United States Holocaust Memorial Council", approved October 7, 1980 (94 Stat. 1547; Public Law 96–388), is amended—

(1) in subsection (a) of section 2 by striking out "sixty" both times it appears and inserting in lieu thereof "sixty-five";

(2) in subsection (b) of section 2—

(A) by striking out "the initial" in the first sentence;

(B) by striking out all matter in the second sentence preceding "shall serve" and inserting in lieu thereof "All noncongressional voting members designated under the preceding sentence";

(C) in paragraph (1), by striking out "initial" and inserting in lieu thereof "such noncongressional voting";

(D) in paragraph (2), by striking out "ten of such initial" and inserting in lieu thereof "eleven of such noncongressional voting";

(E) in paragraph (3) by striking out "ten other initial" and inserting in lieu thereof "eleven other such noncongressional voting"; and

(F) by striking out the sentence following paragraph (3);

(3) in paragraph (1) of subsection (c) of section 2, by striking out "with respect to the initial members of the Council"; and

(4) by striking out subsection (b) of section 5 and substituting the following:

"(b) The Executive Director shall have authority to—

"(1) appoint employees in the competitive service subject to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification and general schedule pay rates; and

"(2) appoint and fix the compensation (at a rate not to exceed the maximum rate of basic pay payable for GS–18 of the General Schedule) of up to three employees notwithstanding any other provision of law.".

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR DEPARTMENT OF STATE, INTERNATIONAL COMMUNICATION AGENCY, AND THE BOARD FOR INTERNATIONAL BROADCASTING

Mr. STEVENS. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 1193.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1193) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes, (The amendment of the House is printed in the RECORD of October 29, 1981 beginning at page 26063.)

Mr. STEVENS. Mr. President, I move that the Senate disagree with the House amendment, agree to a conference requested by the House of Representatives and the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. LUGAR) appointed Mr. PERCY, Mr. HELMS, Mr. HAYAKAWA, Mr. LUGAR, Mr. PELL, Mr. BIDEN, and Mr. GLENN; Mr. MATHIAS as an additional conferee solely for the consideration of section 120 (a) through (e) of the House amendment; and Mr. CRANSTON in lieu of Mr. BIDEN as an additional conferee solely for consideration of title VI of the bill as passed by the Senate, as conferees on the part of the Senate.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering the nomination on page 3, Calendar No. 477.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

FEDERAL EMERGENCY MANAGEMENT AGENCY

The legislative clerk will read the nomination of Jeffrey S. Bragg, of Ohio, to be Federal Insurance Administrator.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, is there an order for convening on Monday?

The PRESIDING OFFICER. There is an order to convene at 11 a.m. on Monday.

ORDER FOR THE RECOGNITION OF SENATOR ROBERT C. BYRD ON MONDAY

Mr. STEVENS. Mr. President, in addition to those special orders that are already entered, I ask unanimous consent that the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD) be accorded a 15-minute special order in regular order on Monday morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, is there anything further to come before the Senate?

RECESS UNTIL MONDAY, NOVEMBER 16, 1981, AT 11 A.M.

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 11 a.m. on Monday.

The motion was agreed to; and at 3:47 p.m. the Senate recessed until Monday, November 16, 1981, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate November 13, 1981:

THE JUDICIARY

Clyde H. Hamilton, of South Carolina, to be U.S. district judge for the district of South Carolina vice Robert F. Chapman, elevated.

CONFIRMATION

Executive nominations confirmed by the Senate November 13, 1981:

FEDERAL EMERGENCY MANAGEMENT AGENCY

Jeffrey S. Bragg, of Ohio, to be Federal Insurance Administrator, Federal Emergency Management Agency.

HOUSE OF REPRESENTATIVES—*Friday, November 13, 1981*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore (Mr. DANIELSON).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
November 12, 1981.

I hereby designate the Honorable GEORGE E. DANIELSON to act as Speaker pro tempore on Friday, November 13, 1981.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O Lord, as You accept us in compassion and forgive us by Your grace, so teach us to touch those about us with a spirit of generosity and fairness. Though disagreements and conflicts separate people, may we remember that You have created us as one people and we share the heritage of our common birth. Help us to pray and work together so that we will respect those with whom we differ and unite in our resolve to do those things that make for peace and justice for all people. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 357, MAKING FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1982

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 97-329) on the resolution (H. Res. 271) providing for the consideration of the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year 1982, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST CONFERENCE REPORT ON S. 815, DEPARTMENT OF DEFENSE AUTHORIZATIONS ACT OF 1982

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 97-328) on the resolution (H. Res. 270) waiving certain points of order against the conference report on the bill (S. 815) to authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development test, and evaluation for the Armed Forces, to authorize appropriations for fiscal year 1982 for operations and maintenance expenses of the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for fiscal year 1982 for civil defense, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 349, AUTHORIZING PARTICIPATION OF UNITED STATES IN IMPLEMENTATION OF TREATY OF PEACE BETWEEN EGYPT AND ISRAEL

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 97-330) on the resolution (H. Res. 272) providing for the consideration of the joint resolution (H.J. Res. 349) to authorize the participation of the United States in a multinational force and observers to implement the Treaty of Peace between Egypt and Israel, which was referred to the House Calendar and ordered to be printed.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 4209, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATION, 1982

Mr. BENJAMIN. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

MISINTERPRETATION OF COMMISSARY FUNDING

(Mr. DAN DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks).

Mr. DAN DANIEL. Mr. Speaker, I would like to draw the attention of my colleagues to an article written by George C. Wilson which appeared on page 1 in the Washington Post of Tuesday, November 10. This article, which described actions taken by the Senate Appropriations Subcommittee on Defense, on the fiscal year 1982 Department of Defense appropriation, plus information obtained explaining the subcommittee markup, shows it is mixing apples and oranges and proceeding on incorrect assumptions.

The subcommittee markup points out that all military commissaries and exchanges sell cigarettes for about $2 per carton below the civilian market price. They believe that by increasing the selling price of cigarettes by $2 a carton, an additional $96 million in revenues would be realized and could be used to reduce the operations and maintenance (O. & M.) appropriation by that amount.

Statutory requirements governing the operation of military commissaries, sections 4621, 9621, and 7601 of title 10, United States Code, prescribe pricing of resale merchandise or goods and method of funding. Merchandise or goods are to be sold at invoice price—that is, at cost plus a surcharge fee.

Commissary operating funds are derived from three sources: namely, direct congressional O. & M. appropriations, stock funds, and surcharge trust funds. The annual O. & M. appropriation is used to pay civilian salaries and wages and for the transportation of American products and goods to overseas stores.

Stock revolving funds, the initial working capital, are used to finance the purchase of resale merchandise. The revolving fund is replenished as goods are sold. Surcharge trust funds are used for the construction and renovation of facilities, purchase of equip-

ment, and certain expenses such as utilities and supplies. Surcharge funds are realized at the point of sale by adding 4 percent to the entire amount purchased by the patron. Thus, both the stock revolving fund and surcharge fund expenditures are earmarked for specific operating purposes.

The $96 million proposed reduction in O. & M. funds by the Senate subcommittee does not meet statutory requirements, commissary operations, and methods of specific funding. Since merchandise must be sold at cost, only the surcharge can be increased. Any additional revenue generated must be deposited in the trust fund and cannot be used to offset reductions in the O. & M. appropriations account. Thus, commissary operations would be directly reduced by $96 million, and could not be offset of any increase in surcharge funds. This, in effect, reduces the amount appropriated for civilian salaries and the transportation of goods overseas. The result can only mean the closing of commissary stores, a reduction in operating hours, and fewer goods available to our overseas forces.

The report assumes that commissaries and exchanges price cigarettes in the same manner. This is incorrect. Exchanges purchase cigarettes and all other merchandise with funds not appropriated by Congress. In the case of cigarettes, they are marked up 34 percent above cost and are generally priced to sell only 25 to 60 cents per carton below commercial prices. Any sizable increase beyond this amount would make them higher than those sold in civilian stores. The loss of sales would mean fewer profits and fewer funds available for morale, welfare, and recreation activities. Exchange profits or nonappropriated dollars are used to fund recreation activities which are not supported with taxpayer dollars.

STOCKMAN MUST GO

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, the Director of the Office of Management and Budget has outlived his usefulness, and for the good of the country, he ought to go, and leave his task to someone who has credibility.

I said last June 16 that Stockman had turned the Office of Managment and Budget into a fib factory. Now, in the interviews he granted to the Atlantic Monthly, his lies, his cynicism are laid out for one and all to see.

When the OMB economic model predicted—accurately—what the Reagan program would do to the Federal deficit, Stockman had as easy answer: change the computer program until it came out to match his own ideas. When the Senate Republicans said they did not think the Reagan program would work, Stockman told them to have faith, that the "magic asterisk" gimmick would cover all doubts.

Stockman knew that the Reagan program was intended to take from the poor and give to the rich. In private, he called the Kemp tax bill a Trojan horse to give the appearance of tax relief to ordinary citizens, even as the vast bulk of its benefits went to the well off and, most of all, to the wealthy.

Those of us who studied the budget carefully knew all this. I, at least, called the budget and tax programs what they were—a rich man's war, a poor man's fight, in a statement I made here to the House on March 19. I asked then the precise questions that Stockman himself was asking privately—how could the Reagan program overcome its internal inconsistencies, and how could Americans fail to see its overwhelming unfairness?

Stockman hid the failings, deceived everyone about his own misgivings, changed the numbers to make his schemes workable—for to him, the only thing that counted was winning, not to create a program that would necessarily make economic sense, let alone one that would be fair to the people of this country.

If David Stockman were a principled man, he would have expressed his doubts openly. He would have refused to change data to cover up the realities of the Reagan budget. He would have insisted that the questions be resolved. He did not one of those things. He lied, he rationalized his own doubts—and now that the original doubts he had are so clearly revealed as being right, he says to us, "Have faith." Faith in what? How can we have faith in a fib factory—for that is what Mr. Stockman has been all along, a fib factory.

REAGAN TAX BILL SHOULD BE CALLED FAT TRANSPLANT ACT OF 1981

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, I received a letter from a 92-year-old woman in North Dakota last week and she summarized very well the frustrations about economic policy in this country. She said, "It looks to me like the rich run the country and the rest of us pay the bills."

To illustrate her point, I read in the paper this morning that the provision in this year's tax bill enabling corporations to buy and sell their tax breaks may cost the Treasury $6 billion this year.

That is one of the most outrageous giveaways that has ever been written into the American Tax Code. It is exactly what the lady had in mind about who pays the bills.

President Reagan came to Washington with a good idea—to put the public sector on a diet—to cut out the fat. But he created tax laws that transfer the fat to the private sector.

The recent tax bill is a perfect example. It should be called the Fat Transplant Act of 1981. It encourages corporations to engage in the same kind of paper shuffling, the same kind of bloated bureaucratic empire building, of which the President has rightly criticized the Federal Government. Either way the citizens of this country pay for it.

We need to get back to basics, and our tax laws are a good place to start.

Today too many American executives are huddled in corners trading tax gimmicks and loopholes that have been handed to them by this administration while this country continues to lose ground in international trade.

We have developed a tax system which encourages corporate executives to draw their profits from tax loopholes rather than from the marketplace, and it is all wrong.

It seems to me that corporations should make their profits by making good products not by manipulating tax gimmicks. And I think that the administration should be more concerned about crafting a tax plan that taxes people and corporations in a manner that relates to their ability to pay, not their ability to avoid.

It is that simple, and the only people who refuse to see it are those who are building the trough of tax favors for the rich and those who are feeding from it.

FEDERAL SPENDING OUT OF CONTROL? PUT THE BLAME ON CONGRESS

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANNEMEYER. Mr. Speaker, there is always a tendency to want to shoot the messenger rather than believe the message, particularly when we hear something we do not want to hear.

Federal spending is still out of control. Do not blame the fact on Mr. Greider or Mr. Stockman. Put the blame where it belongs. On Congress.

We in Congress can reduce the irresponsible level of spending by the Federal Government anytime we develop the courage to do so.

Cutting marginal tax rates was the right thing for Congress to do. The tax rate cuts were evenly distributed across all income groups. These tax

cuts will create tremendous pressure to reduce spending even more in order to balance the budget.

For the better part of this year I have been urging the House to adopt further budget cuts totaling some $52 billion for fiscal year 1982. Identified are 272 items where such cuts can be made.

Those in Congress who now refuse to cut spending further will have the privilege of explaining, in the election in the fall of 1982, why they are voting to keep interest rates high and stifling economic recovery.

A NEW STEEL PLANT IN OHIO

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, bad news seems to reach us quickly while good news too often comes to our attention more slowly if, indeed, we hear it at all. I am pleased, therefore, to report an economic happening in the 16th District of Ohio which unquestionably qualifies as good news.

The Timken Co., recognized worldwide as a leading manufacturer of roller bearings and specialty steel, has announced it will construct a $500 million steel mill complex in Stark County. Depending on the project's success, the complex could more than double in size in the years ahead.

This development has excited the people of the Canton area, home of the Timken Co., and they have contributed outstanding community support. The plant will be one of the finest facilities of its type in the world.

Timken has a long-established and well-recognized reputation as a civic-minded supporter of the community.

This project will create 800 jobs with the company plus work for more than 600 construction firm employees. Hundreds of millions of dollars will be generated locally.

Officials of the United Steelworkers of America also worked diligently to bring this project about. A new contract was ratified by an overwhelming 10-to-1 majority.

Other public and private sectors within the community also rallied behind the proposal, encouraging the company to go ahead with its plan.

The Timken story, multiplied many times throughout the Nation, can turn the country around economically, and that is good news.

REAGAN ECONOMIC POLICY BENEFITS POOR AND MINORITIES

(Mr. DUNN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNN. Mr. Speaker, yesterday sitting in my office I came across a 1-minute speech that was given on the floor a couple of weeks ago by my distinguished colleague from Maryland, PARREN MITCHELL, in which he asked the question, "What has the 97th Congress done for the minorities and the poor of this country?"

He then went on in graphic detail to talk about the plight of the poor and minorities over the last 25 years, and how that really had not improved.

I happen to agree with Mr. MITCHELL that it has not improved, despite the policies that he has advocated and the Members on the other side.

As to the question, what has the 97th done, we have began to change those policies around. Even though it is only 40-some days, we have begun to come up with an economic policy that will not benefit or mostly favor the rich, but the minorities and the poor, the people that will need the jobs in this country.

THE STOCKMAN QUOTATIONS YOU DIDN'T READ ABOUT

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, we all know that dull truths rarely catch up with exciting half-truths, but I thought I would try to put in a little perspective the by now well-known Atlantic Monthly interview with OMB Director David Stockman.

We have all heard about or read the quotations in which Stockman says—or seems to be saying—something damaging about the President's economic policies. But we have not heard anything about other things he said during the lengthy Atlantic Monthly interview.

He said:

All kinds of decisions, made 5, 10, 15 years ago, are coming back to bite us unexpectedly.

We have not heard any Democrat quote that part of the interview.

Stockman said:

The Council of Economic Advisers in the preceding administration has been consistently wrong in the past.

We have not heard anyone quote these passages.

I wonder why?

CREDIBILITY AND THE VOA

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, today's Washington Post carries a front page story concerning an internal memorandum written by an administration appointee of the International Communication Agency.

This memorandum, among other things, suggests that the Voice of America should operate as a propaganda agency.

Propaganda is a word loaded with such negative connotations that it has long since ceased to be useful.

But this does not mean that VOA credibility is somehow lessened when it follows the foreign policy direction of the President.

VOA news credibility is not an end in itself, but a means toward a goal. It is a useful tool to aid the President to communicate the views of the administration around the world.

The current policy of ICA and VOA is the effective communication of U.S. policy views to persuade targeted audiences of the correctness of those views.

I cannot see what is wrong with that.

RELIGIOUS DISCRIMINATION OF SOVIET JEWRY MUST BE ENDED

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, this morning I call the attention of this body to a pressing issue, one of global proportions; an issue of tragedy, and one that is morally unjustifiable. The issue of which I speak is the continuing religious discrimination against Soviet Jews, especially in emigration, and the continued anti-Semitism that abounds in the Soviet Union today. The problem of Jewish emigration is growing rapidly, and if it continues, will lead to the effective termination of Jewish emigration completely.

Mr. Speaker, a brief look at the facts sheds light on this problem. In October of 1979, the Soviets allowed 4,746 Jews to emigrate, yet in October of 1981, they allowed just 368. The numbers speak for themselves. Overall by year, the Soviets have decreased the numbers from 51,320 in 1979 to 8,650 so far this year, with the predicted numbers for November and December keeping this figure around 10,000. It is my feelings, as well as I am sure yours also, that this august body should lodge its protest against this inexcusable action.

Yesterday I introduced two resolutions, one which calls for the President to voice the opinion of this body, as well as the country, that the religious discrimination of Soviet Jewry be ended; and the second calls for the release of one particular individual who is being persecuted, Yuli Kosharovsky.

House Concurrent Resolution 219 calls upon the Union of Soviet Socialist Republics to end the current policies of Jewish emigration descrimination and anti-Semitism. This resolu-

tion has been referred to the House Committee on Foreign Affairs.

House Resolution 269 calls upon the Union of Soviet Socialist Republics to permit the emigration of Yuli Kosharovsky and his immediate family to Israel. This legislation has also been referred to the House Committee on Foreign Affairs.

I am submitting the language of both of these bills to the House of Representatives and include them in the CONGRESSIONAL RECORD:

H. CON. RES. 219

Whereas, the government of the U.S.S.R. has decreased Jewish emigration significantly and nearly completely, and continues to maintain this form of discrimination based upon religion;

Whereas, under the current policy, the government of the U.S.S.R. has reduced the number of Jews allowed to emigrate from a high or 4,746 in October 1979, to the present figure of 368 in October 1981, the lowest amount since emigration began;

Whereas, 260,000 Jews have been allowed to emigrate in the last twelve years, over one half million Jews have filed for emigration in the same time period;

Whereas, the government of the U.S.S.R. is implementing a policy of exiling Hebrew teachers, banning Jewish education programs, and confiscating books, as well as sacred and religious articles;

Whereas, the press of the U.S.S.R. is implementing a policy of disseminating anti-Semitic propaganda to the peoples of the U.S.S.R., which is designed to hinder Jewish heritage and terminate traditional religious practices;

Whereas, within the past four months, more arrests of Soviet Jews have taken place than in the last four years, underscoring the policy of increasing discrimination, as well as the declining emigration figures, in the U.S.S.R.: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the policies of Jewish emigration discrimination and anti-Semitism are morally reprehensible, and that the President, at every opportunity and in the strongest terms, should express to the Government of the U.S.S.R. the opposition of the United States to these reprehensible policies, and that the restrictions on the emigration of Soviet Jews be removed.

H. RES. 269

Whereas Yuli Kosharovsky lost his job as a radio electronics engineer when his employers found out his wish to emigrate to Israel, forcing him to support his family by taking odd jobs since April of 1971; and

Whereas Yuli Kosharovsky is one of Moscow's leading Hebrew teachers, having a regular class of over thirty students, and, since 1975, has been teaching a seminar for unemployed engineers—unemployed only because of their desire to leave the Soviet Union for Israel; and

Whereas Yuli Kosharovsky has been threatened with imprisonment by the KGB if he continued to conduct these seminars, which he courageously has; and

Whereas Yuli Kosharovsky's wife, Inna Kosharovsky, studied Mathematics at Moscow State University, but has been unable to find a job within her field because of her wish to emigrate; and

Whereas Yuli Kosharovsky's fourteen-year-old son, Mikhail Kosharovsky, has been the constant target of bullying by his classmates, being called "dirty Jew" by them on several occasions; and

Whereas Yuli Kosharovsky and his family have been the constant target of harassment by their community; and

Whereas the situation of the Yuli Kosharovsky is becoming rapidly more severe after the recent raid on the Kosharovsky home by KGB officials, in which Yuli Kosharovsky's typewriter and teaching materials were confiscated; and

Whereas there is a significant difference between dissidents and Jewish activists in the Soviet Union, as dissidents are people who are trying to change the internal structure of the Soviet Union, whereas the Jewish activists are only trying to leave the Soviet Union; and

Whereas these rights are guaranteed to the Soviet Jews under the Soviet constitution; and

Whereas such persecution of Yuli Kosharovsky and his family is in direct violation of the commitments to freedom of thought, conscience, expression of religion, and emigration made by the Soviet Union through its adoption of and/or participation as a signatory to the United Nations International Covenant on Civil and Political Rights, the Final Act on the Conference on Security and Cooperation in Europe, the Charter of the United Nations, and the Universal Declaration of Human Rights; and

Whereas Yuli Kosharovsky and his family continue to live in the Soviet Union in constant fear of their lives: Now, therefore, be it

Resolved, That the House of Representatives hereby condemns the treatment of Yuli Kosharovsky and his immediate family by the Government of the Soviet Union.

SEC. 2. It is the sense of the House that:

(1) the President of the United States should express to the Government of the Soviet Union the deep concern and opposition of the United States with respect to the refusal to permit the emigration of Yuli Kosharovsky and his family to Israel;

(2) the Government of the Soviet Union should comply with its commitments under the United Nations International Covenant on Civil and Political Rights, the Final Act of the Conference on Security and Cooperation in Europe, the Charter of the United Nations, the Universal Declaration of Human Rights, and the Constitution of the Union of Soviet Socialist Republics, by permitting Yuli Kosharovsky, his wife, Inna, and their son, Mikhail, to emigrate to Israel; and

(3) the Government of the Soviet Union should immediately cease its persecution of individuals seeking to emigrate from the Soviet Union, and its denial on basic religious, civil and human rights to the Jews living in the Soviet Union.

SEC. 3. The Clerk of the House shall transmit copies of this resolution to the Soviet Ambassador to the United States, to the Chairman of the Presidium of the Supreme Soviet, and to Mr. Yuli Kosharovsky.

Thank you for your consideration of these resolutions, both of which are vital to the Soviet Jews, and important to all people who seek to protect fundamental human rights.

PRESIDENT SHOULD WAIVE RULES ON MEDICAID FOR EVERYBODY: HELP ALL THE KATIES OF AMERICA

(Mr. WAXMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

● Mr. WAXMAN. Mr. Speaker, the press reported this morning that the President has waived the rules so that Katie Beckett, the disabled child he talked about in his press conference on Wednesday, can go home and still get her medicaid benefits. I am delighted that Katie will be able to rejoin her family and receive the care she needs at home. I wish her and her family all the best.

But I find it offensive that it requires a personal waiver by the President of the United States to take care of the needs of this child. I am announcing today that I will introduce legislation to extend these same benefits to all the Katies of America.

I think my colleagues would be interested to know that there are 160,000 disabled children on medicaid now. While their situation might not be exactly like Katie's I am sure that 10,000 to 20,000 of them could benefit from the change the President made for Katie today.

I share the President's concern that our programs rely too heavily on institutional care. But I find it more than ironic that, while the President is reaching out to this family with great media fanfare, the President is pursuing policies that will destroy the medicaid program—making it much more difficult for low-income children to receive the medical care they need.

In the same reckless fashion, the administration's AFDC cutbacks are stripping hundreds of thousands of working poor mothers and children of their medicaid coverage making them choose between working—and losing their medicaid coverage—and welfare—with less money, but continued medicaid coverage. The loss of this protection, particularly in the prenatal care situation, can only lead to unnecessary suffering, permanent disability and retardation, and increased Government outlays.

It is tragic that the President does not see the conflict between his actions in this one special case and his savage program cuts, which will deny needed care to millions of equally deserving children and families. The special consideration that the Federal Government has shown to Katie Beckett and her family should be made available to all children and families in similar circumstances. My legislation will do that. I am asking the administration to support it and to work actively for its passage.●

DOUBLE EAGLE V

(Mr. CLAUSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLAUSEN. Mr. Speaker, last night at approximately 10:30 p.s.t. The first successful transpacific balloon flight was completed when the four crewman of *Double Eagle V* brought their balloon down in the Redwood Empire near Covelo, Round Valley, Calif.

The 400,000 cubic foot, helium-filled balloon was launched early Monday from the Japanese city of Nagashima on its historic 6,000-mile trip across the Pacific Ocean. This flight has captured the imagination of the American people. That pioneer spirit which made America great is very much alive—a pioneer spirit reminiscent of the Lindbergh flight made just over half a century ago.

As was the case with Lindbergh's *Spirit of St. Louis* the spirit of *Double Eagle V* has lifted the spirit of America at a time when it really needs an uplift. This spirit of adventure and risk-taking is the same pioneering spirit that built America.

Mr. Speaker, I believe it is appropriate that these brave balloonists' first sight of land was Cape Mendocino—the most westerly point of land in the lower 48 States. As Representative of the Second Congressional District of California and as a fellow aviator, I would like to welcome and congratulate each of the four crewmen and their families, of *Double Eagle V* for this truly momentous flight.

DAVID STOCKMAN TOLD THE TRUTH

(Mr. FOWLER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. FOWLER. Mr. Speaker, we in the U.S. Congress are not in the business of selling magazines, but in the spirit of bipartisanship which I think ought to prevail in this body, I rise in support of the words of the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL), in urging all Americans to buy and read the full article in the Atlantic Monthly magazine. I also want to support the President of the United States for having the courage to continue in office a man who told the truth.

David Stockman told the truth about supply side economics, he told the truth in anticipating the budget deficits that we now see, and he told the truth about foreseeing high interest rates.

Mr. Speaker, it is only a shame that the truth was not printed in the March or April issue of the Atlantic Monthly rather than waiting until nearly December, when we have all seen and we all feel the effects of the truth that Mr. Stockman foresaw 6 months ago.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled bill on Thursday, November 12, 1981:

S. 1322. An act to designate the U.S. Department of Agriculture Boll Weevil Research Laboratory Building, located adjacent to the campus of Mississippi State University, Starkville, Miss., as the "Robey Wentworth Harned Laboratory" to extend the delay in making any adjustment in the price support level for milk; and to extend the time for conducting the referenda with respect to the national marketing quotas for wheat and upland cotton.

ADJOURNMENT TO MONDAY, NOVEMBER 16, 1981

Mr. FOWLER. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

DE LUGO INTRODUCES CHARTER BOAT DEREGULATION ACT

(Mr. DE LUGO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LUGO. Mr. Speaker, President Reagan has made it very clear that his administration is devoted to getting the Federal Government "off of the backs of the American people" wherever possible. One way he intends to accomplish this goal is by eliminating any Federal rule, regulation, or statute that allegedly serves no purpose except to inconvenience the public.

I agree wholeheartedly with the President. If a rule, regulation, or public law is useless, it should be erased from the books.

Today, therefore, I am introducing legislation that will, in fact, remove some burdensome and useless customs reporting requirements that have become a major nuisance to the charter boat industry in the U.S. Virgin Islands. Passage of my bill will eliminate this nuisance and save the Federal Government time and money—a goal that we all certainly share these days.

The charter boat industry in the Virgin Islands is, for obvious reasons, very extensive and contributes significantly to the growth and well-being of our local economy. Each year thousands of visitors lease or rent these vessels, for various periods of time, to take advantage of the many recreational activities afforded by our clear tropical waters and impeccable weather. Those tourist dollars, in turn, are recirculated into our local economy.

On many occasions, these charter boats make excursions into the nearby waters belonging to the British Virgin Islands. At certain points these waters are a mere quarter of a mile away from ports in the U.S. Virgin Islands.

Whenever such an excursion is anticipated, a member of the crew is required to physically report to the local customs office before leaving port to complete a vast array of paperwork. The only purpose served by this paperwork is to compile statistics on how many people use the charter boat services. Meanwhile, the vessels are rarely—if ever—inspected.

Upon returning from the waters of the British Virgin Islands, the same procedure is repeated—even if, for example, the craft had dropped anchor and spent just 1 hour to scuba dive.

I believe that these reporting requirements are a waste of valuable time and money—both for the charter boat users who do not want to spend precious time stuck in port, and for the local customs officials who have more important matters to attend to than collecting useless paperwork.

But wait. The story does not stop here.

Sometimes the charter boats will return to the U.S. Virgin Islands on a weekday or a Saturday after 5 p.m., or on a Sunday. At these times, the customs office is closed. So what happens? Believe it or not, the captain of the charter boat has to try to track down one of the customs officials to check in and fill out the required paperwork. To add insult to injury, the captain is required to reimburse the Federal Government for the overtime costs incurred in making the customs officials work after hours.

There is one final irony.

Owners of private yachts who wish to venture into the waters of the British Virgin Islands do not have to go through the same laborious reporting procedures as charter boat users. The yacht owner merely has to telephone the customs office 24 hours after returning if he or she has on board any article required by law to be examined by customs.

Mr. Speaker, I believe the Congress should rectify this ludicrous situation. The customs office in the Virgin Islands is already understaffed and overworked. Surely, they have better things to do than accumulate useless paperwork and be disturbed during their hours off. My bill would eliminate the reporting requirement for charter boats and extend to them the same convenience that is now extended to private yacht owners, that

is, they would merely have to call within 24 hours upon returning to ascertain if customs wishes to inspect the vessel.

This is a simple measure that, in these days of fiscal austerity and deregulation fever, is highly apropos. It would save customs precious time and dollars. And it would eliminate an unnecessary and burdensome bureaucratic nuisance.

THE UNIQUE CHARACTERISTICS OF THE FEDERAL RESERVE BOARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, once before I addressed the House with respect to the introduction of an impeachment resolution that I prepared directed to the Chairman of the Federal Reserve Board, Paul Volcker, and a subsequent resolution of impeachment directed to the Open Market Committee of the Federal Reserve Board, which in effect means all 12 members. As the Members know, the Open Market Committee consists of five private bankers, nonmembers of the Board, and all of the seven members of the Board.

At the time of introduction of those resolutions, I had personally advised Mr. Volcker during the course of a hearing before the Committee on Banking, Finance and Urban Affairs, that his appearance then, being in pursuance of a resolution that I had co-authored several years ago, was long overdue and belated and was an expression on the part of the Congress to bring some accountability from this runaway junta known as the Federal Reserve Board. And what was involved was a so-called quarterly report on the monetary conditions and policies of the Federal Reserve Board by way of a general report in view of the passage of the then so-called Humphrey-Hawkins Act.

When the Chairman had come in, in obedience to that act, from the Federal Reserve Board, there was shown as usual a sort of arrogance and condescension, as if to say, "Well, we are here, not that we want to be here or not that we see any need for it, but because of some silly congressional notion that we are not fully independent and that we have some kind of accountability to give to the Congress."

In the 20 years that I have served on this committee, which has, of course, the direct jurisdictional overview power over such entities as the Federal Reserve Board, I have not known of one time that the Federal Reserve Board, either through individual members or its chairmen, has ever recognized any kind of responsiblity to account to either the Congress or the President for its policies, the formulation of its policies, the reasons therefor, or even a mechanism for and the procedures followed in arriving at policy judgment decisions. Then, most importantly of all, there has been no accounting for the administration in the carrying out of such policies and even such practices as the actions of the Open Market Committee.

I know that this area or subject matter is very, very difficult to get the interest of either our colleagues in the Congress or the general public. It is considered a dry-as-dust subject matter, and, therefore, the tremendous connection between the economic fate of the country, what we call the American standard of living, and the policies dictated by this Board is lost sight of and very seldom even analyzed at all, even by such committees as the one to which I have the honor to belong that have direct jurisdictional responsibilities or the one that is the counterpart of my committee in the Senate.

Therefore, some very fundamental truths have also been either overlooked or not generally known at all, and among them is the fact that we are the only country in the world or, for that matter, in the industrialized world, whether European or Japan, that conducts its monetary matters in the fashion that we do, in effect meaning that the Congress has not only delegated powers but abdicated its prime constitutional responsibility. The fact is that the coinage of money and the actual setting of monetary policy is entrusted only and specifically to the Congress by the Constitution. Historically, there are very, very good reasons, as brought out during the debates of the Constitutional Convention before the adoption of the Constitution in 1789, for that being the case.

When the Congress enacted the Federal Reserve Act of 1913, it gave birth to what we now call roughly or in general terms a central bank of the United States or the Federal Reserve Board, but it is one which cannot in any real sense at all be compared to the actual central banks of the other industrialized nations. It is roughly the equivalent only because there is no question that the Federal Reserve Board is the agency that has not only the power but has arrogated ungiven power to dictate the monetary and fiscal policies of this country, and that has determined the fate and the economic well-being or "not well-being" of the country.

Other countries have accountability. In our country the Federal Reserve Board, which, as I have said, has either arrogated to itself or usurped the power or is attempting to express what it considered to be a delegation of power from the country, is really accountable to nobody, and, therefore, the American people do not have any kind of accountability either through its elected officials, the Congress, or the executive branch, the Presidency.

Mr. DORGAN of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I am delighted to yield to the gentleman from North Dakota.

□ 1230

Mr. DORGAN of North Dakota. First, let me say that I think the gentleman is providing a real service by discussing this issue. It is an issue that the House of Representatives seems more interested in ignoring than facing. I think it is time for this House to turn back and start analyzing the kinds of issues that the late Honorable Wright Patman, talked about for 30 years in this House. And that is the structure of the Federal Reserve Board.

I introduced a piece of legislation that I call "the Paul Volcker Retirement Act." I did that early in this Congress. I did not do it so much to focus on the Chairman of the Federal Reserve Board as a person as to talk about the institution of the Federal Reserve Board, and the inability of the people of this country who are in a governing position to deal with monetary policy as long as we have a Federal Reserve Board that is completely and thoroughly independent.

I went back and read the things that have been written about the creation of the Federal Reserve Board. President Wilson, the Democrats and the Republicans in Congress said, "We thought we ought to have a Federal Reserve Board to try to stop and try to monitor some of these cantankerous practices of some of the local banks out there in the country, but we sure do not want to be creating with this Federal Reserve Board a strong independent bank."

Here we are, 70 years later, and what we have is a strong independent bank accountable to no one. Federal Reserve Board members are appointed for a 14-year term; they are not accountable to the President; they are not accountable to the Congress. They develop monetary policy at their own time, in their own ways, and, consequently, we come to a point in our history at which fiscal policy and monetary policy collide. They are not united in a combined strategy that makes much sense for the future of this country.

We are told that high interest rates today are part of an economic solution. In fact, it is part of the economic problem. Some say, "Use fiscal policy, cut spending, cut taxes, and that will add up to a balanced budget." It does not, but that is the current fiscal policy strategy. It is all based upon supply-side economics, which means you need explosive bursts of economic

growth to enable supply-side economics to work.

On the other hand, you have monetary policy, which is policy guaranteed to try and retard economic growth in the country. That is why we have moved into a recession. Monetary policy is designed to retard economic growth.

So we have, on the one hand, fiscal policy, which requires economic growth and substantial amounts of it to work, and, on the other hand, we have monetary policy that retards economic growth and throws the country into a recession.

It is the most schizophrenic kind of economic policy that I have ever heard of in my life. There are people in town who believe that somehow it will work. It will not work. It is economic faith healing. It is wishbone economics. It simply is not based on economic logic at all.

I want to say to the gentleman that his discussion of the structure of the Federal Reserve Board is extraordinarily productive, because that is what we need to be discussing today in Congress.

Tax cuts do not mean anything to a main street business person who is not earning a profit because he is paying 20-percent interest rates. You give him a tax cut, and it does not mean a thing. The fact is, you only pay taxes if you earn a profit. I do not know of many main street businesses in this country which are earning profits by having to pay 18 or 20 percent interest rates on the capital they need to operate their business. That just is not happening.

So we are addressing the wrong thing. It is like mowing your lawn while your house is burning. The interest rates represent the burning house, and we have to deal with interest rates in a structural way. That gets right back to the issue the gentleman is talking about: What ought the Federal Reserve Board's role be in this Government?

Should it be an independent role capable of creating a strategy of monetary policy that is inconsistent with the fiscal policy strategy? Of course not. That is not a reasonable approach. I think it is time people in the Congress begin realizing that this contradictory strategy of monetary and fiscal policy is not logical and will not work.

In conclusion—and I appreciate the gentleman allowing me the time to visit about interest rates and monetary policy—I would like to say further that the Federal Reserve Board has put us in a position of starving the most productive sector of the American economy. We starve from a credit standpoint the small business and the family farms and, at the same time, Mobil Oil Co. is out there getting $5, $6 billion worth of credit to try to buy Conoco. Now they are gobbling up credit to try to buy Marathon Oil. There is not one new job created from that kind of activity. There is no new productivity created from that kind of activity. It is a completely useless and inefficient economic activity in this country.

The most productive segment of our economy is being starved, and we are rewarding the least productive for the purposes of acquisition and concentration of corporate power; chipping away at the free enterprise system. None of that makes any sense.

So we do need a more coherent monetary strategy so that the folks in this country who need credit to build productive small businesses with, to create new jobs with, get that kind of credit, only then can they have the kind of business that prospers and grows along with the economy of this country.

I do not think the President is solely to blame for the interest rates. Obviously, the Federal Reserve Board develops monetary policy. But the fact is that the President has supported this monetary policy. He has said so time and time and time again.

I heard some colleagues on the floor of this House just the other day talking about how this program is working. "This program is working," they say. Well, if this program is working, the *Hindenburg* is still trying to park and the *Titanic* is still sailing.

The fact is, this program is not working. It has only been in force 40 or 50 days, but already we have seen the estimates change on the expected fiscal year 1982 deficit from $42 billion to upward of $80 billion. The fact is, it will not work because we have inconsistent monetary and fiscal policies. We have to get it straightened out. But even more importantly, we have to address the long-term structure of the Federal Reserve Board. That is why I think the gentleman is dead right. I have not put my name to the current resolution the gentleman is speaking about, but I have several bills of my own in and several resolutions in on the Federal Reserve Board. I commend the gentleman for bringing this to the attention of the House day after day after day. As more people begin to understand that tight money is the problem, not the solution, then we will begin dealing with that problem and create better economic solutions for the people of this country that really work.

I thank the gentleman.

Mr. GONZALEZ. Mr. Speaker, I, in turn, wish to thank the distinguished gentleman and say that he is absolutely correct. I have introduced some bills, two bills, one that would call for the abolition of the Open Market Committee and two additional bills that have to do with restructuring the Federal Reserve. One would abolish the Federal Reserve as it is now and bring it under the jurisdiction of the Department of the Treasury, where it ought to be anyway; and the other would modify it along the lines suggested by the gentleman's bill that I am familiar with and on which I am certainly in agreement. But the impeachment process I use because I think it is the only way that we can help perhaps bring about a change in sufficient time to avoid the total catastrophe that faces us. We are on the precipice. There is no question of that in my mind. I know so. I have traveled around the country. I have had the Subcommittee on Housing and Urban Affairs, which I happen to have the honor of chairing, holding hearings throughout the country. We may kid ourselves here in these marble hall environments, but the people are not fooled. The people know. And everyone of us has heard the plain people say, "Hey, look, what is Congress going to do about this?"

All this fancy talk, both by the President as well as by the Congress in the past, where we have said, "Oh, well, the Feds do this, they are independent. It is not our fault, we cannot do anything about it." And the administration says, "Oh, well, we wish we could change it, but the Feds are doing it." Of course, as the gentleman has reminded us, this administration has seconded, it has affirmed, it has backed the disastrous continued course that Volcker's chairmanship and the present Federal Reserve Board has embarked upon, and it is just a case of upward failure. It looks as if we are not following the old American tradition, and that is that if something is not working, we fix it and make it work. We do not keep trying to reward failure, and if anybody says that the continued Federal Reserve Board of the last few years is a success, then certainly they have a different definition of the word "success" than what I understand the dictionary defines it.

So I in turn wish to thank the gentleman for his contribution and hope that, together, we can engender sufficient interest in order to at least, from the policymaking level, which is the Congress, bring attention. I am presently trying to get the chairman of the full committee to give us some hearings on our bills calling for the restructuring. This is long overdue. Even if you forget about impeachment, even if you forget about success or failure of Fed boards, there is no question that the Congress has postponed the restructuring of the Federal Reserve system too long, and at great risk of catastrophe now for the entire Nation.

Mr. DORGAN of North Dakota. To further state the point I was trying to make before, the gentleman, I think has reiterated that interest rates are

seen by many as some mysterious force that Congress is not prepared to deal with.

Mr. GONZALEZ. Oh, they put on as if it is an act of God, you know. "Oh, listen, it is an act of God; nobody can do anything about it, it is just too bad."

Some say "Oh, if you dismantle the Federal Government, interest rates will go down. Oh, once you get inflation under control * * *."

Well, I wish that were correct. But all history shows otherwise, all recorded experience. Under the present circumstances, how in the world, as the gentleman has well brought out, can you assess what program you must develop, what actions must be formulated and taken in order to resolve the problem of inflation, say, if you are either ignorant of or ignore the causes for the peculiar kind of inflation that flagellates us today? This the reason why I could not support, either, Jimmy Carter's so-called energy program, because he did the same thing. He was not taking into consideration the prime cause, which was OPEC, and what to do about that; but, rather, trying to do it unilaterally by control of consumption, through price or taxation, when the European experience clearly has shown us that increase in price from $1 to almost $3 has not reduced consumption. It just meant that the rich ride and the poor walk. That is all.

Mr. DORGAN of North Dakota. Another point that I think should be made here is that those same folks who talk about the free market system talk about it with respect to interest rates, and the fact is that interest rates today are not set in the free market. Historically, interest rates represent a price for money that is about 3 percentage points above the inflation rate. Today that would make interest rates somewhere around 12, 13, or 14 percent. But they are not 12 or 13 or 14 percent. They have been 20 percent. Why? Because the Federal Reserve Board is artificially manipulating the supply of money.

Mr. GONZALEZ. That is right.

Mr. DORGAN of North Dakota. And they are doing it in a way which I think is very detrimental to the people in this country who really count, the people who produce the jobs, the people who create the innovations, the small business sector, the family farmer, and that is what worries me.

I might also just add that the gentleman, coming from Texas, remembers well back in the 1960's when McChesney Martin was Chairman of the Federal Reserve Board. I recall that there was a debate all summer long in Washington over whether or not we were going to increase the prime rate one-half of 1 percent. President Johnson put his arms around McChesney Martin down there at the ranch in Austin, Tex., and the Congress debated it for 3 months. Today interest rates go up and down one-half or 1 percent in 1 day or 2 days or a week and nobody seems to notice or care much because, they say, it represents a free market. That is just nonsense. This so-called free market—which in reality is Federal Reserve Board manipulation—is driving a whole lot of folks out of business, and a tax cut is not going to help somebody who has a failing business because they could not afford to pay the interest rates.

Mr. GONZALEZ. That is right.

The so-called long-range solution is no satisfaction to the business that is confronted with bankruptcy and extinction today. That is the problem.

Mr. DORGAN of North Dakota. Your solution will be called radical; that is, a whole series of solutions that deal with structure of the Federal Reserve Board will be called radical because the institutions in this town and in this Government say that you do not move very quickly on these kinds of issues. But the fact is, we have been debating this issue for 30 years.

Let me just leave you with a quote from one of my favorite politicians. He said: "That which is right has always been called radical by those who have a vested interest in that which is wrong."

Despite the fact that these kinds of approaches are called radical, they are right. It is time now to start talking in real ways about the structure of the Federal Reserve Board, to finally help restore some economic health to this country.

Mr. GONZALEZ. I thank the gentleman for his comments. That is the whole issue here of accountability. As a matter of fact, I referred a while ago to the Federal Reserve Board as short of a junta. Mr. Stockman, to me, represents no more than the fact that he finally had enough, his conscience bothered him enough, and he talked out. But with this Cosa Nostra, we cannot even get them to come before us hooded and their faces covered, like the Mafiosos have at least done before some congressional committees. This Cosa Nostra, the Federal Reserve Board, is another tough hombre. It is a different proposition.

Now, it is accountability, of course. I have been a member of the Banking Committee, as I said, for 20 years. Not one time can I remember any Federal Reserve Board or Chairman coming before us to give us a report on their transactions, on the reasons for their actions, on their policymaking procedures.

□ 1245

Do they have a policy, for instance, to sort of patrol themselves, govern themselves, protect themselves, say, from improper leaks from the proceedings of the so-called open market committee, which is not open, it is secret. We do not know.

I do not know at any time that the Federal Reserve Board has ever wanted to tell us.

I am also the ranking member of the Subcommittee on Oversight and Renegotiation of this committee and we have on my instigation had some hearings before us and we brought some of the regulatory heads such as the Home Loan Bank Board Chairman, its counterpart with the savings industry, and also the Federal Reserve, in an attempt to get GAO—GAO was flat turned down.

Now as you know, the General Accounting Office is the only arm that the Congress has to overview the executive branch. It is the only thing we have.

They came back to us and said, "We are sorry. We tried to get you the information." We were trying to find out what is the extent of the problem that seems to be emerging with respect to not only commercial banks but savings banks and institutions, and they were sort of hesitant and just plumb refused to even tell us, well, how many do you have on your so-called list of troubled institutions.

Some of us had already had word from some of the affected and troubled institutions. We now know as we knew then that there was trouble but you could never get it from the regulatory authorities. Then what do you have, the Comptroller of the Currency as the main officer of the commercial banking system. Well, that is so independent of the Congress that when Wright Patman tried to get the Director of that Agency to come before us some 15 years ago, 14 years ago, he just plumb told us that he was not accountable. Why? Because he is not receiving appropriated funds from the Congress to carry out the business of the Comptroller's office, the Comptroller of the Currency. The Comptroller of the Currency is funded by the banks through their fee payments for examinations, for example.

Now, what more of a turning over of this power to the directly interested vested interests can you have anywhere under the sun than that which we have done in the United States of America.

We have turned over the coinage of the money through our fractional currency. We have in effect allowed the banks to manufacture money. They talk about printing press money, meaning Congress and the Government. That is not the issue. It is the banks' manufacture of money that is at issue with no accountability, with no restraint.

Why should we be shocked now that Americans are being flagellated and being punished and business being driven out of existence? Should we be

surprised when we have turned over to those interests the control thereof. Even in ancient times it was illegal. Even in the oldest written annals of mankind or historical accounts, the last Jewish king in the old system, and his edict against usury, or even the payment of interest on loans.

It must have been troubling then and all through history it has been illegal. Since when has it been legal to have 21, 22, 20 percent rates of interest?

Any American today, businessman or individual, if he goes to his bank anywhere in the United States today and says, "I want to borrow $15,000," in the case of a businessman, "for my inventory," in the case of a private citizen to save his home, "for 90 days," he will have to pay no less than 21 percent right now.

Since when has that become the custom of the land and allowable and permissible? It ought to be out of the pale of the law and the Congress makes the laws. How in the world can the fundamental system that we have developed first and foremostly in the world, mass production, based on mass consumption, in turn based on that remarkable engine known as consumer credit, how can it survive at anything even over 10 percent? It is impossible.

The fate has been decreed and already this year we have 47½ percent more business bankruptcy thus far this year than was the case previous or last year. What are we waiting on? I think I know.

Now in the meanwhile I have done the best I know how. I know it sounds bombastic. I have been in this before. In 1957, in my freshman semester, in the Texas State Senate, I filibustered the race bills, the massive kit of resistance bill that emanated from Virginia and went down through the Confederate States. It was the only State legislature in the Old South they were even debated. All 16 bills in the Arkansas Senate were passed in 16 minutes. Only in the Texas Senate were they not only debated, we filibustered them for over 26 hours. We took the floor and defeated 14 of the 16.

Well, the first time was not too bad because it kind of attracted attention. It was sort of a curiosity. Then came Little Rock in September of 1957 and the troops, and the Governor of Texas then convened a special session, in order to pass what he called the anti-troop bill, to keep the bayonets from the necks of our schoolchildren.

Well, whereas in May, we had moral support, in September I had a pistol toting pistolero from east Texas, a white citizen's council come over and gave me the message, maybe we had better not do the same thing in the special session, and I did. It is true, I did not get any support then from any other Senator. It was not funny then.

But did I did not do it because I thought it was heroic or bombastic. I did it for the same reason I am getting up here today, because I took an oath of office. I feel very privileged in a democracy such as ours, and I pray to God we keep it—what greater honor, reward, could any man or woman receive than being elected to an office of public trust in which a fundamental oath is taken, whether it is a State, city, or national level, and that is to uphold the Constitution of the United States.

As I said then, if I had done it because I thought it was politically advantageous, I would have been very, very ignorant and amateurish, as I have been in politics. I would have been worse than amateur, I would have been stupid because my constituency which then represented the entire county of Bexar, has only 7½ percent Texans or Americans of black descent—and I certainly could not say I was speaking for them. I said so on the Senate floor. I said I do not see any black Member in the Senate and I do not see any in the House of Representatives then and there were none—I said that does not make any difference, if there were only one or it were any other individual that this legislation addressed itself to, I feel that I have betrayed my oath if I did not get up and fight it every inch of the way, and that was the only reason. And what happened?

All the experts said you have committed political suicide. When I got back home the worst critics I had came from the group I emerged from, which is supposed to be an ethnic minority, who said, "Why, Henry is crazy. He is putting us in there with the blacks." Because remember at that time you had Jim Crow laws against the blacks. You did not have them against the Mexican Americans. I had the worst critics from the group that I am supposed to come from.

Maybe politically some of these critics might have been right. All I know the people did not respond that way.

Because, the average American, I have said this before on the floor, contrary to this grievous notion that has gotten out that America is a racist society—it is a grievous sin against the American people. It is not true, if that were the case I would not be here and I would not have been elected to the Senate in 1956 at all. It is not true.

The average American whether he is black or brown or white or blue wants the same thing that we all want, no more, no less.

Of course you have exceptions in every group. That is true for everybody. What I am saying is it is the same issue here now. Impeachment is the only way that I think the Congress can bring the attention it needs at this point for accountability. There is not accountability. There is no man in this Congress who can tell me, unless he has been told in secret and has not divulged it, exactly how it is the Federal Reserve makes policy or why, or what its reasons are or what it does to supervise its own self.

And so, today, I have asked the GAO to do two things for me—one—to go in and find out and tell me the Federal Reserve indeed in fact has such a policy. Do they have an Inspector General, for example. Who knows? We have not been told.

What are their policies?

Second, I want to know about what was reported a couple of years ago, and that is, that there has been indeed and in fact a leak from the open market committee, that had resulted in an advantageous grasping of millions of dollars by special interests in the New York financial world.

All I know is that the Federal Reserve Board did appoint a special committee. Now what happened? Who was on the committee? What did they do? What did they find out? What were the results? I want GAO to tell me and find out and let us know in Congress.

But in the meanwhile, I have also written a letter to the Honorable PETER W. RODINO, JR., chairman of the Judiciary Committee.

The letter says:

As you know, I have introduced a resolution calling for the impeachment of Paul A. Volcker, Chairman of the Federal Reserve Board. This is to request that you set this matter down at the earliest possible time for public hearings.

I believe that Chairman Volcker is guilty of committing the most grave abuses of governmental power, subverting our system of government, and that he is unfit to continue in public office. He has systematically defied and obstructed congressional efforts to monitor, review and oversee monetary policy. He has thereby made it impossible for Congress to fulfill its legislative responsibilities with respect to economic policy.

Now, I had two Members since then join me in this resolution, voluntarily. I have not circulated a "Dear Colleague" letter. As I do in the case of my own family I never involve them in my fights. I am always welcoming volunteers. But I do not try to conscript anybody.

I intend to follow this and find out if I am going to get serious attention from this committee, because I certainly will pursue the matter and, therefore, I am seeking the GAO to bring me some of this information, which I think will clearly bear out how derelict we in the Congress have been in our responsibility of overviewing the actions, the policies and formulation thereof of this all important committee and Board.

Now, of course, it is a creature of Congress. The Federal Reserve Board did not spring from the brow of the Greek god—it is a creature of a legislative effort by the Congress. In reading the memoirs of Carter Glass, then

Senator from Virginia, and the main author of the act, in reading the proceedings in the Congress, and in reading the utterances of President Wilson with respect thereto, I will bear witness to corroborate what the gentleman who joined me a while ago said. It never was intended any more than the Reorganizational Act of 1947 and in reorganizing the Defense Department was intended to be sacred script and fixed in immutable law. It was being looked forward to being changed and revised and overviewed from time to time.

□ 1300

Instead, what we have done is that we have turned the fate of the Government over to unelected, unresponsible, unaccountable, powerful men, the handmaidens of the most special powerful interests in the world.

The Federal Reserve Board is ostensibly responsive to about 14,000 commercial banks directly, but in truth and in effect it serves only at the bidding and at the pressure of about seven of the giant mammoth institutions, international in scope today, where they can transcend easily the policy of the Government.

This brings to mind the other area that the Congress has failed to address itself to even indirectly, and that is that no matter what we do domestically, no matter how much we put in order our own house, we still have to find ways and means of reducing the impact, adverse in some cases, of those international forces now that impinge upon us.

The world is smaller and contracted and interdependent, and even such things, for example, as the gold question, the sale of wheat to Russia and predicated, incidentally, on payment in gold equivalent, and whether we do or do not all have an impact; but the most desperate thing of all is how our administrations including this present one, have failed to address itself.

Recently, in September we had the last annual meeting of the International Monetary Fund. I thought it was a brilliant opportunity for this new President to assert American leadership, which past administrations have not, to try to safeguard a collapse worldwide, which I feel is imminent, caused by us, incidentally, but to which we have these contributing factors internationally.

I have had no kind of reaction from the men in charge of monetary policy, either the deputy assistant secretary for monetary affairs of the Treasury and the last three sets of them since 1978 when President Carter went to Bonn to the Economic Summit Meeting there and I think very irresponsibly accepted the German proposal, which was accepted by the European Common Market and the development of EMS, the European Monetary System, and the EMF, the European Monetary Fund, and predicated upon their own interagreements based on gold transactions and the hard-headed insistence on the part of our money managers going back to Secretary Simon and actually following the false goddess of the gold speculators, to which we now are being impaled, we are being impaled on that sacrificial altar for that reason.

We have missed opportunities to assert the last vestiges of the possibility of a potential for American leadership and instead of that what we have had, we should not be surprised at our defense. If we do not take care of what is imminent in terms of mere collapse, that is, our monetary system, you can forget all, no matter how you feel, about defense. What good does it do to try to think and conjure up elaborate defense systems if the dollar is no good?

When we have so-called allies that are threatening now to even sort of disassociate themselves in defense matters, you can rest assured that it is just an epilog. It follows what they have already told us where they are on financial matters. They clearly have shown that and the whole thrust of the formation of EMS and EMF in 1978 was against and was directed against the dollar and our leadership has not wanted to confront it, because apparently politically it does not help the image of being in control of foreign policy.

The fact of the matter is we do not have a policy. We do not have a policy in either one of those cases. All of that impinges on the other.

Even if the world did not interfere, we still have the task of controlling our own destiny and the Congress has the inescapable duty, unless it just wants to sit supinely by, as we are, waiting for the house of cards to collapse all around our ears.

Since I expected, I have instructed and we have now been working for about a month and a half with the professional staff of the Subcommittee on Housing to work a contingency; that is, I have always believed in anticipatory action. I think this is the only thing that I can truly say in my career as a public official, as a legislator, because this is a field that I have gone into, what I call legislative advocacy, and that is anticipatory, not sit until you have an emergency, but anticipate and in anticipation thereof we are now following programs that we hope we can offer when the foundations begin to shake, if not collapse, in the not too distant future.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

ICA, VOA AND CREDIBILITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MICHEL) is recognized for 10 minutes.

Mr. MICHEL. Mr. Speaker, recent editorials and news stories in the Washington Post make serious allegations against the current leadership of the International Communication Agency (ICA) and its broadcasting station, the Voice of America (VOA).

An examination of these allegations leads me to the conclusion that they were made out of misunderstanding of the true role of ICA and VOA appointees. In a recent editorial the Post wrote of ICA Director Charles Z. Wick:

> It is being asked whether he is sacrificing credibility for propaganda . . . He calls his approach Project Truth and has a weakness for simplistic approaches to complicated subjects like Soviet disinformation.

In a front page news story, Friday, November 13, 1981, carrying the headline, "Propaganda Role Urged for Voice of America," the Post disclosed the contents of an internal ICA memorandum written by an ICA appointee to VOA Director James B. Conkling.

The memorandum, as quoted in the Post, states that the VOA should function as a propaganda agency.

The Post then goes on to describe the memorandum writer's views.

> He specifically suggested efforts "to destablize" the Soviet Union and its satellites.

The Post states:

> The whole thrust of the VOA operation in recent years has been to champion news objectivity as its goal, which is how VOA's purposes are legislatively sanctified.

It is evident that the Post believes that current ICA leadership is engaged in activities detrimental to "news objectivity" and to the mission of ICA and VOA.

I disagree. I believe ICA and VOA need and deserve close policy supervision from those appointed by the President to lead those organizations.

The first point that must be conceded is that the writer of the internal memorandum in question confuses the role of VOA with that of Radio Liberty, an independent, Government-operated radio station broadcasting to the Soviet Union. It is the job of Radio Liberty to tell the people of the Soviet Union news of their own country. It is the job of VOA to be the official broadcasting arm of the U.S. Government. The two jobs are equally important but Radio Liberty is best suited to carry out the task of informing the Soviet Union's listeners of internal problems and other news.

It also must be stated that neither the VOA nor Radio Liberty and Radio

Free Europe, its sister station, broadcasting to East bloc nations, should engage in destabilizing activities. That is not their proper function and no responsible official of the Reagan administration or of the Board for International Broadcasting—the parent body of Radio Liberty and Radio Free Europe—has ever said it is a desirable goal. These stations should not shy away from telling unpleasant truths about Communist-dominated societies, but never in an inflamatory fashion.

The memorandum leaked to the Post—ICA officials say it was stolen from them—is not relevant to the current debate over the direction of ICA because it does not reflect the policies or the opinions of the leadership of ICA or VOA. It is the informal and unofficial view of one officer. It raises some interesting points. It asks blunt questions about the purpose of ICA and VOA, questions that should be asked. In doing so, however, it offers policy options that in some instances are based on misinformation and in other areas makes suggestions that, if carried out, would be detrimental to the long-range mission of VOA.

Let us not allow this internal memorandum, meant to be confidential and totally without official sanction, muddle the real issue which is what role ICA and VOA should play in the foreign policy of the United States.

That role, as I see it, is as follows: ICA, through its various media and personal diplomacy has the important foreign policy role of aiding the President in communicating his policy views to a worldwide audience.

VOA news broadcasts are one aspect of this role. The purpose of these broadcasts is not news in and of itself, but credible news broadcasts as a means by which foreign audiences build trust in VOA broadcasts as a whole. Thus, credibility in VOA news is a means toward an end, not an end in itself.

This means that responsible ICA officials, appointed by the President, have the right and the duty to make certain that VOA broadcasts remain credible, that is, do not engage in falsehood or distortions, because VOA credibility is a vital factor in overall VOA and ICA effectiveness.

VOA career officers are not and never have been the same as news professionals in private media. The VOA professionals are employees of the U.S. Government, and under our system, must take policy direction from those with legitimate responsibility for such direction.

If this means that ICA or VOA appointed officials question newsstories or parts of stories, this is as it should be. The taxpayers are not supporting VOA or ICA in order to have career experts dictate policy, but to have experts make themselves available to effectively carry out policy formulated by elected officials and those they appoint.

"Sacrificing credibility for propaganda" has a nice ring to it, but it really does not tell us much. If the Post means by this phrase that ICA officials appointed by the President have no right to question the choice of words, phrases, substance of newsstories or selection of newsstories, then the Post misunderstands the proper role of these officials.

They are not in their positions to rubberstamp the decisions made by news experts, but to work with those experts in seeing to it that VOA broadcasts are effective from the viewpoint of the foreign policy goals of the President.

Can appointees make wrong decisions in these areas? Of course they can. Is it possible that in any given administration we are going to find administration appointees at ICA or VOA who will be heavyhanded in dealing with VOA news operations? Of course—it has happened. But these are the risks that must be taken if VOA is to fulfill its true mission, which is not to become a carbon copy of NBC Evening News, but to be a useful tool for the President in the area of foreign policy.

As for the Post's assertion that "Project Truth" is "simplistic," I can only say that I have read "Soviet Propaganda Alert," the first item in the "Project Truth" program and have inserted it in the CONGRESSIONAL RECORD. It is a thoroughly professional job, clear, concise, informative, balanced, and persuasive. Since the Post's charge of "simplistic" policy is not supported by any documentation, I can only say I know of no evidence to support this charge.

The use of the word "propaganda" in the memorandum was unfortunate because the word has no useful meaning in describing persuasive communication which is, after all, what ICA was created by Congress to engage in. The real question we should be asking ourselves is what is the proper way in which ICA and VOA can best serve the goals of the foreign policy of the United States. Front page and editorial denunications of those who are presenting options to answer that question does not bring us any closer to solving the problems involved.

Secretary Haig's statement made before the House Foreign Affairs Committee says that our relationship with the Soviet Union must be based on the twin principles of "restraint and reciprocity." It is clear that Secretary Haig views Soviet disinformation programs as a sign that the Soviet leaders are not interested in reciprocity in international communications. ICA and the VOA must reflect this reality in their programs. This does not mean we engage in disinformation. It does mean, however, that we are willing to tell the truth about the Soviet Union. That is what the current ICA leadership seeks to do.

BEDELL SOCIAL SECURITY PACKAGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, judging from the hundreds of letters I receive, it has become clearly apparent that no issue has alarmed so many Americans and caused so much anxiety and fear as the administration's plan to cut back on social security benefits.

Directly or indirectly, social security touches the lives of almost every American. There is no question that social security is the central feature of the way Americans plan their financial futures. That security must be preserved.

The question that remains unanswered is not whether the social security system is going bankrupt. The system is not going broke. Those who threaten bankruptcy are using fear and misunderstanding to force people to accept drastic changes in the system that are simply not needed.

The American people can be certain that Congress will not allow the social security system to cave in. Because of unexpected economic developments in past years—high unemployment, rapid inflation, low real wage growth—the social security system has been forced to carry a heavier and heavier load. Nonetheless, I am personally committed to assuring that the millions of Americans who have paid into the system over the past 30 or 40 years in good faith receive every dollar of assistance they deserve.

The only answered question is how can we strengthen the system without destroying it and without delaying benefits to those who have earned them?

The administration has proposed a plan consisting of several ideas they feel would solve the financial problems of the old-age and survivors insurance trust fund. While their intentions of solving the problem are ones that all of us share, I believe their plan for reducing benefits to present and future recipients is one that is unnecessarily harsh.

It is wrong to tell the American people that there is only one way to solve this problem, as the administration has done by calling for cuts in benefits as the only answer.

Through forums conducted in June in northwest Iowa on the future of social security, through open door meetings, I held in August, and through many, many letters and phone calls from my constituents, I have received helpful suggestions and

ideas on how we can preserve our social security system in a fair and even-handed manner.

As a direct result of these ideas and suggestions, Mr. Speaker, I am today introducing a social security package. My package is designed to put the system back on firm financial footing without breaking faith with social security beneficiaries.

My package consists of three bills. Unlike the administration's plan, my proposals will not significantly cut benefits. In addition, they will not raise taxes, but will solve the system's financial problems in the near and longer term.

The package consists of the following bills:

A bill which will end payment of all social security benefits to convicted criminals confined to penal institutions. Currently, prisoners are receiving many types of social security benefits. For example, under present law, there is a loophole which says that a prisoner can collect monthly social security disability checks, if he agrees to enter a rehabilitation program. As one would imagine, a great number of prisoners do this and continue to drain the financially troubled system.

Rather than severely cutting benefits, the second bill will modify the formula used to adjust benefits to keep pace with inflation. My constituents during August open door meetings told me that they would favor increasing the cost-of-living adjustments by either the rise in the CPI or the wage index, whichever is lower. This change in the formula would save social security $26 billion by 1986, if the economy continues to perform as it has in recent years.

Finally, social security was originally established in 1935 as a Federal insurance program to provide supplemental retirement income. Over the years, other social programs have been added to the social security system. Thus, to redirect the system back toward its original purpose, my third bill will finance the hospital insurance program—part A-medicare—from general revenues. In 1965, the payroll tax was expanded to include withholding for the Federal hospital insurance program. Since this program is more socially oriented and the benefits are not related to a worker's contributions, it is better suited for support from general funds.

The current payroll tax would be applied toward financing the other two parts of social security—the old-age and survivors insurance and disability insurance. The savings we would realize by using general revenues for hospital insurance would be about $187 billion—more than enough to put the retirement program back on firm financial footing.

The American people have been told that because of the dire condition of the social security funds, we must either sharply cut back on benefits or raise taxes. This is simply not true.

By taking sensible and fair actions like the bills included in my social security package, we do not have to go back on our word to the people. By taking the steps I have proposed, we can save the system billions of dollars painlessly and put our social security system back on a stable financial base.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. DE LA GARZA) is recognized for 5 minutes.

● Mr. DE LA GARZA. Mr. Speaker, yesterday on rollcall No. 297, the motion to recommit H.R. 4035, the Interior appropriations bill, I inadvertently voted "yea" for recommittal when my vote should have been "nay" against recommittal.

I bring this to the attention of the House to set the record straight. Thank you for your attention.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 5 minutes.

● Mr. DANIELSON. Mr. Speaker, I was unable to be present on the floor of the House of Representatives on Thursday, November 5, 1981, when the House voted on rollcall No. 293 and rejected an amendment to H.R. 2330, the Nuclear Regulatory Commission authorization, that sought to strike the language authorizing the NRC to grant temporary operating licenses before public hearings are completed. The vote was 90 ayes to 304 noes. Had I been present, I would have voted "aye."●

DEFERRAL IN FISCAL YEAR 1982 FUNDS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-110)

The SPEAKER pro tempore (Mr. PATMAN) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report one deferral of $108 thousand in fiscal year 1982 funds.

This action is taken to restrain spending of funds made available by the Continuing Resolution, P.L. 97-51.

The deferral contained in this message is for the Department of Interior's Historic Preservation Fund.

The details of the deferral are contained in the attached report.

RONALD REAGAN.

THE WHITE HOUSE, *November 13, 1981.*

AGRICULTURAL FAIR PRACTICES ACT AMENDMENTS OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 10 minutes.

● Mr. PANETTA. Mr. Speaker, today I am introducing amendments to the Agricultural Fair Practices Act to strengthen protections for producers and handlers of perishable commodities in bargaining situations. There is a pressing need for this protection as evidenced by the tremendous support my bill enjoys from the American Farm Bureau Federation, the Grange, the Farmers Union, and the National Council of Farmer Cooperatives. I would like to briefly explain to my colleagues the reason I am introducing this measure and to describe its basic provisions.

There is a pressing need to help our farmers survive in this time of rapidly increasing inflation and low farm prices. It is apparent as the House and Senate work out their compromises on the farm bill, that our farmers are going to have to rely more upon the market and less upon Government programs to insure their livelihood. In light of this increased reliance upon the market, it is more important now than ever before, that we insure that the market runs in a smooth and fair manner. My bill would achieve this objective by amending existing law to clarify and strengthen the standards of fair conduct that both producers and handlers must meet in negotiating purchases and sales of perishable commodities.

The fact is that our marketplace for farm products is a highly concentrated one. There are few large handlers of farm commodities as compared to the many thousands of producers seeking to sell their products. Consequently, it is difficult for a farmer to bargain effectively regarding price, terms of sale, and condition of products. This difficulty is compounded by the fact that producers of perishable commodities must find a home for their product or risk losing everything to spoilage.

To offset their weakness in the marketplace, many farmers have banded together in associations to negotiate in a single voice with farm-product handlers. Naturally, handlers have resisted these efforts primarily by refusing to deal with such associations and by offering sweetheart contracts to entice their individual members to negotiate separately. In some areas, farmers

have overcome this problem and formed effective bargaining associations. The National Farmers Organization is an example of one group that has struggled long and hard to establish itself as bargaining agent for farmers and to gain recognition from the large handlers. Other farmers, particularly those who produce perishable crops, have met with less success in gaining recognition.

My legislation respects the position of farm organizations that have already established themselves in certain areas by not changing the law as it pertains to them. My bill, however, gives a boost to growers of vegetables, fruit, nuts, and poultry, by allowing their associations to be certified upon application to the Secetary of Agriculture. With this certification would come an obligation on the part of the association and handlers to engage in good faith negotiations regarding the price, quality, and terms of sale of farm products.

It is vitally important that we establish these guidelines for the smooth and proper functioning of the marketplace. Otherwise, farmers will remain in an unfair position in their negotiations with large handlers who control the markets. My bill corrects this problem in a simple and effective way without creating a new bureaucracy or incurring excessive costs to the taxpayer.

I urge my colleagues to join with me in seeking enactment of this legislation. As the second ranking member of the House Agriculture Subcommittee on Domestic Marketing, I intend to seek hearings on this matter and to move the bill toward adoption in the 97th Congress.

H.R. 4975

A bill to amend the Agricultural Fair Practices Act of 1967 to assure fair practices in agriculutral bargaining

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SEC. 1. This Act may be cited as the "Agricultural Fair Practices Act Amendments of 1981."

LEGISLATIVE FINDINGS AND DECLARATION OF POLICY

SEC. 2. (a) Agricultural products are produced in the United States by many individual farmers and ranchers scattered throughout the various States of the Nation. Such products in fresh or processed form move in large part in the channels of interstate and foreign commerce, and such products which do not move in these channels directly burden or affect interstate commerce. The efficient production and marketing of agricultural products by farmers and ranchers is of vital concern to their welfare and to the general economy of the Nation. Because agricultural products are produced by numerous individual farmers, the marketing and bargaining position of individual farmers will be adversely affected unless they are free to join together voluntarily in cooperative organizations as authorized by law. Interference with this right is contrary to the public interest and adversely affects the free and orderly flow of goods in interstate and foreign commerce.

(b) It is, therefore, declared to be the policy of the Congress and the purpose of this Act to establish standards of fair practices required of handlers and, with respect to certain agricultural commodities, to establish the mutual obligation of handlers and accredited associations of producers to bargain in good faith relative to the production or marketing of such agricultural commodities.

DEFINITIONS

SEC. 3. For purpose of this Act—

(a) The term "handler" means any person other than an association of producers engaged in the business or practice of—

(1) acquiring agricultural products from producers or associations of producers for processing or sale, or

(2) grading, packaging, handling, storing, or processing agricultural products received from producers or associations of producers, or

(3) contracting or negotiating contracts or other arrangements, written or oral, with producers or associations of producers with respect to the production or marketing of any agricultural product, or

(4) acting as an agent or broker for a handler in the performance of any function or act specified in subparagraphs (1), (2), or (3).

(b) The term "producer" means a person engaged in the production of agricultural products as a farmer, planter, rancher, dairyman, of poultryman, or as a fruit, vegetable, or nut grower, including a grower or farmer furnishing labor, production management, or facilities for the growing or raising of agricultural products.

(c) The term "association of producers" means any association of producers of agricultural products engaged in marketing, bargaining, shipping, or processing as defined in section 15(a) of the Agricultural Marketing Act of 1929 or in section 1 of the Act entitled "An Act to authorize association of producers of agricultural products", approved February 18, 1922 (7 U.S.C. 291),

(d) The term "person" includes individuals, partnerships, corporations, and associations.

(e) The term "agricultural products" means agricultural commodities and the products thereof, but does not include cotton or tobacco or their products.

(f) The term "qualified commodity" means vegetables, fruits, nuts, or poultry and the products thereof.

(g) The term "to bargain in good faith" means meeting at reasonable times and for reasonable periods of time to negotiate in good faith with respect to the price, terms of sale, compensation for products produced under contract, or other terms relating to the production or sale of such products.

(h) The term "accredited association of producers" means an association of producers which is accredited by the Secretary to be the exclusive bargaining agent, for all producers members of such association within a bargaining unit.

(i) The term "bargaining unit" means a bargaining unit approved by the Secretary under section 4.

(j) The term "Secretary" means the Secretary of Agriculture.

ACCREDITATION, BARGAINING UNITS, AND COVERED COMMODITIES

SEC. 4. (a) An association or producers may file an application with the Secretary—

(1) requesting accreditation to serve as the exclusive bargaining agent on behalf of its producer members who are within a proposed bargaining unit with respect to any qualified commodity;

(2) describing the geographical boundaries of such proposed bargaining unit;

(3) specifying the number of producers and the quantity of product included within such proposed bargaining unit;

(4) specifying the number and location of the producers and the quantity of product represented by such association; and

(5) supplying any other information required by the Secretary.

(b) Within 60 days after receiving an application under subsection (a), the Secretary shall approve or disapprove such application in accordance with this section.

(1) The Secretary shall approve such application if he determines:

(A) that under the charter documents or bylaws of the association, it is owned and controlled by producers;

(B) that the association has valid and binding contracts with its members empowering the association to sell or negotiate terms of sale of the products of its members or to negotiate for compensation for products produced under contract by its members;

(C) that the association represents a sufficient number of producers or that its members produce a sufficient quantity of agricultural products to enable it to function as an effective agent for producers in bargaining with handlers. In making this finding, the Secretary shall not take into consideration any quantity of the agricultural products contracted by producers with producer owned and controlled processing cooperatives and any quantity of such products produced by handlers;

(D) that the association has as one of its functions acting for its members in negotiations with handlers for prices and other terms of trade with respect to the production, sale, and marketing of the products of its members, or for compensation for products produced by its members under contract; and

(E) that accreditation would not be contrary to the policies of this Act as set out in section 2.

(2) if the Secretary does not approve the application under paragraph 1, then such association of producers may file amended applications with the Secretary. The Secretary, within a reasonable time, shall approve an amended application if it meets the requirements set out in paragraph (1).

(c) Accreditation by the Secretary shall be effective for such period during which the association meets the requirements for accreditation as provided for in this section. An accredited association shall file an annual report in such form as required by the Secretary to allow the Secretary to determine if the association continues to meet the accreditation requirements. If it appears to the Secretary, based on information furnished in the annual report or other information, that the association no longer meets the requirements for accreditation, the Secretary shall issue a notice of intent to revoke accreditation to the association. The proposed action shall become final and effective at the end of 30 days from receipt by the association unless within that time the association corrects the accreditation deficiency or requests a hearing. In the event a hearing is held, the decision of the Secretary shall be final.

PROHIBITED PRACTICES

SEC. 5. (a) It shall be unlawful for any handler to engage, or permit any employee or agent to engage in any of the following practices:

(1) To coerce any producer in the exercise of his right to contract with, or to join, or to refrain from contracting with or joining, or belonging to an association of producers, or to refuse to deal with any such producer because of the exercise of his right to contract with or join and belong to such an association.

(2) To discriminate against any producer with respect to price, quantity, quality, or other terms of purchase, acquisition, or other handling of agricultural products because of his membership in or contract with an association of producers.

(3) To coerce or intimidate any producer to enter into, maintain, breach, cancel, or terminate a membership agreement or marketing contract with an association of producers or a contract with a handler.

(4) To pay or loan money, give any thing of value, or offer any other inducement or reward to a producer for refusing to or ceasing to belong to an association of producers.

(5) To make false reports about the finances, management, or activities of associations of producers or handlers.

(6) To refuse to bargain in good faith with an association of producers accredited under section 4 with respect to any qualified commodity.

(7) To offer more favorable terms with respect to any qualified commodity to a producer or his agent in a bargaining unit for which an association of producers has been accredited under section 4 than offered to such association.

(8) To refuse to comply with compulsory and binding arbitration ordered by the Secretary under section 6.

(9) To conspire, combine, agree, or arrange with any other person to do, or aid or abet the doing of, any act made unlawful by this Act.

(b) It shall be unlawful for any association of producers to engage, or permit any employee or agent to engage in any of the following practices:

(1) To refuse to bargain in good faith with a handler for any qualified commodity for which the association is accredited under section 4.

(2) To coerce or intimidate a handler to breach, cancel, or terminate a marketing contract with an association of producers or a contract with a member of such an association.

(3) To make or circulate false reports about the finances, management, or activities of an association of producers or a handler.

(4) To coerce or intimidate a producer to breach, cancel, or terminate a membership agreement or marketing contract with an association of producers.

(5) To refuse to comply with compulsory and binding arbitration ordered by the Secretary under section 6.

(6) To conspire, combine, agree or arrange with any other person to do or aid or abet the doing of any practice which is in violation of this Act.

MEDIATION AND ARBITRATION

SEC. 6. (a) The Secretary may provide mediation services if requested to do so by an accredited association of producers or by a handler engaged in bargaining with an accredited association of producers and if, in the Secretary's judgment, such accredited association and handler have reached an impasse in bargaining.

(b) The Secretary shall provide assistance in proposing and implementing arbitration agreements between accredited associations of producers and handlers. The Secretary shall establish a procedure for compulsory and binding arbitration. The Secretary may require compulsory and binding arbitration under such procedure if requested to do so by an accredited association of producers or a handler and if, in the Secretary's judgment, such accredited association and handler have reached an impasse in bargaining.

ASSIGNMENT AND REMITTANCE OF ASSOCIATION DUES, FEES, OR RETAINERS

SEC. 7. If a producer directs in writing in a sales contract, membership agreement with an association of producers or other instrument that a handler deduct from an amount owed by such handler to the producer under a contract for the sale of commodities or production services any dues, fees or sums to be retained by an association of producers and the handler has notice of such written direction from the association, then the handler shall so deduct the amount of such dues, fees or sums to be retained and remit the same to such association upon payment by the handler under such contract.

COMPLAINTS, ADMINISTRATIVE REVIEW, AND JUDICIAL REVIEW

SEC. 8. (a)(1) Whenever it is charged that an accredited association or a handler has violated or is violating Section 5(a)(6) or 5(b)(1), the Secretary shall issue and cause to be served upon the person charged a complaint stating the charges. The complaint shall summon the named person to a hearing before the Secretary not later than five days after the serving of the complaint.

(2) Whenever it is charged that an association or handler has violated or is violating any other provision of this Act, the Secretary shall investigate such charges. If, upon such investigation, the Secretary has reasonable cause to believe that the person charged has violated such provision, he shall issue and cause to be served upon the person so charged a complaint stating the charges. The complaint shall summon the named person to a hearing before the Secretary at the time and place therein fixed.

(b) No complaint shall issue based upon any act occurring more than 6 months before the filing of such charge with the Secretary. Any such complaint may be amended by the Secretary in his discretion at any time prior to the issuance of an order based thereon. Any person named in the complaint shall have the right to file an answer to the original or amended complaint and to appear in person or otherwise and present testimony and evidence at the place and time fixed in the complaint. In the discretion of the Secretary any other person may be allowed to intervene in the said proceeding and to present testimony and other evidence. Upon a showing of relevance, the Secretary may issue a subpena to compel testimony or production of documents or other evidence from any person. On contest, the subpena may be enforced by a United States district court. Except as otherwise provided in this Act, any such proceeding shall, so far as practicable, be conducted in accordance with the rules of evidence and civil procedure applicable in the district courts of the United States.

(c) If, upon the preponderance of the testimony and other evidence taken, the Secretary shall be of the opinion that any person named in the complaint has engaged in or is engaging in any prohibited practice, then the Secretary shall state findings of fact and shall issue and cause to be served on such person an order requiring such person to cease and desist from such practice and to take such affirmative action as will effectuate the policies of this Act. Such order may further require such person to make reports from time to time showing the extent of compliance with the order. If upon the preponderance of the testimony and other evidence, the Secretary shall determine that the person named in the complaint has not engaged in or is not engaging in any such prohibited practice, then the Secretary shall issue findings of fact and an order dismissing the complaint.

(d) Any person aggrieved by a final order of the Secretary under subsection (c) may obtain review of such order in the United States Court of Appeals for the District of Columbia Circuit, by filing in such court, within 30 days from the date of such order, a written petition praying that the order of the Secretary be modified or set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the Secretary, and thereupon the aggrieved party shall file in the court the record in the proceeding, certified by the Secretary. The order and findings of the Secretary shall be sustained if supported by substantial evidence when considered on the record as a whole.

(e) Petitions filed under subsection (d) shall be reviewed expeditiously, and if possible not later than ten days after such petitions are filed.

INVESTIGATION POWERS OF SECRETARY

SEC. 9. In order to carry out the objectives of this Act, the Secretary shall conduct such investigations and hearings as he shall consider necessary. In connection therewith, he may require the maintenance of records, the attendance and testimony of witnesses and the production of evidence under oath. Any records, reports or information obtained under this section shall be available to the public except that upon a showing satisfactory to the Secretary that, if made public, they would divulge confidential business information, the Secretary shall consider such record, report or information, or particular portion thereof confidential in accordance with Section 1905 of Title 18, United States Code, except that they may be disclosed to other offices, employees or authorized representatives of the United States concerned with carrying out this Act or when relevant in any proceeding under this Act.

SUIT FOR DAMAGES

SEC. 10. Any person injured in his business or property by reason of any violation of, or combination or conspiracy to violate, any provision of section 5 may sue therefor in any district court of the United States without respect to the amount in controversy, and shall recover damages sustained, including reasonable attorney fees and costs of bringing such suit. Any action to enforce any cause of action under this section shall be forever barred unless commenced not later than two years after such cause of action accrued.

CIVIL PENALTIES AND FINES

SEC. 11. (a) Any person who violates section 5 may be assessed a civil penalty by the Secretary of not more than $100,000 for each offense. No civil penalty shall be assessed unless the person charged shall have been given notice and opportunity for a hearing on such charge. In determining the amount of the penalty, the Secretary shall consider the appropriateness of such penal-

ty to the size of the business of the person charged, the effect on the person's ability to continue in business, and the gravity of the violation. If the Secretary is unable to collect such civil penalty, then the Secretary shall refer the collection to the Attorney General, who shall recover such amount by action in the appropriate United States district court.

(b) Any person who knowingly violates section 5, or who permits or authorizes any agent, officer, or employee to violate such section, shall be guilty of a misdemeanor and shall on conviction be fined not more than $25,000, or imprisoned for not more than 1 year, or both.

AUTHORITY OF SECRETARY TO MAKE RULES

SEC. 12. The Secretary may make such rules, regulations and orders as may be necessary to carry out the provisions of this Act.

EFFECT ON STATE LAW

SEC. 13. The provision of this Act shall not be construed to change or modify existing State law nor to prevent a State from enacting similar legislation nor to deprive the proper state courts of jurisdiction, provided, that, no state may enact legislation which permits any action prohibited by this Act.

SEPARABILITY

SEC. 14. If any provision of this Act or the application thereof to any person or circumstance is held invalid, the validity of the remainder of the Act and of the application of such provision to other persons and circumstances shall not be affected thereby.●

CONFERENCE REPORT ON H.R. 4209

Mr. BENJAMIN submitted the following conference report and statement on the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 97-331)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 13, 14, 38, 39, 91, and 94.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 10, 12, 18, 19, 21, 22, 27, 28, 29, 37, 41, 42, 43, 44, 45, 49, 51, 52, 57, 59, 61, 62, 69, 70, 71, 72, 73, 76, 79, 81, 85, 86, 92, 95, and 98, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$35,100,000*; and the Senate agree to the same.

Amendment numbered 2:

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *consent*; and the Senate agree to the same.

Amendment numbered 4:

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,400,000,000*; and the Senate agree to the same.

Amendment numbered 6:

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$400,000,000*; and the Senate agree to the same.

Amendment numbered 9:

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$49,483,000*; and the Senate agree to the same.

Amendment numbered 11:

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *$5,000,000*; and the Senate agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$2,220,000,000*; and the Senate agree to the same.

Amendment numbered 17:

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$800,000,000*; and the Senate agree to the same.

Amendment numbered 23:

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$29,982,000*; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$192,440,000*; and the Senate agree to the same.

Amendment numbered 32:

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$14,500,000*; and the Senate agree to the same.

Amendment numbered 33:

That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$9,667,000*; and the Senate agree to the same.

Amendment numbered 34:

That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows:

Territorial Highways

For necessary expenses in carrying out the provisions of title 23, United States Code, sections 152, 153, 215, and 402, $4,000,000, to remain available until expended.

And the Senate agree to the same.

Amendment numbered 35:

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$325,000,000*; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$81,900,000*; and the Senate agree to the same.

Amendment numbered 40:

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows: *Provided further, That, of the funds appropriated under this heading $6,000,000 shall be available only for activities at the Transportation Systems Center.*; and the Senate agree to the same.

Amendment numbered 47:

That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$9,500,000;* and the Senate agree to the same.

Amendment numbered 48:

That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$9,000,000;* and the Senate agree to the same.

Amendment numbered 60:

That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$26,888,000;* and the Senate agree to the same.

Amendment numbered 63:

That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,479,000,000;* and the Senate agree to the same.

Amendment numbered 65:

That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,430,000,000;* and the Senate agree to the same.

Amendment numbered 68:

That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$560,000,000*; and the Senate agree to the same.

Amendment numbered 74:

That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$2,000,000*; and the Senate agree to the same.

Amendment numbered 75:

That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$27,000,000*; and the Senate agree to the same.

Amendment numbered 80:

That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$450,000*; and the Senate agree to the same.

Amendment numbered 82:

That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$5,000,000*; and the Senate agree to the same.

Amendment numbered 83:

That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$76,000*; and the Senate agree to the same.

Amendment numbered 87:

That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$92,500,000*; and the Senate agree to the same.

Amendment numbered 88:

That the House recede from its disagreement to the amendment of the Senate numbered 88, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$8,000,000,000*; and the Senate agree to the same.

Amendment numbered 96:

That the House recede from its disagreement to the amendment of the Senate numbered 96, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *322.*; and the Senate agree to the same.

Amendment numbered 97:

That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *323.*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 5, 7, 8, 15, 20, 24, 25, 30, 31, 46, 50, 53, 54, 55, 56, 58, 64, 66, 67, 77, 78, 84, 89, 90, 93, 99, 100, 101, 102, 103, and 104.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

TITLE I—DEPARTMENT OF TRANSPORTATION

OFFICE OF THE SECRETARY

Salaries and expenses

Amendment No. 1: Appropriates $35,100,000 instead of $35,000,000 as proposed by the Senate and $35,193,204 as proposed by the House.

The conferees note that the Department has complied with the directive issued in the House report to submit a cost/benefit study analyzing future procurements of automated office equipment. The conferees agree to lift the restriction of such procurements contained in the House report so long as the benefit to cost ratios identified in the Department's analysis continue to be achieved.

Amendment No. 2: The conference agreement includes language prohibiting the sale or transfer of any Consolidated Rail Corporation securities held by the Federal Government without prior consent by the House and Senate Appropriations Committees. The House bill required prior approval and the Senate bill required prior notification.

COMMUTER RAIL SERVICE

Amendment No. 3: Deletes $22,000,000 appropriation proposed by the House. The appropriation for this program is discussed further under Amendment No. 55.

COAST GUARD

Operating expenses

Amendment No. 4: Appropriates $1,400,000,000 instead of $1,337,207,000 as proposed by the Senate and $1,409,086,000 as proposed by the House.

The conferees understand that the Coast Guard is considering substantial changes to existing regulations which would increase the size of tanker vessels allowed to operate in Puget Sound of the State of Washington. It is the conferees' belief that the Coast Guard should demonstrate that any increase in the present limit would also increase the level of environmental protection presently being afforded to the Puget Sound region. The conferees therefore direct the Coast Guard to hold public hearings prior to the implementation of any changes in existing regulations.

Amendment No. 5: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

That an additional $5,000,000 shall be derived from the National Recreational Boating Safety and Facilities Improvement Fund to implement a program of recreational boat safety, designed by the Secretary pursuant to 46 U.S.C. 1475 and for the purposes set out in Public Law 97-12: Provided further,

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Acquisition, construction, and improvements

Amendment No. 6: Appropriates $400,000,000 instead of $391,000,000 as proposed by the House and $537,000,000 as proposed by the Senate.

The conferees direct that a report be submitted to the House and Senate Committees on Appropriations by January 1, 1982, to outline what criteria are being used for asset assignment and what decisions have been made to date. The conferees also direct that the Coast Guard, in the process of formalizing these assignment criteria, give full consideration and significant priority to the need to assign more assets to the agency's drug interdiction responsibilities. The conferees do not accept the Coast Guard argument that assets assigned to the 1st, 3d, and 5th districts can be of significant assistance to the drug interdiction problems in the 7th district.

The conferees are concerned that the Coast Guard has failed to achieve the productivity gains that were used to help justify replacing existing Loran-C vacuum tube transmitters with new solid state transmitters. The conferees therefore expect the Coast Guard to proceed with future procurements of solid state transmitters only if such Loran-C stations will be operated with four or less personnel. The conferees believe that ample experience exists with Canadian and other foreign government Loran solid state operations to make this a reasonable condition of future procurement. The conferees also direct that the Department of Transportation provide a comprehensive plan for implementation of the unmanned Loran-C operations program and the reassignment of the redundant personnel to the House and Senate Committees on Appropriations not later than February 15, 1982.

Amendment No. 7: Report in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$175,000,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Alteration of bridges

Amendment No. 8: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$12,000,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Reserve training

Amendment No. 9: Appropriates $49,483,000 instead of $45,000,000 as proposed by the Senate and $50,900,000 as proposed by the House.

Research, development, test, and evaluation

Amendment No. 10: Appropriates $22,000,000 as proposed by the Senate instead of $29,730,000 as proposed by the House.

Within the funds provided, the Coast Guard is directed to promptly complete the Ammonia Spill Study Program, which is jointly supported by the United States, foreign governments, and private industry. This research, which is more than two-thirds completed, is expected to provide specific data that can be of significant benefit to public health and safety on the characteristics of anhydrous ammonia.

The conferees direct the Coast Guard to obtain the approval of the House and Senate Committees on Appropriations before closing the research and development facility at Avery Point in Groton, Connecticut.

The conferees also direct the Coast Guard to submit its research, development, test and evaluation program plan for fiscal year 1982 to the Committees on Appropriations for approval prior to implementation.

OFFSHORE OIL POLLUTION COMPENSATION FUND

Amendment No. 11: Appropriates $5,000,000 instead of $9,550,000 as proposed by the House and an indefinite appropriation as proposed by the Senate.

COAST GUARD SUPPLY FUND

Amendment No. 12: Appropriates $1,320,000 as proposed by the Senate instead of $1,500,000 as proposed by the House.

DEEPWATER PORT LIABILITY FUND

Amendment No. 13: Appropriates $5,000,000 as proposed by the House instead of an indefinite appropriation as proposed by the Senate.

POLLUTION FUND

Amendment No. 14: Deletes $1,000,000 appropriation proposed by the Senate. According to information provided by the Department of Transportation, the unobligated balance for this program was $20,172,000 as of September 30, 1981.

FEDERAL AVIATION ADMINISTRATION

Operations

Amendment No. 15: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate to include language to pay lenders of guaranteed aircraft purchase loans where default occurs and collateral cannot be sold to satisfy the Government's obligation.

Amendment No. 16: Appropriates $2,220,000,000 instead of $2,199,792,000 as proposed by the Senate and $2,306,200,000 as proposed by the House.

The amount provided in the conference agreement includes $57,500,000 for the Administration's proposal to raise the pay of air traffic controllers and other selected personnel associated with the operation of a safe and effective air traffic control system. The FAA is directed to report immediately to the House and Senate Committees on Appropriations if this requirement will result in the reduction of any personnel essential to the operation of a safe and effective air traffic control system.

Amendment No. 17: Provides that $800,000,000 of the appropriation shall be derived from the Airport and Airway Trust Fund instead of $750,000,000 as proposed by the Senate and $850,000,000 as proposed by the House.

Facilities, engineering and development

Amendment No. 18: Appropriates $17,797,000 as proposed by the Senate instead of $19,000,000 as proposed by the House.

Facilities and equipment

(Airport and Airway Trust Fund)

Amendment No. 19: Appropriates $284,847,000 as proposed by the Senate instead of $353,570,000 as proposed by the House. The conference agreement includes the following amounts:

Air route centers	$47,340,000
Towers and terminals	124,468,000
Flight service stations	49,649,000
Air navigation facilities	41,653,000
Miscellaneous facilities	21,737,000
Total	284,847,000

The conferees expect the House and Senate Committees on Appropriations to be promptly advised in writing of any decision to deviate from the above allocation by over 10 percent. Such notification should include a full explanation of the reasons necessitating such action.

In addition to the projects specifically identified in the House and Senate Committee reports, the conferees expect the Federal Aviation Administration to give attention to the need for a new tower facility at the Southern Illinois Airport at Carbondale, Illinois.

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate earmarking $4,000,000 for the design, engineering, construction, and equipment for an air traffic control training facility at the University of North Dakota at Grand Forks.

Because of the termination of approximately 12,000 air traffic controllers, the conferees believe that training of replacement controllers is of the highest priority and have therefore concurred with the Senate in providing funds for an additional training facility. It is the conferees' understanding that the FAA training academy located in Oklahoma City, Oklahoma, will be operating 24 hours per day, 7 days a week. The University of North Dakota at Grand Forks has a special aviation curriculum that should be integrated into the FAA's training program. The conferees direct the Secretary to take advantage of these additional facilities in order to expedite the rebuilding of the air traffic control system.

Research, engineering and development

(Airport and Airway Trust Fund)

Amendment No. 21: Appropriates $71,800,000 as proposed by the Senate instead of $80,000,000 as proposed by the House.

GRANTS-IN-AID FOR AIRPORTS

(*Liquidation of contract authorization*)

(Airport and Airway Trust Fund)

Amendment No. 22: Appropriates $471,000,000 as proposed by the Senate instead of $481,000,000 as proposed by the House.

Operation and maintenance, Metropolitan Washington Airports

Amendment No. 23: Appropriates $29,982,000 instead of $26,922,000 as proposed by the Senate and $30,593,000 as proposed by the House.

Construction, Metropolitan Washington Airports

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amemdment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$31,700,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Aircraft purchase loan guarantee program

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert:

New commitments to guarantee loans shall be exclusively for the purchase of aircraft designed to have a maximum passenger capacity of sixty seats or less or a maximum cargo payload of eighteen thousand pounds or less, and shall not exceed in the aggregate $100,000,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

FEDERAL HIGHWAY ADMINISTRATION

Limitation on general operating expenses

Amendment No. 26: Limits general operating expenses to $192,440,000 instead of $187,440,000 as proposed by the Senate and $200,400,000 as proposed by the House. The conference agreement includes $5,000,000 for the rural transportation assistance program.

Motor carrier safety

Amendment No. 27: Appropriates $12,893,000 as proposed by the Senate instead of $14,500,000 as proposed by the House.

Highway safety research and development

Amendment No. 28: Appropriates $6,860,000 as proposed by the Senate instead of $7,200,000 as proposed by the House.

Amendment No. 29: Provides transfer of $1,500,000 as proposed by the Senate instead of $1,800,000 as proposed by the House.

Highway beautification

Amendment No. 30: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment amended to read as follows:

Highway beautification

For necessary expenses in carrying out section 131 of title 23 U.S.C. and section 104(a)(11) of the Surface Transportation Assistance Act of 1978, $2,000,000 to remain available until expended: Provided, That, notwithstanding any other provision of law, any determination as to whether any outdoor advertising sign, display, or device is or has been lawfully erected under state law or is entitled to compensation shall not be affected by any waiver of compensation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees note that there has been considerable confusion surrounding the provisions in the Highway Beautification Act concerning just compensation for outdoor advertising signs, displays, or devices lawfully erected under State law, but not permitted under the Act. This uncertainty has led many States to adopt their own rules and regulations in an attempt to obviate the problems perceived to have arisen under the Act. The Conference agreement includes language intended to clarify Congressional intent.

The language added by the conferees would clarify Congressional intent regarding permit language. Apparently, when the Act was enacted, many States believed that, despite the shared compensation aspect of the Act, they might be responsible for the total amount of any just compensation to be paid upon removal of signs, displays, and devices, if they were, despite conformance with State law, nonconforming under the Act. One method employed by the States to this end was the imposition of a requirement that those receiving permits to erect signs, displays or devices (which conformed to existing State Law) waive their rights to compensation if those signs had to be removed, at some future date, pursuant to promulgation of federal regulation and Federal-State agreements.

The conferees wish to make it clear that any determination as to whether any outdoor advertising sign, display, or device is or has been lawfully erected under State law or is entitled to compensation shall not be affected by any waiver of compensation.

Railroad-highway crossings demonstration projects

Amendment No. 31: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $2,835,000 for 23 U.S.C. 322(b).

Amendment No. 32: Appropriates $14,500,000 instead of $12,500,000 as proposed by the Senate and $18,000,000 as proposed by the House. The conference agreement includes funds for those projects identified in the House and Senate Committee reports.

Amendment No. 33: Provides that $9,667,000 of the appropriation shall be derived from the Highway Trust Fund instead of $8,325,000 as proposed by the Senate and $12,000,000 as proposed by the House.

Territorial highways

Amendment No. 34: Appropriates $4,000,000 instead of $6,000,000 as proposed by the House.

INTERSTATE TRANSFER GRANTS—HIGHWAYS

Amendment No. 35: Appropriates $325,000,000 instead of $200,000,000 as proposed by the Senate and $400,000,000 as proposed by the House. The conference agreement includes the following amounts:

Location:	
New Jersey	$9,000,000
Washington, D.C	9,000,000
Philadelphia	22,000,000
Oregon	60,000,000
Northeast Illinois	125,000,000
Hartford	13,000,000
Tucson	10,000,000
Cleveland	7,000,000
Denver	10,000,000
New York	8,000,000
Baltimore	4,000,000
Omaha	6,000,000
Memphis	20,000,000
Hennepin County	11,000,000
Duluth	1,000,000
Indianapolis	10,000,000
Total	325,000,000

The conferees recognize that delays in some regions' projects could necessitate adjustments to the above allocations. The conferees expect these adjustments, if required, to be accomplished through the normal reprogramming process.

The conferees note that Portland and Hartford are two of five regions which were entitled to contract authority prior to the rescission of that authority by the Department of Transportation and related Agencies Appropriation Act, 1980. The conferees reaffirm the language included in that year's House Committee report, which is as follows:

In making this rescission and replacing it with direct appropriations, the Committee does not intend to disturb any existing commitments or the total amount of funding that these areas are eligible to receive.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

Operations and research

Amendment No. 36: Appropriates $81,900,000 instead of $85,876,000 as proposed by the House and $79,000,000 as proposed by the Senate. The conference agreement includes the following amounts:

Rulemaking	$6,538,000
Enforcement	10,612,000
Highway safety	11,500,000
Research and analysis	38,750,000
General administration	14,500,000
Total	81,900,000

The conferees expect the appropriated funds to be expended according to the above distribution. Any proposal to reallocate funds between these categories during fiscal year 1982 should be submitted to the House and Senate Committees on Appropriations in the form of a reprogramming request. Similarly, if major projects or programs are developed for fiscal year 1982 that have not been presented in the fiscal year 1982 budget request, the conferees expect that an appropriate reprogramming request will be made.

Amendment No. 37: Provides that $24,785,000 of the appropriation be derived from the Highway Trust Fund as proposed by the Senate instead of $27,185,300 as proposed by the House.

Amendment No. 38: Provides that $39,664,700 of the appropriation remain available until expended as proposed by the House instead of $43,000,000 as proposed by the Senate.

Amendment No. 39: Provides that $12,512,000 of the amount appropriated to remain available until expended be derived from the Highway Trust Fund as proposed by the House instead of $13,608,000 as proposed by the Senate.

Amendment No. 40: Provides that $6,000,000 of the amount appropriated be used for research and analysis projects at the Transportation Systems Center in Cambridge, Massachusetts instead of $10,500,000 as proposed by the House. The Senate bill proposed to delete the specific earmarking for the Transportation Systems Center.

State and community highway safety

(Liquidation of contract authority)

Amendment No. 41: Strikes the word "Including" in the heading as proposed by the Senate.

Amendment No. 42: Deletes appropriation of $975,308 for highway safety programs in the territories as proposed by the Senate.

Amendment No. 43: Appropriates $150,200,000 for the payment of obligations incurred in carrying out the provisions of 23 U.S.C. 402 and 406 as proposed by the Senate instead of $145,000,000 as proposed by the House.

FEDERAL RAILROAD ADMINISTRATION

OFFICE OF THE ADMINISTRATOR

Amendment No. 44: Appropriates $7,522,000 as proposed by the Senate instead of $4,315,000 as proposed by the House.

Railroad safety

Amendment No. 45: Appropriates $26,676,000 as proposed by the Senate instead of $26,904,000 as proposed by the House. The conferees believe that an effective railroad safety program requires that sufficient travel funds be made available so that safety inspectors are not constrained from making field inspections. The conferees therefore expect the FRA to make sufficient funding available within this appropriation to provide for at least 15 travel days per month for its railroad safety inspectors. The FRA is also directed to report immediately to the House and Senate Appropriations Committees if this requirement in and of itself will ever cause a reduction in the number of railroad safety inspectors.

Railroad research and development

Amendment No. 46: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$39,000,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes $5,000,000 to complete preliminary engineering work for the East St. Louis Metropolitan Gateway Area railroad restructuring project.

The conferees direct the Department of Transportation to obtain the approval of the House and Senate Committees on Appropriations before making any changes in the ownership status of the Transportation Test Center.

The conferees support the formation of the Japan-United States Rail Congress by legislators from the U.S. Senate and House of Representatives and the Japanese Diet. This bilateral Congress proposes to introduce a system of high-speed passenger trains in this nation's heavily populated transportation corridors and with it to create jobs for the construction and operation of the system and the manufacture of equipment. The conferees believe that high-speed passenger train service in Japan, France and elsewhere demonstrates that it can be financially self-supporting and that adequate private capital can be made available. The conferees congratulate the Joint Economic Committee and Science and Tech-

nology Committee for their support of high-speed rail passenger service. Equal plaudits go to the Senate Rail Caucus and Amtrak for their support of new technology and improved rail transportation.

The conferees direct the Executive Branch, including the Department of Transportation and its Federal Railroad Administration, to prepare in conjunction with Amtrak a report to the Congress planning the creation of an American high-speed passenger rail system. The FRA and Amtrak are specifically directed to determine the feasibility of high speed corridor operation between Los Angeles and San Diego, Orlando and Miami, Chicago and Detroit, Chicago and Milwaukee, and Chicago and Cincinnati via Indianapolis (along Interstate right-of-way).

RAIL SERVICE ASSISTANCE

Amendment No. 47: Appropriates $9,500,000 for rail service assistance and necessary administrative expenses instead of $5,659,000 as proposed by the House and $14,313,000 as proposed by the Senate. The conferees direct that the authorized position level be maintained at 85 as proposed by the House instead of 99 as proposed by the Senate.

Amendment No. 48: Appropriates $9,000,000 for the Minority Business Resource Center instead of $8,756,000 as proposed by the Senate and $9,965,000 as proposed by the House.

Amendment No. 49: Inserts the word "immediately" as proposed by the Senate instead of "on October 1, 1981" as proposed by the House.

CONRAIL LABOR PROTECTION

Amendment No. 50: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert:

Rail Labor Assistance

(Transfer of funds)

For payment of benefits under section 1160 of the Northeast Rail Service Act of 1981, $25,000,000, to remain available until expended, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": Provided, That such sum shall be considered to have been appropriated under said section 1160.

Conrail workforce reduction program

(Transfer of funds)

For expenses of the Conrail Workforce Reduction Program as authorized by section 713 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, $100,000,000, to remain available until expended, to be derived from the unobligated balance of "Payments for Purchase of Conrail Securities": Provided, That, such sum shall be considered to have been appropriated to the Secretary under section 713 of the Regional Rail Reorganization Act of 1973 to be available for the payment of termination allowances under section 702 of that Act: Provided further, That, for the purposes of section 710 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, such sum shall be considered to have been appropriated under section 713 of the Regional Rail Reorganization Act of 1973 and counted against the limitation on the total liability of the United States.

Conrail labor protection

(Transfer of funds)

For labor protection as authorized by section 713 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, $85,000,000, to remain available until expended, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": Provided That, such sum shall be considered to have been appropriated to the Secretary under said section 713 for transfer to the Railroad Retirement Board for the payment of benefits under section 701 of the Regional Rail Reorganization Act of 1973, as amended: Provided further, That, for purposes of section 710 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, such sum shall be considered to have been appropriated under section 713 of the Regional Rail Reorganization Act of 1973 and counted against the limitation on the total liability of the United States: Provided further, That, in addition, such sums as may be necessary shall be derived from the unobligated balances of "Payments for Purchase of Conrail Securities" for necessary expenses of administration of section 701 of the Regional Rail Reorganization Act of 1973 by the Railroad Retirement Board.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees intend that any dispute or controversy concerning eligibility for any benefit under section 701 may be resolved under such procedures as the Railroad Retirement Board may by regulation provide, including, but not limited to, an arbitration process similar to that used under labor protection legislation dealing with Milwaukee Railroad employees. Each railroad that employs or has employed a person who may be eligible for a benefit should provide any information required by the Board to determine such eligibility. The administrative powers and penalties set forth in sections 9 and 12 of the Railroad Unemployment Insurance Act would be available to the Board with respect to the administraton of the section 701 funds provided by this Act.

The conferees direct the Federal Railroad Administration in conjunction with the Railroad Retirement Board to submit a detailed report to the House and Senate Committees on Appropriations by no later than December 31, 1981, on the estimated fiscal year 1982 funding required by the Railroad Retirement Board to administer the section 701 program.

Northeast corridor improvement program

Amendment No. 51: Appropriates $176,000,000 as proposed by the Senate instead of $200,000,000 as proposed by the House. This amount, together with a carryover balance of $258,481,000 from previous years' appropriations, will provide a total program level of $434,481,000 in fiscal year 1982. The conferees expect the Federal Railroad Administration to honor its commitment made in testimony before the House Appropriations Committee that the work items deleted in the proposed fiscal year 1982 funding reduction from $200,000,000 to $176,000,000 will be deferred into fiscal year 1983.

Grants to the National Railroad Passenger Corporation

Amendment No. 52: Appropriates $569,000,000 as proposed by the Senate instead of $544,000,000 as proposed by the House. This amount, together with $166,000,000 derived from the permanent appropriation, will provide $735,000,000 for Amtrak operating losses, capital improvements and labor protection costs. The House bill language requiring specified funding levels for operating losses, capital improvements and labor protection costs is also deleted.

It is the expectation of the conferees that, once necessary repair work in the Baltimore Tunnel is completed, Amtrak will restore the Metroliner express stops for Wilmington, Delaware. Additionally, the conferees urge Amtrak not to make any further service reductions to Wilmington during the time this track rehabilitation program is continuing.

Amendment No. 53: Reported in technical disagreement. The managers of the part of the House will offer a motion to recede and concur in the amendment of the Senate which directs Amtrak to continue rail passenger service along the route of the Cardinal between Chicago and Washington, D.C. via Cincinnati. The conferees are encouraged by the improved ridership on the Cardinal in the past year and believe that further improvement is clearly possible. Amtrak is directed to improve local advertising and reservation service along the route of the Cardinal. Also, the conferees expect Amtrak to report before April 1, 1982, to the House and Senate Committees on Appropriations on the feasibility of increasing ridership on the Cardinal through route changes, fare restructuring, and service improvements. In particular, this report should comment on the practicality of routing the Cardinal through Indianapolis, Indiana.

Amendment No. 54: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

Notwithstanding any other provision of law, none of the funds appropriated for the benefit of the Corporation pursuant to this Act or the revenues or other assets of the Corporation or any railroad subsidiary thereof shall be available for payment to any State, political subdivision of a State, or local taxing authority for any taxes or other fees levied on the Corporation: Provided, That notwithstanding any provision of law, the Corporation shall pay all taxes or other fees appropriately levied on its facilities in Beech Grove, Indiana.

(Disapproval of Deferral)

The Congress disapproves in its entirety deferral D82-217 relating to the Federal Railroad Administration, Grants to the National Railroad Passenger Corporation, as set forth in the message of November 6, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective immediately and the amount of the proposed deferral disapproved herein shall be made available for obligation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Commuter rail service

Amendment No. 55: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

Commuter rail service

For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, $15,000,000, and for necessary expenses to carry out section 1139(b) of Public Law 97-35, $45,000,000, to remain available until expended.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

PAYMENTS TO THE ALASKA RAILROAD REVOLVING FUND

Amendment No. 56: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $6,160,000 for Alaska Railroad capital improvements and operating expenses.

Redeemable preference shares

Amendment No. 57: Changes heading as proposed by the Senate.

Amendment No. 58: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *for uses authorized for the Fund, in amounts not to exceed $67,500,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes the following amounts:

Location:	
East St. Louis Metropolitan Gateway Project	$20,000,000
OKT (Kansas-Ft. Worth/Dallas rehabilitation)	11,000,000
Grain route—Twin Cities-Kansas City	15,000,000
Milwaukee mainline	6,000,000
SSW/ICG yard	5,000,000
East St. Louis and other meritorious projects	10,500,000
Total	67,500,000

The conferees expect that appropriate consideration will be given to any application submitted by the Ann Arbor Railroad System.

The conferees agree that a comprehensive evaluation of the section 505 program must be completed to aid Congress in its future funding decisions for this program. The Federal Railroad Administration is therefore directed to submit the results of a comprehensive assessment of this program to the House and Senate Committees on Appropriations by no later than February 15, 1982. This submission should include an analysis of whether past section 505 investments have effectively contributed to the statutory goals of this program. Such an analysis should be predicated on data showing the impact of section 505 funding on the financial performance of the affected railroads; service and operational efficiencies; employment; labor costs and productivity; safety; and energy conservation.

The conferees also expect this report to explain the Department's views on the future direction of this program. Such views should take into account the policy of deregulation contained in the Staggers Rail Act of 1980, the Administration's policy to minimize Federal involvement in the private sector, the Administration's stated policy to emphasize alternatives to the section 505 program, the ability of railroads to raise capital from private sources for rehabilitation and restructuring projects, and the future need for rehabilitation improvements.

Investment in fund anticipation notes

Amendment No. 59: Deletes provision as proposed by the Senate. This is a technical amendment which is necessary to provide borrowing authority for the redeemable preference share program. The provision is reinserted under a separate heading (Amendment No. 84).

URBAN MASS TRANSPORTATION ADMINISTRATION

Administrative expenses

Amendment No. 60: Appropriates $26,888,000 instead of $25,476,000 as proposed by the Senate and $28,300,000 as proposed by the House.

In furtherance of closing the section 17 grant program, which expired in September 1978, UMTA is directed to settle, as is, without additional transference of funds between UMTA and grant recipients or offsetting deductions from other accounts, any disputes with grantees relating to costs which were anticipated to have been incurred for use of the Northeast Corridor.

Research, development, and demonstrations and university research and training

Amendment No. 61: Appropriates $61,600,000 as proposed by the Senate instead of $69,000,000 as proposed by the House. The conference agreement includes $8,500,000 for the continued development of advanced group rapid transit, including magnetic transit. The conferees expect that the planned test loops be built as soon as possible and that completion of the test phase be expedited to show initial results in 1984.

Amendment No. 62: Earmarks $58,600,000 of the appropriation under this heading for research, development and demonstrations as proposed by the Senate instead of $66,000,000 as proposed by the House.

URBAN DISCRETIONARY GRANTS

Amendment No. 63: Appropriates $1,479,000,000 instead of $1,428,000,000 as proposed by the Senate and $1,555,000,000 as proposed by the House. In addition to the funds included in the conference agreement under this amendment, there will be an additional $231,000,000 in unobligated carryover funds and transfers available under this heading. These funds are to be distributed as follows:

Bus and bus facilities	$540,000,000
Existing rail modernization and extensions	895,000,000
New systems:	
Miami (rail construction)	70,000,000
Buffalo (light rail)	16,200,000
Atlanta (rail construction)	40,800,000
Detroit (central automated transit system)	20,000,000
Miami (circulator)	26,000,000
Los Angeles (preliminary engineering)	10,000,000
Urban Initiatives	30,000,000
Planning	55,000,000
Innovative techniques and technology introduction	7,000,000
Total	1,710,000,000

The conference agreement includes $10,556,434 for the design and construction of a bus maintenance facility in Gary, Indiana.

The conferees direct the Secretary to expedite approval of the application for section 3 urban discretionary grant funding of the Detroit Riverfront West development project. Furthermore, the conferees expect that this project be funded from some category other than the urban initiatives program.

The conferees expect UMTA to continue to fund applications for alternatives analysis, not excluding any mode, in areas such as Seattle, Baltimore, San Francisco, Minneapolis, Boston and Orange County, California.

The conference report on the Department of Transportation and Related Agencies Appropriations Act, 1981, includes language under Amendment No. 43 regarding the administration of the "Buy America" provisions of section 401 of Public Law 95-599. The conferees reiterate the language contained in last year's conference report and direct UMTA to administer its capital grant program accordingly.

NON-URBAN FORMULA GRANTS

Amendment No. 64: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *1970 decennial census until March 31, 1982, after which date funds apportioned under this appropriation shall be distributed on the basis of data from the 1980*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees intend that 50 percent of the section 18 appropriation be distributed according to the 1970 decennial census and 50 percent of the section 18 appropriation be distributed according to the 1980 decennial census. Those cities which will move from the section 18 program to the section 5 program under the 1980 census will be eligible for the equivalent of six months funding under each program in accordance with the appropirate census.

URBAN FORMULA GRANTS

Amendment No. 65: Appropriates $1,430,000,000 instead of $1,381,000,000 as proposed by the Senate and $1,480,000,000 as proposed by the House. The conference agreement includes the following amounts:

Tier I	$825,000,000
Tier II	165,000,000
Commuter rail/fixed guideway	90,000,000
Bus and bus facilities	350,000,000
Total	1,430,000,000

The conference agreement includes $49,000,000 in addition to the Senate allowance for tier I. The conferees assume that the increase in fiscal year 1982 outlays resulting from this tier I funding increase will be offset by UMTA's controlling fiscal year 1982 capital grant obligations according to the following schedule:

	Percent
1st quarter	20
2d quarter	20
3d quarter	20
4th quarter	40

Amendment No. 66: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *1970 decennial census until March 31, 1982, after which date funds apportioned under this appropriation shall be distributed on the basis of data from the 1980*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees intend that 50 percent of the section 5 appropriation be distributed according to the 1970 decennial census and 50 percent of the section 5 appropriation be distributed according to the 1980 decennial census. Those cities which will move from the section 18 program to the section 5 program under the 1980 census will be eligible for the equivalent of six months funding under each program in accordance with the appropriate census.

WATERBORNE TRANSPORTATION DEMONSTRATION PROJECT

Amendment No. 67: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which rescinds $2,000,000.

INTERSTATE TRANSFER GRANTS—TRANSIT

Amendment No. 68: Appropriates $560,000,000 instead of $550,000,000 as proposed by the Senate and $600,000,000 as proposed by the House. The conference agreement includes the following amounts:

Location:	
Boston	$125,000,000
New York	15,000,000
New Jersey	25,000,000
Washington, D.C	290,000,000
Philadelphia	9,000,000
San Francisco	3,000,000
Oregon	45,000,000
Sacramento	2,000,000
Northeast Illinois	25,000,000
Minneapolis-St. Paul	1,000,000
Baltimore	7,000,000
Duluth	1,000,000
Unearmarked	12,000,000
Total	560,000,000

The conferees recognize that delays in some regions' projects could necessitate adjustments to the above allocations. The conferees expect these adjustments, if required, to be accomplished through the normal reprogramming process.

In cooperation with the Department of Transportation policy that section 3 funds shall not be used for new rail starts, the conferees have agreed to fund the Banfield light rail project with Interstate transfer funds. The conferees recognize that this Department of Transportation policy places a substantial burden on other regions within the States that rely on the limited Interstate transfer highway funds. Therefore, in allocating $45,000,000 in Interstate transfer transit funds for the Banfield project, the conferees direct that such funding be available for relocating the highway and building or rebuilding overpass structures which have been initiated as part of the comprehensive effort to accomodate the total light rail system in the Banfield corridor.

RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

Research and special programs

Amendment No. 69: Appropriates $26,441,000 as proposed by the Senate instead of $29,837,000 as proposed by the House.

Amendment No. 70: Provides that $8,703,000 of the appropriation shall remain available until expended for conducting research and development as proposed by the Senate instead of $11,260,000 as proposed by the House. The conference agreement includes the following amounts:

Hazardous materials technology	$1,100,000
Pipeline safety technology	678,000
Advanced research and technology	3,600,000
Telecommunications	75,000
University research	2,500,000
Information and data management	750,000
Total	8,703,000

The conferees direct that, of the funds available for advanced research and technology, $460,000 shall be made available for the "Transition Path Analysis" and Northwest Indiana Multimodal Freight System Analysis" project conducted by the Automotive Transportation Center at Purdue University.

Amendment No. 71: Provides that $3,184,000 of the appropriation shall remain available until expended for grants-in-aid to State natural gas pipeline safety programs as proposed by the Senate instead of $3,618,000 as proposed by the House.

OFFICE OF THE INSPECTOR GENERAL

Salaries and expenses

(INCLUDING TRANSFER OF FUNDS)

Amendment No. 72: Appropriates $13,047,000 for necessary expenses of the Office of the Inspector General as proposed by the Senate instead of $14,826,000 as proposed by the House.

Amendment No. 73: Provides an additional $9,200,000 for necessary expenses of the Office of the Inspector General to be derived from funds available under 23 U.S.C. 104(a) as proposed by the Senate instead of $9,454,000 as proposed by the House.

TITLE II—RELATED AGENCIES ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

Salaries and expenses

Amendment No. 74: Appropriates $2,000,000 instead of $1,821,000 as proposed by the Senate and $2,070,000 as proposed by the House. The conferees direct the Board to maintain a minimum of 25 positions.

CIVIL AERONAUTICS BOARD

Salaries and expenses

Amendment No. 75: Appropriates $27,000,000 instead of $26,266,000 as proposed by the Senate and $29,280,000 as proposed by the House.

Since the Airline Deregulation Act was signed into law, several airline mergers have been approved by the Civil Aeronautics Board. Numerous questions have arisen as to how successful these ventures have been and what impacts such mergers have had on employees and stockholders, the communities served, the traveling public, and the nation's air transport system in general. The conferees therefore direct the Civil Aeronautics Board and the Department of Transportation to undertake a joint study and report to the appropriate Congressional committees not later than January 15, 1982, on the effects of recent airline mergers on (1) the national air transportation system, (2) the potential effects on the system, (3) the probable consequences of those mergers and (4) any recommendations that might serve to avoid these problems in the future.

Payments to air carriers

Amendment No. 76: Appropriates $65,900,000 as proposed by the Senate instead of $58,000,000 as proposed by the House.

Amendment No. 77: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *: Provided, That, notwithstanding any other provision of law, none of the funds appropriated by this Act shall be expended under section 406 for services provided after 95 days following the date of enactment of this Act to points which, based on reports filed with the Civil Aeronautics Board, enplaned an average of eighty or more passengers per day in the fiscal year ended September 30, 1981*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 78: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *: Provided, further, That, notwithstanding any other provision of law, payments under section 406, exclusive of payments for services provided within the State of Alaska, shall not exceed a total of $14,000,000 for services provided during the period between March 31, 1982, and September 30, 1982, and, to the extent it is necessary to meet this limitation, the compensation otherwise payable by the Board under section 406 shall be reduced by a percentage which is the same for all air carriers receiving such compensation: Provided further, That, notwithstanding any other provision of law, payments under section 406 for services provided within the State of Alaska during the period between March 31, 1982, and September 30, 1982, shall not exceed a total of $5,500,000 and, to the extent it is necessary to meet this limitation, the compensation otherwise payable by the Board under section 406 shall be reduced by a percentage which is the same for all carriers receiving such compensation: Provided further, That the foregoing limitations shall not apply to payments made pursuant to the requirements of section 419(a)(7)(A) nor shall such payments be reduced by virtue of such provision: Provided further, That the provisions of this paragraph shall be effective only until modified by subsequent legislation*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees believe that the section 406 program should be terminated. The funding provided in this conference agreement for section 406 is viewed as the final Federal compensation to be made available in order to facilitate an orderly close-out of this program.

PANAMA CANAL COMMISSION

Operating expenses

Amendment No. 79: Appropriates $400,754,000 as proposed by the Senate instead of $398,744,000 as proposed by the House.

Amendment No. 80: Provides that not more than $450,000 shall be available for operation of guide services instead of $272,000 as proposed by the House and $515,000 as proposed by the Senate.

Amendment No. 81: Provides that not more than $60,000 shall be available for the maintenance of a residence for the Administrator as proposed by the Senate. The House bill provided up to $60,000 for the maintenance of a residence as well as certain staffing.

Amendment No. 82: Provides that not more than $5,000,000 shall be available for maintenance and alteration of certain facilities instead of $3,724,000 as proposed by the House and $5,450,000 as proposed by the Senate.

Amendment No. 83: Provides that not more than $76,000 shall be available for expenses of the supervisory Board instead of $50,000 as proposed by the House and $80,000 as proposed by the Senate.

DEPARTMENT OF THE TREASURY

OFFICE OF THE SECRETARY

Investment in fund anticipation notes

Amendment No. 84: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

DEPARTMENT OF THE TREASURY

Office of the Secretary

Investment in fund anticipation notes

(Including transfer of funds)

For the acquisition, in accordance with section 509 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, and section 803 of Public Law 95-620, of fund anticipation notes, $67,500,000, of which $25,000,000 shall be derived from the unobligated balances of "Payments for Purchase of Conrail Securities".

The managers on the part of the Senate will move to cncur in the amendment of the House to the amendment of the Senate.

UNITED STATES RAILWAY ASSOCIATION

Administrative expenses

Amendment No. 85: Provides that the $13,000,000 appropriated for necessary administrative expenses shall remain available until expended as proposed by the Senate.

TITLE III—GENERAL PROVISIONS

Amendment No. 86: Limits commitments for grants-in-aid for airports to $450,000,000 as proposed by the Senate instead of $650,000,000 as proposed by the House. In addition to the specific projects identified in the House and Senate Committee reports, the conferees direct that priority consideration also be accorded to Scottsdale Municipal Airport at Scottsdale, Arizona; Jimmy Stewart Airport at Indiana, Pennsylvania; as well as airports at Dickinson, Williston and Bismarck, North Dakota.

Amendment No. 87: Limits obligations for State and community highway safety to $92,500,000 instead of $85,000,000 as proposed by the Senate and $100,000,000 as proposed by the House. The conferees direct the Department to retrench and recover any funds which may have been apportioned to the States in excess of the limitation contained in the conference agreement.

Amendment No. 88: Limits obligations for Federal-aid highways and highway safety construction programs to $8,000,000,000 instead of $7,700,000,000 as proposed by the Senate and $8,200,000,000 as proposed by the House.

Amendment No. 89: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which deletes the word "and".

Amendment No. 90: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment insert: *and $15,000,000 for the Bismarck-Mandan Bridge, $4,000,000 for the Steubenville-Weirton Bridge, and necessary funds required during fiscal year 1982 for the Dickey Road Bridge in East Chicago, Indiana, and the U.S. 12 Bridge over Trail Creek in Michigan City, Indiana*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 91: Deletes language proposed by the Senate increasing the obligational authority for emergency relief from $100,000,000 to $150,000,000.

Amendment No. 92: Deletes language proposed by the House making the availability of construction funds for the Dulles Airport Access Highway contingent upon the Commonwealth of Virginia agreeing to assume the responsibility for maintenance and operation of such extension.

Amendment No. 93: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

Sec. 311. None of the funds provided in this Act shall be used by the Interstate Commerce Commission to approve railroad branchline abandonments in fiscal year 1982 in any State in excess of 3 percentum of a State's total mileage of railroad lines operated: Provided, That this limitation shall not apply to any abandonment of Conrail railroad lines: Provided further, That exceptions to this limitation shall be made only upon the specific approval of each of the appropriate committees of Congress.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees concur in the language throughout the Senate Report regarding the serious impact of aggressive railroad branchline abandonments. Massive abandonments would be devastating to rural communities, to country grain elevators and other shippers. The ability of producers to transport their goods to market would be threatened and an overwhelming burden would be imposed on roads and bridges. The conferees have therefore agreed to a general provision which limits railroad branchline abandonments in fiscal year 1982 to 3 percent of any State's total mileage of railroad lines operated. Conrail lines are exempted from this provision and exceptions may be made upon the approval of each of the appropriate committees of Congress. This language has been broadened beyond the limited scope of the Senate bill in response to the numerous requests of Members of Congress.

The conferees urge the Interstate Commerce Commission to utilize its Section of Rail Services Planning to assist rail users in the area of branchline surcharges and rate increases. The burden of challenging these surcharges or increases is placed on shippers who are at a disadvantage because of a lack of knowledge of rail costing and operations. As a result, the services of Rail Services Planning are needed to help shippers evaluate and effectively challenge surcharges and increases that may be excessive.

The Staggers Rail Act specifies that a light-density line surcharge cannot exceed 100 percent of the reasonably expected costs of operating the line plus 110 percent of the variable cost of transporting the traffic involved to or from such line. The problem is that the Commission is only directed to define the first cost factor: reasonably expected costs. There is no specific procedure for calculating the variable costs. Without this second calculation a shipper cannot determine whether a surcharge exceeds the statutory limits and thereby effectively challenge a surcharge. The conferees urge the Commission to develop procedures for computing these costs. In addition, the Commission is urged to provide shippers with the underlying data needed to challenge a surcharge. Otherwise, the shipper would be placed at an extreme disadvantage with little chance of a successful challenge should a violation exist.

Amendment No. 94: Restores language proposed by the House designating the weeks of June 13 through July 4, 1982, as "National Clean-up and Flag-up America's Highways Weeks".

Amendment No. 95: Deletes language proposed by the House prohibiting a reduction in the number of civilian employees of the Coast Guard.

Amendment Nos. 96 and 97: Conform section numbers.

Amendment No. 98: Deletes language proposed by the House related to Washington National Airport. The conferees endorse the language contained on pages 83 through 87 of the Senate Appropriations Committee report regarding Metropolitan Washington Airports Policy.

Amendment No. 99: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: *Restore the matter stricken by said amendment amended to read as follows:*

Sec. 324. None of the funds appropriated by this Act shall be used to implement, administer, or enforce Order 81-5-27 of the Civil Aeronautics Board or any other order of the Civil Aeronautics Board which prohibits or has the effect of prohibiting any U.S. air carrier from participating in the International Air Transport Association's North Atlantic Traffic Conference under its existing articles and provisions: Provided, That this limitation may be terminated by an appropriate resolution adopted by the House Public Works and Transportation Committee or the Senate Commerce Committee.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement concurs in the House language with a provision that this section shall be effective only until the subject of the Civil Aeronautics Board Order

81-5-27 is resolved by the House Public Works and Transportation Committee or Senate Commerce Committee. In taking this action, the conferees note that legislation is pending in these authorizing Committees with regard to the "sunset" of the CAB and related matters. The conferees also note that CAB Order 81-5-27 is the subject of oversight hearings in the House Public Works and Transportation Investigations and Oversight Subcommittee. In view of the Board's new leadership, pending legislation and oversight hearings, the conference agreement is intended to allow time for the House Public Works and Transportation Committee or the Senate Commerce Committee to adopt a resolution to continue or release the prohibition imposed on procedures by the CAB on Order 81-5-27. This should also allow time for the Administration to develop a coherent position on this and other issues related to international aviation policy. Pending further action by Congressional Committees, it is the intent of the conferees that the Board Order not go into effect for the duration of fiscal year 1982.

Amendment No. 100: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

Sec. 325. Notwithstanding any other provision of law, the secretary shall, with regard to the Urban Discretionary Grant Program of the Urban Mass Transportation Administration, promptly issue a letter of intent for the Dade County, Florida, Circulator System for $63,642,666, and, in addition, shall promptly issue a letter of intent for nonrail projects in the Portland, Oregon, Metropolitan region for $76,800,000 and also issue a letter of intent for the Southeast Michigan Central Automated Transit System for 110 million 1981 dollars.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes language directing the Secretary to issue a letter of intent for the nonrail transit projects in the Portland Metropolitan Region in the amount of $76,800,000. In keeping with the Department's policy, the letter of intent for section 3 funds will transfer the Department's section 3 commitment to nonrail transit projects in the region. It is the conferees' intent that funding of this new letter of intent should commence this year at the rate of $15,000,000 annually and that the region should compete equally with other cities for additional section 3 funds and that such UMTA decisions should not be prejudiced by the funds issued through this letter of intent. The conferees concur with House language directing UMTA to issue a full funding contract to Tri-Met in Portland for completion of the Banfield project to ensure completion of the project on schedule.

In order to avoid costly delays the conferees also direct UMTA to provide Tri-Met in Portland with a full funding contract as expeditiously as possible consistent with UMTA's December 22, 1980 letter of intent. The conferees expect and intend that the Banfield project will be completed on schedule.

In addition to the letters of intent contained in the Senate bill, the conferees direct the Secretary to promptly issue a letter of intent for the Central Automated Transit System in the Southeast Michigan Region. This system is a component of the integrated regional transportation plan, portions of which are already under construction, and will require a Federal funding commitment of 110 million 1981 dollars.

Amendment No. 101: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *326*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 102: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number 325 named in said amendment, insert: *327*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 103: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number 326 named in said amendment, insert: *328*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 104: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number 327 named in said amendment, insert: *329*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1982 recommended by the Committee of Conference, with comparisons to the fiscal year 1981 amount, the 1982 budget estimates, and the House and Senate bills for 1982 follow:

New budget (obligational) authority, fiscal year 1981	$12,769,738,764
Budget estimates considered by House, fiscal year 1982	11,103,037,235
House bill, fiscal year 1982	11,090,306,439
Budget estimates considered by Senate, fiscal year 1982	9,776,966,927
Senate bill, fiscal year 1982	10,414,397,927
Conference agreement, fiscal year 1982	10,613,137,927
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1981	−2,156,600,837
Budget estimates of new (obligational) authority, considered by House, fiscal year 1982	−489,899,308
Budget estimates of new (obligational) authority, considered by Senate, fiscal year 1982	+836,171,000
House bill, fiscal year 1982	−477,168,512
Senate bill, fiscal year 1982	+198,740,000

ADAM BENJAMIN, Jr.,

Managers on the Part of the Senate.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. MICHEL, a special order for 10 minutes for today.

(The following Member (at the request of Mrs. SNOWE) to revise and extend his remarks and include extraneous material:)

Mr. PAUL, for 1 hour, November 17, 1981.

(The following Members (at the request of Mr. FOWLER) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BEDELL, for 5 minutes, today.

Mr. DE LA GARZA, for 5 minutes, today.

Mr. DANIELSON, for 5 minutes, today.

Mr. LAFALCE, for 20 minutes each day, on November 16, and 17, 1981.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. GLICKMAN, for 10 minutes, today.

Mr. PANETTA, for 10 minutes, today.

Mr. WYDEN, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mrs. SNOWE) and to include extraneous matter:)

Mr. LEWIS.

Mr. KEMP.

Mr. GOODLING.

Mr. WEBER of Minnesota.

Mr. GINGRICH.

Mr. DANNEMEYER.

Mr. EVANS of Delaware.

Mr. DERWINSKI.
Mr. WINN.
(The following Members (at the request of Mr. FOWLER) and to include extraneous matter:)
Mr. OTTINGER.
Mr. BARNES.
Mr. LELAND in two instances.
Mr. KILDEE.
Mr. FORD of Michgan.
Mr. WIRTH.
Mr. AUCOIN.
Mr. MOFFETT.
Mr. FROST.
Mr. TRAXLER.
Mr. ROE.
Mr. CONYERS.
Mr. MINETA.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1322. An act to designate the U.S. Department of Agriculture Boll Weevil Research Laboratory Building, located adjacent to the campus of Mississippi State University, Starkville, Miss., as the "Robey Wentworth Harned Laboratory"; to extend the delay in making any adjustment in the price support level for milk; and to extend the time for conducting the referenda with respect to the national marketing quotas for wheat and upland cotton.

BILLS PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on November 12, 1981, present to the President, for his approval, bills of the House of the following title:

H.R. 4734. An act to recognize the organization known as the Italian American War Veterans of the United States; and

H.R. 4792. An act to amend title 10, United States Code, to improve the military justice system.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 18 minutes p.m.) under its previous order, the House adjourned until Monday, November 16, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2518. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the transient aircraft maintenance function at Randolph Air Force Base, Tex., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2519. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-110, "To amend the District of Columbia Unemployment Compensation Act in order to implement the Multiemployers Pension Plan Amendments Act of 1980 and the Omnibus Reconciliation Act of 1980," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2520. A letter from the Secretary of Energy, transmitting a report on a study of alternatives to the Natural Gas Policy Act of 1978; to the Committee on Energy and Commerce.

2521. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of a proposed new records system for the Army, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2522. A letter from the Comptroller General of the United States, transmitting a report on the merits and cost effectiveness of the proposed increase of the existing $50,112.50 executive pay cap to $57,500; to the Committee on Post Office and Civil Service.

2523. A letter from the Assistant Secretary of Energy for Conservation and Renewable Energy, transmitting the initial comprehensive wind energy program management plan, pursuant to section 4(a) of the Wind Energy Systems Act of 1980; to the Committee on Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DERRICK: Committee on Rules. House Resolution 270. A resolution waiving certain points of order against the conference report on S. 815, a bill to authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test, and evaluation for the Armed Forces, to authorize appropriations for fiscal year 1982 for operations and maintenance expenses of the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve Component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for fiscal year 1982 for civil defense, and for other purposes (Rept. No. 97-328). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 271. A resolution providing for the consideration of House Joint Resolution 357, a joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes (Rept. No. 97-329). Referred to the House Calendar.

Mr. HALL of Ohio: Committee on Rules. House Resolution 272. A resolution providing for the consideration of House Joint Resolution 349, a joint resolution to authorize the participation of the United States in a multinational force and observers to implement the Treaty of Peace between Egypt and Israel (Rept. No. 97-330). Referred to the House Calendar.

Mr. BENJAMIN: Committee of conference. Conference report on H.R. 4209 (Rept. No. 97-331). And ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. STARK (for himself, Mr. DUNCAN, Mr. HOLLAND, Mr. FOWLER, Mr. RUSSO, Mr. MATSUI, Mr. HEFTEL, Mr. GUARINI, Mr. SCHULZE, Mr. VANDER JAGT, Mr. FORD of Tennessee, Mr. BAILEY of Pennsylvania, and Mr. BAFALIS):

H.R. 4961. A bill to make miscellaneous changes in the tax laws; to the Committee on Ways and Means.

By Mr. BEDELL:

H.R. 4962. A bill to amend title II of the Social Security Act to provide that no benefits thereunder may be paid to convicted criminals who are inmates of penal institutions; to the Committee on Ways and Means.

H.R. 4963. A bill to amend title II of the Social Security Act and chapters 2 and 21 of the Internal Revenue Code of 1954 to provide that the hospital insurance program shall hereafter be financed from general revenues rather than through the imposition of payroll taxes as at present, reallocating the future proceeds of such taxes to the old-age, survivors, and disability insurance program in order to assure the actuarial soundness of that program; to the Committee on Ways and Means.

H.R. 4964. A bill to amend title II of the Social Security Act to provide that the automatic cost-of-living increases in benefits thereunder shall be based either on increases in the Consumer Price Index or on increases in wages, whichever (in any particular case) is lower; to the Committee on Ways and Means.

By Mr. CRAIG:

H.R. 4965. A bill to provide for the minting of U.S. silver coins; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PHILIP M. CRANE:

H.R. 4966. A bill to provide for the confidentiality of medical and dental records of patients not receiving assistance from the Federal Government, and for other purposes; to the Committee on Energy and Commerce.

H.R. 4967. A bill to amend the Airport and Airway Development Act of 1970 to make privately owned public use airports eligible for assistance under the act; to the Committee on Public Works and Transportation.

H.R. 4968. A bill to provide that the Internal Revenue Service may not implement certain proposed rules relating to the determination of whether private schools have discriminatory policies; to the Committee on Ways and Means.

H.R. 4969. A bill to amend the Internal Revenue Code of 1954 to repeal the family shelter tax; to the Committee on Ways and Means.

H.R. 4970. A bill to amend the Internal Revenue Code of 1954 with respect to the deduction of charitable contributions to organizations from which the taxpayer or a member of his family receives services; to the Committee on Ways and Means.

H.R. 4971. A bill to amend the Internal Revenue Code of 1954 to clarify the stand-

ards used for determining whether individuals are self-employed for purposes of the employment taxes; to the Committee on Ways and Means.

H.R. 4972. A bill to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes; to the Committee on Ways and Means.

By Mr. DE LUGO:

H.R. 4973. A bill to exempt certain charterboats in the U.S. Virgin Islands from the entry requirements of the customs laws; to the Committee on Ways and Means.

By Mr. KILDEE (for himself and Mr. GOODLING):

H.R. 4974. A bill to amend the Vocational Education Act of 1963 to provide comprehensive vocational guidance services and programs for States and local educational agencies; to the Committee on Education and Labor.

By Mr. PANETTA:

H.R. 4975. A bill to amend the Agricultural Fair Practices Act of 1967 to assure fair practices in agricultural bargaining; to the Committee on Agriculture.

By Mr. PHILIP M. CRANE:

H. Res. 273. Resolution to amend the rules of the House of Representatives to eliminate the limitations on outside earned income of Members of the House; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. HARTNETT introduced a bill (H.R. 4976) for the relief of Elizabeth Ann Jones, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 808: Mr. EVANS of Georgia, Mr. SYNAR, Mr. LANTOS, and Mr. DENARDIS.

H.R. 2203: Mr. MATTOX and Mr. EMERY.

H.R. 2832: Mr. HOWARD.

H.R. 3091: Mr. COUGHLIN.

H.R. 4247: Ms. MIKULSKI, Mr. OTTINGER, Mr. SOLOMON, Mr. MCCOLLUM, and Mr. DYSON.

H.R. 4248: Mr. OTTINGER, Mr. MARTIN of New York, Mr. SOLOMON, Mr. MCCOLLUM, and Mr. DYSON.

H.R. 4498: Mr. KASTENMEIER, Mr. FORSYTHE, Mr. OTTINGER, Mr. BEILENSON, Mr. O'BRIEN, Mr. FAZIO, Mr. NEAL, Mr. EDGAR, Mr. MINISH, Mr. WHITEHURST, Mr. JEFFORDS, Mr. FRENZEL, Mr. DENARDIS, Mr. MILLER of California, Mr. STOKES, Mr. PORTER, Mr. STARK, Mr. APPLEGATE, Mr. GINN, Mr. D'AMOURS, Mr. LEHMAN, Mr. BONIOR of Michigan, Mr. MORRISON, Mr. ERDAHL, Mr. SYNAR, Mr. DANNEMEYER, Mr. ADDABBO, Mr. BEVILL, Mr. MARLENEE, Mr. ZEFERETTI, Mr. GUARINI, Mr. MCEWEN, Mr. EDWARDS of Oklahoma, Mr. CARNEY, Mr. DANIELSON, Mr. HARKIN, Mr. RICHMOND, Mr. RAHALL, Mr. MCGRATH, Mr. SEIBERLING, Mr. DELLUMS, Mr. WEISS, Mr. SILJANDER, Mr. LAFALCE, Mrs. COLLINS of Illinois, Mr. BINGHAM, Mr. GIBBONS, Mr. CHAPPELL, Mr. FRANK, Mr. OBERSTAR, Mr. RINALDO, Mr. DANIEL B. CRANE, Mr. GARCIA, and Mr. PRITCHARD.

H.R. 4567: Mr. MITCHELL of Maryland.

H.R. 4617: Mr. FAUNTROY and Mr. WILLIAM J. COYNE.

H.R. 4673: Mr. O'BRIEN.

H.R. 4816: Mr. MITCHELL of Maryland, Mr. FOGLIETTA, Mr. GIBBONS, Mr. EDGAR, Mr. LOWRY of Washington, and Mr. OTTINGER.

H.R. 4842: Mr. MOORE, Mr. RITTER, Mr. DANNEMEYER, Mr. VANDER JAGT, Mr. STATON of West Virginia, Mr. CHENEY, Mr. SKEEN, Mr. PORTER, Mr. NEAL, Mr. OXLEY, Mr. BERNARD, Mr. LOTT, Mr. BEREUTER, Mr. FORSYTHE, and Mr. MCDADE.

H.J. Res. 293: Mr. HARTNETT, Mr. WORTLEY, Mr. ROEMER, Mr. MAVROULES, Mr. DYMALLY, Mr. STOKES, Mr. GREGG, Mr. ROSENTHAL, Mr. DANNEMEYER, Mr. GEPHARDT, Mr. DIXON, Mr. HOWARD, Mr. DE LA GARZA, Mr. ST GERMAIN, Mr. GILMAN, Mr. KASTENMEIER, Mr. PICKLE, Mr. MOORHEAD, and Mr. BAILEY of Pennsylvania.

H.J. Res. 318: Mr. ALBOSTA, Mr. ASHBROOK, Mr. BEARD, Mr. BEDELL, Mr. BEREUTER, Mr. BIAGGI, Mrs. BOUQUARD, Mr. BROWN of Colorado, Mr. CARMAN, Mr. CHAPPIE, Mr. CLINGER, Mr. COATS, Mr. COELHO, Mr. COLEMAN, Mr. CONYERS, Mr. JAMES K. COYNE, Mr. DREIER, Mr. DUNCAN, Mr. DYSON, Mr. EDGAR, Mr. ENGLISH, Mr. ERDAHL, Mr. ERTEL, Mr. FAUNTROY, Mr. FINDLEY, Mr. FOGLIETTA, Mr. FORD of Tennessee, Mr. FOWLER, Mr. GIBBONS, Mr. GONZALEZ, Mr. GRISHAM, Mr. GUNDERSON, Mr. HARKIN, Mr. HIGHTOWER, Mr. HOLLENBECK, Mrs. HOLT, Mr. HORTON, Mr. HUBBARD, Mr. JONES of Tennessee, Mr. KASTENMEIER, Mr. KEMP, Mr. LATTA, Mr. LEWIS, Mr. LIVINGSTON, Mr. LONG of Maryland, Mr. LOWERY of California, Mr. MARRIOTT, Mr. MCCOLLUM, Mr. MCDADE, Mr. MILLER of Ohio, Mr. MURPHY, Mr. NEAL, Mr. NICHOLS, Mr. NOWAK, Mr. OXLEY, Mr. PEPPER, Mr. PURSELL, Mr. REGULA, Mr. RINALDO, Mr. RITTER, Mr. ROBINSON, Mr. ROYBAL, Mr. SAVAGE, Mr. SHAW, Mr. SKELTON, Mr. SMITH of Pennsylvania, Mr. STANGELAND, Mr. STARK, Mr. STUMP, Mr. SUNIA, Mr. SYNAR, Mr. TAUZIN, Mr. VENTO, Mr. WALGREN, Mr. WALKER, Mr. WASHINGTON, Mr. WEBER of Ohio, Mr. WYLIE, Mr. WEBER of Minnesota, Mr. CORCORAN, Mr. HAMILTON, and Mr. ST GERMAIN.

PETITIONS, ETC.

Under clause 1 of rule XXII,

271. The SPEAKER presented a petition of the Georgia Criminal Justice Coordinating Council, Atlanta, relative to Federal assistance for prison facilities; which was referred to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

VOCATIONAL GUIDANCE ACT OF 1981

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. KILDEE. Mr. Speaker, this week marks the 16th observance of National Career Guidance Week; a recognition of the important efforts of the teachers, guidance counselors, and personnel workers who assist our citizens in their decisions about careers and career training. The theme of this year's observance, "Explore for the future," seems especially fitting as the House Elementary, Secondary, and Vocational Education Subcommittee of which I am a member proceeds with hearings on the reauthorization of the Vocational Education Act of 1963.

Today I am introducing, along with my colleague on the subcommittee, Mr. GOODLING, the Vocational Guidance Act of 1981. This bill would amend the Vocational Education Act to specify a vocational guidance component in the act and would reserve 6 percent of the act's State program funds for vocational guidance activities.

Research findings show that students who receive vocational counseling do better in vocational education courses, are more apt to successfully complete their training, and are more often successfully placed in jobs. Our current high unemployment rate has given vocational education new importance as a means to economic revitalization through more effective worker training. Vocational guidance has proven its importance to vocational education. The role of vocational guidance in vocational education should be enhanced. Congress recognized this in the last reauthorization of the act by specifying that 20 percent of a State's program improvement funds be reserved for purposes of vocational guidance. This comes to about 4 percent of the total Federal vocational education funds received by the States.

The Vocational Guidance Act would not result in any additional Federal expenditure. Rather, it would encourage States to augment and expand their vocational guidance program by earmarking funds for that purpose and by further identifying vocational guidance activities. The bill would bring vocational guidance personnel more fully into their rightful place in the Federal vocational education effort.

The text of the bill follows:

H.R. 4974

A bill to amend the Vocational Education Act of 1963 to provide comprehensive vocational guidance services and programs for States and local educational agencies

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Vocational Guidance Act of 1981".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

(1) when prevocational guidance and exploration programs are offered to middle school and junior high school youth, the result has been a qualitative as well as a numerical increase in vocational program enrollments at the secondary and postsecondary levels;

(2) when continued access to guidance and counseling services by those female students, minority students, handicapped students, and academically and economically disadvantaged students enrolled in vocational programs is assured, a higher rate of program approval and completion has been reported;

(3) when vocational programs have included counseling for employability development, human relations, work skill transferability, and job-seeking, job-finding, and job-keeping skills, the number of satisfactory graduate placements is significantly greater than the number of such placements recorded by programs without such counseling;

(4) when vocational programs have consistently provided comprehensive guidance services preceding, during, and following their tenure, the job market advantage of graduates has extended beyond the four years presently associated with those who terminate their formal education at the high school level;

(5) when guidance and counseling practitioners have had firsthand experience in business and industry, their effectiveness in providing career counseling, placement, and follow-up services has been greatly increased;

(6) in spite of the factors described in paragraphs (1) through (5), the potential contribution of guidance and counseling to effective vocational program delivery at the State level has yet to be fully realized in practice; and

(7) postsecondary educational institutions should be encouraged to consider establishing policies under which postgraduate credit is granted to students who are involved in progams which provide new or renewal experiences in business, industry, the professions, and other occupational pursuits which will better enable the students to carry out guidance, counseling, and instructional services.

(b) It is the purpose of this Act to increase the benefits to those enrolled in vocational education programs by amending the Vocational Education Act of 1963 to (1) specify comprehensive guidance components in all portions of such Act over which the States have jurisdiction; (2) designate such components as vocational guidance; and (3) authorize a minimum percentage of funds to be set aside for such purposes.

PURPOSES OF VOCATIONAL EDUCATION PROGRAM

SEC. 3. Section 101 of the Vocational Education Act of 1963 (20 U.S.C. 2301) is amended—

(1) in paragraph (3) thereof, by striking out "and" at the end thereof; and

(2) by redesignating paragraph (4) as paragraph (5), and by inserting after paragraph (3) the following new paragraph:

"(4) provide comprehensive vocational guidance programs and services (including job development and placement services) to increase the capacity of youth and adults to benefit from vocational education, and".

FUNDING FOR VOCATIONAL GUIDANCE ACTIVITIES

SEC. 4. Section 102 of the Vocational Education Act of 1963 (20 U.S.C. 2302) is amended by adding at the end thereof the following new subsection:

"(e) Of the total amounts appropriated for State programs of vocational education in this section, at least 6 percent of the funds allocated shall be reserved to carry out (1) vocational guidance activities described in section 120(b)(1) and in section 125; and (2) other vocational guidance requirements specified in other provisions of this Act.".

ALLOTMENTS AMONG STATES

SEC. 5. Section 103(a)(2) of the Vocational Education Act of 1963 (20 U.S.C. 2303(a)(2)) is amended—

(1) in subparagraph (A) thereof, by striking out "50 per centum" and inserting in lieu thereof "42 per centum" and by striking out "fifteen to nineteen" and inserting in lieu thereof "eleven to seventeen";

(2) in subparagraph (B) thereof, by striking out "20 per centum" and inserting in lieu thereof "28 per centum" and by striking out "twenty to twenty-four" and inserting in lieu thereof "eighteen to thirty-four"; and

(3) in subparagraph (C) thereof, by striking out "twenty-five to sixty-five, inclusive" and inserting in lieu thereof "thirty-five or older".

STATE AND LOCAL ADVISORY COUNCILS

SEC. 6. (a) Section 105(d)(4)(A) of the Vocational Education Act of 1963 (20 U.S.C. 2305(d)(4)(A)) is amended by inserting "vocational guidance," after "vocational rehabilitation,".

(b) The last sentence of section 105(g)(1) of the Vocational Education Act of 1963 (20 U.S.C. 2305(g)(1)) is amended by inserting "vocational instruction and guidance" after "established for".

GENERAL APPLICATION

SEC. 7. Section 106(a)(8) of the Vocational Education Act of 1963 (20 U.S.C. 2306(a)(8)) is amended—

(1) by inserting "vocational guidance programs under section 125," after "except"; and

(2) by striking out "in making" and all that follows through the end thereof and inserting in lieu thereof "planned prevocational experiences designed to enable them to make informed and meaningful occupational preparation choices;".

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

FIVE-YEAR STATE PLANS

SEC. 8. (a) Section 107(a)(1) of the Vocational Education Act of 1963 (20 U.S.C. 2307(a)(1)) is amended—

(1) by redesignating subparagraph (B) through subparagraph (J) as subparagraph (C) through subparagraph (K), respectively;

(2) by inserting after subparagraph (A) the following new subparagraph:

"(B) a representative of the State agency (if such separate agency exists) having primary responsibility for school guidance and counseling programs, designated by such agency;";

(3) in subparagraph (J) thereof, as so redesignated in paragraph (1), by striking out "and" at the end thereof;

(4) in subparagraph (K) thereof, as so redesignated in paragraph (1), by striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(5) by inserting after subparagraph (K) thereof, as so redesignated in paragraph (1), the following new subparagraph:

"(L) a representative of practicing secondary school counselors, as determined by State law.".

(b) Section 107(b)(2)(A)(iii) of the Vocational Education Act of 1963 (20 U.S.C. 2307(b)(2)A)(iii)) is amended by striking out "allocations" and all that follows through "opportunities" and inserting in lieu thereof "assignment of responsibility for the offering of those courses, training opportunities, and guidance services,".

(c) Section 107(b)(2)(A)(iv) of the Vocational Education Act of 1963 (20 U.S.C. 2307(b)(2)(A)(iv)) is amended by inserting "guidance services," after "opportunities,".

(d) Section 107(b)(4)(B) of the Vocational Education Act of 1963 (20 U.S.C. 2307(b)(4)(B)) is amended by inserting "guidance and training" after "meet the".

FEDERAL AND STATE EVALUATIONS

SEC. 9. Section 112(b)(1)(B) of the Vocational Education Act of 1963 (20 U.S.C. 2312(b)(1)(B)) is amended—

(1) in clause (i) thereof, by striking out "and" at the end thereof;

(2) in clause (ii) thereof, by inserting "current" after "their" and by adding "and" at the end thereof; and

(3) by inserting after clause (ii) the following new clause:

"(iii) exhibit desirable skills related to employability, as determined jointly by employees, educators, and employers.".

BASIC GRANT AUTHORIZATION

SEC. 10. Section 120(b)(1) of the Vocational Education Act of 1963 (20 U.S.C. 2330(b)(1)) is amended—

(1) in subparagraph (H) thereof, by inserting ", support, and follow-up" after "placement";

(2) in subparagraph (I) thereof, by inserting "and other prevocational" after "arts";

(3) in subparagraph (L) thereof—

(A) by striking out "and" at the end of clause (iii);

(B) by inserting "and" at the end of clause (iv); and

(C) by inserting after clause (iv) the following new clause:

"(v) persons seeking skills enabling midcareer changes, such as early retirees;";

(4) by redesignating subparagraph (N) and subparagraph (O) as subparagraph (O) and subparagraph (P), respectively; and

(5) by inserting after subparagraph (M) the following new subparagraph:

"(N) vocational guidance and counseling programs and services as described in section 125;".

COOPERATIVE VOCATIONAL EDUCATION PROGRAMS

SEC. 11. Section 122(d) of the Vocational Education Act of 1963 (20 U.S.C. 2332(d)) is amended—

(1) by striking out "ancillary" and inserting in lieu thereof "support"; and

(2) by inserting "counselors," after "coordinators,".

RESIDENTIAL VOCATIONAL SCHOOLS

SEC. 12. Section 124(a) of the Vocational Education Act of 1963 (20 U.S.C. 2334(a)) is amended by adding at the end thereof the following new sentence: "All students in residence shall be provided appropriate guidance and training.".

VOCATIONAL GUIDANCE AND COUNSELING UNDER BASIC GRANTS

SEC. 13. Subpart 2 of part A of the Vocational Education Act of 1963 (20 U.S.C. 2330 et seq.) is amended by adding at the end thereof the following new section:

"VOCATIONAL GUIDANCE AND COUNSELING

"SEC. 125. In accordance with the provisions of section 102(e), programs for vocational guidance and counseling shall include—

"(1) initiation, implementation, and improvement of high quality vocational guidance and counseling programs and activities;

"(2) vocational counseling for children, youth, and adults, leading to a greater understanding of educational and vocational options;

"(3) provision of educational and job placement services, including programs to prepare individuals for professional occupations or occupations requiring a baccalaureate or higher degree, including follow-up services;

"(4) vocational guidance and counseling training and work experiences designed to acquaint guidance counselors with (A) the requirements of employers, businesses, and industries; (B) the changing work patterns of women; (C) ways of effectively overcoming occupational sex stereotyping; and (D) ways of assisting girls and women in selecting careers solely on their occupational needs and interests, and to develop improved career counseling materials which are free of bias;

"(5) vocational and educational counseling for youth offenders and adults in correctional institutions;

"(6) vocational guidance and counseling for persons of limited English-speaking ability;

"(7) establishment of vocational resource centers to meet the special needs of out-of-school individuals, including individuals seeking second careers, individuals entering the job market late in life, handicapped individuals, individuals from economically depressed communities or areas, and early retirees; and

"(8) leadership for vocational guidance and exploration programs at the local level.".

RESEARCH PROGRAMS

SEC. 14. (a) Section 131(a) of the Vocational Education Act of 1963 (20 U.S.C. 2351(a)) is amended—

(1) in paragraph (1) thereof, by striking out "and development", and by inserting "and career development" after "education"; and

(2) in paragraph (2) thereof, by striking out "test" and all that follows through "overcome" and inserting in lieu thereof "replicate or install useful research methodologies and findings, including effective guidance components of vocational programs, programs which show promise of overcoming".

(b) Section 131(b) of the Vocational Education Act of 1963 (20 U.S.C. 2351(b)) is amended by inserting "and guidance" after "teaching".

EXEMPLARY AND INNOVATIVE PROGRAMS

SEC. 15. Section 132(a)(5)(A) of the Vocational Education Act of 1963 (20 U.S.C. 2352(a)(5)(A)) is amended by inserting "prevocational guidance and counseling" before "programs".

CURRICULUM DEVELOPMENT

SEC. 16. Section 133(a) of the Vocational Education Act of 1963 (20 U.S.C. 2353(a)) is amended—

(1) in paragraph (1) thereof, by striking out "and" at the end thereof;

(2) in paragraph (2) thereof, by inserting "and counselors" after "teachers", and by striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(3) the review and development of materials or systems which can effectively catalogue and disseminate new or existing occupational information, job-seeking, job-finding, and job-keeping skills, and other tools necessary to vocational maturity.".

ADDITIONAL VOCATIONAL GUIDANCE AND COUNSELING

SEC. 17. Section 134 of the Vocational Education Act of 1963 (20 U.S.C. 2354) is amended to read as follows:

"VOCATIONAL GUIDANCE AND COUNSELING

"SEC. 134. In addition to the provisions of section 102(e), and as described in section 125, programs for vocational guidance and counseling shall use funds which have been set aside for such purpose, insofar as is practicable, for funding programs, services, or activities by eligible recipients which bring individuals with experience in business and industry, the professions, and other occupational pursuits into schools as counselors, teachers, or advisors for students, and which bring students into the work establishments of business and industry, the professions, and other occupational pursuits for the purpose of acquainting students with the nature of the work that is accomplished in such pursuits, and for funding projects of such recipients in which guidance counselors and other vocational personnel obtain new or renewal experiences in business and industry, the professions, and other occupational pursuits which will better enable these individuals to carry out their guidance, counseling, and instructional duties.".

VOCATIONAL EDUCATION PERSONNEL TRAINING

SEC. 18. Section 135(a) of the Vocational Education Act of 1963 (20 U.S.C. 2355(a)) is amended—

(1) in paragraph (1) thereof, by inserting "and counselors" after "teachers" the first place it appears therein, and by inserting "and counselors," after "teachers" the last place it appears therein;

(2) in paragraph (2) thereof, by inserting ", counselors," after "teachers"; and

(3) in paragraph (3) thereof, by inserting ", counselors," after "teachers".

DEFINITION

SEC. 19. Section 195 of the Vocational Education Act of 1963 (20 U.S.C. 2461) is amended by adding at the end thereof the following new paragraph:

"(22) The term 'vocational guidance' means those services and programs which

are coordinated by professional counselors with appropriate credentials and which focus upon—

"(A) the unique guidance, placement, and follow-up needs of individuals enrolled in vocational programs; and

"(B) the prevocational counseling and orientation of other individuals who could benefit from the pursuit of skills in fields which do not require a baccalaureate degree for entry.".●

VIETNAM VETERANS

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. FROST. Mr. Speaker, I rise today to acknowledge the courage and devotion of those men and women who fought and died for this country. I am especially proud to salute on this day our most recent group of soldiers—and often, most misunderstood. I speak of those who served in Vietnam.

Included in this massive group are nearly 60,000 who never returned home. Among the survivors are hundreds of thousands who have managed to put their lives back together. Even so, countless others remain physically and psychologically scarred as a result of their ordeal. The common bond of these veterans—indeed, all veterans—is their tremendous courage, personal sacrifice, and devotion to duty and country.

Perhaps, Vietnam was no more gruesome than any other war that has plagued this Nation. However, it is certainly the most vivid of wars for Americans living today. Those who stayed at home remember the news reports, camera footage, and still shots of confrontation and bloodshed. And for our soldiers there are the images of fallen comrades, the sense of an approaching enemy, and the smell of gunfire and atomic warfare. This Nation must not forget either those who were made stronger by the awesome experience or those who still suffer tremendously from the brutalities of the war.

We must honor their sacrifice and devotion to country. Moreover, we must acknowledge the fact that they still have so much to offer the Nation, their communities, and families. When I speak of expressing our appreciation and respect for these men and women I refer not so much to a structure, although I wholeheartedly support and anxiously await the dedication of the Vietnam Veterans Memorial near the site of the Lincoln Memorial next fall. Rather, I call for a body of actions from this 97th Congress that will help to advance the stations of Vietnam veterans and their dependents.

Specifically, we must fight those efforts which would sacrifice quality health and hospital care for all veterans in order to balance the budget. We must assure proper medical attention for those Vietnam veterans who were exposed to agent orange and other hazardous chemical substances. At the same time, we must continue our efforts to see that the psychological and readjustment needs of Vietnam veterans are addressed. Above all, we must support those programs that mean improved educational and job opportunities for Vietnam veterans.

The Vietnam Veterans in Congress has played an active role in impressing these issues on our national consciousness. I am proud to be a member of this organization and to have this opportunity to extol the courage and tremendous personal sacrifice of those men and women who served in Vietnam.●

INNOVATIVE INFILLS BOOST PRESERVATION

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. AuCOIN. Mr. Speaker, early this year, the historic preservation fund was targeted for extinction by the administration. However, both the House and Senate Appropriations Committees understand the value of Federal preservation programs and committed $26.5 million to fund the Government's commitment to such programs.

In the November issue of Preservation News, published by the National Trust, Michael Alesko writes of the restoration going on in Portland, Oreg. He is currently an administrative aide to Portland City Council member Margaret Strahan and he formerly covered historic preservation and urban planning issues for the Oregonian. I would like to share this article with my colleagues and let them see the potential which exists in their hometowns.

INNOVATIVE INFILLS BOOST PRESERVATION

(By Michael Alesko)

Dubbed "the most exciting project that has come to downtown Portland, Oregon, in the last several years" by one Portland City Council member, the $6 million Yamhill Marketplace development that broke ground in September also typifies perfectly the new directions of Portland's healthy and greatly diversified preservation scene.

The city's Historic Landmarks Commission and attendant landmark preservation ordinance date to 1968. Local preservationists spent much of their time over the following decade in a diligent effort to save historic structures by inventorying them and getting the city council to designate them as official city landmarks. That list now totals nearly 200 buildings. While designation was the immediate need to ensure a preservation base, other efforts were proceeding in such areas as public financing of private preservation efforts and raising the public's consciousness about preservation.

As 1981 draws to a close, the combined public and private efforts have branched out into such areas as historically compatible infill development in downtown historic districts, represented by local developer N. Robert Stoll's Yamhill Marketplace and other infill projects now under way.

The six-block downtown Yamhill Historic District, listed in the National Register of Historic Places, has been blighted for years by a parking lot spanning three-fourths of a block in the small district's heart. Stoll and his partners are filling that space with a two-story retail complex that will house about 100 merchants, including open-air market stalls, cafes, major restaurants and retail vendors in an historially sensitive environment. Retractable exterior walls and a public roof garden will merge the market activity directly into the surrounding historic district. The project is expected to bring certain day-and-night vitality into the area.

The Yamhill Marketplace, designed by the Ragland Hagerman Partnership, will reintroduce in the Yamhill Historic District the farmers' market type of activity that predominated there in Portland's early history and continued well into this century. An infill office and retail development that is underway across the street from Stoll's project will combine with the marketplace to fill all of the historic district with built space. Infill activity is also under way in downtown Portland's other historic district—the National Historic Landmark Skidmore-Old Town District.

ESSENTIAL INGREDIENT

"Infill in our historic districts is tough," commented Leo D. Williams, preservation coordinator in Portland's Bureau of Planning. "Infill projects don't get the tax breaks and publicly subsidized loans that restoration efforts get and they are encumbered by such rules in the historic districts as height limits. But to me, infill is the essential ingredient needed in our historic districts. It adds the new vibrance. It puts teeth back into a toothless smile in these districts."

On a corner of the Yamhill Marketplace block, developer John Russell's restoration of the italianate stucco 1884 Thomas Mann Building symbolizes other facets of the Portland preservation effort. In rescuing the abandoned building from total neglect and blight on the historic district, Russell also added to it two stories of rental housing in the form of eight attractive market-rate rental apartments.

The project is the first to add on to a landmark downtown building and the first to offer new middle-income rental housing in the downtown core. Using research and suggested elevations by restoration architects Allen McMath Hawkins, the project architects, Zimmer, Gunsul, Frasca Associates were able to replicate some of the original facade styles of the historic district in both the main part of the since-altered building and the added-on portion. Although work on the building is not yet complete, the ground-floor retail space is occupied and so are the apartments—at rents higher than those commanded by modern downtown Portland apartment towers. "Housing is essential downtown if we are to make that area in general and historic districts in particular vital day-and-night places," Russell said.

Both the Yamhill Marketplace and Thomas Mann projects illustrate the creative use of public assistance in Portland for preservation efforts in recent years. Each received Federal Urban Development Action Grants through the city ($250,000 for

Thomas Mann; $1.2 million for Yamhill Marketplace) that were conveyed in the form of low-interest project loans. The Thomas Mann project also received a 15-year tax freeze from the Oregon State Historic Preservation Office and a $250,000 three-percent loan from the Portland Development Commission for its housing portion.

The Yamhill Marketplace garnered a $250,000 three-percent loan from the development commission's Urban Conservation Fund, which was established specifically to finance preservation-related efforts. The PDC loans are almost ironic, considering that the commission is best known as Portland's urban renewal agency.

Also symbolizing the new health of the Portland landmark preservation scene was the announcement in September that investors had acquired the 1872-vintage Italianate-style New Market Theater building in the Skidmore-Old Town Historic District. They intend to fully restore it to its original design and convert its present interior (a parking garage) into retail and office space.

The building, in a terrible state of neglect, is one of the most important structures in Portland history. It was the center of the city's early cultural life, serving as the first home of the city's symphony orchestra, home of the city's first major live theater and home of the first major produce market.

"We've been working on saving this building since the landmarks program began," said Leo Williams. "It has been under condemnation at various times and is probably recognized as the prime building in the historic district."

Portland's full-circle preservation effort of recent years is not only a story of buildings. The planning bureau and landmarks commission are halfway through a two-year project to create a historic resources inventory. It will result in a computer information bank, including more than 2,000 structures in the city. The information will be used in designating additional landmarks, in helping city bureaus plan neighborhood improvements and in helping neighborhoods learn about items of historic value they might not otherwise recognize.

PRESERVATION WEEK

The landmarks commission for the past three years has directed a local effort to commemorate National Preservation Week each May. Portland activities include historic neighborhood tours, exhibits on city history and an awards program recognizing significant Portland preservation efforts, such as John Russell's.

Also, established three years ago was the Portland Architectural Preservation Gallery, an effort of the Junior League of Portland. Operated exclusively by volunteers, the gallery is a measuring point of Portland's growing awareness of and involvement in the preservation area. It drew 3,000 visitors in its first year and about 8,500 to its most recent exhibit.

Not to be overlooked in the fabric of the local preservation tapestry are two projects that technically are modern construction—Pioneer Courthouse Square and the Portland Public Service Building. Both reflect the city's historic heritage—with the Public Service Building (photo on page 1) by renowned Princeton, N.J., architect Michael Graves likely to be regarded nationally as a landmark example of post-Modern architecture.

Pioneer Courthouse Square is a public plaza being built on what was until recently a parking garage. The plaza covers a full block in the busiest area of the downtown core. It is oriented to the Pioneer Courthouse, an 1875 National Historic Landmark that is across the street. To recall the city's history, the square will contain the original gate from the Portland Hotel, which occupied the square's site for decades until 1951, when it was torn down to make way for the parking lot.

The design of the square, which was the result of a national competition won by a five-member interdisciplinary team headed by Portland architects Martin, Soderstrom and Matteson, will feature ornamental elements harking back into city history, among them classical park benches, stoa columns, arch features and bronze entry gates.

NEW LANDMARK

The 15-story Portland Public Service Building is under construction on a block that is flanked by the landmark four-story 1895 Portland City Hall and the seven-story 1913 Multnomah County Courthouse, both of which are classical in appearance. With its historical allusions and luxurious style, rich in blue, green, brown and cream colors, the Graves building has been hotly debated in the international architectural and popular press as perhaps the hallmark of the current post-Modern style of architecture—essentially representing a neo-classical framework. It is to be completed in the fall of 1982.

Urban design, planning, architecture and history buffs predict that Graves' Public Service Building will be a landmark of the first degree, for its bold representation of post-Modernism. The building brings home the fact that Portland's landmark scene is a rich blend of the old and the new.●

A TRIBUTE TO STANLEY DUNN

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. ANDERSON. Mr. Speaker, I feel confident in saying that the South Bay area of California that I represent is blessed with several excellent public school systems including the Torrance Unified School District. This school system is served by very capable teachers, administrators, support personnel, and is directed by an excellent board of education. I would like, today, to pay tribute to one of the members of that board of education, Mr. Stanley Dunn, for Stanley is retiring from the board after 12 years of exemplary service.

Stanley is a native southern Californian, born in Hermosa Beach, and raised and educated in the South Bay area. After completing high school, Stanley studied at the University of Southern California and the University of California at Santa Barbara before obtaining his law degree from the University of California, Hastings College of Law. Stanley chose printing as his occupation and is owner-partner of Dunn Brothers' Commercial Printers in Gardena, Calif.

Perhaps the most important quality a good school board member must possess is a consistent and dedicated interest in the community as a whole as well as in its educational system. Stanley has demonstrated this commitment continually, having served as chairman of the city of Torrance Youth Welfare Commission, president of the Alcoholism Council of South Bay, and president of the South Bay-Harbor Industry-Education Council. He has been affiliated with such community organizations as the city of Torrance Charter Review Committee, the YMCA, the American Youth Soccer Organization, the Torrance Area Chamber of Commerce, and the Riviera Little League.

My wife, Lee, joins me in thanking Stanley for all he has done for the community and wish him and his wife, Marlene, along with their children, Theresa, John, Bob, and Mike, the best in the years ahead.●

QUALITY EDUCATION IN UNIVERSITY SYSTEM IN CALIFORNIA

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. LEWIS. Mr. Speaker, the following essay is the work of a college student and constituent of mine from Rancho Mirage, Calif. I commend his work to my colleagues for it is an outstanding illustration of the results of quality education of our university system in California:

To begin with, let me introduce myself. My name is Remulak and I will be answering this essay question for my Earthling friend, Rob.

He is quite an amiable chap, as he supplied me with comfortable sleeping quarters and plenty of solid and liquid refreshment and calmed me after my spaceship crashed here one week ago.

Upon my arrival, Rob asked only one thing of me in exchange for his generosity: To view the audio/visual medium know as television for one Earth week and to describe to him what conclusions I reached about American culture. Being a citizen of outstanding stature on the planet Belzar in the galaxy Cronolia, I feel that I have good judgment (I also have super-human intelligence).

The first thing that I noted about Americans through my television experience is that they must be a totally violent people. A very large percentage of the programs I viewed were directly concerned with violent acts.

Not only was this completely repulsive to me (Belzar being a peaceful planet) but it became completely repulsive when I realized that the violent acts were often the sources of humor (which captivated totally the audience) in children's programing.

I found these violent themes throughout children's television especially in the celluloid-animation form known to Earthlings as cartoons. Such cartoons as "The Bugs

Bunny/Road Runner Hour" and "Tom and Jerry" were particularly appalling to me.

The only plot that I could detect was that of trying to mangle one of the characters. Often they resembled an accordian or a pancake. In contrast, on Belzar, the only thing our children view on the "video-feelies" (which is more advanced than TV) is educational, artistic and athletic programs.

Obviously, this bombardment of violence on children isn't enough to develop an affinity between Americans and violence. However, adult programming assures it. Such shows as "Baretta," "The Rifleman" and "Starsky and Hutch" are concerned only with America's taste for "good" violence. Strangely, all the exposure to violence made me want to "shoot it out" with the bad guy too.

The other thing that I gathered about Americans is that they must have a very low "mentality." I conjectured this after watching such programs and "BJ and the Bear" and "Enos." Not only is the story line dull and repetitious to me but these shows must insult even the average human intelligence.

Another interesting facet of American culture that I discovered through Television is an obsession with fantasy. Daytime television is chiefly "soap-operas" and "game shows." As far as I can perceive the only "purpose" these shows serve would be to lull the public into believing a false world of fantasy and excitement.

The most curious and bizarre part of American television to me is the phenomenon known as the commercial. Never on Belzar had I encountered anything so obnoxious. American television is bad enough without constant interruption by such characters as an extremely strange man named Cal Worthington and his pseudo-dog Spot. These commercials convinced me that Americans must be simple, inefficient, competitive and materialistic creatures.

Another curious aspect of American culture relayed through television is religion. It was very amusing to view a culture whose foundation is freedom to pursue any faith, yet, its largest communications medium devotes only a few hours of time-space (when many are sleeping) to this type of free expression.

Of course I realize that I have been very critical of American television. Although I have been fair in my opinions thus far, I must also reveal what I found to be beneficial about television. Several "educational" shows, especially some on PBS, I quickly adhered to. "Nova," "Masterpiece Theater" and "In Search Of . . ." were a few programs I particularly enjoyed.

It also has to be said that many "news" type broadcasts seemed informative as well as "Wide World of Sports" which dealt with Earth athletics. Even certain comedy shows such as "MASH" and "Mork and Mindy" seemed to reflect the best of American culture. These shows all focused my attention on the most curious quality of American culture: Humanity.

This "humanity" however, seems clouded by increasing complexity, competition and materialism. I feel that Americans should reassess their true desires and beliefs and structure their most powerful communications medium—television—around the betterment of society rather than materialistic concerns.

As I conclude my judgment of American culture through television, I see that my friend Rob is preparing a chart to accompany this essay. He now has asked me whether the statistics of this chart are good representations of what actually appears on television.

My answer is both "yes" and "no". It is very revealing in that violence-oriented shows occur much more in programming than news, education and religion. However, the chart is also limited because it does not have a true sensitivity for several things. First, it cannot judge the content of particular programs.

Also it is not subject to the constant bombardment of commercial upon commercial. Most importantly, however, it cannot describe the strong influencing effect that particular programs might have upon the American mind.

Mr. Speaker, it is with great pride that I commend Robert Gilley to the House of Representatives for his excellent essay and wish him future success in his endeavors at the University of California at San Diego.●

PERSONAL EXPLANATION

HON. BILL NELSON

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. NELSON. Mr. Speaker, due to official business in my district associated with the launching of the Space Shuttle *Columbia*, I was not present to vote earlier today on the motion to approve the Journal for Tuesday, November 10, 1981. Had I been present, I would have voted "yes" on rollcall 295.●

REAGAN AND HUMAN RIGHTS

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. MOFFETT. Mr. Speaker, El Salvador has once again hit the front pages of our newspapers, as the administration considers new options to deal with the apparent stalemate between the junta and the rebel forces. The declining popularity of the junta and the low morale of the armed forces are among the factors cited in explaining this phenomenon. While we all hope and expect that the talk of military action in Central America is no more than just talk, it would not be surprising to see the administration offer additional security assistance to El Salvador.

I would like to take this opportunity to remind my colleagues of the gross human rights violations in El Salvador, and of the fact that section 502B of the Foreign Assistance Act of 1961 prohibits security assistance to "any country the government of which engages in a consistent pattern of gross violations of internationally recognized human rights." Government security forces in El Salvador—especially the treasury police and the army—continue to terrorize the countryside, torturing and murdering noncombatants as well as guerrillas. The Reagan administration's apparent violation of section 502B has prompted me and several of my colleagues to file a law suit against the administration for providing military aid to the Salvadoran junta. This aid surely violates the spirit and intent, if not the letter, of section 502B.

Administration policy in El Salvador seems to reflect a broader, and more disturbing, tendency to ignore human rights considerations in pursuit of an illusory "strategic consensus." The following editorial by Aryeh Neier, vice chairman of the Helsinki Watch Committee and the Americas Watch Committee, appeared recently in the New York Times. The article elaborates the Reagan administration's consistent refusal to comply with the laws, established by Congress, to insure that U.S. arms and assistance are not used to further the cause of repression and tyranny around the world.

[From the New York Times]

OF REAGAN AND RIGHTS

(By Aryeh Neier)

According to a State Department policy memo recently approved by Secretary of State Alexander M. Haig, Jr., "Human rights is at the core of our foreign policy." Public disclosure of this memo seems to have ruffled feathers elsewhere in the Administration. James A. Baker 3d, the White House chief of staff, dealt with the matter on a television program by attempting to downgrade the memo, saying it did not constitute "any significant change in policy."

It is President Reagan's prerogative, of course, to embrace the department's memo on human rights enthusiastically or to repudiate it. However, whatever policy he follows, he must comply with laws of the United States intended to promote human rights internationally. Up to now, such laws have been disregarded.

Here is the record.

The Administration has disregarded Section 502B of the Foreign Assistance Act. It requires the United States to deny "security assistance," including sales of defense equipment, to governments that engage in "a consistent pattern of gross violations of internationally recognized human rights." Hardly any country fits this criterion better than Guatemala, where, as the Inter-American Human Rights Commission of the Organization of American States has recently reported, the Government is assassinating thousands of teachers, priests, lawyers, journalists, and leaders of Indian and peasant organizations, unions, and opposition parties. Yet in June, the Administration sold $3.2 million worth of trucks and jeeps to Guatemala after removing this equipment from the "Security" assistance list.

The administration has disregarded Section 701 of the International Financial Institutions Act. It requires United States representatives at multilateral development banks to oppose loans to governments engaging in a "consistent pattern of gross violations of internationally recognized human rights." This law specifies that gross violations include: "torture or cruel, inhumane,

or degrading treatment or punishment, prolonged detention without charges, or other flagrant denial to life, liberty, and the security of the person."

Disregarding this law, the United States has recently voted, in multilateral development banks, for loans to Argentina, Chile, Paraguay, South Korea, and Uruguay, even though the State Department's own published reports show that all these countries have engaged in the specified violations. For example, the Argentine Government admits that it holds some 900 people in prolonged detention without charges; in addition, it refuses to account for the "disappearances" of an estimated 20,000 people in the last five years.

The administration has disregarded Public Law 96-259, as amended in 1980. It requires that: "The Secretary of the Treasury or his delegate shall consult frequently and in a timely manner with the chairman and ranking minority members [of several specified Congressional committees] to inform them regarding any prospective changes in policy direction toward countries which have or recently have had poor human rights records."

The first notice to Congress of a change in policy was a letter from a Treasury official, W. Dennis Thomas, dated July 1, 1981, and received by the House Banking Committee on Friday, July 3, when many members of Congress had already left Washington for the holiday weekend. Votes on a $300 million loan to Argentina and a $40 million loan to Uruguay (which, since the 1973 coup, probably has had, per capita, the largest number of political prisoners in the world) took place on Tueaday, July 7. The vote on a $126 million loan to Chile took place on July 8. As the administration was aware, Congress would be in recess that week.

For a long period, the administration disregarded Section 624(f) of the Foreign Assistance Act. It provides that: "There shall be in the Department of State an Assistant Secretary of State for Human Rights and Humanitarian Affairs." In early June, President Reagan's first nominee for the post, Ernest W. Lefever, withdrew following a 13-4 vote by the Senate Foreign Relations Committee to reject his nomination. Now, five months later the President has finally nominated a candidate, Elliot Abrams, to fill the post.

The Abrams nomination is a welcome sign to advocates of human rights both because it is associated with implementation of the policies called for in the State Department memo and, more important, because it is a beginning step in complying with the laws intended to promote human rights. In determining whether to confirm Mr. Abrams, the Senate should satisfy itself that he will see it as his first duty to make certain the Mr. Reagan and the administration fulfill that constitutional mandate that "he take care that the laws be faithfully executed."●

A TRIBUTE TO HALSEY C. BURKE

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today on behalf of Congressman DON EDWARDS and myself to salute Mr. Halsey C. Burke who is being honored by the Santa Clara County Boy Scout Council on November 24, 1981, with their 1981 Distinguished Citizen's Award.

We have known and worked with Halsey for many years and have always found him to be the kind of person that we can all learn from. His life shows numerous examples of community service and can serve as a role model for many young people growing up today.

Halsey was born in 1922 and was first introduced to community service when he joined Boy Scout Troop 25 which was sponsored by the Willow Glen Methodist Church. He earned many badges and attained the rank of Star Scout.

Throughout his life, he has always found the time to give of himself to community service. He has been extremely active in Rotary, having served as president of Rotary Club of San Jose, district governor of District 517 and chairman or member of various clubs, district and Rotary International committees. Other community activities have included: president, United Way of Santa Clara County; president, San Jose Chamber of Commerce; member, Music and Arts Foundation Board; member, Retirement Jobs, Inc. board; trustee, Good Samaritan Hospital; founding chairman, president's council, San Jose State University; president, San Jose Employees' Council; director, Boys' City Club; director, American Red Cross; Executive Board, Boy Scouts of America, and director, Santa Clara County Taxpayers' Association.

Currently, Halsey serves as a member of the President's Council, San Jose State University; advisory board, San Jose Chamber of Commerce; trustee, United Way; director, Standard Insurance Company; director, San Jose Water Works; director, Bank of the West; vice chairman, Santa Clara County Manufacturing Group; and director, National Jewish Hospital.

As you can see, Halsey has filled his life with community service. His achievements are many and all of the residents of Santa Clara County are grateful for the time and energy he has given us to improve the quality of life in our community.

Mr. Speaker, I ask you and all our colleagues in the House of Representatives to join Congressman DON EDWARDS and me to congratulate Halsey C. Burke on receiving the Santa Clara County Boy Scout Council's 1981 Distinguished Citizen's Award and to wish him success on all his future endeavors.●

AMERICANS ARE OPTIMISTIC ABOUT THE ECONOMY

HON. VIN WEBER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. WEBER of Minnesota. Mr. Speaker, some of us, I am afraid, get the bulk of our news from the Washington Post and the nightly network news. A steady diet of facts and information from these media would lead us to believe that we stand at the abyss of an economic collapse—that we are approaching 1929 all over again.

I contend that there are other, more accurate sources of economic news. For those of us who choose to spend recesses back in our home States, listening to constituents and reading local newspapers, the news is not so bleak.

A recent nationwide poll asked people if they are better off today than they were 1 year ago. The predominant answer was, "Yes." And the American people expect their economic well-being to improve even more in the years ahead. The truth is, a majority of people in this Nation support the new direction President Reagan has charted for our country. They believe that cutting the bloated Federal budget, returning to workers more of their hard-won wages, and trimming the tangled web of Federal regulations are essential medicine for our economy.

As an example of this sentiment, I would like to insert the following editorial. This level-headed piece of commentary appeared in an award winning daily, the St. Cloud Times, which serves a large area of farmers, wage earners and small businessmen in the Sixth District of Minnesota.

[From the Daily Times, Nov. 3, 1981]

DON'T IGNORE THE GOOD NEWS

The nation is currently suffering a slight recession and overall our economy is still struggling, but we are better off today than we were a year ago. The economy is slowly getting better, and that simple statement isn't heard enough.

Since President Reagan took office last January Americans have heard more talk about the economy than any other single issue. Inflation, unemployment, "misery indexes," Consumer Price Indexes, prime rates, Gross National Products and Reaganomics have become household words. But the bottom line has been that things are truly getting better.

None of us will deny that the national economy has a long way to go yet before it's fixed. We still have a high rate of inflation, interest rates are still dragging down such important industries as housing and auto sales, there's still plenty of misery left in the misery index and even with the Reagan administration tax cut many Americans find it difficult to make economic gains against inflation. But even so, things are getting better.

For example, wages are beginning to rise faster than the rate of inflation. The Labor Department reported last week that wage increases average 11.5 percent, while the annual rate of inflation for the first three quarters of 1981 figured out to 10.1 percent. An indication that the national economy is finally moving in the right direction. (Minnesota, of course, remains stuck in the same liberal-spending and taxing cycle.)

When President Carter left office in Dec., 1980 the prime interest rate was at 20.8 percent. Today the prime has dropped to 17.5 percent and is likely to go even lower in the months ahead. And while there is no guarantee interest rates will stay down, most economists are predicting lower average rates over the next two years.

The "misery index," inflation plus unemployment, has decreased substantially since Reagan took office. According to the conservative Heritage Foundation, the misery index had dropped a full six percentage points by last September.

It is presently being reported that the nation is suffering a "slight" recession. And although the recession has gone almost unnoticed by much of the public, economists sometimes refer to it as a "cooling" of the economy, brought on partially by the Federal Reserve Board's tight money policy. While many of these same economists agree that the money supply must be restricted, it is possible the Fed has put on the brakes just a little too hard, creating a small recession.

But whatever economic theory you accept or economist's column you read, most economic indicators do demonstrate an economy which is on the mend. While we may be some distance yet from getting out of the woods, we are also much better off than we were a year ago. Our prospect for the future is not quite so worrisome. If Congress can hold itself together and implement Reagan administration budget cuts and if the president doesn't make any serious mistakes, for the first time in more than decade, Americans have something to look forward to economically.

Things really are getting better.●

HON. AVERELL HARRIMAN

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. WIRTH. Mr. Speaker, from the days when most travel happened on the rails, to today's era of jet airplanes, Averell Harriman has been a tireless traveler for peace.

Whether his dispatches were carried by cable during World War II or via international satellites, he has been a precious international communicator, providing great insight to the news of the day.

Averell Harriman is unquestionably one of the truly great men of our century; our lives have been enriched by his insights and our future can be brighter if we remember his example.

Whether it was sending entertaining reports as a personal envoy of President Franklin D. Roosevelt during the darkest days of World War II or helping to negotiate with the Vietnamese for President Lyndon Johnson, Averell Harriman has known that it is people who turn policies into realities, and it is people who have the power to make peace.

It is this special human quality which all of us must remember in these days when nuclear confrontation is casually discussed. For Averell Harriman, famous for his blunt talk as well as his careful diplomacy, has always known that what really matters in this world is people, and that if we can somehow communicate with one another honestly and truthfully, we can find ways to resolve our differences peaceably.

As Averell Harriman once said:

If you haven't been to a country, no matter how much information you have, you can't get the feel of it.

He has taught us that diplomacy means not just convincing an adversary to see our point of view, but also building the relationships of personal trust so both sides can understand mutual benefits from reaching compromise. But he also knew there were times when compromise was the wrong move, and that keeping peace means being strong and firm.

Averell Harriman understands political power and the peculiar way it is exercised in this town—he has impressed many of the world's movers and shakers of this century.

And despite his background of great wealth, Averell Harriman always understood that working people must not be ignored. During the debate over the National Recovery Administration, for example, he said:

The man who can hold his place in the competitive system only by working women and children for long hours at low wages has no right to survive.

He has appreciated the now languished art of conversation, nurturing and preserving it. Now at age 90, he stands as a great monument to what a talent for talk can accomplish. In today's world of electronic communications we must not lose the art of person-to-person communications, with our friends and with our enemies.

Averell Harriman's profound understanding of global interdependence must be preserved now especially as our world has truly become a global village. His ability to balance national interest with international survival is a lesson we must all remember.

At age 90, I salute Averell Harriman for his work as special envoy to Churchill and Stalin; for his work founding the United Nations; for his development of the Marshall plan; for his ability to keep Soviet-American tensions from escalating into war; for his leadership as Governor of New York; for his work on the Nuclear Test Ban Treaty; and for his leadership at negotiating with the Vietnamese.

Perhaps most importantly, I salute Averell Harriman for always understanding that national interest must be built upon an understanding of people, who despite our vast diversity, share so much as fellow travelers on this planet.

Averell Harriman, when most men his age were enjoying restful retirement, has continued to serve the public, and has continued to be a national treasure. Without him, our party, our Nation, and our world would be more barren. Let us join together in praise for this great American, to pledge to remember what he has taught us, and our hopes that he will long remain among us.●

THE PROMISE OF SPACE EXPLORATION

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. CONYERS. Mr. Speaker, Omni magazine has played a pioneering role in bringing the world of science within reach of the layman, particularly in expanding and deepening public awareness of space exploration and science, and the great promise this holds for life on Earth.

In its December 1981 issue, Omni reprinted a commencement address of Dr. Thomas O. Paine, former Administrator of NASA, presented at the University of Hawaii in May of this year. Dr. Paine, who is president of Northrup Corp., offers sound reasons for continuing support for U.S. space activities, and I want to share his remarks at this point with my colleagues.

FIRST WORD

(By Thomas O. Paine)

From my perspective, America faces four great challenges:

First, to build and demonstrate to the world a creative polyethnic democracy, ". . . with brotherhood from sea to shining sea."

Second, to preserve global peace, using deterrence and persuasion wisely to prevent a calamitous nuclear war between the superpowers.

Third, to manage international science and technology in order to raise health and living standards throughout the world.

Fourth, to continue to explore the frontiers of science, particularly our solar system and the cosmos, eventually propagating terrestrial life to new worlds.

To me the greatest glory of America is our multifaceted democratic society, with diverse ethnic and religious values. More races live and work harmoniously together here than anywhere in the history of the world. We do not have to apologize that the task is not yet finished; of course it's not. Much remains to be done because we are an organic society, still experimenting, adapting, and receiving new peoples.

I believe that America's destiny is to demonstrate to a troubled world how people of diverse races and cultures can effectively work together and reach for the stars.

Our second challenge, to preserve global peace and prevent nuclear war, is of overwhelming importance. We will need extraordinary wisdom and determination, patience and strength, vigilance and luck. Military strength and resolution are not enough. We must combine deterrence with diplomatic persuasion and better mutual understanding. We must create more effective economic and cultural incentives for peace. Magnificent opportunities exist for joint programs in space exploration. The future of humankind depends upon our skill and success.

Our third challenge, to manage international science and technology to raise global health and living standards, also contributes to peace and stability. New technologies will be of critical importance: medicine, aerospace, "green revolution" agriculture (with genetic engineering promising new breakthroughs), industrial production (including computers and robotics), space communications, and new energy options—all of these will spark further rapid advances for the remainder of the century.

Our final challenge: continued bold research on the frontiers of science, particularly in the exploration of our solar system and the cosmos.

I see greater possible rewards today from research in the physical and biological sciences than at any time in our history. Step by step, we are progressing toward a powerful understanding of our environment and our own makeup, from the innermost structure of subatomic matter to the grand architecture of the universe, and from the beautiful genetic blueprint of DNA's double helix to the cognitive mysteries of the human mind.

Today we face exciting opportunities on transcendent planes.

I believe that America's national security and economic well-being depend upon our continuing technological leadership. As was shown a decade ago, NASA's clear lead in space operations is a sobering deterrent to Soviet miscalculation and a major stabilizing force in maintaining peace. Space surveillance systems, furthermore, offer the best hope for realistic arms control that can be carefully monitored and enforced.

There are many other practical benefits from NASA's programs. Communications satellites today represent a private investment of $1 billion—money raised not from taxpayers but from Wall Street investors expecting a return. More than 100 nations are now linked by the global communications satellite system, soon to be followed by the direct broadcast of many television channels from orbit.

In the next decade modules derived from the space shuttle will be fitted together to create operations centers in orbit. They will provide permanent facilities for medical and materials research, Earth observations, advanced communications, navigation systems, radio astronomy, and other valuable human activities. From space telescope observation may come discoveries of new fundamental laws of nature, with implications for future technologies as important as the past discoveries of radioactivity, lasers, and semiconduction were to present technology.

Thus the new shuttle rocket planes will open for investment and economic development a rich new continent in Earth orbit. Low-cost transportation to orbit and eventually to the moon and asteroids, plus vigorous space research, will generate whole new industries. From our new vantage point in space, we will better comprehend the universe and humankind's role as a vitalizing force, propagating terrestrial life outward from its earthly cradle.

This is a sound direction for us today. Let us create a new Golden Age as we soar upward to explore our cosmic environment and, in the tradition of the pioneering Polynesian navigators, open new islands for human settlement across the space frontier.●

DELAWARE FARM BUREAU PRESIDENT WALTON ON FARM PRICES AND PRODUCTION

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. EVANS of Delaware. Mr. Speaker, farmers in my home State of Delaware are extremely fortunate to have Mr. John F. Walton as president of the Delaware Farm Bureau. Mr. Walton involves himself not only in the affairs of farmers in Delaware, but also speaks out with keen insight on national farm matters.

In the latest issue of Northeast Agriculture, an American Farm Bureau publication, Mr. Walton contributed an interesting report on the issues of agricultural production in our Nation and the prices farmers receive for their products. I submit this article by Mr. Walton for inclusion in today's CONGRESSIONAL RECORD.

LOW PRICES—WHAT'S THE ANSWER?

Being president of Farm Bureau, I am occasionally asked by someone, usually from the news media or employed by government, "What's on the farmer's mind?" or "What problem is on the front burner currently?"

Those are not easy questions to answer, but there is no doubt that the question foremost in the farmer's mind is "Why are prices so low when costs continue to escalate?"

Farmers need a profit to stay in business. There is nothing particularly wrong with people wanting "cheap" food to eat, but an absolute necessity is that the producers of that food make a profit.

Americans brag about their high standard of living—the highest in the world! Our nation's balance of payments depends on agricultural exports.

What is not being talked about or written about is that the people producing this food are not making ends meet. No one seems to want to address this issue or speak out about it or even address it remotely. Government statistics reports do not do justice to the seriousness of the problem. An occasional brief report during the evening news is not adequate to let people know what is going on "Down on the Farm."

It's sort of this way; there are so few of us actually on the farm that the rest of the people, as long as they have food to eat, are not concerned about three or four percent of the people's problems.

I consider it a major responsibility of this organization to do all it can to solve farmers' problems. The answer to low prices may be due to overproduction—not necessarily so. As long as farmers continue to produce, low prices are an asset to the nation—but at whose expense! In order for free enterprise to succeed, there must be a profit incentive.

When savings and loan interest rates and "super savers" interest rates exceed any possible profit potential for business, what is the incentive to produce?●

HUMAN RIGHTS VICTORY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. KEMP. Mr. Speaker, the protection of human rights is the foundation on which this Nation was built; it must also be the foundation of our foreign policy. The future of human freedom hinges largely on the efforts of the United States to export its respect for individual liberty to other lands and to oppose the spread of tyranny.

It is gratifying, therefore, to know that the Reagan administration has appointed a most capable individual, Mr. Elliot Abrams, to administer its human rights policy. The administration of such a policy requires difficult choices among the lesser of evils; and it requires honest acknowledgments of the human rights violations of nations we choose to befriend. I am confident that Elliot Abrams is the right man for this demanding job.

A State Department memo, quoted in the New York Times by William Safire, states, "A human rights policy means trouble"; and Mr. Safire adds, fittingly, "unless it means trouble, a human rights policy means nothing." I commend Mr. Safire's November 5 essay "Human Rights Victory" to my colleagues to commemorate a promising "new beginning" in American foreign policy.

The article follows:

HUMAN RIGHTS VICTORY

(By William Safire)

WASHINGTON, Nov. 4.—The Reagan Administration intends to take the human rights issue seriously.

When the nomination of Ernest Lefever to the Human Rights post in the State Department was withdrawn (many believed his concern was limited to violations by Communist nations), the Reagan men took their time before sending a new name up to the Hill. Leo Cherne, Leonard Garment and the columnist Michael Novak were approached; each declined, but recommended "somebody like Elliot Abrams."

Mr. Abrams, 33 years old, is now Assistant Secretary of State for U.N. matters. His neoconservative pedigree ranges from being the stepson-in-law of Commentary magazine's editor, Norman Podhoretz, to being a former aide to Senator Daniel P. Moynihan. At State, Mr. Abrams has been one tough cookie-pusher, and his nomination last week to the sensitive human-rights post signals Mr. Reagan's desire to live up to his 1976 campaign commitments.

Underscoring the significance of the Abrams nomination is the policy expressed in an "eyes-only" memorandum, dated Oct. 27, to Secretary Alexander Haig, from Deputy Secretary William Clark and Under

Secretary for Management Richard Kennedy recommending the Abrams appointment. (I suspect the memo was drafted by Mr. Abrams, who will probably be blamed for being the source; he was not.)

"Human rights is at the core of our foreign policy," states the Clark-Kennedy memo. ". . . We will never maintain wide public support for our foreign policy unless we can relate it to American ideals and to the defense of freedom."

"The fundamental distinction" between ourselves and the Soviet bloc is our sharply different attitudes toward freedom, says the memo: "Our ability to resist the Soviets around the world depends in part on our ability to draw this distinction and to persuade others of it." The writers recognize that one cause of the wave of neutralism abroad is the notion of relativism: "Why arm, and why fight, if the two superpowers are morally equal? Our human rights policy must be at the center of our response."

Fine words, but to achieve credibility we will have to knock our friends occasionally. Here is how the new policy handles that: "If a nation, friendly or not, abridges freedom, we should acknowledge it, stating that we regret and oppose it. However . . . human rights is not advanced by replacing a bad regime with a worse one, or a corrupt dictator with a zealous Communist politburo."

That is a necessary straddle, but activists will hail this passage: "A human rights policy means trouble, for it means hard choices which may adversely affect certain bilateral relations. At the very least, we will have to speak honestly about our friends' human rights violations and justify any decision wherein other considerations (economic, military, etc.) are determinative. There is no escaping this without destroying the credibility of our policy, for otherwise we would be simply coddling friends and criticizing foes."

In dealing with the Russians, Mr. Abrams appears to have extracted an internal concession to insure that his will not be a cosmetic role: ". . . this Administration might possibly seek the repeal of the Jackson-Vanik Amendment," which links our trade concessions to Communist nations to their willingness to allow dissidents to emigrate. "Abrams has made clear," reads the burn-before-reading memo, "that he could only support such an effort in the context of the sort of agreement reached between Jackson and Kissinger in 1975. To seek repeal without such an agreement would, in his view, make a mockery of our human rights policy. . ."

The memo contains the Haigian turfmanship, proposing that State head the Interagency Group on human rights, "using Defense Attachés in some cases as part of our 'quiet diplomacy,'" which my turn Defense Secretary Weinberger purple.

And there is a wistful paragraph suggesting "we should move away from 'human rights' as a term, and begin to speak of 'individual rights,' 'political rights' and 'civil liberties.'" Presumably this is because "human" rights have been mistaken by some to mean an entitlement not to starve, but the name-changing notion is wrong-headed: human rights is rooted in Locke's "natural rights," put in the French phrase for "the rights of man," and changed by Eleanor Roosevelt at the U.S. to "human rights" to include women.

In the Reagan espousal of that policy, the good guys have won. Hats off to the beleaguered Secretary of State; let us hope he does not find the public perusal of his inter-office mail too great a parannoyance. We should be prepared to wade through reams of soporific eyes-only or teeth-only memos (how do you get off Al Haig's distribution list?) to find one line like "A human rights policy, means trouble." Unless it means trouble, a human rights policy means nothing.●

VOCATIONAL GUIDANCE ACT OF 1981

HON. WILLIAM F. GOODLING

OF PENNSYLVANVIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. GOODLING. Mr. Speaker, during this week we are observing National Career Guidance Week. President Reagan has written the following message to the National Vocational Guidance Association:

I am pleased to send my greetings to the National Vocational Guidance Association and its members as you celebrate National Career Guidance Week.

Your sixteenth annual observance properly emphasizes the growing need for skilled and thoughtful planning in choosing one's career. In today's complex world of work, it becomes more important than ever that professional career guidance be available to help people of all ages choose occupations that will provide the greatest opportunity to develop their skills and abilities and to achieve personal fulfillment.

I congratulate the members of the National Vocational Guidance Association for your commitment to effective handling of the counseling concerns of our Nation's citizenry.

You have my best wishes for a successful and productive observance of National Career Guidance Week.

I would like to associate myself with the President's remarks. In addition I am pleased to cosponsor, along with my colleague from Michigan on the Education and Labor Committee, Dale Kildee, a bill which enhances the critical role of guidance and counseling in career preparation and planning without creating a new spending program.

As you are aware, Mr. Speaker, I have been concerned about the critically high level of youth unemployment, especially among disadvantaged minority youth. I am convinced of the importance of informed guidance and counseling to any attempt to effectively deal with this problem.

As our Subcommittee on Elementary, Secondary, and Vocational Education proceeds in its hearings on the reauthorization of the Vocational Education Act, I would like along with my colleague from Michigan, to offer this Vocational Guidance Act of 1981 as a basis for discussion of the proper role of guidance and counseling in the context of vocational education. I recognize the need for a link among the Nation's schools and business and the labor market. Providers and recipients of the service must not be isolated from the mainstream. The Federal role in this area must be defined more clearly so that objectives and outcomes can be more specifically described.

This legislation, I feel, creates greater opportunities for vocational guidance personnel to gain first hand and continuous experience in business and industry. This will enable them not only to provide a more realistic assessment to their students, but will foster greater contacts between the school, business, and labor sectors of our community. I realize that this represents only a small step but I sense that it is an important one. I plan to work on this theme of greater private sector involvement and substantial coordination among vocational education, job training programs, business, industry, and labor unions.

In this era of spending restraint, it is important that we use our dollars wisely. This bill would require that a minimum percentage of the currently available funding be used to enhance the role of career counseling in our vocational education programs. It does not require new or additional Federal outlays.

It is in this spirit that I am supporting the Vocational Guidance Act of 1981.●

OUR REDS, AND THEIRS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD an excellent article by I. F. Stone which recently appeared in the New York Times. In this article, Mr. Stone provides a perceptive analysis of American foreign policy.

Mr. Stone notes that there are two Communist blocs: one led by Moscow—the other by Washington. Our Communist bloc consists of China, Pol Pot's Cambodia, Somalia, and Yugoslavia. Indeed, well over two-thirds of those living in Communist-ruled countries are now in our camp, which leads to some major anomolies in our foreign policy. Mr. Stone notes in his article:

We have harsh trade embargos against Cuba and Vietnam while we give substantial trade and credit advantages to the Union of Soviet Socialist Republics.

This just does not make sense—except in that it is consistent with the administration's overall vacillating and incoherent foreign policy. I am delighted that Mr. Stone has finally asked the important question:

If we can get along so readily with so many varieties and millions of Communists, do we have to fight—and spend ourselves—to death in a crazy arms race with the rest of them?

I commend this excellent analysis to the attention of my colleagues:

OUR REDS, AND THEIRS

(By I. F. Stone)

WASHINGTON.—Devotees of yoga recommend standing on one's head a few minutes every day. They say it provides a refreshing new view of the world. One way to defuse the holy-war spirit welling up around us is to stand on our heads and take an upside-down view of the so-called East-West struggle.

If we look freshly, we can see that there are now not one but two Communist blocs. One is led by Moscow, the other by Washington.

There are now five Communist countries that look to us for protection: China, Poland, Pol Pot's Cambodia, Somalia, and Yugoslavia. Moscow governs more than twice as many Communist states. But we, thanks to China, of course, have more than twice as many of the world's Communists under our wing.

The United States has more than a billion Communists climbing onto its payroll. Moscow has less than half a billion. So, well over two-thirds of the world's Communists are now in our camp.

The edges of these two blocs tend to be unstable. The latest switches were in the Horn of Africa. There, the Ethiopian and the Somalian Marxist-Leninists are engaged in a game of musical chairs. The Ethiopians have switched their fealty to Moscow and the Somalians to Washington, but both remain "peoples' republics."

In the Far East, where Vietnam used to be Communist China's buffer against United States power, China is now the United States' biggest buffer against the Soviet Union, and Vietnam is the Soviet Union's buffer against China, but none of them has changed ideologically. It's hard to make holy war with any real passion when Communism and capitalism are both so flexible and faithless in switching their bedfellows.

Our Communist bloc is what investment counselors call a diversified portfolio. The five Communist regimes in our bloc range from the world's most admirable, in Poland, to the world's most bloodthirsty, the followers of Cambodia's Pol Pot—the Idi Amin of world Communism. They survive only along the Thai border but they sit ensconced as Kampuchea, with our full diplomatic support, in the United Nations.

Joining the United States' Communist bloc is not like joining the Roman Catholic Church. No conversions is required. Yugoslavia, the first rebel against the Soviet bloc, has been under America's wing for three decades. It is still a one-party Communist dictatorship.

We are more tolerant to our Communist bloc than we are in our Free World bloc. If Poland were in Latin America, we would be nudging it toward a military dictatorship and a trade-union crackdown as in Argentina and Chile. We would be pleading the need to enforce "austerity" on a country that had been living beyond its means thanks to somewhere between 24 and 27 billions in hard-currency loans.

Except for the Soviet Union, no other Soviet country has been allowed to pile up a comparable debt to capitalism. As for Solidarity's right to strike against the Government, how United States air controllers must wish they were in Poland. There, Ronald Reagan would be on the picket line with them.

China, the biggest Communist country in our lap, remains as hostile to freedom of expression as were Mao's China and Stalin's Russia. The only difference is that its harder to find samizdat literature in China.

United States treatment of the Communists in Moscow's bloc is equally resistant to logical analysis. We have harsh trade embargos against Cuba and Vietnam while we give substantial trade and credit advantages to the Union of Soviet Socialist Republics.

On the other hand, we grant most-favored-nation treatment to Rumania and Hungary, along with Poland and China. Just why Rumania and Hungary are thus honored is not clear. Rumania internally is the most Stalinist Muscovite satellite while Hungary is the most "liberal."

The biggest anomaly is in our relations with our No. 1 enemy. the rationale for the stepped-up arms race is that it will starve out the Soviet regime. Its people, so Ronald Reagan said the other day, are already "eating sawdust." Mr. Reagan forgot to mention that the sawdust was liberally enriched with American wheat and corn.

Perhaps this has a hidden logic. Perhaps we keep the enemy alive because if the Soviet Union ever dropped dead of hunger, there would also be starvation here, though of another kind, in our military-industrial complex. General Dynamics would fall clear out of the bottom of the stock-market tables. What would the Pentagon do without Moscow?

Our little fable, like Aesop's, has its moral. If we can get along so readily with so many varieties and million of Communists, do we have to fight—and spend ourselves—to death in a crazy arms race with the rest of them?●

W. AVERELL HARRIMAN

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. ANNUNZIO. Mr. Speaker, I am delighted to join my distinguished colleague, the Honorable JONATHAN B. BINGHAM, in saluting a great leader and outstanding public servant, the Honorable W. Averell Harriman, on the occasion of his 90th birthday.

Ambassador Harriman began his career of public service in the Roosevelt administration at the National Recovery Administration, and served in several posts before becoming a special representative of the President in Great Britain in 1941. From 1943 to 1946 he served as the American Ambassador to the Soviet Union, became our country's Ambassador to Great Britain for a time in 1946, and then accepted the position of Secretary of Commerce, which he held from 1946 to 1948.

Averell Harriman continued in various positions of public service during the Truman administration, and in 1955, he was elected as Governor of New York. Governor Harriman served in the Kennedy and Johnson administrations as Ambassador-at-Large, Assistant Secretary of State for Far Eastern Affairs, and Under Secretary of State for Political Affairs during the decade of the 1960's and is also the author of several books on foreign policy.

During his long career Governor Harriman has witnessed some of the greatest moments in the history of mankind and he has experienced, in a very real sense, the triumphs and the tragedies of our Nation. He has never lost that zeal and that fire as champion of all the people by espousing that it is good and it is right for people to share in the wealth of America, because he believes that a productive citizen is what makes a Democratic country like ours strong. He firmly believes that each citizen who has produced for America and who has contributed to the wealth of America must be rememberd by America in the twilight of their lives.

Again, I congratulate W. Averell Harriman on this honor, and I extend to him my warmest best wishes for abundant good health and ever-increasing success as he continues to serve his nation in devotion to high principle.●

DOUBLE STANDARD ON HUMAN RIGHTS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. DERWINSKI. Mr. Speaker, Allan C. Brownfeld is a versatile journalist who has established a well-deserved reputation for his effective coverage of foreign affairs. He is also a long-time student of developments in the Communist world.

Therefore, I would like to direct the Member's attention to his column in the Washington Inquirer of October 30, which I believe merits reading.

DOUBLE STANDARD ON HUMAN RIGHTS

(By Allan C. Brownfeld)

AGANA, GUAM.—From Europe, Asia, North and South America a group of academicians and political leaders gathered to consider the question of international human rights on this small, tropical U.S. Pacific Island, the place, as the tourist brochures point out, "where America's day begins."

The conference, sponsored by the Chinese Association for Human Rights of Taipei, Taiwan, the Center for International Studies of London, and the Guam Association for Freedom and Human Rights, included such participants as Dr. Ernest Lefever, President Reagan's original choice for the position of Assistant Secretary of State for Human Rights; J. A. Parker, president of the Lincoln Institute, who headed the Reagan Administration transition team at the Equal Employment Opportunity Commission; Nobuyuki Fukuda, president of the University of Tsukuba, Japan; the Hon. Jill Knight, M.P., England; and the Hon. A. Ploeg, M.P., the Netherlands.

While many opinions were presented on a variety of subjects, there was widespread consensus about the danger of the world's double standard concerning human rights,

one which judges non-Communist states much more harshly than those Communist states which are, in fact, the world's most serious human rights violators.

Professor A. James Gregor of the University of California declared that, "Jimmy Carter's decision to make human rights issues the central concern of American foreign policy generated considerable confusion, manifested itself in considerable ambiguity and seeming inconsistency, and left a tangle of problems to be resolved by his successors. One of the central problems left as a legacy by the Administration turned on the fact that the U.S. seemed prepared to impose unilateral constraints on economic and security assistance against those nations that were real or potential American allies should their internal political arrangements, by American judgment, fail to conform to some abstract and absolute standard of human rights provisions. Since the U.S. had very few occasions to employ such sanctions against communists states, its use of sanctions gave every appearance of being selective."

The double-standard of the Carter policy, Professor Gregor declared, led to "punitive measures that were employed exclusively against selected 'authoritarian' regimes. Communist regimes seem to have suffered very little, irrespective of their doleful histories of human rights violations. In effect, the human rights policies of the Carter Administration seemed to lack internal consistency and credibility."

The Reagan Administration, Dr. Gregor argued, recognizes the very real difference between totalitarian and authoritarian regimes, which the Carter Administration did not: "By distinguishing between those systems that are semi-competitive and those that are intrinsically non-competitive, the present administation displays a greater sensitivity to the realities of the contemporary world than its predecessor."

Dr. Alphonse Max, a respected Uruguayan journalist, pointed to the dangerous effects of the Carter policy in Latin America, where anti-Communist regimes such as that of Anastasio Somoza in Nicaragua were abandoned, only to be replaced by far more oppressive governments. Dr. Max noted that, "The government of Mr. Carter was completely unable to see that if there were violations in Latin American countries, such violation was the result of the abuse of human rights by Communist countries and the terrorists which were their agents. Violation was not the cause of the abuse. Outbreaks of the Marxist guerrilla movements—the Tupameros in Uruguay, the Montoneros in Argentina, MIR in Chile, M-19 in Colombia—caused the occurrence of the assumed violations."

President Carter, Dr. Max charged, "was unable to discriminate between a country attacked by international terrorism directed from the communist metropolis and the aggressor itself. Such aggressor has the whole world as its scene of battle. It makes use of client states such as Cuba, Vietnam, East Germany, etc. The aggressor symbolizes the permanent violation of all human rights, not as an exception but as the rule . . . Mr. Carter set out with much more success to fight the democratic states which have temporarily lost part of their condition as such in the emergency of facing aggression than he did combatting those which perpetually violate human rights . . . Thus, we observe that while the former government in Washington did everything possible to wipe out governments which were unconditionally allied to the U.S., such as Iran and Nicaragua, on the one hand, it devoted its attention to splitting hairs over individual cases within the Soviet Union."

A number of speakers detailed the very real denial of human rights now taking place in Communist countries. Dr. Han Lih-Wu, president of the Chinese Association for Human Rights in Taipei, discussed the outrages committed by the Communist Chinese since they came to power on the Mainland in 1949 and stated that, "Altogether, as the various estimates show, some 60,000,000 people were either killed, shot, tortured to death, or forced to commit suicide by the Chinese Communists since the beginning of their movement in 1921." The Soviet Union, declared Professors Stephen Feinstein and Charles H. C. Kao of the University of Wisconsin, remains a major violator of human rights. They note that, "What in the Soviet Union is considered normal prison or exile conditions often amounts to outright torture . . ."

Dr. Ernest Lefever assured the group that human rights policy under the Reagan Administration would be far different than that which existed under President Carter. No longer, he said, would pro-American states be singled out for condemnation. A distinction would be made between "totalitarian" and "authoritarian" states and attention would be paid to whether or not human rights were improving. Dr. Lefever noted that "authoritarian" states such as Portugal, Spain, and Greece had all evolved into parliamentary democracies. "There is no example thus far," he said, "of a Communist dictatorship evolving into a democracy."●

TAKING POLITICS OUT OF SOCIAL SECURITY

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. WINN. Mr. Speaker, 4 years ago, President Carter told the American people that social security was in dire financial trouble and the only way to save it, he claimed, was the single largest tax increase in the peacetime history of our Nation—$227 billion over 10 years, tripling the tax burden on middle income Americans. When the 1977 social security amendments were passed, it was publicized by that administration that—

Social security has been placed on a sound financial footing for the next 40–50 years.

It is now clear that they were wrong.

The Members of Congress not only have the opportunity but the critical responsibility to make good on the Government's word to the millions of Americans who depend upon social security for their very existence. I feel that everyone agrees that some changes are necessary to insure the future solvency of the program but we do not need to scare beneficiaries who are currently drawing benefits as we solve this problem. Their fright stems from the misinformed and misquoted statements which are far too often made by public officials who seek only to gain politically from the social security issue. We have an obligation to every current recipient and future beneficiary to work together for a sensible approach to solving the social security problem, rather than playing politics as usual such as I have witnessed over the past several months.

Thoughtful senior citizens in my district in Kansas tell me they are tired of Republicans pointing at Democrats, saying they have overloaded the system with various programs and brought it to the brink of bankruptcy. And, these same senior citizens are tired of Democrats pointing at Republicans, accusing them of trying to wreck the system and violate the social security commitment.

Social security was enacted to insure a basic floor of protection to every American who has paid into the system. These people have made nothing less than a contract with their Government and now, when it is time for these people to receive a return on their investment, it is questionable if they will have what rightfully belongs to them. It is feared that the Government is threatening to jerk the rug right from under their feet on the eve of retirement or in its early beginnings. For a government to allow this unfair play to happen to its senior citizens is a disappointment, a discouragement, and a cruel chapter in our history.

However, we do have an opportunity, here in the House, to not let that unfair play happen. To make good on our Government's word. To restore faith in the entire American system, as we work together, putting politics aside and making the social security system a reliable program. I applaud President Reagan's recent proposal to form a bipartisan study commission of a 15-member panel to help in this effort. I ask those who were appointed to the commission the same as I ask my colleagues: Please let us come together, quietly and sincerely, determined to solve this problem. We cannot allow our political discord to cause unnecessary apprehension among Americans who depend upon social security. Our senior Americans deserve no less.●

FACTSHEET ON MOBILE SOURCE EMISSIONS

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. TRAXLER. Mr. Speaker, while general public support for the goals of the Clean Air Act appears undiminished, it has become once again evident in recent months that the debate over the best means to achieve those goals remains equally active. This is in

part due to the very complexity of the act itself as well as the intricate nature of the problem it addresses.

Earlier this year, Congressman HILLIS of Indiana and I introduced H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981. This bill proposes several adjustments in the act which we believe will provide for continued air improvement in a less burdensome, more cost effective way. These proposals, while supported by a growing number of groups and individuals both within and outside the motor vehicle industry, have also been the subject of some questions and criticisms. Unfortunately, such comments have been frequently based on *misunderstandings* and/or misinformation.

The Motor Vehicle Manufacturers Association has recently put together a factsheet which addresses assertions made by various critics of efforts to adjust the mobile source requirements of title II of the Clean Air Act. In an effort to help clarify these issues, I am submitting excerpts from the MVMA factsheet. Additional excerpts from the factsheet are included in today's RECORD by my colleague, Mr. HILLIS of Indiana. I urge my colleagues in this body to read this material and to join us in our efforts to bring about these needed adjustments in the act.

FACT SHEET

Assertion: A Carbon Monoxide (CO) Standard of 7.0 g/m And A Nitrogen Oxide (NO_x) Standard Of 2.0 g/m Would "Double" Emission Standards and Mean a "Giant Step Backward in Air Quality."

Comment: Does "doubling" the standards mean doubling pollution? No, there would not be any discernible change in health protection under standards of 7.0 CO and 2.0 NO_x.

CO STANDARD

A new car carbon monoxide standard of 7.0 grams per mile represents a 92 percent reduction in emissions from precontrolled vehicles. A standard of 3.4 g/m is a 96 percent reduction. Thus, a "doubling" of the CO standard from 3.4 to 7.0 represents a 4 percent and not a 100 percent difference.

A standard of 7.0 g/m will provide for continued air quality improvements. According to the latest EPA estimates,[1] CO air quality in 223 urban areas has improved some 36 percent between 1972-79, for an average annual improvement of 7 percent. In cities with the highest levels, the annual average improvement rate is even higher, about 11 percent. Furthermore, this progress through 1979 was achieved with a national car fleet designed to meet standards of 15 g/m or higher.

Independent studies have concluded that a 7.0 g/m standard is more than adequate to assure compliance with the health standard for CO. Moreover, a 3.4 standard would not result in earlier achievement of the health standard.

EPA estimates that the difference in the impact on air quality between the two standards is negligible—by 1987 the total in-use car fleet would average 26.3 grams per mile under a 3.4 standard and 26.6 g/m under a 7.0 standard. According to recent EPA testimony, CO is ". . . a problem that is just a small fraction of the problem it was 10 years ago . . . There is virtually no difference between the two standards [7.0 and 3.4 g/m]."[2]

NO_x STANDARD

A new car oxides of nitrogen standard of 2.0 g/m represents a 51 percent reduction from pre-controlled vehicles. A standard of 1.0 g/m is a 76 percent reduction. However, the difference in the impact on air quality between the two standards is not significant. According to EPA "In NO_x, we have a non-problem. We have hundreds of monitors out there recording attainment . . . Over the next 10 years we don't see the NO_x problem getting worse [with a 2.0 standard]."[3]

A standard of 2.0 g/m will provide for continued air quality improvement. According to latest EPA estimates,[4] total passenger car NO_x emissions have decreased 13 percent since 1973 (the year that standards began). The largest annual reduction occured in 1979 as new cars meeting the 2.0 g/m standard (which started in 1977) began to significantly impact the total on-the-road fleet. In 1979, the car population was emitting NO_x at a level of about 3.0 g/m.

Outside of the Los Angeles area (where California would continue to set its own unique standards), nearly all areas of the country are in compliance with the ambient air quality standard for NO_2 and any marginal areas will quickly achieve compliance as 2.0 g/m NO_x vehicles make up an ever increasing portion of the fleet.

Assertion: Proposals Will Adversely Affect Smog Control.

Comment: Efforts to control smog formation center on reducing hydrocarbon emissions. Highway vehicles account for about 30 percent of hydrocarbon emissions from all man-made sources nationwide.

Hydrocarbon (HC) emissions are controlled because they react in the atmosphere to help form photochemical oxidants, such as ozone. Certain kinds of HC, such as methane, are non-reactive, however, and therefore do not contribute to smog formation. Nonetheless, EPA requires vehicle manufacturers to control both reactive and nonreactive HC emissions. In addition, EPA regulates HC at two separate points: In tail pipe exhaust and the evaporative losses from the fuel system.

Motor vehicle manufacturers support a consolidated, reactive HC only standard in order to provide a more rational and flexible approach to HC control. The impact of this new HC standard would result in no net change in stringency from that of the present standards.

Furthermore, while NO_x emissions are participants in ozone (smog) formation, along with hydrocarbons and sunlight, their role appears ambiguous at low levels of control—at times promoting while at other times inhibiting ozone generation. Continuation of the 2.0 g/m auto standard outside California (which sets its own standards) would provide effective mobile source NO_x control and significant consumer savings. California's unique air quality requirements can still be addressed through its waiver provisions under the Clean Air Act.

Assertion: A CO Standard of 7.0 g/m Will Adversely Affect Health.

Comment: According to the final report of the National Commission on Air Quality: "Based on . . . Commission studies, if the exhaust emission standard for carbon monoxide were changed from 3.4 grams per mile to 7.0 grams per mile, there would be no change in the projected attainment status of areas of the country in 1990. Los Angeles and one area of Denver would exceed the standard according to Commission projections; according to EPA projections, Denver would meet the standard. There will be no effects from relaxation of the standard in Los Angeles because the California standard is presently 7.0 grams per mile; the state of California made the determination that the more stringent standard is not necessary to protect public health."[5]

According to recent EPA testimony: "We are in the process of looking at the [National Ambient Air Quality] carbon monoxide standard. The standard is tied to trying to protect against defects in the oxygen-carrying capacity of the blood. There is no effect on the health as far as we can see. We wouldn't be talking about relaxing [emission] standards if we were faced with the edge of human health considerations."[6]

Assertion: A CO Standard of 7.0 g/m Will Increase the Need for Inspection and Maintenance Programs.

Comment: According to EPA testimony: "The selection of the standard level isn't going to affect the need for inspection and maintenance, since the fleet average emissions of CO will be the same for either standard; 26.3 and the 26.6 [g/m] are at a level where we can't distinguish between the two. They are virtually the same. The question, then, becomes whether I/M is needed, independent of the level of those standards."[7]

Assertion: Motor Vehicle Sulfur Oxide and Nitrogen Oxide Emissions Significantly Contribute to Acid Rain.

Comment: The main constituent of acid rain in areas of concern (Northeastern U.S.) is sulfuric acid.

According to latest EPA estimates,[8] highway vehicles account for less than 2 percent of total sulfur oxide emissions from man-made sources nationwide.

Nitric acid accounts for about 30 percent of the acid in acid rain in the Northeastern U.S. Since passenger cars account for about 15 percent of total NO_x emissions, they at most might account for 5 percent of the nitric acid contribution to acid rain on a national average basis.

EPA has estimated that:

". . . In 1995 the difference in total NO_x emissions between 1.0 and 2.0 gram/mile standard is projected . . . to represent only about 1 percent of the total precursor emissions."

"The potential impact of increased emissions between the two standards is probably even smaller than 1 percent, for several reasons. Automobiles emit NO_x near ground level, and over large geographic areas. Thus, these emissions are less prone to be transported over great distances than are emissions from very tall stacks . . .

[2] Testimony before House Subcommittee on Health and the Environment, September 23, 1981, hearing transcript, p. 99.

[3] Ibid., pp. 99-100.

[4] U.S.E.P.A., "National Air Pollution Emission Estimates 1970-79," March 1981, p. 10.

[5] National Commission on Air Quality, "To Breathe Clean Air," March 1981, p. 128.

[6] Hearing transcript, op. cit., p. 109.

[7] Hearing transcript, op. cit., p. 104.

[8] "National Air Pollutant Emission Estimates," op. cit., p. 6.

". . . relaxing the NO_x emission standard for automobiles to 2.0 gram/mile will not contribute significantly to acid deposition. This appears to be particularly true in the eastern part of the country where sulfur oxides play a dominant role in acid deposition. Nitrates are believed to contribute relatively more to the acid deposition problem in the western states than in the east. Although still small, the impact of the proposed relaxation may be somewhat higher in the western states except California where a more stringent NO_x standard is in effect." [9]

Assertion: Proposed adjustments to the Clean Air Act are supported by motor vehicle manufacturers because they claim: the Act is killing the auto industry; pollution control requirements are stopping the industry's ability to raise capital; and the technology to meet the current standards for gasoline powered automobiles is unavailable.

Comment: Domestic motor vehicle manufacturers do not base their support for adjustments to the Clean Air Act on any of the above alleged claims.

Their case is based on the following:

A growing body of air quality data and projections indicating that requirements to control the last fraction of vehicle emissions presently mandated by the Clean Air Act are not needed to improve air quality and protect public health; and that

Such requirements impose substantial and disproportionate costs without discernible benefits.

According to EPA estimates,[10] the cost of tightening the CO standard from 15.0 g/m to 7.0 was $8 per ton of CO removed, but the cost of going from 7.0 to 3.4 g/m is $71 per ton. The case for revising the NO_x standard is even more dramatic: the cost per ton of NO_x removed at 2.0 g/m was $57 while the cost to reach the 1.0 standard is $656 per ton.

The consumer must pay these sharply escalating costs but in turn receives little or no air quality benefit.

The technology has indeed been demonstrated for meeting the 1981 statutory standards. If it must be used sometime in the future, it can be. It just is not needed now.

Assertion: The Auto-Makers Claim That Pollution Controls Hurt Their Competition With Foreign Manufacturers. . . . In Japan, Emission Standards are Equal to, or Stricter Than, the American Ones.

Comment: Both imported and domestic vehicles are required to meet the same U.S. standards.

U.S. auto standards are the most stringent in the world, bar none. Because of differences in test procedures, EPA several years ago concluded that Japanese standards of 0.4 HC/ 3.4 CO/ 0.4 NO_x "are not more stringent for NO_x, and . . . are substantially less stringent for HC and CO" than U.S. standards of .41 HC/ 3.4 CO/ 1.0 NO_x.[11]

Standards in European countries are presently set at levels less stringent than 1975 U.S. standards and do not require catalyst technology and unleaded gasoline.

Canadian standards are less stringent than American, but require emission control hardware roughly equivalent to that of 1979 U.S. standards (which required the use of catalysts on most U.S. cars).●

ANTIGUA GAINS INDEPENDENCE

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. BARNES. Mr. Speaker, on November 1 the world gained a new nation, Antigua-Barbuda. After 349 years of British control these small Caribbean islands have become independent. This is an important event, and as chairman of the Subcommittee on Inter-American Affairs, I want to congratulate the 76,000 citizens of Antigua-Barbuda on their independence.

Earlier this year, my colleagues on the Foreign Affairs Committee and I had the opportunity to meet with the Prime Minister Vere Cornwall Bird, who can fairly be called the father of that small nation. I think that we were all impressed by the Prime Minister and his commitment to the difficult task of building a national identity without the long-standing British presence. The United States and the people of these islands have a long tradition of friendship and cooperation.

I want to take this opportunity to wish the Antiguans and the Barbudans success on their independence and pledge our continued friendship for the future. I also think that my colleagues may find Prime Minister Bird's independence speech of interest. Below is a brief report of his comments.

Prime Minister's comments follow:

Prime Minister Bird, in a brief emotional address, listed unity, dedication and hard work as the principal elements for future success. They could together make it a land of glory, but all must go forth together and produce. "We are free this night," said the veteran leader, "but freedom cannot exist without responsibility. What we do now is our own responsibility. We can blame no others. The freedom now won after centuries of colonialism must be protected and safeguarded," he declared. "The people of this new nation—all Antiguans and all Barbudians—must ensure that they never become dependent again. Productivity must be the cornerstone of the national thrust . . ." "We must commit ourselves to work, and to work hard," said the prime minister. "If not, we shall fall to new masters." "But this country has not struggled long and with great fortitude merely to exchange one master for another." Mr. Bird identified economic self-sufficiency as the number one priority . . ." "Go forth and be productive," he told the huge throng, urging national respect for the dignity of labor and the value of work. This was the "promised land" delivered today, and it was for the people of Antigua and Barbuda now to "put our shoulders to the wheel and our hands to the plow." The promise he was making on this historic day was not to produce manna from heaven, said the prime minister, it was promise that "if we all work together, we shall achieve self-sufficiency, and substain our independence dignity." "The future calls for discipline and for dedication.

"There is no ideal more noble, no task more rewarding, than to work for your own country's development." The prime minister made it clear that Antigua and Barbuda were parting from Britain without bitterness. He said: "Tonight, we have severed the unbilical cord which united us with Britian * * * Tonight, we are a nation fully formed and we can take advantage of every opportunity in the world to which we have delivered. But in severing the final constitutional tie with Britain, we must not act like a petulant infant." He added: "As we must be practical in all things, so we must be practical in recognizing that we cannot blame today's Britain for the rule of yesterday's empire." In his first speech as prime minister, Mr. Bird said that Antigua was a multiracial society reborn. Said he: "Our forefathers were Africans, English, Welsh, Scots, Portuguese and, more recently, Lebanese and Syrian." He added: "tonight, we are all reborn Antiguans and Barbudans, each with a role to play, each with a contribution to make." The prime minister said that as his country opposed racial bigotry and prejudice in other lands "so must we eradicate any trace of it in our society."

Mr. Bird said he could not guarantee that the road ahead would be easy. "I can give no assurance that if you sit idle then (prosperity) will fall in your lap like manna from heaven," he remarked. "But I can promise that provided we all work together * * * We will sustain our independence with dignity and with self-respect." He told Antiguans and Barbudans: "Let us make this a land of glory."●

FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. FORD of Michigan. Mr. Speaker, I can no longer stand back and allow the Director of the Office of Personnel Management, Donald J. Devine, to blame the current mess in the Federal employees health benefits program (FEHBP) on everyone else in this town, when in fact, the responsibility is his, and his alone.

As a result of Director Devine's actions, over 2 million Federal employees and their families face a situation where first, their health insurance coverage will be substantially reduced; second, their health insurance premiums will be substantially increased; and third, their open season, the period when they are allowed to switch plans or options, has been indefinitely canceled only 3 days before it was scheduled to begin. The situation is unprecedented and it is tragic. Who caused it?

First, Director Devine blamed his staff. On September 11, 1981, after he had ordered the 120 health carriers in the program to submit new plans reducing benefits by 6 percent, he stated:

In addition to underestimating the effects of inflation, OPM seriously underpriced most of the FEHB plans in 1980 and 1981.

So he appointed a new Associate Director to head the program. When the plans had complied, he decided to order a second round of benefit reductions in October. At this point, some of the carriers challenged this second round of Devine's directed cuts in court, and a Federal district court agreed the Director had abused his discretion.

So now the Director had some new fall guys—the courts and the Congress. On October 30 he stated that the court had "usurped fundamental authority conferred by the Constitution on the legislature." According to the Director, the benefit reductions he had ordered were necessary to stay within "congressionally mandated budget constraints." The court decision could "require OPM to spend nearly a half billion dollars more on the program than Congress provided under the Budget Reconciliation Act of 1981." Nonsense. Funds for FEHBP have not yet been appropriated, and there is nothing whatsoever in the "Budget Reconciliation Act of 1981" relating to, or imposing restraints on, that program.

Now, with criticism of the Director's handling of the program building, he has decided his problems are the fault of the previous administration. In a November 9 statement concerning the benefit cuts he claims "these cuts have nothing whatever to do with budgetary constraints ordered by this administration: the benefit cuts were necessary to live within the budget level set by the previous administration, a budget level which has not been changed."

Here are the facts:

It is true the Carter administration budget underestimated the premium increase now known to be necessary to keep FEHBP benefits at last year's level. These were actuarial estimates made over a year ago by career civil servants, not political appointees. Inflation, utilization, and the number of program participants were all underestimated. When the Reagan administration submitted its budget revisions this spring, it proposed no change in the amounts recommended by the previous administration. Thus, the budget recommendations now before the Congress are those of the Reagan administration.

The House has approved FEHBP funds for OPM in the amount requested by the Reagan administration. The Senate Appropriations Committee has done the same. These amounts may be inadequate, but they are only a part of the Government funds used for the program. The Government's contribution for health benefits for active employees—roughly 60 percent of premium—is paid from each agency's appropriation for salaries and expenses. No specific amounts are appropriated to the agencies for these payments. If the premiums go up more than expected, each agency must absorb the increase within its existing budget. This has happened before. No additional appropriation is needed.

With respect to the funds appropriated to OPM for the program, Director Devine could have asked Congress, and still can ask Congress, to increase the amount to make up the estimating error. He didn't. Instead, he chose a course of arbitrary action which has thrown the program into turmoil.

It appears Director Devine is a true believer in, and a blind follower of, the Stockman school of cut, cut, cut—whatever the cost. He seized upon an opportunity to reduce Government outlays for health insurance premiums by ordering arbitrary benefit reductions which diminish the value of the program to employees and jeopardize the financial positions of many carriers. It is employees and carriers who pay the cost. It is Director Devine's actions which have caused the problem we now face. The responsibility is his alone.●

WASHINGTON POST ENDORSES NATURAL GAS DECONTROL

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 13, 1981

● Mr. DANNEMEYER. Mr. Speaker, national energy policy should be a prime component of our effort to fashion an economic recovery program for the Nation. Providing the proper incentives for economic growth through tax and budget cuts is a necessary, but by no means a sufficient, step. Ultimately, economic growth will require access to, and the efficient use of, energy resources.

The most important single step that the 97th Congress could take to improve our national energy policy would be to decontrol the price of natural gas. While the issue is complex, the bottomline is that decontrol would foster both conservation and production of an important fossil fuel.

It is unfortunate that the administration has postponed action on decontrol proposals. The lead editorial of the Washington Post of November 5, 1981, is entitled, "The Retreat from the Free Market." I urge my colleagues to consider the Post's arguments in support of natural gas decontrol.

The editorial follows:

[From the Washington Post, November 5, 1981.]

THE RETREAT FROM THE FREE MARKET

The free market is all the energy policy that this country needs, the administration repeatedly says. But reality keeps awkwardly intruding. The latest example is the decision at the White House to postpone any attempt to take price controls off natural gas. That's a pity, for natural gas production is one area of energy policy in which a free market would work most usefully.

The rhetoric has been admirable. Last week Secretary of Energy James B. Edwards was in New York, enthusiastically explaining to an audience of skeptical utility managers the great things that the Reagan administration has in mind for the electric power industry. Among other things, he said, "We have to deregulate natural gas, as we did oil earlier this year, to create a free market in energy. . . ."

Meanwhile, back at the White House, things were sliding in the opposite direction. The President and the Republican leadership in Congress have now decided not to do anything about deregulation legislation this year. As a practical matter, in view of the 1982 elections, that means next year as well.

The reasons for deregulating gas prices are as valid as ever. It's grotesque to keep gas cheaper than oil, and only encourages waste. The administration's reason for backing off is, apparently, only to avoid another messy and uncertain wrestling match in Congress. The congressional leaders have told Mr. Reagan that he can't get deregulation without a tax on the sharply rising returns to the producers. But Mr. Reagan has promised the producers that he would veto a tax. That pledge could no doubt be forgiven, if anyone in the administration wanted to take the time and trouble to show the less sophisticated elements of the gas industry where its real financial interests lie. But that's more time and trouble than the White House evidently cares to invest in an issue that also sets the various regions of the country, and economic interests, fiercely against one another. The administration, struggling to retain some degree of control over its economic program, is not interested in launching a bill that it considers an expensive and exhausting diversion.

That's another pity, for a stiff tax on deregulated gas—similar to the present windfall tax on oil—could raise perhaps $20 billion a year. That's the kind of new revenue that the administration now urgently needs. Freeing the price of gas, and taxing it, is infinitely preferable to fiddling around with nuisance taxes on beer and telephone calls.●

SENATE—*Monday, November 16, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

It is good to give thanks to the Lord, to sing praises to Thy name, O Most High.—Psalm 92: 1, 2.

Holy, holy, holy is the Lord of hosts; the whole Earth is full of His glory.—Isaiah 6: 3.

Gracious God, help us to realize that we need to worship Thee, that it is of the essence of true humanness. Help us to see that in denying Thee, we deny ourselves. In the words of the Apostle Paul:

Though they knew God, they did not honor Him as God, or give thanks to Him, and they became futile in their thinking and their senseless minds were darkened. Claiming to be wise, they became fools.—Roman 1: 2, 22.

Thou dost not need our worship, O God, but we need to worship. Thou dost not lose Thy glory when we fail to honor Thee, but we devalue our humanity. Forgive us Lord for the idolatry which exalts man as God and worships the creature rather than the Creator.

Receive our gratitude for Thy forbearance, grace and love. In the name of Thy Son, our Saviour, we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

WALKING

Mr. BAKER. Mr. President, the demands of this week should by now be well known; during the latter part of the week, long hours will turn into long days, and hopefully decisiveness will be buoyed by necessity.

But in the prolog of legislative logistics, I ask unanimous consent that we digress for a moment and subsume "Walking," a poem by Gregory Orr.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

WALKING

Out here in the chill air,
the fabric of each breath
unravels. We walk in tractor
ruts where frozen mud studded
with ice crystal makes,
under our boots, a sound
from my childhood: crunch
of sugar lump in a horse's jaw;
its warm muzzle
works across my palm
which is rigid with a held-back
giggle of fear and pleasure.

Sweetcake, our cat, scoots past
then flops on her side and waits
in a clump of broom-sage
colored the same luminous
orange as her own left haunch.
We laugh to think we love so much
this dumb bundle of fluff.
Back in the cottage, under thick
quilts, our bed's still warm.

MISS D'AMATO SHOWERED WITH PRAISE

Mr. BAKER. Mr. President, my good friend and colleague from New York, Senator D'AMATO, is one proud papa today. It seems that his 19-year-old daughter Lisa, stepped into the shower in the most notorious manner since Janet Leigh in "Psycho," and has emerged a world recordholder for time spent in a shower.

I will refrain from making the easy, cheap remarks that such news might well inspire.

I will not say, for example, that Miss D'Amato will henceforth be not only showered with fame but famed for her shower.

I will not say that Miss D'Amato, to a greater degree than anyone I know, has "cleaned up her act."

But 121 hours and 1 minute nonstop is no small drop in the bucket, and before we all break into a chorus of "Singing In The Rain," I want to extend the Senate's congratulations to Lisa and her local water authority.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, is there an order for the transaction of routine morning business for today?

The PRESIDENT pro tempore. There is no order.

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order and the recognition of the distinguished junior Senator from West Virginia (Mr. ROBERT C. BYRD), there be a brief period for the transaction of routine morning business for not to extend beyond 20 minutes in length in which Senators may speak for not more than 3 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, is there an order for the Senate to resume consideration of H.R. 4169?

The PRESIDENT pro tempore. That is automatic and it requires no order.

Mr. BAKER. Yes. I thank the Chair.

ORDER FOR THE RECOGNITION OF SENATOR HART

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the distinguished minority leader under special order the distinguished Senator from Colorado (Mr. HART) be recognized on special order for not to exceed 15 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the Senator.

Mr. BAKER. I thank the minority leader.

ORDER OF PROCEDURE

Mr. BAKER, Mr. President, after the recognition of the two leaders and the recognition of two Senators on special orders and the transaction of routine morning business as provided for, the Senate will resume consideration of H.R. 4169, the State, Justice, and Commerce appropriations bill, and will continue debate and disposition of that measure until the hour of 3:30 p.m. when, under the order previously entered, the Senate will temporarily lay aside H.R. 4169 and proceed in executive session to consider the nomination of C. Everett Koop to be Surgeon General of the Public Health Service.

There is a 1-hour time limitation on debate on that nomination to be equally divided. At the end of that period a vote will occur on the Koop nomination. The Senate will then return to legislative session and resume consideration of H.R. 4169.

Mr. President, there may be other matters that can be dealt with in the course of the day by unanimous consent, and I will have further announcements as the time grows nearer.

POSSIBILITY OF LATE SESSIONS THIS WEEK

Mr. BAKER. Mr. President, as I indicated last Friday, there is the possibility at least of late sessions every day this week, and there is also a distinct possibility of a weekend session, certainly a Saturday session, assuming that it is necessary in order to complete action on

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

79-059 O-85-10 (Pt. 21)

a continuing resolution and measures in respect thereto. Senators should make their plans accordingly.

Mr. President, I yield to the distinguished Senator from Wyoming.

The PRESIDENT pro tempore. The Senator from Wyoming.

Mr. WALLOP. I thank the majority leader.

SCHEDULE OF TAPE RECORDING VIEWINGS IN THE MATTER OF SENATOR WILLIAMS

Mr. WALLOP. Mr. President, the resolution to expel Senator WILLIAMS, Senate Resolution 204, has been scheduled for floor action on December 3.

In response to requests for an additional opportunity to hear and view tape recordings received in evidence during the Ethics Committee hearings, Senator HEFLIN and I have scheduled four more presentations. These will be held on Thursday, November 19, 1981, and on Tuesday, November 24, 1981.

There will be identical presentations in the morning and afternoon of each of those days: The morning presentations will be from 9:15 a.m. to 12:45 p.m. and the afternoon presentations from 2:15 to 5:45 p.m. The sessions will be held in room 457, Russell Senate Office Building, the same room as they were held before. Because of a number of requests, one staff person for each Senator will be permitted to attend the session on Tuesday afternoon. Senate identification should be displayed to the person on duty at the door. Any questions concerning these sessions may be directed to staff counsel, Donald Sanders, at 4–2018.

Approximately two-thirds of the entire Senate has already attended taping presentations in September and October. Senator HEFLIN and I urge the remainder of the Senate to take advantage of one of these final opportunities before December 3.

There is an extensive record in this case. All materials printed by the committee, including the committee report, No. 97–187, and the briefs of Senator WILLIAMS' attorneys, have been sent to each Member's office in order to help you in making a careful and informed judgment. As you make use of this data in preparing for this very important matter, please do not hesitate to call Senator HEFLIN or myself if you wish further assistance. Committee staff and special counsel will also be available, at your request, to answer any questions.

In fairness to Senator WILLIAMS, he has written Members two Dear Colleague letters in which he has made available his counsel to respond to requests or interpretations for Members.

I think as we approach this rather historic and solemn occasion that it behooves Members of the Senate to, in the interest of fairness, the interest of the public's interest in the Senate of the United States, in the interest of the Senate itself, to operate from the standpoint of as full information and full credibility to the judgment process they are going to make as is possible.

The only way to do this is to take time from what is already a busy schedule and to read the record of the hearings and to view those tape-recorded presentations and contact counsel on both sides to interpret data as they see fit. But it is fair and it is appropriate that the Senate do that at this time.

Mr. President, I yield the floor.

Mr. BAKER. Mr. President, I thank the distinguished chairman of the Ethics Committee, the Senator from Wyoming, who has done such an extraordinarily good and impartial job under trying circumstances.

I must remark that the Senator from Wyoming has—as many other Senators have, but he especially has—the double difficulty of dealing with the matters of the Ethics Committee which are largely done, and properly done, behind closed doors, in a most confidential and discrete way, and still attend to his regular legislative duties and to his responsibilities to represent, as he does so ably, the people of his State.

The Senate as a whole owes him and the distinguished Senator from Alabama, the vice chairman, Senator HEFLIN, a special debt of gratitude because while all of us are very busy, the chairman and the vice chairman of the Ethics Committee have the most difficult job.

Mr. President, I yield back my time or yield whatever time I have remaining to the distinguished minority leader.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader for yielding his time to me. How much time do I have?

The PRESIDING OFFICER (Mr. NICKLES). The Senator has 13 minutes.

Mr. BAKER. I yield the remainder of my time.

DIRECTOR STOCKMAN'S BELATED CANDOR

Mr. ROBERT C. BYRD. Mr. President, the city of Washington has become blase to shocking revelations from Government officials. But even this blase city is still reeling at the cynicism displayed by OMB Director David Stockman's comments as reported in the Atlantic Monthly. In an era in which the public grows increasingly disenchanted with our public institutions, Mr. Stockman's admissions that the administration has been intentionally fooling the American people about its economic program are particularly disheartening.

He spoke the truth, but he spoke the truth to an assistant editor of the Washington Post. He did not speak the truth to the Congress of the United States nor did he speak the truth to the American people.

But the issue is not simply whether or not Mr. Stockman has been so discredited as to severely limit his utility as an administration spokesman. The larger issue is that, with his indiscreet candor, Mr. Stockman has totally discredited the administration's so-called economic recovery plan.

Many of us have said for some time that the so-called economic recovery plan was a thinly veiled effort to transfer wealth from the middle class to the wealthy in America. Many of us have said for some time that the program was internally flawed, based on phony numbers, and a major economic gamble with the only economy we have.

Now, Mr. Stockman has told the world that he agrees with much of this analysis. As our economy careens into what appears to be a deep recession, it becomes ever more clear that the administration's economic game plan cannot bring about vigorous economic growth and, therefore, that this game plan must be dramatically revised. Therefore, it is particularly unfortunate that at this critical time the domestic policy apparatus of the administration now seems to reflect the same disarray, doubt, and confused leadership that has characterized the foreign policy apparatus for some time.

OMB Director Stockman's comments show his remarkable understanding of the consequences which are flowing from his budget and tax programs. He was forthright in his conversations with Mr. Greider although not with the public—in assessing the internal failures of the administration's fiscal policies.

At the same time, I am deeply disturbed that millions of working men and women and our Nation's elderly citizens were not told earlier that the sacrifices they were asked to endure would be in vain. Mr. Stockman has now told them: "We have a [budget] gap which we couldn't fill even with all these budget cuts * * *." Why could he have not made this clear before the cuts were made?

Mr. Stockman told the House Ways and Means Committee this past May that if social security cuts were not made, "the most devastating bankruptcy in history will occur on or about November 3, 1982." He paints a far different picture in this article, admitting that the social security cuts were made to satisfy "* * * the here-and-now of budget requirements." This was a cruel and unnecessary misrepresentation that distressed many of our elderly citizens.

Billions of dollars have been cut from housing programs at a time when the housing sales are at near depression levels. Employment programs have been ended at a time when 8.5 million people are out of work. School lunches and child nutrition programs have been slashed, and student loans are drying up. The most tragic aspect of these cuts is that they were made with neither rhyme nor reason. Mr. Stockman has now conceded that, "none of us really understands what's going on with all these numbers." Why did he not say that to the American people and to Congress before?

The administration sold its budget and tax cuts using economic assumptions and budget projections which were woven from whole cloth. The Atlantic Monthly article reports that Mr. Stockman's reaction to early economic forecasts of unprecedented Federal deficits was to change the computer program by contriving a "* * * swift decline in prices and interest rates * * * [and] a dramatic surge in the nation's productivity." All the time, Mr. Stockman understood that, "You don't stop inflation without some kind of dislocation. You don't stop the growth of the money supply in a three-trillion-dollar economy without some kind of dislocation. The supply-siders have gone too far." Why did he not reveal this to the American people and to the Congress before the program was enacted?

The administration was no more honest about the tax cuts than about the budget cuts. Democrats warned repeatedly that the proposed tax cuts were a total surrender to big business and the wealthy. As Mr. Stockman has now admitted, the plan was "* * * really 'trickle down.'"

The supply-side rhetoric was added for political consumption. Mr. Stockman said the administration disguised the tax cuts as supply side because, "It's kind of hard to sell 'trickle down,' so the supply-side formula was the only way to get a tax policy that was really 'trickle down.'"

It does not surprise anyone that trickle down is hard to sell. Any program that gives money to the wealthy in the hope that some relief will eventually drip down to the middle classes should be hard to sell. But, because of the ideological facelift, we now have the trickle-down theory embodied in the tax cuts passed this summer.

Since the truth about tax and budget cuts has now been told, it is time to bring reality back to the fantasy land of supply-side economics which has brought on our current recession.

For some time, I have been asking the administration to come forth with a realistic and full accounting of its fiscal policy. I have introduced a bill, S. 1787, and offered an amendment, which require Mr. Stockman to make a full and complete accounting of his budget and tax plans. When I offered my amendment requiring that the administration produce the specific details of budget cuts and tax increases necessary to balance the budget, it was defeated on a straight party-line vote.

One revelation in the Atlantic Monthly article that did not come as a surprise is that the numbers in the administration's budget games did not add up. Mr. Stockman tried to disguise this phony budget by employing a magic asterisk, as he called it. This asterisk stood for unidentified cuts—the unidentified cuts that I have tried unsuccessfully to flush out through these past months.

This is the time to recognize that no hocus-pocus, whether it be "magic asterisks" or voodoo economics, will put the economy back on a road to economic recovery. The American people should be told the truth. Now that Mr. Stockman has admitted that his budget is phony, I hope that the majority will not continue to stonewall my efforts to get the administration to provide us with a believable plan to balance the budget.

The administration plan has brought us no economic relief. Inflation is higher now than it was in January, 14.8 percent compared to 9.1 percent then. Unemployment has shot up to 8.0 percent from the 7.4 percent rate in January. Mortgage rates are more than 3 points higher now, 18.3 percent compared to a 15.15 percent rate when the administration took office.

To top it all off, our real GNP has dropped by $8 billion between the first and third quarters of this year. Retail sales in October dropped 1.5 percent. All indications are that the recession is growing deeper each day.

The time has come for the administration to act decisively. It is time for the administration to abandon its discredited fiscal plan and to send Congress a realistic plan to bring down the ballooning deficits. It is time for the administration to abandon its bankrupt tight money policy. It is time to get our Nation's citizens back to work.

Mr. Stockman has shown a great ability to focus the clear light of reality on his past failures. I am sure he can shine this same light on our economic future. I hope the administration's next budget proposals reflect this clear light and not the diffuse cloud of blue smoke that has obscured the economic horizon so far this year.

I ask unanimous consent that a special report prepared by the staff of the Democratic policy committee entitled "The World According to Stockman" be printed in full in the RECORD. This special report highlights the very lengthy Atlantic Monthly article. I also ask unanimous consent that an article entitled "The Stockman Confessional" published in the Washington Post on November 12, 1981, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, follows:

[Special Report]

THE WORLD ACCORDING TO STOCKMAN

This report contains the most important excerpts and quotations from the article entitled, "The Education of David Stockman," which appears in the December, 1981 issue of Atlantic Monthy.

It is a surprising summary, and analysis, of Reaganomics by Director Stockman, who was the principal architect of that plan.

The full text of this article was placed in the CONGRESSIONAL RECORD on November 10th, by Senator HART. The reprint begins on page 27125

These excerpts are grouped under several headings, and are intended to be a useful condensation of the lengthy article.

ECONOMIC FORECASTING METHODS UNDER REAGANOMICS

GREIDER. In early January . . . an OMB computer, programmed as a model of the nation's economic behavior, was instructed to estimate the impact of Reagan's program on the federal budget. It predicted that if the new President went ahead with his promised three year tax reduction and his increase in defense spending, the Reagan Administration would be faced with a series of federal deficits without precedent in peacetime—ranging from $82 billion in 1982 to $116 billion in 1984. Even Stockman blinked.

Stockman set about doing two things. First, he changed the OMB computer. . . . Instead of continuing double-digit inflation, the new computer model assumed a swift decline in prices and interest rates. Instead of the continuing pattern of slow economic growth, the new model was based on a dramatic surge in the nation's productivity. . . . Second, Stockman used the appalling deficit projections as a valuable talking point in the policy discussions that were underway with the President and his principal advisers.

STOCKMAN. (The financial markets are) concerned about the out year budget posture, not about the near term economic situation. The (Henry) Kaufmans don't dispute our diagnosis at all. They dispute our remedy. They don't think it adds up. . . . I take the performance of the bond market deadly seriously. I think it's the best measure there is . . . it means we're going to have to make changes. . . I wouldn't say we are losing. We're still not winning.

THE BUDGET CUTS

GREIDER. Two weeks after selling Congress on the biggest package of budget reductions in the history of the Republic, Stockman was willing to dismiss the accomplishment as less significant than the participants realized. . . . He knew that the budget resolution numbers were an exaggeration. The total of $35 billion was less than it seemed, because the "cuts" were from an imaginary number—hypothetical projections from the Congressional Budget Office on where spending would go if nothing changed in policy or economic activity. Stockman knew that the CBO base was a bit unreal. Therefore the total of "cuts" was, too.

STOCKMAN. There was less there than met the eye. Nobody has figured it out yet. Let's say that you and I walked outside and I waved a wand and said, I've just lowered the temperature from 110 to 78. Would you believe me? What this was was a cut from an artificial CBO base. That's why it looked so big. But it wasn't. It was a significant and helpful cut from what you might call the moving track of the budget of the government, but the numbers are just out of this world. The government never would have been up at those levels in the CBO base.

The reason we did it wrong—not wrong, but less than the optimum—was that we said, hey, we have to get a program out fast. and when you decide to put a program of this breadth and depth out fast, you can only do so much. We were working in a 20 or 25 day time frame, and we didn't think it all the way through. We didn't add up the numbers. We didn't make all the thorough, comprehensive calculations about where we really needed to come out and how much to put on the plate the first time, and so forth. In other words, we ended up with a list that I'd always been carrying of things to be done, rather than starting the other way and asking, "What is the overall fiscal policy required to reach the target?

I just wish that there were more hours in the day or that we didn't have to do this so fast. . . . I don't have time, trying to put this whole package together in 3 weeks, so you just start making snap judgments.

GREIDER. But Stockman . . . cheerfully conceded that the administration's own budget numbers were constructed . . . mixing cuts from the original 1981 budget left by Jimmy

Carter with new baseline projections from the Congressional Budget Office in a way that, fundamentally, did not add up.

STOCKMAN. None of us really understands what's going on with all these numbers.

GREIDER. Democrats accused Reagan of reneging on his promise to exempt Social Security from the budget cuts and accused Stockman of trying to balance his budget at the expense of Social Security recipients, which, of course, he was.

STOCKMAN. The Social Security problem is not simply one of satisfying actuaries . . . it's one of satisfying the here-and-now of budget requirements.

The problem is that the politicians are so wary of the Social Security issue per se that they want to keep him away from it, thinking they could somehow have an administrative initiative that came out of the boondocks somewhere and the President wouldn't be tagged with it. Well, that was just pure naive nonsense. . . . My view was, if you had to play this thing over, you should have the President go on TV and give a twenty minute fire-side chat, with some nice charts.

THE ECONOMIC AND POLITICAL FOUNDATIONS OF KEMP-ROTH

STOCKMAN. The hard part of the supply-side tax cut is dropping the top rate from 70 to 50 percent—the rest of it is a secondary matter.

The original argument was that the top bracket was too high, and that's having the most devastating effect on the economy. Then, the general argument was that, in order to make this palatable as a political matter, you had to bring down all the brackets. But, I mean, Kemp-Roth was always a Trojan horse to bring down the top rate.

It's a kind of hard to sell "trickle down", so the supply-side formula was the only way to get a tax policy that was really "trickle down". Supply-side is "trickle down" theory.

GREIDER. He was conceding what the liberal Keynesian critics had argued from the outset—the supply-side theory was not a new economic theory at all but only new language and argument to conceal a hoary old Republican doctrine: give the tax cuts to the top brackets, the wealthiest individuals and largest enterprises, and let the good effects "trickle down" through the economy to reach everyone else. "Yes", Stockman conceded, "when one stripped away the new rhetoric emphasizing across-the-board cuts, the supply-side theory was really new clothes for the unpopular doctrine of the old Republican orthodoxy".

STOCKMAN. Do you realize the greed that came to the forefront. . . . The hogs were really feeding. The greed level, the level of opportunism, just got out of control. . . . The basic strategy was to match or exceed the Democrats and we did.

THE ECONOMIC FOUNDATIONS OF REAGANOMICS

STOCKMAN. The whole thing is premised on faith . . . on a belief about how the world works.

GREIDER. The final pasted-together (Gramm/Latta) measure would be several thousand pages of legislative action and, Stockman feared, another version of the Trojan horse—a Trojan horse filled full of all kinds of budget busting measures and secondary agendas.

Sugar subsidies might not cost the government anything, but could cost consumers $2 to $5 billion. "In economic principle, it's kind of a rotten idea," he conceded. Did Ronald Reagan's White House object? "They don't care, over in the White House. They want to win."

THE FAIRNESS OF REAGANOMICS

STOCKMAN. We are interested in curtailing weak claims rather than weak clients. The fear of the liberal remnant is that we will only attack weak clients. We have to show that we are willing to attack powerful clients with weak claims. I think that's critical to our success—both political and economic success.

GREIDER. What was new about the Reagan revolution, in which oil royalty owners win and welfare mothers lose? Was the new philosophy so different from old Republicanism when the federal subsidies for Boeing and Westinghouse, and General Eelctric were protected, while federal subsidies for unemployed black teenagers were "zeroed out"? . . . For now, Stockman would concede this much: that "weak clients" suffered for their weakness.

STOCKMAN. Power is contingent—The power of these client groups turned out to be stronger than I realized. The client groups know how to make themselves heard. The problem is, unorganized groups can't play in this game.

REAGANOMICS VERSUS TRADITIONAL ECONOMICS

STOCKMAN. We believe our ideas have intellectual respectability, and we think the press will recognize that. The traditional Republicans probably sensed, even if they didn't know it, that their ideas lacked intellectual respectability.

STOCKMAN'S VIEWS ON REAGANOMICS

STOCKMAN. I've never believed that just cutting taxes alone will cause output and employment to expand.

Some of the naive supply-siders just missed this whole dimension. . . . You don't stop inflation without some kind of dislocation. You don't stop the growth of money supply in a $3 trillion economy without some kind of dislocation. . . . Supply-side was the wrong atmospherics—not wrong theory or wrong economics, but wrong atmospherics. . . The supply-siders have gone too far. They created this nonpolitical view of the economy, where you are going to have big changes and abrupt turns, and their happy vision of this world of growth and no inflation with no pain.

Whenever there are great strains or changes in the economic system . . . it tends to generate crackpot theories, which then find their way into the legislative channels.

[From the Washington Post, Nov. 12, 1981]

THE STOCKMAN CONFESSIONAL

(By Hobart Rowen)

So you thought "voodoo economics" was just a George Bush campaign wisecrack about Reagan's policies? I hope you have been reading what OMB Director David Stockman has been confessing privately to my Washington Post colleague, William Greider, in an Atlantic article entitled "The Education of David Stockman."

The article provides a stunning, candid insight into the formulation of economic policy by the Reagan administration. It validates in undisputable terms what critics of Reaganomics have said from the beginning—that cutting taxes excessively and pumping up the military budget would not produce balanced budgets, but only big deficits and high interest rates.

The young budget director—a dynamic force behind Reagan's widely acclaimed budget-cutting offensive earlier this year—admits that the actual cuts were made to look far more important than they really are. What's more, he acknowledges what many have long suspected, that the optimistic forecast of the economy that provided a rationale for big tax cuts and a swelling of the Pentagon budget was really a phony.

"None of us really understands what's going on with all these numbers," Stockman told Greider.

For all of the elaborate rhetoric on how the Kemp-Roth bill would stimulate investment by cutting marginal tax rates, for all of the baloney spoon-fed to willing congressmen by Arthur Laffer, Jude Wanniski and Rep. Jack Kemp, Stockman confesses that he knew from the very start that "the supply-side formula was the only way to get a tax policy that was really 'trickle down.' Supply side is 'trickle down' theory."

Stockman concedes the point that the tax cut is a rich man's bill. "Do you realize the greed that came to the forefront (when the tax legislation went to the Hill)?" he asked Greider. "The hogs were really feeding. The greed level, the level of opportunism, just got out of control. . . . The politics of the bill turned out to be very traditional. The basic strategy was to match or exceed the Democrats, and we did."

Although the Democrats have little to be proud about, considering their role in expanding this year's tax giveaways. Greider's piece undoubtedly will provide a field day for them as they search for a new political platform: Stockman is saying flat out that Reaganomics is a failure, and the economic arguments for it were fraudulent—and he knew it. What he calls for, in effect—at the obvious risk of his job—is a drastic revision of Reaganomics, something that the White House team headed by Ed Meese isn't ready to do.

"This government must stiffen its spine and not throw in the towel on our fight to get federal spending under control," said President Reagan at his Tuesday press conference. But what Stockman is saying is that the president will never get spending under control or achieve his other goals with this program. And he's right.

This reporter and many others have cited as the key internal inconsistency of Reaganomics the attempt to blend an expansionary fiscal policy with a restrictive monetary policy. Since April, one concludes from the Greider account, Stockman has reluctantly come to the same conclusion.

When the financial markets hit the toboggan during the late summer, White House spokesman whined about Wall Street's lack of "support" for the Reagan program. But Stockman was telling Greider in a weekly tête-à-tête that Wall Street was right.

"I take the performance of the bond market (which was deeply depressed) deadly seriously," Stockman said. "I think it's the best measure there is. The bond markets represent worldwide psychology, worldwide perception and evaluation of what, on balance, relevant people think about what we're doing. . . . It means we're going to have to make changes. . . ."

For most of this past week, President Reagan and Treasury Secretary Donald Regan—who seems to be moving into the key economic advisory slot—have been insisting that the administration would stick firmly to its economic proposals, even though recession, and the realities that Stockman recognizes, have made mincemeat of its predictions.

The president now says that there will be no balanced budget in fiscal 1984 and admits that "none of us" had predicted a recession, expecting merely "a stagnant economy."

What President Reagan has to acknowledge beyond that is the main thrust of the Stockman confessional: there's no way to get the economy out of the mess he's put it in unless he agrees to junk supply-side mythology. By January, when he must revise budget forecasts, Reagan will need a new and more plausible scheme. Painful as it may be for him, it will have to incorporate a lesser tax cut and a lesser defense buildup in fiscal year 1983 and beyond.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from Wisconsin.

THE BIGGEST AND MOST SERIOUS ILLUSION IN ECONOMIC POLICY

Mr. PROXMIRE. Mr. President, David Stockman, the Budget Director has gotten himself and the administration in a peck of trouble. Why? Because Stockman talked honestly and bluntly to a reporter armed with the most lethal of political weapons: A tape recorder. Some people think we would have a better world if all of us spoke the truth no matter how painful. Try following that policy with your wife when she first gets up in the morning or with your boss when you catch him in a self-serving error, and you will find out in a hurry how dangerous and damaging, in fact, how downright cruel committing truth can be.

Of course, there are times when that cruelty may be helpful. This may be one of them. David Stockman did some passing damage to the President and his program by speaking the truth, but in the long run what he has done may serve the interest of the country and even the President.

Here is why: The worst shibboleth about economic policy is that we can follow a particular budget or tax policy and then as a result it will have a particular effect on interest rates, on jobs, on productivity, on growth, on the deficit or the national debt and on other variables.

The fact is that no matter how thorough or careful our economic analysis may be, the best we can do is guess whether a particular Federal policy tossed into the huge vastness of this $3 trillion economy will end up pushing employment up, or interest rates down.

Almost any Federal policy unless it encompasses a truly massive spending or tax change or variation in monetary policy and persists in it for years will be overwhelmed by forces the policy does not reach.

This does not mean that we should just give in and do whatever seems politically feasible. It means we should recognize that we will not achieve significant improvements in our economy—like a permanent reduction in inflation and interest rates or a permanent increase in the employment level—unless we adopt truly decisive changes and persist in staying with them for a number of years.

If you read thoroughly the article in the Atlantic Monthly, and the press conference Mr. Stockman held Thursday, this message comes through very clearly. And along with it several other sensible words of wisdom. Mr. Stockman found that two elements of the Reagan program developed a life of their own. They ran surely outside his control and perhaps outside even the control of the President.

One was the tax cut. Stockman refers to the rampant greed. Those of us who took part in the tax debate will recall that especially the rush to win additional tax concessions for the oil boys when they were already gorged on sky-high OPEC world prices. Remember the giveaway to the overseas fat cats who won a $75,000 income tax exemption by simply living overseas—anywhere—an Arabian desert, a Paris brokerage office, or a beach house in Tahiti?

Another was the military spending explosion. Stockman rightly calls our attention to the fabulous waste, as he puts it so well, the "contracting idiocy." How can anyone who has followed the M1 tank or the B–1 bomber or the F–18 plane doubt that? Stockman spoke the truth. And let us not forget it.

All of us—Democrat as well as Republican—have a deep interest in cutting spending, and that is what David Stockman more than any other man in public life today stands for. He has none of the illusions others in the Reagan administration have about the sacredness of defense spending. He knows when you explode health, nutrition, or defense into the billions and, in the case of defense, hundreds of billions of dollars a year, you will run into mountains of waste.

David Stockman performed a genuine service for this country by speaking the truth, and manfully standing by what he said in his press conference. We should remember what he said when the tax bill rolls around again and when the military appropriation and authorization bills come before us. Whatever his faults, Stockman understands this Federal budget as no one else in the administration or in the Congress does. Let us read and ponder and benefit from the lessons he has taught us.

A $1,000 THANK YOU

Mr. PROXMIRE. Mr. President, the editorial in yesterday's Washington Post "A $1,000 Thank You" reminds us once again of the serious adverse consequences of questionable payments to government officials.

It is sadly ironic that a high official of the Reagan administration is involved in a gratuity payments matter from a foreign nation at the same time the Reagan administration appears before Congress in a major effort to gut the Foreign Corrupt Practices Act and to legalize just such payments to foreign government officials by American companies.

S. 708 as reported and as appears on the Senate Calendar would authorize payments by American companies to foreign officials constituting a courtesy or a token of regard or esteem.

Bribery is bad business, whether directly or under the euphemism of gratuities or questionable payments for courtesy or esteem. The Allen case reminds us once again how shabbily such payments reflect on the democratic process. If and when S. 708 is taken up, I hope my colleagues will have the courage to stand up to the Reagan administration and vote no. A no vote on S. 708 will put the Senate firmly on record against shabby corrupt practices. Instead of cutting back on our law we should encourage other nations, like Japan, to enact their own laws, putting a stop to such practices overseas.

The existing Foreign Corrupt Practices Act has effectively stopped American companies from bribing foreign officials. There is absolutely no need to amend the law at all as does S. 708.

Mr. President, I ask unanimous consent that the editorial in yesterday's Washington Post be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A $1,000 THANK-YOU

Housewife's companion, the Japanese magazine, to which Nancy Reagan gave a five-minute interview on her first full day in the White House, turns out to be not so—well—companionable after all. The magazine, it is now reported, presented a $1,000 token of its "gratitude" to White House National Security Adviser Richard V. Allen, who was involved, in a way not yet clarified, in the interview. "Knowing this to be customary in Japan and not wishing to embarrass the Japanese journalist or the First Lady," the White House said Friday, "Mr. Allen received the honorarium and gave it to his secretary for safekeeping until he could ascertain the proper procedure for turning it over to the government." The money sat for eight months in a safe in the office Mr. Allen had briefly occupied before he moved into the West Wing, and was discovered in September, triggering an investigation that is still under way.

Well, fine. Whenever cash money in an envelope is passed in the White House, there darned well ought to be an investigation. Even if you accept Mr. Allen's explanation as the full and final version of this slightly bizarre affair, it seems as though he should have had the presence of mind—notwithstanding what no doubt was the hectic pace of Jan. 21, 1981—to comprehend the political dynamite inherent in that sort of transaction. His solicitude for the tender sensibilities of the Japanese might well have been matched by a regard for the proprieties of the Americans, not least his boss.

The investigation that is going on is being conducted in the Justice Department. Should it stop there? The ethics in government act of 1978, drafted in high post-Watergate dudgeon, would seem to have application here. Under its terms, the attorney general must investigate any allegation of illegal activity by a federal official and, if necessary, pass the probe on to a special prosecutor outside his department within 90 days.

We have questioned the wisdom of the way this special-prosecutor law has been applied in the past. The circumstances in this case, however, seem to be exactly of the sort that Congress had in mind when it established an investigative procedure outside the Justice Department. If nothing untoward has occurred, the public deserves to have the clearest possible assurance that this is the case. Mr. Allen, who insists the explanation of the affair is entirely innocent, surely can have no objection to letting a special prosecutor so demonstrate.

SECRETARY HAIG AND THE NEED TO AFFIRM OUR COMMITMENT TO HUMAN RIGHTS

Mr. PROXMIRE. Mr. President, the underlying principles of the American political and social philosophy evolved from our Founding Fathers' deep and abiding commitment to human rights.

As the standard bearer of those basic human rights we must not allow a weakening of our resolve or our credibility through apathy or neglect.

Unfortunately, indifference to human rights is historical and well-documented, and it is not necessary for me to recite a litany of the inhumane acts that have resulted from that indifference. Instead let me quote the eloquent opening remarks of Secretary of State Alexander Haig at the October 26, 1981 International Liberators Conference of the U.S. Memorial Council:

> Let us therefore remember well the signposts on the road to genocide. First, individual rights were revoked, then individual dignity was denied, and finally, in the abyss of despair, came murder itself. And genocide succeeded because the defenders of individual rights allowed themselves to be divided, because they sought refuge in illusion and weakness. They failed to fight for their own principles. They betrayed not only those who lost their lives, but themselves.

Mr. President, can we as a people afford to live with that kind of betrayal? We revere our Declaration of Independence and its enunciation of man's basic rights. We honor our Constitution, the embodiment and protection of those rights. These ideals and institutions have become part of the American fabric and are known and respected throughout the world.

Mr. President, one critical instrument for our continued advocacy of Human Rights is the Genocide Convention, which was specifically created for the protection of the most fundamental human right—the right to exist.

We need to constantly reaffirm our beliefs in these enduring rights. As Secretary Haig so aptly pointed out, we must not fail to fight for principles.

One important reaffirmation of our 200-year-old human rights tradition would be our ratification of the Genocide Convention.

I thank my good friend, the minority leader.

The PRESIDING OFFICER. The time of the minority leader has expired.

RECOGNITION OF SENATOR ROBERT C. BYRD

The PRESIDING OFFICER. Under the previous order, the Senator from West Virginia is recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Mr. President, I yield my time, or such of it as he may require, to the distinguished Senator from Colorado (Mr. HART).

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. HART. Mr. President, I thank the minority leader.

EVENTS REVERSING TREND IN BUDGET PROCESS

Mr. HART. Mr. President, Congress adopted in the Congressional Budget Act of 1974 a set of procedures intended to "assure effective congressional control over the budgetary proces." While we have made some progress in the past 6 years in bringing discipline to the budget process, several recent events have reversed this trend. And we are now in danger of forfeiting our congressional responsibilities in a sea of economic distortions.

The congressional budget system has been corrupted this year by at least three conscious decisions on the part of Congress to acquiesce almost unquestioningly in administration demands.

The first corrupting decision was acceptance of the administrations' false economic assumptions. Last spring, Congress adopted a budget resolution which significantly underestimated the cost of Federal programs by relying on a set of projections about economic growth, unemployment, and inflation which it had every reason to believe was wrong.

For the first time in 6 years, Congress rejected the economic projections of the Congressional Budget Office and substituted an economic forecast close to the uniquely optimistic Reagan administration projections. These administration projections grossly overestimated the revenue-producing potential in national economic growth—the GNP—and underestimated the cost for Federal programs of inflation and unemployment.

By abandoning CBO's "mainstream" forecast, the size of the 1982–84 deficit was magically shrunk by $41.6 billion, disguising the real deficit of President Reagan's tax cut and "reducing" the size of the spending cut needed to balance the budget by 1984.

The revelations in the Atlantic article were significant not only because of the cynicism with which the President's chief spokesman on the budget could push the supply-side Trojan Horse through the gates of Congress. But it is equally appalling how easily that Trojan Horse was accepted by Congress, despite the warnings of virtually every respectable economist we heard.

The second corrupting decision involved phony budget figures. Unable, even on the basis of the "wishful thinking" economic forecast, to identify budget savings sufficient to balance the budget by 1984, Congress simply inserted in the budget resolution $63.1 billion in "unidentified savings."

These "savings" were used to reduce the deficit shown in the budget, but were left to be made by some more imaginative, or courageous, Congress at some future date. To produce the 1984 balanced budget shown in the Budget Resolution, this differential had to be accepted. These "unidentified"—or perhaps more accurately characterized as "unproposed, unenacted, and unsaved"—budget reductions totalled $62.1 billion in 1983 and 1984.

The third corrupting decision was surrender to the executive branch. Put simply, Congress surrendered its budgetary independence from the executive branch. The Senate Budget Committee has been said to have become a "Charlie McCarthy" to David Stockman's "Edgar Bergen," frequently delaying its markups until the latest instructions arrive directly from OMB.

In the first resolution debate, the House rejected its Budget Committee's advice altogether, and substituted the Gramm-Latta amendment. That amendment, as we know, had been pasted together so hastily at OMB that, as passed by the House, it contained the names and phone numbers of the OMB budget examiners who wrote it.

In addition, the Senate committee's decision—adopted by the Congress in the first resolution—to reduce authorization levels as part of the reconciliation process was a gratuitous and wholly unnecessary invasion of the authorization/appropriations process which may lead to retribution by those committees as Budget Act revisions are considered.

Also, we are under pressure to adopt a strategy now formally adopted by the House committee, to do a "pro forma"—and perhaps more accurately described as "meaningless and misleading."

Second resolution which merely restates the totally inaccurate figures of the first resolution. Under this unprecedented plan, Congress would wait for the President to tell it what to do in his January budget before adopting the revised and binding resolution the Budget Act requires of the Congress prior to adjournment.

It is noteworthy, Mr. President, that the President of the United States has announced that he will have nothing further to say of any instructive or leadership nature on this financial dilemma that we find ourselves in until the first of the year.

These actions, and others, destroy the credibility of the budget process. No wonder Wall Street is so nervous. No wonder Main Street is so cynical and distrustful of politicians. Congress has relinquished control. I believe that we can and we must take that control back again.

We should begin immediately to exercise control over the process by not bowing to the President's wishes and simply passing as the second budget resolution the assumptions and programs put forth in the first resolution which we now know to be so false. We must construct a program, based on realistic economic assumptions, that restores fiscal discipline to the budget.

Second, we should reject the use of unspecified or unidentified savings in the budget projections. Either savings should be made explicit or they should not be allowed to pad future programs.

Third, we should adopt a procedure to

eliminate partisanship from the underpinnings of the budget process—the economic assumptions. We need a standardized set of economic assumptions on which the policy impacts of the alternative budget proposals could be compared on a consistent basis.

Mr. President, changes that look like minor technicalities can mean swings of billions of dollars in projected outlays, receipts, and deficits. Only a few economists on the budget staffs at CBO, and in the administration really understand what the economic assumptions are and how changes in them can change the entire budget picture. Lack of understanding by Congress and the public leads to inadequate deliberations and arbitrary decisions.

We need an economic benchmark free of political manipulation. This is not a substitute for economic projections based on whatever one believes are the most accurate predictions of how the policies will work out. Rather, it is a tool to consider how different program designs will affect outlays and receipts from year to year under a consistent set of economic assumptions and projections.

Mr. President, I suggest the following procedure:

First, that all contending parties agree in December preceding the start of the fiscal year to base program decisions on a common set of forecasts and projections regarding the economy. These would be used throughout the first budget resolution.

Second. The contending parties could also project the implications of policy decisions on different sets of assumptions if they like, but at least there would be one set for consistent comparisons.

Third. A new set of assumptions could be devised for the administration's July budget revisions and the second concurrent budget resolution, based on the latest data.

The common set of assumptions should be as free as possible from political manipulation such as we have seen this year. This suggests some rather arbitrary rule for setting the projections. Especially in the out years.

Mr. President, a well-known economist at the American Enterprise Institute and a former OMB chief economic forecaster, suggests that the projections for one year ahead be based on actual econometric projections—say an average of those of the administration and CBO, or of some panel of private forecasters. For out-years, where the forecasting record is not very good and there is too much room for wishful thinking, he suggests basing them on the average experience over the past 5 years—average changes in real growth, inflation, and so forth.

While the details of such a procedure need to be developed more fully, this or some alternative standardized process to compare policy proposals should become an integral part of our budgetary deliberations. Congress must regain control of its budgetary process, and we must use this control to construct a budget to meet the needs of the American people in this difficult time of inflation and recession. The steps I have suggested above will move the Congress toward assuming its proper budgetary responsibility.

Mr. President, I ask unanimous consent that the article I have referred to, by Mr. Rudolph Penner concerning his proposal for standardizing economic assumptions be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BUDGET ASSUMPTIONS AND BUDGET OUTCOMES

(By Rudolph G. Penner)

In June 1980, the Congress of the United States voted to balance the fiscal 1981 budget. With less than two months to go in the fiscal year, it appears as though the actual deficit will be close to $60 billion. In January 1979, President Jimmy Carter recommended outlays for fiscal 1980 of $531.6 billion. Actual expenditures were $48 billion higher.

Although we still do not have a good picture of what went wrong with the 1981 budget, 1980 has been studied more carefully. Policy changes, which added $10 billion to defense and $9 billion to nondefense spending, accounted for about 40 percent of the $48 billion discrepancy in 1980. The other 60 percent, or about $29 billion, resulted from enormous assumptions regarding the cost of a given set of policies. About $20 billion resulted from errors in economic forecasting, and $9 billion was the result of other estimating problems.

Errors of this magnitude indicate the extent to which the federal budget is on automatic pilot. Higher inflation adds automatically to the cost of indexed benefit programs such as social security, food stamps, and school lunch subsidies. It also drives up interest rates and the cost of servicing the national debt. Costs of programs that promise specific services, such as medical services under Medicare and Medicaid, also rise. On the other side of the ledger, inflation raises receipts by more than the increase in prices because income-tax payers are driven into higher tax brackets as their money income rises.

Increases in the unemployment rate raise the cost of unemployment insurance, food stamps, and other welfare programs. Higher unemployment also induces some to retire earlier, and social security outlays rise. At the same time, receipts fall with higher unemployment, and in total, an unexpected rise in the unemployment rate of one percentage point will raise the 1982 deficit by over $30 billion.

Details on the sensitivity of 1982 outlays to economic conditions are provided in tables 1 and 2. The dollar numbers in those tables can be compared with a July 1981 estimate of total 1982 outlays of $704.8 billion, receipts of $662.4 billion, and a deficit of $42.5 billion.

Even if economists were lucky enough to forecast the economy correctly, budget outcomes would be far from certain. Crop yields affect outlays on agricultural price support programs. Natural disasters such as Mount St. Helens and hurricanes can create large claims on the budget. The proportion of the eligible population showing up to claim benefits in programs such as food stamps and social security can vary greatly under constant economic conditions. And last, but certainly not least, it is never certain what proportion of an appropriation will be spent in any one year.

TABLE 1.—SENSITIVITY OF FISCAL YEAR 1982 BUDGET OUTLAYS TO ECONOMIC ASSUMPTIONS

[In billions of dollars]

	1982 outlays
Prices (effect on indexed programs only):	
1 percent increase in CPI level by:	
1st quarter, calendar year 1981	1.9
3d quarter, calendar year 1981	.7
4th quarter, calendar year 1982	.4
Interest rates:	
1 percentage point increase in interest rates by:	
Jan. 1, 1981	4.2
July 1, 1981	3.3
Oct. 1, 1981	2.6
Jan. 1, 1982	1.6
July 1, 1982	.3
Unemployment rate:	
1 percentage point increase in average rate for fiscal year 1982:	
Unemployment benefits	5.5
Other	1.5
Civilian and military October 1981 pay raises:	
1 percentage point increase	.7

Note: For changes in economic assumptions in the opposite direction, outlay decreases would be of similar magnitude with the opposite sign.

Source: Office of Management and Budget.

That is because spending money is hard work. Potential suppliers have to be found, bids solicited, contracts negotiated, checks written, and so forth. Bureaucrats are not good at estimating how much of this work will be completed before the end of a fiscal year. Usually they overestimate what can be done, and this is one of the few areas in which cost underruns are more common than cost overruns.

The impact of unforeseen events on budget totals is a matter of constant frustration to politicians. In designing programs, they struggle mightily to achieve certain spending and receipts targets only to see their efforts overwhelmed by unanticipated economic or other events.

Although our inability to forecast budget outcomes has a long history, it has only become an important political issue in recent years. Prior to the enactment of the new congressional budget process—first used in fiscal 1976—the president would make his budget recommendations with a great fluorish in the January preceding the start of a fiscal year. The Congress never voted on budget totals, but instead would act on the president's recommendation in dozens of individual spending and tax bills. Few, other than economists and bond traders, paid much attention to how it all worked out.

The new budget process changed all that. For the first time in recent history, the Congress had to vote explicitly on aggregate outlays, receipts, and deficits. Because these totals are so sensitive to assumptions regarding the future, those assumptions are now debated heatedly.

In general, the political system has not responded well to this new challenge. The temptation to fudge the numbers has become very strong.

ASSUMPTIONS AND SHORT-TERM BUDGETING

The basic problem is that there is an important asymmetry between the political implications of changing budget totals by changing program characteristics and the implications of achieving the same outlay change by changing assumptions. For example, one of the proposed program cuts in fiscal 1982 involves eliminating the minimum benefit in the social security program. The cut saves only $1 billion in 1982, but it has created a firestorm of opposition, and it has become a partisan *cause célèbre*. Yet, cuting the budget in the long run cannot be successful without hundreds of tough decisions of this type, each imposing enormous political costs.

A glance at table 1 or 2 indicates, however, that a $1 billion error in estimating outlays is "in the noise." For example, $1 billion can be "saved" in 1982 by lowering the forecast of interest rates starting October 1, 1981, by less than one-half of one percentage point. No one can forecast interest rates with anything remotely resembling that degree of accuracy, and few would notice such a change. Faced with the choice of "saving" $1 billion by cutting social security or by a minute change in the economic assumptions, it is little wonder that the latter looks so tempting. In fact, it is remarkable that budget and economic forecasts are as accurate as they are.

Although assumptions regarding the future are crucial to budget outcomes, this fact is often not emphasized in policy debates. The public is largely unaware of the quantitative dimensions of the problem, and policy makers can use this fact to obfuscate the issues. Beyond that, politicians are reluctant to admit, even to themselves, that the budget outcome is so largely determined by events beyond their control. As a result, debates over policy become hopelessly intertwined with debates over assumptions, and even an informed observer has trouble determining what is really going on.

One of the most interesting political battles of 1981, for example, occurred in the House of Representatives where, in the debate over the first budget resolution, the choice was between the budget targets recommended by the Democratically controlled Budget Committee and the President's targets backed by a coalition of Republicans and southern Democrats. The policy differences between the two resolutions were minor, but the Budget Committee made a crucial error in basing their targets on a less favorable set of economic assumptions. While they wanted to spend a bit more than the President for a given set of economic assumptions, the use of less optimistic assumptions made their outlay totals appear significantly higher. They could never successfully explain this complicated fact to the public, and though they may have been defeated in any case, the lack of understanding of the role of assumptions clearly meant that they started the debate with a severe handicap.

TABLE 2.—SENSITIVITY OF THE BUDGET TO ECONOMIC ASSUMPTIONS

[In billions of dollars]

	Fiscal year 1981			Fiscal year 1982		
	Outlays	Receipts	Deficit	Outlays	Receipts	Deficit
Effect of 1 percentage point higher annual rate of inflation beginning: [1]						
January 1981	2	3	−1	6	11	−5
January 1982	(2)	(2)	(2)	2	3	−1
Effect of 1 percentage point lower annual rate of real growth beginning:						
January 1981	1	−3	4	4	−13	17
January 1982	(2)	(2)	(2)	1	−3	4

[1] Includes the effect of higher inflation on indexed programs, interest outlays, and medicare and medicaid; excludes effects on discretionary programs.

[2] Not applicable.

Note: If the rate of inflation were lower or the rate of real growth higher by 1 percentage point, the changes in outlays and receipts would be of the opposite sign but of similar magnitude to the figures shown above.

Source: Office of Management and Budget.

Once assumptions are chosen, they have all sorts of subtle effects on decision making. Policy makers typically evaluate the cost savings associated with the options for cutting programs by using a single set of economic assumptions. There is little consideration given the fact that under one set of assumptions, policy A may save more than policy B, while under another set, policy B may save more than A. For example, basing the automatic increase in social security benefits on the lower of wage or price increases will not appear to save anything if future price increases are assumed always to exceed future price increases. It might, however, save an enormous amount in the long run if occasional periods of negative economic growth are assumed. Computations of other savings—those related to cancelling a capital project, for example—are less sensitive to economic assumptions.

Private economists may criticize budget assumptions as being too optimistic, but then they proceed to rely on them for analyses of individual components of the budget. They have little choice, because it takes an enormous number of hours to re-estimate budget totals for different economic assumptions, and few individual researchers have large staffs.

Thus, economists will make detailed analyses of the distributional and other implications of the administration's proposed income tax cuts using administration assumptions. Yet, if a lower future growth of money income were assumed, the impact of the tax cuts would change. They would become true tax cuts to a much greater extent since the proposed 25 percent cut in tax rates would not be offset to the same degree by taxpayers being pushed into higher tax brackets. The distributional implications would change because bracket creep affects different income groups quite differently.

ASSUMPTIONS AND LONG-TERM PROJECTIONS

As serious as these problems may be in the short run, they are multiplied manyfold when the long-run implications of different policies are analyzed. Clearly, long-run budget planning is essential. Many policy changes, such as those concerning social security, have little initial impact, but their long-run effect on spending totals is enormous. As we look further into the future, our assessment of such impacts is undertaken with exponentially growing uncertainty.

Since the beginning of the new congressional budget process, both the administration and the Congress have made five-year budget projections. Thus, President Carter's 1982 budget, which was proposed in January 1981, projected budget totals through fiscal 1986.

The budget projections made for the remainder of fiscal 1981 and 1982 are based on an economic forecast for calendar 1981 and 1982. For subsequent years, the budget totals are based on what is called an economic "projection." The projection always shows the economy making steady progress toward lower levels of inflation and unemployment. Forecasts and projections made at various times in the past are shown in table 3.

In the Ford and Carter administrations, it was made crystal clear that the long-run projections were arbitrary except during a brief interlude when the Carter administration felt obliged to base the projections on the long-forgotten economic goals prescribed by the Humphrey-Hawkins Act. The Reagan administration seems more inclined to consider the projections as economic targets, but whether the projections are arbitrary or imply targets, they are always extraordinarily optimistic, portraying a world devoid of business cycles where everything looks better day by day. As a result, it always appears easier than it really is to lower the ratio of outlays to the gross national product and to balance the budget eventually. For example, the current administration's projections show a balanced budget emerging in 1984. It is remarkable how seriously this projection is taken since everything has to go absolutely right to achieve it. (It should be noted that a balanced budget could also be achieved by things going wrong. Inflation raises receipts more than it raises outlays: so unanticipated inflation could balance the budget accidentally, though few would like to achieve balance in that manner.)

Although table 3 clearly shows that the long-run projections used for budget purposes have been totally misleading in the past, they still have had a profound impact on decision making. They have totally obscured the strong budget pressures engendered by transfer programs because such programs do not grow much if unemployment is assumed to decline. They make a given defense effort look less burdensome than it really is because high assumed levels of real growth understate the ratio of the defense budget to GNP implied by a given set of defense policies.

In other words, rosy projections dull us into being too complacent regarding future budget trends. A set of budget policies that provides hope of a balanced budget given the projections is likely to lead to large deficits under a more realistic outlook. We do not serve ourselves well by assuming the suspension of Murphy's Law.

IMPROVING THE FORECASTING PROCESS

How can we improve current procedures? It is unlikely that our ability to forecast will improve much in the near future. Consequently, it is necessary to emphasize constantly the degree of uncertainty inherent in any budget projection. Furthermore, the rationality of decision making would be enhanced considerably if debates regarding program design could be clearly separated from debates regarding assumptions. This, in turn, would be facilitated if all of the contending parties could agree in the December preceding the start of a fiscal year to base program decisions on a common set of forecasts and projections regarding the economy and other variables affecting budget totals.

The administration proposes one set of assumptions in its January budget. The Senate and House then prepare budget resolutions with their own assumptions, which often differ from those of the administration and from each other. Occasionally, a fourth set of assumptions emerges from the Congressional Budget Office (CBO), though CBO assumptions are sometimes adopted by the Senate or the House.

If an agreement could be reached on a

common set of assumptions for the purpose of making program decisions, the important issues would be greatly clarified. It could be understood that not everyone has to agree that the common assumptions provide the best possible projections of the future. The budget committees could also project the implications of policy decisions on the basis of differing assumptions if they like, but at least there would be one calculation of the implications of the different policy packages of the administration, the House, and the Senate based on a common set of assumptions. As a result, issues arising because of different policies would be more clearly separated from issues arising because of different assumptions.

Nothing would prevent changing the assumptions as the year proceeded. For example, the first congressional budget resolution, which sets budget targets, should be based on the same assumptions as used in the president's January budget. But then a new set could be devised for the second resolution, which sets binding targets, and that same set could be used for the administration's July budget revisions.

TABLE 3.—EXECUTIVE BRANCH PROJECTIONS OF THE ECONOMIC OUTLOOK, 1975–86

Variable and forecast date	1975	1976	1977	1978	1979	1980	1981	1982	1983	1984	1985	1986
Nominal GNP growth:[1]												
January 1975	7.2	12.6	12.4	12.0	10.8	10.8	[2]	[2]	[2]	[2]	[2]	[2]
January 1976	[2]	12.4	12.2	12.4	11.9	10.9	9.1	[2]	[2]	[2]	[2]	[2]

[1] Percentage change, year over year.
[2] Not applicable.
[3] Total, annual average.

Note: Years in column headings are calendar years.
Source: Office of Management and Budget.

While the common assumption could be quite arbitrary—based on past trends rather than on a forecast, for example—I would not advocate this approach for the short run. Instead, the January budget and the first budget resolution should continue to be based on the best economic forecast possible. Although the forecasting profession is often ridiculed, its record is not that bad in making short-run forecasts, as can be seen in table 3 for administration forecasts published in January for the same calendar year. (It must be admitted that forecasts made in July are sometimes worse for the current year than the forecast made in January.)

In the period 1975 through 1980, the largest error for the unemployment rate was 0.4 percentage point in the recession year of 1975, and despite the temptation to be overly optimistic, the actual unemployment rate was very slightly overestimated on average. The real growth rate was missed by more than one full percentage point only once during the six years (again in 1975), and in four of the six years, the forecast was within 0.3 percentage point of being correct. The inflation rate was missed by more than one percentage point in two years (1975 and 1978), but the forecast was within 0.2 percentage point in two other years (1977 and 1980). Unfortunately, though the errors have been small, they still had significant effects on the forecasts of budget totals.

Needless to say, the forecast made in January for the following calendar year was considerably less accurate than that made for the current year. For the five years from 1976 through 1980, however, the unemployment forecast was, on average, fairly accurate. Only in 1980 did the forecast badly miss. The January 1979 forecast projected 1980 unemployment at 6.2 percent, but the actual outcome was 7.1 percent. The forecast for real GNP growth underestimated the strength of the recovery in the 1975–1976 period and failed to anticipate the 1980 recession but otherwise was fairly accurate. After overestimating the inflation problem in the 1975–1976 and the 1976–1977 periods, the two-year forecasts greatly underestimated the problem in the January forecasts from 1977 through 1979.

Although there were major errors, the one- and two-year forecasts were on average better than could be obtained from naive extrapolations, and in general terms, they seem to belie my earlier contention that there is a strong temptation to be overly optimistic.

Table 3 indicates that the strong optimistic bias shows up in the longer-run projections made for the four years following the two-year forecast period. It is these longer-run projections that have been terribly misleading in obscuring long-run budget trends and that have led us to believe that controlling the growth of outlays and balancing the budget is much easier than a less biased set of projections would imply.

A TECHNIQUE FOR MAKING PROJECTIONS

I would recommend that projections of real growth and inflation be arbitrarily based on the average experience of the previous five years. That is to say, if this procedure had been in effect in the past, the budget assumptions made in January 1975 would have involved making the same economic forecast as was originally made for calendar 1975 and 1976, but the projections for the years 1977 through 1980 would have been based on the average real growth rate and inflation rate over the period 1970 through 1974. Since the real growth rate over any five-year period is usually not a bad approximation of the potential growth of the economy over the long run, it is reasonable to assume that the unemployment rate remains constant over the long-run projection period. In other words, in the above example, the unemployment rate for the period 1977 through 1980 would be assumed to remain constant at the level forecast for 1976.

Since interest rates are closely linked to inflation rates, and the proposed procedure would assume the same inflation rate in the 1977–1980 period as prevailed in 1970–1974, it is reasonable to assume that interest rates are also identical in the two periods.

Table 4 shows the projections of several variables made for 1980 in the January budgets of the period 1975 through 1980 and compares them with the projections that would have been made if the suggested procedure had been in effect. (Past GNP data were revised several times over the period. The table ignores this problem and assumes that current GNP definitions were in use over the entire period.)

Table 4 also shows that, except for the projection made in January 1976, the use of the proposed procedure would have been less accurate than actual budget procedures in projecting nominal 1980 GNP. The success of the budget in projecting nominal GNP, however, was the accidental result of two major offsetting errors. The long-run budget projections consistently underestimated inflation and overestimated real growth. The proposed procedure would have been consistently more accurate over time than actual budgets in predicting real GNP, the GNP deflator, and unemployment for 1980. It would, therefore, have been much more accurate in projecting outlays even though receipts would have been underestimated.

TABLE 4.—A COMPARISON OF ECONOMIC FORECASTS MADE FOR 1980 USING PAST BUDGET ASSUMPTIONS AND THE PROPOSED ALTERNATIVE

Forecast date	Nominal GNP in 1980 (billions of dollars)		Real GNP in 1980 (billions of dollars)		GNP Deflator in 1980 (1972=100)		Unemployment in 1980 (percent)	
	Budget	Proposed alternative	Budget	Proposed alternative	Budget	Proposed alternative	Budget	Proposed alternative
January 1975	2,675.5	2,416.9	1,613.3	1,412.5	165.87	171.51	5.5	7.9
January 1976	2,725.2	2,551.1	1,663.7	1,496.0	163.92	170.58	5.2	6.9
January 1977	2,617.4	2,558.9	1,606.4	1,525.4	163.04	167.88	4.9	6.6
January 1978	2,623.1	2,606.5	1,577.4	1,550.3	166.54	168.43	5.4	5.9
January 1979	2,627.7	2,627.7	1,521.4	1,521.4	172.59	172.59	6.2	6.2
January 1980	2,614.3	2,614.3	1,474.1	1,474.1	177.26	177.26	7.0	7.0
Actual	2,626.5	2,626.5	1,480.9	1,480.9	177.36	177.36	7.1	7.1

Source: The budget projections are based on the data contained in table 3 and the most recently revised GNP statistics. The proposed alternative is based on the author's own computations.

If the proposed technique were adopted now, it might be argued that, given the administration's deflationary monetary policy, it would overestimate the long-run inflation rate, nominal income growth, and, therefore, receipts. But the administration and the Congress have not paid much attention to the impact of the proposed monetary policy in making their projections. The proposed procedure would, in fact, result in lower nominal GNP projections for 1983 and 1984 than are now being used by the administration, though the nominal GNP projection would be slightly higher in 1984 and 1986. The projected inflation rate would be higher than is currently being used (7.2 rather than 5.8 percent for the entire period 1983–1986), and the real growth rate would be lower (3.7 rather than 4.5 percent). The projected unemployment rate would average 7.3 percent over the period rather than the administration's 6.0 percent.

No technique for projecting, however, will be very accurate. The main goal is to remove the optimistic bias inherent in current procedures. The new procedure would clearly be understood to be arbitrary, and it could be adopted by all parties without squabbling about long-run goals.

It obviously is not perfect. Any single procedure will have subtle effects on policy making and will result in some bad decisions. It might be argued that we should make a number of projections each implying a different path for budget totals, but this is probably not feasible in the hectic days before releasing a budget, especially if all paths had to be approved by all interested parties in the executive branch and the Congress.

As an aside it should be noted that there is no theoretical necessity to show a balanced budget along the path implied by the arbitrary assumptions. The economic conditions portrayed by the projection could warrant a large surplus or a large deficit. Such imbalances need not be rationalized by Keynesian economics. They can, in fact, be justified with a wide variety of theories.

The suggested procedure would admittedly be hard for the current administration to accept. This administration has proposed a fundamental change in policies that it honestly believes will make the economic future better than the past. Making long-run projections on the basis of past performance would be inconsistent with its basic policy stance. In such circumstances, however, an administration could compute an alternative path consistent with its own goals and expectations. While this would add to complexity, it would be more feasible than the promulgation of a number of paths all having to be acceptable to the Congress.

The main point is to have one path that can be used by all and that is free of obvious optimistic biases. Those who wish to compute their own second paths would unavoidably highlight the importance of economic assumptions in determining long-run budget totals. That would again help separate the debate over policy issues from the debate over economic assumptions.

The proposal described above concerns only the economic assumptions. As noted before, many other assumptions are required before budget totals can be estimated. Although there is some tendency to over-estimate the amount of spending out of available appropriations for a given set of economic assumptions, other noneconomic forces tend to make long-run budget outlay estimates too optimistic. Budgets seldom leave enough room for adverse surprises. Outlays for natural disasters and crop supports, for example, are consistently underestimated in the long run. To offset this optimism we should adopt the convention of making meaningful the budget function called "allowance for contingencies." In the current congressional budget projections it is used for long-term projections only to record the yet unspecified budget cuts necessary to attain a balanced budget in 1984. To make the function more meaningful, an amount equivalent to, say, 2 percent of specified outlays should routinely be added to the allowance for contingencies to cover surprises.

Budget projections should never contain "unspecified cuts." It would be less misleading to show a deficit and to state explicitly that it is the goal of policy to eliminate the deficit by a certain date. This, too, would be difficult for the current administration because it has relied so heavily on unspecified cuts to make budget balancing seem feasible by 1984. Taking the unspecified cuts out of the budget totals and printing a significant deficit for 1984 would have drawn more attention to the seriousness of future budget problems and made it more difficult for the administration to obtain passage of the substantial, long-run tax cuts that it believes are necessary to reduce the economic disincentives to save, to invest, and to work.

It will be argued that the proposals made above are totally unrealistic. Politicians like to promise a rosy future, and I am suggesting restraints on their ability to do so.

As noted in the beginning, however, the effect of budget assumptions on budget outcomes is causing more and more frustration among politicians. While some gain an advantage by confusing the debate over assumptions with the debate over policies, it is widely recognized that this frequently results in bad policy and also threatens the viability of the relatively new congressional budget process.

The proposals made above may not offer the best solution to the problem, but I hope that they at least stimulate discussion. Such discussion will, at a minimum, increase policy makers' sensitivity to the extreme importance of assumptions to future budget planning. It must then be understood that all long-run assumptions contain a major arbitrary element because of limits on our ability to predict the future. Having gotten that far, it should be easy to show that some arbitrary assumptions are less misleading than others. The trick is to agree on a good, unbiased, but undoubtedly wrong forecast, since no forecast will be right in all its elements.

Mr. HART. Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, do I have any time remaining?

The PRESIDING OFFICER. The Senator has 5 minutes remaining.

Mr. ROBERT C. BYRD. Does any Senator wish to have me yield my remaining time?

Mr. President, I yield back my time.

The PRESIDING OFFICER. Under the previous order, the Senator from Colorado (Mr. HART) is recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that that order be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order there will now be a period for the transaction of routine morning business during which Senators may speak for no more than 3 minutes each.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEFENSE SECRETARY CASPAR WEINBERGER ON OUR DEFENSE NEEDS

Mr. THURMOND. Mr. President, I rise to call to the attention of the Senate and the Nation an excellent summary statement of our defense needs by Defense Secretary Caspar Weinberger.

This article, entitled "It's Harold Brown Who's Wrong," appeared on the editorial page of today's Washington Post newspaper.

This defense of the Reagan administration's military buildup is the best summary statement I have seen on our current defense problems and the need to correct them.

Secretary Weinberger is also to be commended for answering promptly a statement last week by former Defense Secretary Harold Brown who disagreed with practically every element of the Reagan proposal.

Mr. President, I ask unanimous consent that this succinct and convincing statement by Secretary Weinberger be printed in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IT'S HAROLD BROWN WHO'S WRONG

Serious misconceptions regarding the Reagan administration's overdue program to "Rearm America" continue to surface in public debate, in Congress and in the press. Some of these misconceptions appeared on The Post's op-ed page of Nov. 11 in an article ["Wrong on the B1, Wrong on the MX"] by former Defense Secretary Harold Brown, for whom I have high esteem. They should be corrected.

The administration was given a sweeping mandate by the American electorate last autumn to carry out a massive, admittedly costly, defense program. The reason, I believe is clear. In the 1970s, the nation, trustingly overly in the spirit of "détente," debated—while the U.S.S.R. continued, undramatically but inexorably, to arm. The Soviet Union today not only has matched our previous nuclear superiority; it has far exceeded our conventional military strength and is rapidly projecting its power beyond the needs of legitimate defense. I need only cite Afghanistan, Ethiopia, Angola, South Yemen and Cuba.

Unless we move promptly, the U.S.S.R.'s military buildup will carry it past us, leaving us in the position of permanent, dangerous inferiority. The United States could be subject to nuclear blackmail, cowed from moving boldly to defense itself and its allies in a crisis. This we cannot—and will not—risk.

In this dangerous—if not yet critical—situation we must modernize both our aging bomber fleet and our increasingly vulnerable intercontinental ballistic missile force. The administration has no intention of abandoning the time-tested "Triad": land-based missiles, sea-based missiles and air-breathing strategic systems. We need all three.

The B52 bomber, workhorse of our bomber fleet, is more than 25 years old. While still useful, it is increasingly costly to maintain. Its large radar "cross-section" and slow speed make it vulnerable to Soviet air defenses, and because it cannot be "hardened" to withstand nuclear blast, or take off quickly, it is increasingly vulnerable to Soviet submarine-launched missiles.

By contrast, the new, highly improved B1B bomber not only has one-one hundredth the radar cross-section of the old B52 but no more than one-tenth the cross-section of even the first B1 model cancelled by the Carter administration in 1977. The new B1B employs extremely sophisticated "avionics"—electronic countermeasures that will make it capable of foiling advanced Soviet defense/detection measures well into the 1980s, as William Casey, director of central intelligence, and I jointly notified Congress last week.

Eventually, when Soviet defenses do catch up, it will still be highly effective, armed with cruise missiles for nuclear, or conventional, bombing missions.

Early replacement of the B52 by the B1B will give us vital protection during the dangerous "window of vulnerability" in the mid-1980s and will not delay development of the advanced technology, or Stealth, bomber. The latter is still in its early stages. Potentially, we believe, it will revolutionize air warfare, but it would be risky to force a "crash" program, which might fail, and to be forced to depend, meanwhile, on obsolescent B52s. Such a course might prove more costly than the projected combination of B1B followed by the Stealth system that the administration is recommending.

We must modernize our land-based missiles no less than our bomber force. In our judgment the MX is the answer: in throw-weight, accuracy and flexibility. It provides us with a needed "counter-silo" capability.

The question is, of course, where to base it. Initially we intend to base it in specially hardened Titan and Minuteman silos as a credible, necessary and immediately available deterrent to Soviet attack. This will give us breathing time to devise a permanent, survivable basing mode: either in continually patrolling aircraft, in deep shelters under mountains protected by far more effective ballistic missile defense than we have now or in other combinations as research and technology suggest.

The Carter administration's multiple basing system was rejected by this administration, after prolonged study, as both unduly expensive and vulnerable. The Soviets would need only to increase the number of nuclear re-entry vehicles to saturate it.

A "mix" of B1B penetrating bombers and MX missiles will force the Soviet Union into a costly restructuring of its entire defense system, including command, control and communications networks, thus diverting into defense monies that might otherwise have been available for offense. This will cover our vital defense needs until, by the end of the decade, we will have devised a permanent survivable basing mode for the MX.

National defense is admittedly expensive. As a former secretary of health, education and welfare, I understand the need for social programs. But we do not live in an ideal world. For 10 years, we have been force-feeding social programs and starving defense. We cannot risk further delay. The question should not be whether we can "afford" to defend our nation—but whether we can afford not to.

TRUTH IN BUDGETING

Mr. DOMENICI. Mr. President, it is my pleasure to support Senator GORTON'S bill. In the months since Senator GORTON joined us, I have worked very closely with him on the Budget Committee. As I have come to know the junior Senator from the State of Washington, I have come to respect and admire him for his intelligence, his sincerity and, most of all, for the way in which he has worked hard to help move difficult and controversial budget decisions through the Budget Committee and through the Senate as a whole.

The bill that he has introduced today reflects a keen awareness of the delicate balances that must be struck in refining the budget process. It reflects sensitivity to the traditions and prerogatives of this body while enhancing our ability to achieve consistent and responsible fiscal policy.

In my 8 years as a member of the Budget Committee, I have come reluctly to the conclusion that we will never achieve control over Federal spending unless we strengthen procedures designed to limit spending growth. While no array of procedures can prevent us from spending the taxpayers' dollars, a strengthened budget process can force Congress to be increasingly accountable and politically responsible for the decisions that we make.

It is for this reason that the Budget Committee has always tried, under Democratic and Republican majorities, to make our colleagues aware of the fiscal or revenue impact of the individual decisions we make. Senator GORTON'S bill is consistent with that tradition. Its purpose is simply to require that three-fifths of the Senate and House vote openly to spend more than a certain percentage of the GNP in a particular fiscal year. It does not prevent Congress from approving higher spending. Rather, it simply requires that we do so openly and with full understanding of the effects on the long-term goals of reducing the size of the Federal Government in relation to the gross national product.

Last year, I introduced legislation, S. 2066, which would require a three-fifths vote of the House and the Senate to enact any concurrent budget resolution that exceeded specified limits. Senator GORTON'S bill takes a similar tack but creates a point of order against adoption of such a resolution. The point of order can only be overturned by a vote of a three-fifths majority.

Senator GORTON'S bill also goes beyond my original proposal in another important respect: It brings the executive branch into the ongoing fiscal discipline process by requiring the President to make a report to Congress with recommendations when it becomes apparent that spending will exceed the limits set by Congress. The bill does not constrain the President's or Congress' options, but it does force all of us to confront head-on the problem of spending growth. I believe this kind of "truth in budgeting" is the surest way to establish a coherent and responsible fiscal policy for the Nation. In my opinion, that is the primary goal which we were elected to achieve.

Before coming over to the floor this morning, I reviewed my own legislative proposals from the last Congress and pulled out the following statement in support of one of those earlier proposals. It is no less true today than it was almost 2 years ago. I repeat what I said then:

> Individual judgement shall remain the keystone of our deliberations; priority decisions will remain critical to the process. But, by giving us freestanding statutory limitations, it will impose on all of us a restraint that we have been unable to impose in the past. This bill curtails the freedom of no one really interested in making priorities for the 1980's, or in reducing taxes or the growth of federal spending. . . . The only people who may suffer under this bill are those who have found it impossible to say "no" to more spending in the past.

Mr. President, Senator GORTON'S bill is an important contribution to the improvement of the budget process. I want to assure him and all my colleagues that, when this bill is referred to the Budget Committee, it will receive the most serious consideration as part of our larger effort to revise and strengthen the budget process.

Mr. President, I yield the floor.

ALASKA GAS PIPELINE IS IN AMERICA'S NATIONAL INTEREST

Mr. MURKOWSKI. Mr. President, I was pleased to read that the Washington Post in an editorial of today has endorsed the President's proposed waiver package to facilitate financing and construction of the Alaska natural gas pipeline project.

This waiver package necessary to remove certain legal and regulatory obstacles to the financing of this $44-billion project, must be approved by the Congress by December 18. The Senate

Energy Committee, after thorough hearings on the pipeline project and the proposed "waiver package," voted last week, 14 to 1, to report Senate Joint Resolution 115 which approves these waivers. The House Interior Committee has also voted, 32 to 7, to approve the resolution of approval and the House Energy and Commerce Committee is scheduled to vote on the resolution this week.

The Washington Post editorial is correct in pointing out that the Alaska natural gas pipeline is an "insurance premium for the longer future." It will bring to market the 26 trillion cubic feet of natural gas at Prudhoe Bay which will have the effect of displacing at least 400,000 barrels of imported oil each day. It will be a signal to OPEC that America is determined to move toward energy independence, and will encourage more investment in exploration and production of energy resources in the Arctic region where much of our undiscovered energy is.

I was particularly pleased that the Washington Post editorial put into perspective the shift of some of the financial risks of the project to consumers which is provided for in the waiver package. In order to obtain the enormous level of financing needed to build this project, the financial community has made it clear in testimony to Congress that some level of assurance is necessary for debt service in the case that any of the three major components of this pipeline project is not completed on time as scheduled by the Federal Energy Regulatory Commission.

However, sponsors of the project will have at least $6 billion in equity at stake and will receive no return on that investment until the entire project is completed. There will be enormous incentive for this project to be completed in its entirety on the schedule established by FERC. The risk to the consumer as the Washington Post points out, is "pretty small." Compared with the long-term benefits to the American consumer and to our national security. Mr. President, the shift of some of the financial risk to the consumer is indeed very small.

Mr. President, since the Senate will be considering Senate Joint Resolution 115 in the next few days, I commend the reading of this editorial to Members of the Senate, and ask unanimous consent that it be printed in full at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THAT GIGANTIC PIPELINE

We want to talk to you this morning about your gas bill—not the one you got this month, but the one you'll begin getting in the late 1980s. There's a lot of gas underneath Alaska's North Slope, and getting it down here to customers in Washington and throughout the country is going to require the longest, most expensive pipeline ever built.

You need to be aware that the cost will be in the range of $40 billion and that it will ultimately be paid by the consumers who use the gas. But to get this assured supply at a stable price far into the future will be worth the money.

Congress now has to vote on it once again. The original legislation five years ago contained restrictions that turn out to make the financing impossible, and President Reagan has asked Congress to waive them. These waivers are a reasonable compromise with the realities of current conditions in the financial markets, and if Congress were to reject them it would, as a practical matter, kill the whole undertaking.

Rejection would also constitute a gross betrayal of the Canadian government, which has permitted the construction of the line south from Calgary into this country on the explicit promise by the United States that the rest of it would proceed promptly. That line is already in operation.

The effect of the waivers is to shift more of the financial risks of this enormous investment from the lenders to the consumers. But those risks are pretty small. The greater issue is the cost of the gas, compared with that of other fuels. At first, that price is likely to be substantially higher. But as time passes, with inflation and the higher oil prices that most people expect, the balance will change. An analysis for the House Energy Committee concludes that, over 20 years, on average, the Alaskan gas would cost slightly less than the alternative fuels. But it's necessary to acknowledge that there are many uncertainties in the calculation. Should consumers have to bear the brunt o those uncertainties?

The greater threat now is further rapid escalation of oil prices—and the higher they go, the better deal the Alaskan gas will be. If the gas at first is expensive and raises your gas bill, you ought to regard it as an insurance premium for the longer future. Whatever happens abroad, the prices of the Alaskan gas will continue to be set by law and by long-term contract. The shorter Alaskan oil pipeline seemed extravagantly expensive when it was finished, in 1977, at $9 billion. But since then it has saved this country $50 billion in the foreign exchange that it would otherwise have paid for more oil from OPEC. For the same reasons, the gas line serves the interest of both the consumer and national security.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

The PRESIDING OFFICER. The Senate will now resume consideration of H.R. 4169, which will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The Senate proceeded to consider the bill.

Mr. WEICKER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the sixth excepted committee amendment to H.R. 4169.

EIGHTH EXCEPTED COMMITTEE AMENDMENT—PAGE 37, LINE 22

Mr. WEICKER. Mr. President, by agreement with the ranking minority member, I now lay aside committee amendment No. 6 and move the adoption of committee amendment No. 8, page 37, line 22.

The excepted committee amendment is as follows:

On page 37, line 22, strike "$185,970,000", and insert "$265,970,000";

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 628

(Purpose: Delete $35,000.00 associated with the construction of the American Embassy in Riyadh, Saudi Arabia)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) proposes an unprinted amendment numbered 628 to the excepted committee amendment on page 37, line 22:

On page 37, line 22, strike "$265,970,000," and insert in lieu thereof "$230,170,000."

Mr. THURMOND. Mr. President, the House of Representatives provided in the legislation now before the Senate that $185,970,000 would be available for necessary expenses in carrying out the Foreign Services Buildings Act.

The Senate Committee on Appropriations increased that amount by $80,000,000 to a total of $265,970,000, which is approximately $33,000,000 above the President's September request and more than double the same appropriation for fiscal year 1981.

The $80,000,000 increase above the House committee recommendation is for a chancery and residence complex at Riyadh, Saudi Arabia. The plan for construction is in two phases. Phase I envisions an expenditure of about $40,000,000 for the construction of a new Embassy, a new residence for the Ambassador, and a new quarters for the Marine security detachment. Phase II would use the balance of the funds appropriated to construct staff housing for Embassy personnel.

The administration did not request funds for phase II. This account is already $147,538,000 over the 1981 appropriation, an increase which represents a percentage add-on of about 117 percent at a time when virtually every other Government account is being reduced substantially.

Although I know that added expenditures can always be justified on the basis that inflation will cause expenses to increase, it is also true that that argument carried to a logical extreme would have us appropriate now for the next decade, and not simply 1 year at a time.

In my view $80,000,000 for an Embassy is somewhat high. Indeed, even considering communications equipment and

the like, which I am confident is included in the price of the construction, $80,000,000 borders on the extravagant.

Accordingly, I ask the managers of the bill to modify the committee amendment to reduce the amount proposed to be inserted from $265,970,000 to $230,970,000, for a reduction of $35,000,000, which I understand is compatible for construction of phase I only through fiscal year 1982.

Mr. WEICKER. Mr. President, the majority is willing to accept the amendment of the distinguished Senator from South Carolina.

Before acting on this amendment, I want to discuss the committee's action.

The committee restored an $80 million cut by the House for the construction of a new American Embassy—including chancery, residence, and staff housing—in Riyadh, Saudi Arabia.

In December 1983, the Ministry of Foreign Relations will formally open in Riyadh, Saudi Arabia. At that time, the U.S. Embassy and staff must be fully functioning.

In March, the administration requested $82.1 million for the construction of an embassy complex which includes staff housing. The House denied all funds for this project. The current request of the administration is for $45 million to construct only the chancery and Ambassador's residence. The staff housing project would be delayed until the fiscal year 1983 budget.

The Subcommittee and full Committee on Appropriations approved $80 million to allow the Department of State to go forward with the entire Embassy complex. We rejected any proposal to delay construction because, first, it does not postpone the need, and second, it will result in immediate and substantial cost increases.

I want to stress that if the administration proposal to delay staff housing is agreed to, the minimum additional cost in 1983 will be $17,150,000.

The administration's proposal to delay funding $35.8 million for staff housing results in net savings of $1.5 million in outlays in fiscal year 1982. Thus, to save $1.5 million in outlays this year, it will cost us an additional $17.2 million next year.

By supporting the House action and denying funds for the entire project, we will save $3 million in outlays now and the project will cost us approximately $37 million more next year.

While I am prepared to agree to the lower amount suggested, I feel it is important to explain why the decision of the committee was prudent.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 628) was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EIGHTH EXCEPTED COMMITTEE AMENDMENT—PAGE 37, LINE 22

The PRESIDING OFFICER. The question recurs on committee amendment No. 8, as amended.

The eighth excepted committee amendment (page 37, line 22), as amended, was agreed to.

Mr. HOLLINGS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SIXTH EXCEPTED COMMITTEE AMENDMENT—PAGE 31, LINES 22–24

The PRESIDING OFFICER. The question recurs on the sixth excepted committee amendment.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 629

Mr. WEICKER. Mr. President, I send an amendment to the excepted committee amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Connecticut (Mr. WEICKER) proposes an unprinted amendment numbered 629.

In lieu of the language proposed to be stricken by the Committee amendment starting on page 31, line 22 insert the following:

"No funds appropriated under this Act may be used to prevent implementation of constitutional programs of voluntary school prayer and meditation in the public schools."

Mr. WEICKER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I share the belief of, I am certain, the vast majority of Americans that schoolchildren should be permitted to participate in voluntary prayer in public schools without Government interference.

The House of Representatives, in its consideration of the legislation now before the Senate, adopted a provision to forbid the use of appropriated funds to prevent schoolchildren from participating in voluntary prayer in public schools. The House provision is on page 31 at lines 22 through 24.

The Senate Committee on Appropriations struck out the House provision. That action in my judgment was unwise.

From the beginning America has had a visible faith in God. In 1620, the Pilgrims gathered in the cabin of the *Mayflower* and drew up the first charter of a government of the people, by the people, and for the people. The charter began with the words: "In the name of God, Amen."

In the course of history, it is quite clear that our Nation has been guided by men of religious character. In the Declaration of Independence our forefathers wrote:

We hold these truths to be self-evident that all men are created equal, that they are endowed by their creator with certain unalienable rights, and among these are Life, Liberty, and the pursuit of Happiness.

Religion has always been a cornerstone in American life, but in 1962, the Supreme Court all but eliminated religion from our public schools. The Supreme Court ruled that State-sponsored devotional activities in the public schools, regardless of whether student participation is compulsory or voluntary, is a violation of the first amendment. I feel this action falsely implied to our youth that religion is not important enough to be in our total education. A little prayer verse, known so well to millions of American children, goes like this:

Thank you for the World so Sweet, Thank you for the Food we Eat, Thank you for the Birds that Sing, Thank you, God, for Everything.

Well, that little prayer verse was banned from kindergartens by the court of appeals in Chicago and backed up by the Supreme Court because it was "too religious." I wonder what the judges would do, if they had their way, with the Mayflower Compact, the Declaration of Independence, and the Constitution. According to their interpretation, they could also be called "too religious."

We know that the Constitution provides for the separation of church and state. But, I do not believe our Founding Fathers intended to deny opportunities for periods of Christian worship and education in public school, so long as each child and his parents have the freedom to chose whether or not the child participates. I cannot be convinced that the framers of the U.S. Constitution meant to ban religion from public schools and eliminate voluntary prayer.

That is why I support legislation that would deny the Federal courts jurisdiction in cases involving school prayer, and would let the local school boards decide whether they want prayer in their school. It is my hope that this amendment will pass and once again our children will have the freedom of choice.

However, in spite of several Supreme Court rulings and an erosion of our moral values, we still have some of our early reliance on faith in God left in our

national life. To cite a few examples, prayer continues to open each day's business in both Houses of Congress; our National Anthem contains the words—"praise the power that has made and preserved us a nation"; our Nation's motto, which is found on all our coins, is "In God We Trust"; and in our Pledge of Allegiance to the Flag are the words—"One Nation, Under God."

All is not lost in this age of uncertainty. Our Nation continues to preserve our religious heritage, but without giving our children the opportunity to voluntarily pray in school, we jeopardize losing the fundamentals upon which our Nation was founded.

One of my priorities in this Congress in my capacity as chairman of the Senate Committee on the Judiciary is the enactment of a bill to permit voluntary prayer in public schools. This bill, S. 481, introduced by my distinguished colleague from North Carolina, Senator HELMS, would stop the Supreme Court or Federal district courts from hearing cases challenging any State statute or ordinance, which relates to voluntary prayers in public schools and public buildings. A similar bill is now on the Senate Calendar.

The U.S. Senate, every day of the 27 years I have had the honor of representing the State of South Carolina, has opened its sessions with a prayer for God's blessing. Yet, the Supreme Court has forbidden that privilege to public school children since 1962.

At that time, the Court held that both nondenominational prayer and a Bible reading without comment were in violation of the first amendment prohibition of the establishment of religion. These decisions were, in my opinion, wrong and have not been well-respected in the legal community. Erwin Griswold, a dean of Harvard Law School, has called the holding of the Court "sheer invention."

One of the Founding Fathers of the U.S. Supreme Court, Joseph Story, who served as a Justice from 1811 to 1845 stated:

> The general, if not the universal sentiment in America was, that Christianity ought to receive encouragement from the state so far as was not incompatible with the private rights of conscience and the freedom of religious worship. An attempt to level all religions and to make it a matter of state policy to hold all in utter indifference, would have created universal disapprobations, if not universal indignation.

I intend to make every effort, with others of similar opinion, to restore voluntary prayer in public schools because I regard the right to participate in such prayer as a primary guarantee to all citizens under the U.S. Constitution. Any other result is nothing more or less than Government interference with the free exercise of religion, a course of action expressly prohibited by the first amendment.

Mr. President, I am going to move to table the committee amendment. I believe the yeas and nays have already been ordered on that question, have they not?

The PRESIDING OFFICER. The yeas and nays have been ordered on the committee amendment itself.

Is the Senator making a motion to table the committee amendment?

Mr. THURMOND. I move to lay the committee amendment on the table and ask for the yeas and nays on that.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I withdraw my motion to table for the time being.

The PRESIDING OFFICER. Without objection, it is so ordered.

The motion to lay on the table was withdrawn.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, to bring us to the issue itself, when we look at the amendment on page 31, line 22, what has occurred is that the committee, in trying to keep a clean bill, and not have it encumbered by language, removed the provision:

> No funds appropriated under this act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

In striking that language I think the committee made a mistake, and the Senator from Connecticut has an amendment to the formative language, should the committee amendment be tabled.

So really to bring to issue the question of constitutionality and some provision within the bill for voluntary prayer, I hereby move to table the committee amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from South Carolina to lay on the table the sixth excepted committee amendment.

On this question, the yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Rhode Island (Mr. CHAFEE), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Wisconsin (Mr. KASTEN), the Senator from Idaho (Mr. MCCLURE), the Senator from South Dakota (Mr. PRESSLER), and the Senator from Pennsylvania (Mr. SPECTER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. BOREN), the Senator from Missouri (Mr. EAGLETON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from New York (Mr. MOYNIHAN), the Senator from Rhode Island (Mr. PELL), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote "yea."

I further announce that, if present and voting, the Senator from Montana (Mr. BAUCUS), would vote "nay."

The PRESIDING OFFICER (Mr. D'AMATO). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 70, nays 12, as follows:

[Rollcall Vote No. 376 Leg.]

YEAS—70

Abdnor	Exon	Packwood
Andrews	Ford	Percy
Armstrong	Gorton	Proxmire
Baker	Grassley	Pryor
Bentsen	Hart	Quayle
Biden	Hatch	Randolph
Bradley	Hatfield	Riegle
Bumpers	Hawkins	Roth
Byrd, Harry F., Jr.	Hayakawa	Rudman
Byrd, Robert C.	Heflin	Sarbanes
Cannon	Heinz	Sasser
Chiles	Helms	Schmitt
Cochran	Hollings	Simpson
Cohen	Humphrey	Stafford
D'Amato	Jepsen	Stennis
Danforth	Johnston	Stevens
DeConcini	Kassebaum	Symms
Denton	Laxalt	Thurmond
Dixon	Lugar	Tower
Dodd	Mattingly	Wallop
Dole	Mitchell	Warner
Domenici	Murkowski	Weicker
East	Nickles	Zorinsky
	Nunn	

NAYS—12

Boschwitz	Huddleston	Mathias
Burdick	Inouye	Matsunaga
Cranston	Jackson	Metzenbaum
Glenn	Levin	Williams

NOT VOTING—18

Baucus	Goldwater	Melcher
Boren	Kasten	Moynihan
Chafee	Kennedy	Pell
Durenberger	Leahy	Pressler
Eagleton	Long	Specter
Garn	McClure	Tsongas

So Mr. HOLLINGS' motion to lay on the table the sixth excepted committee amendment on page 31, lines 22 through 24, was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. HOLLINGS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 629

Mr. WEICKER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The amendment of the Senator from Connecticut (Mr. WEICKER).

Mr. WEICKER. Mr. President, I wonder if we can have order in the Chamber.

The PRESIDING OFFICER. The Senator from Connecticut has the floor. The Chair asks that the Senate please be in order.

Mr. WEICKER. Mr. President, first of all, I would like to make clear that it was the desire of both the ranking member and this Senator to clear the decks so that Members of the Chamber can express themselves on this issue, the issue of prayer in school. Those of us who voted for it did so for reasons of substance or for reasons of procedure. In any event, now comes the part that most clearly relates to substance of the matter at hand.

In essence, now you have before you the language of the Senator from Connecticut which states:

No funds appropriated under this act may be used to prevent implementation of constitutional programs of voluntary school prayer and meditation in the public schools.

Or the language in the House bill:

No funds appropriated under this act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

I will be very brief in my remarks. I hope we can soon get to a vote up and down on my amendment.

First of all, this is not like the busing controversy.

Unlike busing, where busing programs were in being and where you tried to tie the hands of the Justice Department and the courts in the sense of the implementation of busing, none of that exists here. There are no Federal programs vis-a-vis prayer in school.

What you are going to do if you pass the House language is to send a signal and all of a sudden we are going to have everybody trying out their own particular scheme. And back we go again as to what is constitutional and what is not. I would hope that we would not send that signal.

I would hope rather that we make clear our dedication to the first amendment, that we would not sit here and tie the hands of the Justice Department or any other agency of Government but, instead let the Constitution decide the question before us.

I would hope that I would have the support of my colleagues that we might show the good sense, which the House failed to do, when it put its language into the State, Justice appropriations bill.

Mr. HOLLINGS. Mr. President, the distinguished Senator from Connecticut alludes to the Federal programs. The language now on page 31, line 23, talks of voluntary prayer, programs of voluntary prayer. It does not allude to Federal programs. In fact, the issue or fundamental involved here is voluntary prayer and meditation in the public schools.

It has been this Senator's view that the constrained interpretation by the Court of the first amendment of the disestablishment clause for religion has been misinterpreted as not allowing voluntary prayer or freedom of religion as to permit any religious activity whatever.

It has always struck me, Mr. President, that we would never think otherwise than to have a prayer to open a session of the Senate. We have a chaplain who is paid with Federal funds. That is fine for Senators.

But then the question comes to those in younger years, those in school. I do not know how you got this far in life if you did not have a prayer inside of a school, or, if you did, maybe we will give you an award for that, or some kind of prize. But the point remains that we should be honest with ourselves.

Certain it is that we do not want to mandate a prayer; certain it is that we do not want to mandate a particular kind of prayer. But when it is free, when it is open, and it is participated in solely in a voluntary fashion, then we think that is constitutional.

The fact is that the distinguished Senator has added the word "constitutional." I know what the Court thinks is constitutional. I happen to differ with the Court. Therefore, I cannot support the Senator's amendment but, rather, stand with the particular language in the bill.

Mr. HELMS. Mr. President, the distinguished Senator from South Carolina is absolutely correct.

I enjoyed observing my good friend from Connecticut as he tried to obfuscate the issue, how he ignored the plain meaning of the word "constitutional."

It reminds me of the words of Lewis Carroll in "Through the Looking Glass," when Humpty Dumpty said, "When I use a word," Humpty Dumpty said, in rather a scornful tone, "it means just what I choose it to mean—neither more nor less."

What the Senator from Connecticut is doing is trying to use a word knowing that it will signal to the courts to "keep on doing what you are doing, meddling in something that never was the court's business in the first place." It is just a code word.

If ever an amendment deserved to be tabled, this amendment by the distinguished Senator from Connecticut deserves that fate.

Mr. President, I hope that someone will move to table this amendment, and I do hope that the Senate will agree to table it. If it is not tabled, then I think we better have some substantial discussion of this issue.

Rather than to consume the time of the Senate now prior to a motion to table the amendment of the distinguished Senator, I will withhold.

Let me say this and only this:

A little over a year ago, I had dinner in Dallas—Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senator from North Carolina has the floor. The Chair will ask those Senators who are conducting conversations to do so outside the Senate Chamber.

The Senator from North Carolina.

Mr. HELMS. I had dinner in Dallas with a young man named Bill Murray. That name may not be familiar to you at the outset, but let me explain that he is the son of Madalyn Murray O'Hair. Bill Murray is the man who, as a child, was the pawn in this game played by Madalyn Murray O'Hair.

Bill Murray is now going around this country apologizing for what his mother did in terms of taking away the right of voluntary prayer from the schools of this country.

Mr. President, Bill Murray went into some detail to describe to me the kinds of people who came to his mother's home and advised her on how to proceed. Those people included a number of Communist functionaries. I do not say that anybody who opposes the Supreme Court decision has Communist sympathies, but I do say that this whole controversy grew out of the mind of an atheistic woman and it has caused a considerable amount of torment around this country.

Mr. President, I am prepared to go into detail about the conversation I had with Bill Murray, but it may not be necessary. All I ask is that the Senate not be misled by the innocent-appearing amendment of the distinguished Senator from Connecticut, because, just as Humpty Dumpty said, when he used a word, the word meant just what he chose it to mean, neither more nor less. The Senator from Connecticut chooses to confuse the issue.

Mr. President, we do not want to invite the Department of Justice to meddle in this issue. If we table this amendment, we shall be well on our way to sending a message to all concerned.

Mr. DANFORTH. Mr. President, will the Senator entertain a question?

Mr. HELMS. Yes, I will do so for the distinguished Senator.

Mr. DANFORTH. Mr. President, I should like to give just a hypothetical question so I may understand the Senator's position on this. Let us assume that a teacher of, say, third-grade students is a very devout Roman Catholic, and she goes into class one day and writes on the blackboard behind her desk the words of the Hail Mary. She then announces, "Children, we will now have a voluntary recitation of this prayer. Those of you who do not want to recite it need not recite it; those of you who wish to, please join with me."

Would it be the Senator's view that the Department of Justice, in such a case, should not go into court and that a court should not entertain such a case?

Mr. HELMS. Mr. President, I think the Justice Department had better concentrate on the drug trafficking in this country and the crimes that are virtually destroying this society.

I say to the Senator that the scenario he has concocted does not bother me at all. I am a Baptist. I would not object at all to my grandchildren being in a class where that happened, and I do not think the majority of the American people would. I do not have any problem with it and I certainly do not think that the Department of Justice ought to send a U.S. marshal on horseback down there to correct it.

Mr. DANFORTH. Mr. President, let us suppose that the Senator were an Orthodox Jew. Would he feel the same?

Mr. HELMS. I think I would feel exactly the same. Again, I say that I am a Baptist and if Christianity cannot stand on its own footing with persons of other faiths, then we have a problem in this country.

I would hope, if the Senator would let me proceed, that any child, whether it be a Jewish teacher or a Catholic teacher

or Protestant teacher—you could name them all in the Senator's list of questions—I would hope that child would go home and discuss this matter with his parents. After all, this country existed a pretty long time without the Federal courts interfering in this fundamental freedom. Our schools are under local control, and we do not need the Federal level dictating to the local level.

Mr. DANFORTH. One other question. Let us suppose that, on Good Friday, a very devout Protestant teacher decided that the class would observe 3 hours of meditation during that period and so organized the class, but announced that any child not wishing to meditate could just sit in his or her chair and read. Would it be the Senator's view that that would not be a matter that the courts would entertain?

Mr. HELMS. I say to the Senator from Missouri, of course, he and I could stand here and examine extreme-case scenarios. But let me ask the Senator a question: Can he name me one child who has ever been harmed by being exposed to prayer or meditation?

Mr. DANFORTH. No, I cannot name a child who has been harmed by being exposed to prayer and meditation, but I do believe that it is a fundamental principle in this country that the Government does not get itself into the business of devising prayer or organizing prayer or setting up prayer. It would be my view that this is not a matter for any governmental official to undertake.

I think the difficulty in the amendment as I understand it is in the definition of what is and what is not voluntary prayer. It would be my view that, in the public school system—not the church school system, but the public school system—we should not open the doors to what could be a whole parade of what the Senator would call extreme cases.

Mr. JOHNSTON. Will the Senator yield for a question?

Mr. HELMS. Yes, sir, I yield to the distinguished Senator from Louisiana.

Mr. JOHNSTON. Is it not a fact that every State in the Union, so far as I know—certainly most of them—has in its own constitutions first-amendment-like protections for religion so that the mere fact that the Department of Justice does not enforce this kind of thing would not mean that the States would not be free to do so and, indeed, States probably would do so? In my own State, we have court cases going back as far as the 1930's relating to not only prayer in school but Bible reading in schools. So the States would do this without the Federal Government having always to come in and lead the charge, is that not correct?

Mr. HELMS. That is certainly correct.

Mr. BUMPERS. Will the Senator from Louisiana and the Senator from North Carolina yield for this question?

Mr. HELMS. I am always careful when the Senator reads a question.

Mr. BUMPERS. I am not going to read the question, Mr. President. This amendment says:

> No funds appropriated in this act shall be used to prevent implementation of constitutional programs of voluntary prayer and meditation in the public schools.

Every Member of this body, Mr. President, when he or she came here, held up his or her right hand and swore to uphold the Constitution, not of the State of Louisiana but of the United States.

My question of the Senator is, What does that mean to him?

Mr. HELMS. Would the Senator repeat it?

Mr. BUMPERS. When the Senator held up his hand and took the oath when he entered the Senate, he said he would uphold the Constitution not of North Carolina, not of Louisiana, but of the United States. My question is, what did that mean to him when he said that?

Mr. HELMS. I think, as the saying goes, res ipsa loquitur.

Mr. President, the Supreme Court is having confusion among itself on this question, according to my private conversations with some of the members of the Court. But there are many, many constitutional authorities who agree that the Supreme Court moved into treacherous waters when it got involved in this question.

Of course, I took an oath to uphold the Constitution of the United States. But Congress also plays a role, by its actions, in determining constitutionality.

Mr. MATHIAS. Mr. President, this is a matter in which I find myself in some measure of agreement with the Senator from North Carolina. He says the wording of the amendment is somewhat convoluted. At least, I took that to be his meaning. I think that is true. I think the wording of this amendment is somewhat convoluted, but also that the issue is somewhat convoluted.

I believe what we want to do, those of us who want to support the amendment, is to make it clear that we do support the separation of church and state.

The Senator from North Carolina said that Madalyn Murray O'Hair had deprived people of the right of voluntary prayer in school. That is a point on which I would differ with the Senator from North Carolina. I would differ with him because I do not believe people have had that right since the ratification of the Constitution. If you want to say somebody deprived the people of that right, then I think you have to say that that somebody is James Madison and the other members of the Constitutional Convention, those giants who framed the Constitution of the United States.

If you read Madison's Journal of the Convention, it is very clear that officially sanctioned prayer would have been anathema to the majority in that Constitutional Convention.

Officially sanctioned prayer is unconstitutional, whether composed and authorized by a State legislature, whether composed and authorized by the Governor of a State, whether composed and authorized by a county school board or a State school board or by a mayor or a board of aldermen. In short, officially composed and authorized prayers are specifically prohibited by the Bill of Rights. Madison's Journal is very explicit in this, very clear.

I will support the amendment of the Senator from Connecticut, and I will resist any motion to table it, because I think that although it goes a long way around to get to the point, it does get to the point of making it clear that the framers of this Constitution—which, as the Senator from Arkansas says, we are sworn to uphold—did not countenance official prayers composed, authorized, or recited in public places under the mandate of public bodies.

Mr. WEICKER. Mr. President, I thank the distinguished Senator from Maryland for his very perceptive remarks.

If, indeed, this is not the easiest of language, that is because I am not the one who devised the language that went into the bill from the House. I had to deal with what was brought over here.

Make no mistake about what I intend to do by the addition of the word "constitutional." First, let me correct one impression among my colleagues which they might have, based on the debate today. This has nothing to do with the courts. I am talking about the Justice Department. So let us understand that this is not in any way restricting the courts. The stricture is on the Justice Department.

Point No. 2: This body, with all the wisdom that is resident here and all the deep feelings for the Constitution and this country, cannot and should not legislate constitutional change. If you want to change the first amendment, change it, but change it via the constitutional process.

I can understand the thickets that many of my colleagues get into insofar as human emotion is concerned when it comes to ongoing issues, such as busing. We have been through that exercise here.

But on this issue we are not talking about something that is a reality in this country. The proponents of the House language are prospectively trying to legislate a change in the Constitution. I think we have more on our plate than we can handle now, without getting into that kind of activity. There is no Justice Department action ongoing at the present time which needs to be reined in.

As to the word "constitutional" and as to its meaning and the objections of the distinguished Senator from North Carolina and others as to what the Supreme Court has done, there is no question that when it comes to constitutionality, the Supreme Court is going to be the last word. Do not try in any way to shy away from that position or try to dilute it or try to put it in any other clothes.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. WEICKER. I will yield in a moment.

The Court is the final determinant of the Constitution.

I hope that the Senate of the United States will now stand up squarely, as was intimated in the comments by the distinguished Senator from Arkansas, for the Constitution, for the great principles it espouses.

When are the court's decisions going to be right? When we get the right people making them? That is fair enough. That certainly is a senatorial function, to put those into the court system who it is hoped, will deliver the types of decisions consistent with the philosophy of the membership. That is fair enough. But, Mr. President, you do not get two swings

at this pitch. The advise and consent function is that swing. There has to be a final arbiter of the Constitution of the United States. I do not want that to be the political winds and the philosophical winds that blow on the Senate floor, and none of you does, either.

I think that the problem with many of my colleagues is that there is an impatience. Finally, their moment has come on the stage of American philosophy and American politics. But they want to see everything change overnight, even if it means tearing down the Constitution and conforming it to what they want to see achieved as an end. Legislate all the policies and all the laws, but leave the Constitution alone. Nothing can be more precious to every American than the first amendment.

More mischief has been done in the history of this world in the name of religion than in the name of any philosophy or any theory or any type of government.

Mr. JOHNSTON. Mr. President, will the Senator yield at that point?

Mr. WEICKER. It is not my object here, in any manner, shape, or form, to try to give a definitive speech on constitutional law; but I must confess that, to my amazement, every time the word "constitutional" comes up now, it is looked upon as a threat. It should not be. It is what holds us all together. It has been and it will continue to be the origin of any greatness that accrues to this very small band of people known as Americans. Devastate that, and you have not just brought about a temporary political change; you will have preordained a future far below our present and past.

I know there will be more comments, but as soon as my colleagues are ready, I hope we will have an up and down vote on the Weicker amendment.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. HOLLINGS. Mr. President——

The PRESIDING OFFICER. The Senator from Louisiana has a question, if the Senator from Connecticut yields to him.

Mr. WEICKER. I yield.

Mr. JOHNSTON. I thank the Senator from Connecticut.

There is a long line of Supreme Court decisions to the effect that constitutional rights are personal rights for individuals to enforce and that the Justice Department may not do so. Indeed, that was the basis on which, in the Civil Rights Act of 1964, the Justice Department was specifically authorized to champion individual constitutional rights, as the Senator knows, being authorized to intervene or to bring desegregation suits at that time.

My question is this: Has the Justice Department ever been authorized, or is it now authorized, to bring such a suit; and, if so, has it ever brought a lawsuit to prevent the implementation of—what is the language—of a program of voluntary prayer in public schools?

Mr. WEICKER. The answer to the distinguished Senator from Louisiana is no, it has not.

That is one of the points that I am making out here.

Mr. JOHNSTON. Is it not true, then, that in the absence of legislation it would not so be authorized to bring such a suit?

Mr. WEICKER. I do not know. I am not here to make that determination. I am just asking the Senator why we have this language in here? Unlike the busing controversy, in which the Senator took part, the Justice Department has never engaged in any suit. All the great decisions in this area have been suits instigated by private individuals. So why have this language in here? What is the reason for putting it in here?

Obviously, it is to invite State and local governments to start throwing out all types of prayer programs that are going to be challenged, and if they be challenged by individuals, then we will raise the issue up to the courts. It is an invitation to litigation.

I think that there is enough to do in this Nation without starting down that track.

Mr. HOLLINGS. Mr. President, I had another talk in mind at this particular hour. Let the record show that I did have a group downtown that I was going to address because on a Monday at lunchtime we never vote as we are waiting for our colleagues from the West to return.

But I cannot let the casual nature and the rather wise nature of some of the comments just take root and act to minimize this as though, what is the problem all about?

We are going to quote James Madison, and we are going to find that we take an oath and we take that oath to support the Constitution.

The Constitution is black and white. Just look at it and one can tell what is constitutional.

Let us go into some of these things:

First, they are praying today in the public schools of America, in my State and in the State of the Senator. I will find it up in Connecticut if he wishes me to. They never have ceased.

We are praying today in this Chamber, and if the Senator wishes to get the Justice Department to protect us in our prayer then vote for this amendment because we need that protection according to the Senator's rationale.

We are going to have a prayer. We are going to have it tomorrow whenever the majority leader sets the time. We will come in. The Presiding Officer will take his position there. He will say, "The Members will rise while the Chaplain leads us in prayer."

That goes to the nice little circumstance situation of the distinguished minister and Senator from Missouri. Certainly it is that we can give circumstances that would be coercive. Everyone understands that, and that would not be a voluntary prayer.

We know what voluntary prayer is, I hope. The Senate cannot find a balanced budget but it should be able to find voluntary prayer in this land.

Are we saying there is no such thing? Is that the contention of the minister? Hogwash.

And the Senator over here talked about the constitutionality. Did we not take the oath? Look at the Senate. The Senate will not even let the Presiding Officer rule. It says the body, not the court. We regularly determine as a group what is constitutional.

Why did James Madison write it so clearly? Read it. We are going to hear further debate on it this year. But what is religion and what is not religion? We will see.

> Congress shall make no law respecting an establishment of religion . . .

That is the key question.

> . . . or prohibiting the free exercise thereof; . . .

That is the first amendment. There is somewhere, sometime, somehow in schools, in institutions, in meetings over this land of ours voluntary prayer or the free exercise of religion not only in churches.

Mr. DANFORTH. Mr. President, will the Senator yield?

Mr. HOLLINGS. Let me complete my thought.

Here is the whole thing. When the Court goes to determine what is nice and pretty about James Madison, I can give Senators many other quotes from James Madison because he said that a free society without access to free information is a sham or prelude to a farce or perhaps both.

So when we see whether or not they are establishing religion it is not a yes-or-no answer, this is religion or this is not.

There is the degree of involvement. We have the GI bill. Is that an unconstitutional act? Certainly not. That is Government money to support higher education because the money flows right into the institutions. Some of these institutions are religiously affiliated, but at the level of higher education they say that does not involve an undue involvement in the exercise of religion because the student body is mature and free from undue influence.

The majority of institutions of higher learnings are not religious. The persons in attendance are of maturity. They are not influenced thereby. Therefore, if you please, it does not constitute a violation.

But give that same money to the kindergarten, give that same money to the elementary school, and we have had it here and we have decisions galore, we will debate tuition tax credit, which they wanted to do, which the court had said was constitutional.

Did the distinguished Presiding Officer, a member of the other party, attend an unconstitutional convention of his party when they came out endorsing the tuition tax credit? Was that unconstitutional? They are proposing it and they are voting for it in this Chamber. Why? Because Senators who vote for that do not think that is an undue involvement of the Government in religion.

So there is a test. It is not that just one man said we are going to have religion or not. They did not write it that way. They said we should not establish it and we should not prevent the free exercise thereof, and if Senators feel all of that is theoretical and are so worked up about this thing, then erase "In God We Trust" from the Senate walls, eliminate the

Chaplain's prayer, take it off the coinage, and repeal the Pledge of Allegiance where we said "under God indivisible with liberty and justice for all."

I agree with the Senator from Connecticut. The wisdom of the first amendment is there. We see it in Ireland. We see it in the Middle East. We see all kinds of continuing national problems and it is without that exercise, the free exercise of religion thereof. But when my colleagues go so far as to intimate that religion itself canot be freely exercised save within some temple, then I resist, resent, and oppose it, and certainly not in the school systems and everything else where we have had voluntary prayer. We have it in the various meetingplaces and we have it right here, and no one has ever put in a rule that we could not do it.

As to the constitutional questions, I am, I guess, exhibit No. 1, having learned at least that which was constitutional up until May 17, 1954; namely, that a State could have separate but equal education facilities.

I say to Senator MITCHELL, who was a Federal judge, that that is what the Federal courts ruled. But then all the way from 1896 and Plessy against Ferguson up to 1954, for 58 years the Supreme Court found it constitutional and then they found it unconstitutional.

Yes, I say to the Senator, membership does change.

I am glad to yield for a question.

Mr. DANFORTH. I wish to ask the Senator from South Carolina this question. He was critical of the hypotheticals which I suggested in trying to differentiate voluntary from involuntary prayer. Can he suggest to the Senate a hypothetical situation which would be an involuntary prayer?

Mr. HOLLINGS. The prayer of the U.S. Senate. I think that is involuntary.

Mr. DANFORTH. That is involuntary?

Mr. HOLLINGS. I mean that is voluntary.

Mr. DANFORTH. That is voluntary or involuntary?

Mr. HOLLINGS Voluntary.

Mr. DANFORTH. Give me an example, if he can, of an involuntary prayer.

Mr. HOLLINGS. An involuntary prayer would be the example the Senator gave, the coercion brought on the little children as he described it. They have a person of the Catholic faith putting up a particular denominational prayer. The Lord's Prayer has been accepted, I say to the Senator, as he well knows, by the Episcopalians and the Lutherans that he and I represent, by the Catholics, and many others.

It has been universally accepted at every particular governmental function that we have. We would never have an inauguration—pull out the program—without the inaugural prayer. Pull out any kind of really important meeting that we have and we would start, yes, with the Lord's prayer. That would be voluntary, in my opinion.

Mr. DANFORTH. Well, supposing that particular denomination never used the Lord's prayer?

Mr. HOLLINGS. You can get the involuntary prayers, that is right.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. DANFORTH. What would make the Lord's prayer a voluntary prayer as opposed to the involuntary prayer?

Mr. HOLLINGS. If the distinguished Senator will come down to a specific prayer, I am coming down to the specific position. There is a provision itself that says "free exercise thereof." I think when we move into the auditorium in a particular schoolroom and they commence a program with a prayer such as when you have a blessing preceding a meal. I have attended those regularly, with members of all faiths there—we have it voluntary. I happen to have attended a school for 4 years, it is still in existence, and I take it to be voluntary prayer.

They have a chapel and chapel services, you can attend whichever one you wish. But it is not an unconstitutional building. It is not an involuntary edifice of prayer. On the contrary, it is there and it is exercised, and I think of example after example which, of course, is the predominant. Your questioning would try to intimate that I would be in some nut position or in a minority, that I do not understand religion and understand prayer.

The contrary is true. It continues every day. We have the Judeo-Christian ethic in our society, and I think it has distinguished our society in the United States from other societies, the public forms of government, and I think it is just fundamental.

I would vote, for example, on that Pledge of Allegiance. I think it was wise to inset "under God" before "with liberty and justice for all."

Mr. STEVENS. Mr. President, will the Senator yield for a question? I am trying to see if we cannot get a quorum over there in the Appropriations Committee, and I wonder if I might ask the Senator if I have a prayer of a chance of getting a quorum over there?

Mr. HOLLINGS. Yes, sir. I will get a prayer to stop this. I wanted to go down to the committee, but I hate to see them give Jesse the bum's rush and talk about what is constitutional, and all of a sudden if you vote the other way you violated your oath. That is the intimation. If you have free exercise of religion then you are unconstitutional. We have gone through all kinds of nonsense of extreme around here, and I think you have got more than a prayer. I will yield the floor.

Mr. MITCHELL. I would like to ask the Senator from South Carolina a question, if he will yield.

Mr. HOLLINGS. Yes, sir.

Mr. MITCHELL. The prayer that occurs daily here at the commencement of proceedings, I would like to ask two questions with respect to that. First, is it true that children are required in this country to attend school?

Mr. HOLLINGS. They do have—that is right; generally speaking, yes.

Mr. MITCHELL. They have truancy laws?

Mr. HOLLINGS. They have truancy laws.

Mr. MITCHELL. Is anybody required to run for the U.S. Senate, to be elected?

Mr. HOLLINGS. No, sir.

Mr. MITCHELL. Second, it is required—is it not true that children are not only required to attend school but they are required to be present at the commencement of school in the morning when prayers are held or to be held?

Mr. HOLLINGS. Yes, sir. That is the time, and I do not see any conflict there.

Mr. MITCHELL. Is there any requirement that U.S. Senators have to be present?

Mr. HOLLINGS. Yes, sir. I can raise a point of order and order your presence.

Mr. MITCHELL. You can?

Mr. HOLLINGS. One Member can make another Member vote. You led into the wrong alley there, Senator. You went too far on that one, yes, sir.

Mr. MITCHELL. No. Everybody who is here is here voluntarily and no child in school is there voluntarily.

Mr. HOLLINGS. You do not think think they are here involuntarily? It comes right now to mind that the distinguished minority leader, Hugh Scott, of Pennsylvania, had gotten off the plane in London to make a talk in Heathrow, and we ordered him back. There is nothing voluntary about this. You are supposed to be here.

Mr. MITCHELL. No, it is very voluntary. The point is whether or not there ought to be prayers in school, which is a legitimate question for debate, as you correctly pointed out.

Mr. HOLLINGS. Right.

Mr. MITCHELL. There is ambiguity in the Constitution. But the argument is not advanced by suggesting that there are prayers in other aspects of public life because the Supreme Court has said repeatedly that the prohibition in the Constitution neither dictates nor prohibits all forms of prayer in public life, and the question here is schools and schoolchildren not the U.S. Senate, not the prescription on the coin or other things. So I do not think the argument is advanced by continually comparing it to the Senate. That is my only point.

Mr. HOLLINGS. I happen to think the argument is very, very much advanced, it is very material, it is very important. You are required to be here. The session is there, and we can command the person's presence, and all these public exercises with respect to officials, that they be required—their presence is required for the oath of office, for the particular function, and what have you, and there is no constitutional provision——

Mr. MITCHELL. But you can leave the Senate any time you want to without violating the law. But a child in school cannot leave school any time he wants to without violating the law. There is a complete element of compulsion in the public schools which does not exist in the Senate.

Mr. METZENBAUM. Mr. President, will the Senator yield?

The Senator just misstated a fact as to who has to be in the Senate. That is not true. You did not speak the truth as to having to be in the Senate. You do not have to be in the Senate.

Mr. HOLLINGS. You do.

Mr. METZENBAUM. You have to be

here for a vote. You can make me come in for a vote, but you cannot——

Mr. HOLLINGS. We can require——

The PRESIDING OFFICER. The Senator from South Carolina has the floor.

Mr. HOLLINGS. We require the presence just for a quorum. The quorum is the presence, and that is in the rules, not just to vote, Senator from Ohio.

Now, to complete the thought that I had in mind with respect to the compulsion of schoolchildren. That is, you have truancy laws and you require the presence to be enforced. That still does not forbid prayer even though they are required to be present. They are not required to pray, and what the distinguished Senator from Maine is contending is that if you are required to attend, anything occurring thereafter—being made to attend—therefore becomes compulsory. I do not follow that logic at all. It is not involuntary prayer when they have these particular exercises in the schools.

So, once again, Mr. President, the first amendment, the establishment-of-religion clause, is the measured judgment by the U.S. Supreme Court. It has been a measured judgment as to whether or not there is that degree of governmental involvement. Some could jump immediately and say, as the Senator from Maine has contended, that once you are required to be present, ipso facto, thereafter, any kind of prayer whatever or religious activity then would be involuntary because you were required to attend in the first place the particular school exercise.

I do not agree with that at all, and I think that there can be voluntary prayer in the public school system in this country within the institution. It is very important to this particular institution. It just does not allude to the requirement of attendance because I can tell you there is no better rule—you might get them for a violation for not attending the particular class, but under the rule here, the U.S. Senate can actually send the marshal out and arrest you and bring you back and compel you attend on that quorum call, yes, sir.

I thank the distinguished Presiding Officer.

(Mr. WARNER assumed the chair.)

Mr. MITCHELL. I would like to merely comment and clarify what I intended in my remarks because I did not intend the interpretation suggested by the distinguished Senator from South Carolina.

I intended merely to make the point that the continual comparison between prayers in public schools and a prayer in the U.S. Senate adds nothing to the debate. I did not say, I did not imply, and I did not mean, that no prayer in a public school could ever be voluntary under any circumstance because there was an element of compulsion in attendance.

I merely pointed out that the analogy drawn repeatedly by the Senator from South Carolina was misplaced because of circumstance because there was an element of compulsion.

Indeed, I believe there are some circumstances in which prayers are voluntary, and that is the moment of silence which is widely used in schools throughout this country, in which those children who choose to pray can do so in the manner they see fit and those who do not can choose to do so.

And that is what I understand to be the intention of the Senator from Connecticut, to describe those that are constitutional and so prescribed. Whether or not prayer is constitutional is clearly a subject of intense emotional debate. But it simply does not add anything to the debate to say that because we open the Senate proceedings with a prayer that we, therefore, ought to have prayer in public schools prescribed by some government.

It also does not follow that if we are going to eliminate prayer in the public schools or prohibit involuntary prayer that we ought also, therefore, on the other side to eliminate all vestiges of religion in all forms of public life. The two conclusions simply do not follow. That is the only point I intended to make.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. I address myself to the concern all of us have about this matter in the prayer in schools and the question of constitutionality; the question that we are discussing an amendment that some even question whether the Justice Department has ever gone into a school area to provide enforcement; and a question of what is the real purpose of this amendment. Is it to see that we can get a vote on an issue of this kind that is already in the House bill?

I commend my friend from Connecticut for attempting to state the amendment in a manner that complies with the Constitution. But it seems to me that, in many respects, the whole issue is a nonissue, but attempted to be made into an issue in order to create more of the divisiveness that exists in America today. I do not think there is much question about the fact that you cannot have prayers in schools. Except this effort to prohibit that which people say is not being done is sort of a reverse way of doing it.

The argument gets into the question of: "What is prayer and what is not prayer? Do we have to be here; don't we have to be here?". I question that.

We can be here for a quorum call. We can be here for a vote. We do not have to be here for the prayer.

But I think the real issue does not have to do with what the Members of the Senate have to do. I think the real issue has to do with what is happening and what could happen and will happen to little children in this country.

The Supreme Court has addressed itself to this issue. They recognized the problem of children being in a school room and being under a kind of pressure by reason of their embarrassment and not able to decide to walk out. That would take a lot of courage on the part of a young child.

The Supreme Court, in the Abington School District case, stated it very well when they said:

> The pervasive religiosity and direct governmental involvement inherent in the prescription of prayer and Bible reading in the public schools, during and as part of the curricular day, involving young impressionable children whose school attendance is statutorily compelled, and utilizing the prestige, power, and influence of school administrators, staff, and authority, cannot realistically be termed simply accommodation, and must fall within the interdiction of the First Amendment.

I think that is so true, because what we are really saying is somehow, some way we ought to come in through the back door and indicate the Senate's approval of prayers in school.

The Senator from Connecticut has attempted to correct the situation by limiting it to constitutional programs of voluntary school prayer. I, myself, would have preferred an up or down vote on the issue of whether or not the Justice Department may be involved in prayers in school. I voted no on the issue of tabling the previous amendment.

But I think it is sad that we have to be debating this issue when the whole economy is upside down, when the international picture creates great problems for us and we are sitting here talking about whether or not the Justice Department should be prohibited from something which the Senator from Louisiana indicates it never did in the first instance anyhow.

I hope that the amendment of the Senator from Connecticut will prevail. I think it, at least, would attempt to provide some clarity and clarification on the subject. But I am concerned as to whether or not it will or will not.

● Mr. DENTON. Mr. President, I would like to express my support for the restitution of the House amendment that prohibits the Justice Department from preventing school sponsored programs of voluntary prayer or meditation.

The 1962 Engel against Vitale Supreme Court case should be remembered as a judicial landmark from which to measure an approach nascence of retreating from a national mortality based upon religious principle. The voluntary recitation of the following simple prayer in New York schools led the Supreme Court to declare that publicly sponsored prayers were a violation of the "establishment clause" of the first amendment:

> Almighty God, we acknowledge our dependence upon Thee, and we beg Thy blessings upon us, our parents, our teachers and our country.

While the rectitude of this decision is still a point of deep-seated controversy, there is little justificiation that it or any other judicial decision should be used to effectively eradicate all vestiges of religious thought or expression in our public life. I could offer scores of quotations proving that the Founding Fathers had fervently hoped that this land would forever be one of religious tolerance.

Indeed, they undoubtedly felt that it would be the well-spring of greater faith in, and reliance upon, God and his providence. While maintaining our respect for all faiths and even nonbelief, we must protect those voluntary expressions of homage for the creator of the universe in all circumstances and at all times.

Certainly, the limited resources of the Department of Justice should not be given over the rooting out this volun-

tarily given sign of respect from our schools and public buildings.

Let us instead rely upon the goodness of our citizens and local schools to uphold the principle of separation of church and state, and let us not charge the Federal authorities to prosecute and persecute public displays of theism. Faith or supplication to the divine providence on which our Founding Fathers reposed our national utmost reliance.

Prayer and meditation have proven to be a source of hope and comfort for mankind since his creation; we should not be seeking ways to discourage our people from acquiring the solace that awaits therein, nor force them to act as if they are citizens of one nation under God.

I strongly urge my colleagues to support the House language.●

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

Mr. President, I am not a lawyer, but I am constantly amazed at some of the declarations I hear on this floor about the Bill of Rights. You would think that the Bill of Rights became part of our Constitution to protect the authorities of the Federal Government, to lock them in. But the truth is, the Bill of Rights was intended to protect the rights of the States.

Now, James Madison has been referred to here with respect to the establishment clause of the first amendment. Madison was very clear in his interpretation of the meaning of the words the "establishment clause," his interpretation being:

> That Congress should not establish a religion, and enforce the legal observance of it by law, nor compel men to worship God in any manner contrary to their conscience.

They go on to say:

> Whether the words were necessary or not, he—

Madison—

> did not mean to say, but they had been required by some of the state conventions, who seemed to entertain the opinion that . . . (Congress) might infringe the rights of conscience and establish a national religion. . . .

What Madison was concerned with was the Federal Government interfering with the practices of the States. The term "establishment of religion" was a term of art. The idea of "an established religion" was well understood at the time. It meant a religion which was given preference over other religions, or which was made the test for holding public office, attending a university, or enjoying other State privileges.

Now, taken into context what occurred, there is no way that the first amendment could be interpreted to refer to school prayer. The words "establishment of religion" did not mean that there was to be no official support for religious beliefs generally. Nor did it mean that religious beliefs would be prohibited. What it meant was not that the Federal Government was to take the position that we had a freedom from religion, but rather a freedom of religion. So all of this strained interpretation of what the establishment clause meant bothers me.

I had a minister write to me not long ago, and he was quoting from the Constitution. And he had in quotes "separation of church and State."

I wrote back. I said, "I wish you would find those words in the Constitution for me."

But that is not the point, Mr. President. This Government has gone far afield in this connection.

I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from North Carolina (Mr. HELMS) to table the amendment of the Senator from Connecticut (Mr. WEICKER). The yeas and nays have been ordered and the clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Rhode Island (Mr. CHAFEE), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Wisconsin (Mr. KASTEN), the Senator from Idaho (Mr. MCCLURE), and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Missouri (Mr. EAGLETON), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from Rhode Island (Mr. PELL), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY), is absent because of illness.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote "yea."

I further announce that, if present and voting, the Senator from Montana (Mr. BAUCUS) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 51, nays 34, as follows:

[Rollcall Vote No. 377 Leg.]

YEAS—51

Abdnor	East	Nickles
Andrews	Exon	Nunn
Armstrong	Ford	Proxmire
Baker	Grassley	Quayle
Bentsen	Hatch	Randolph
Boren	Hawkins	Roth
Byrd, Harry F., Jr.	Hayakawa	Schmitt
Byrd, Robert C.	Heflin	Simpson
Cannon	Helms	Stennis
Chiles	Hollings	Stevens
Cochran	Humphrey	Symms
D'Amato	Jepsen	Thurmond
DeConcini	Johnston	Tower
Denton	Kassebaum	Wallop
Dixon	Laxalt	Warner
Dole	Lugar	Zorinsky
Domenici	Mattingly	
	Murkowski	

NAYS—34

Biden	Hatfield	Percy
Boschwitz	Huddleston	Pryor
Bradley	Inouye	Riegle
Bumpers	Jackson	Rudman
Burdick	Kennedy	Sarbanes
Cohen	Levin	Sasser
Cranston	Mathias	Specter
Danforth	Matsunaga	Stafford
Dodd	Metzenbaum	Weicker
Glenn	Mitchell	Williams
Gorton	Moynihan	
Hart	Packwood	

NOT VOTING—15

Baucus	Goldwater	McClure
Chafee	Heinz	Melcher
Durenberger	Kasten	Pell
Eagleton	Leahy	Pressler
Garn	Long	Tsongas

So the motion to lay on the table Mr. WEICKER's amendment (UP No. 629) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. WEICKER. I ask for the yeas and nays.

Mr. THURMOND. I move to lay that motion on the table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

Mr. HELMS. Mr. President, a parliamentary inquiry. Is the vote going to be on the motion to table which was offered by the Senator from North Carolina?

Mr. WEICKER. Mr. President, I asked for the yeas and nays at the time the motion to reconsider was made.

The PRESIDING OFFICER. The vote is on the motion to reconsider. The motion is, of course, subject to a motion to table.

Mr. HELMS. I move to lay that motion on the table, and I ask for the yeas and nays.

Mr. WEICKER. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. WEICKER. Mr. President——

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Is there objection? The Chair hears none, and it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I ask unanimous consent that there be an additional period of debate to extend not past the hour of 3:15 p.m., and that at the hour of 3:15 p.m. the vote occur on the tabling motion now pending, and that regardless of the outcome of that vote, at 3:30, under the order previously entered, the Senate got into executive session for the purposes stated in the order entered on Friday.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, the order previously entered provided for the time to extend not past 3:15 p.m. If that concludes the remarks on this subject, since there was no arrangement made for the control of time, I am prepared to ask unanimous consent that we proceed now to the vote on the tabling motion, if that is the wish of the manager.

Mr. WEICKER. Mr. President, I wish to make a statement as to what this Senator intends for this bill, which is being managed by the Senator from Connecticut.

Mr. BAKER. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, this action that just took place on the tabling of the Weicker amendment is, by any standard, outrageous. Now I have worked many months, along with the distinguished Senator from South Carolina and other members of the committee, to produce a sound appropriations bill for the Departments of State, Justice, Commerce, and related agencies. But I will not have a bill of this appropriations subcommittee become the vehicle for outrageous unconstitutional action.

The bill will not get off the floor of the U.S. Senate. Sooner or later we are going to address ourselves to our proper jobs here, and we are going to have an appreciation of what this Constitution is all about.

In any event, if it does come on the floor, it is not going to be here by virtue of a bill which comes out of my committee or which I am managing. I want to put my colleagues on notice—there will be long nights and long days. I do not know what the rest of the business is, but this is not going to conference and it is not going to the President's desk.

Mr. MATHIAS. Will the Senator yield?

Mr. WEICKER. I yield to my distinguished friend from Maryland.

Mr. MATHIAS. I think the Senator from Connecticut is right in saying we ought not be here discussing this matter. The purpose that is obviously being attempted here is to subvert the appropriations process to amend the Constitution.

Now those who wish to do that should read article 5 of the Constitution. It tells you exactly how to amend it. It is set out there fully and at large. And if their purpose is to change the first amendment to the Constitution, then they ought to go to article 5 and follow the amending process.

It ought not to be done through the back door by way of an appropriations bill. That would be the effect of the kind of language which is attempted to be enacted into law today.

So I think that the Senator from Connecticut is exactly right in taking the position that he has taken. I hope that before the bill is enacted into law that our view will prevail.

Mr. BAKER addressed the chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, it is close to the hour of 3:15 when debate on this matter ends. Let me simply say to my good friend and colleague from Connecticut that I understand his concern, but we will dispose of this bill. I am not sure whether it will be this bill or whether it will be bound up in a continuing resolution or how late we will have to work to try to do it. But I wish to state that we will take care of our responsibility on the State, Justice appropriations bill.

Mr. WEICKER. May I ask my good friend from Tennessee a question?

Mr. BAKER. Let me finish.

The Senate will not be in late today. I would expect us to recess over at about 6 or 6:30.

It would also be in my expectation that on tomorrow we will resume consideration of this matter.

I yield to the Senator from Connecticut.

Mr. WEICKER. Would my good friend from Tennessee agree that his statement really depends on one's definition of taking care of one's responsibilities?

Mr. BAKER. No. What I mean is we are going to provide the money that this bill requires.

Mr. WEICKER. Money, I have no dispute with the Senator.

Mr. BAKER. Mr. President, might I inquire if it is time now to proceed with the vote?

The PRESIDING OFFICER. The majority leader's observation is correct. The time has arrived.

The question is on the motion to table the motion to reconsider the vote by which the amendment of the Senator from Connecticut was laid upon the table. The yeas and nays have been ordered and the clerk will call the roll.

Mr. HELMS. Mr. President, did the Chair say the question is on a motion to reconsider?

The PRESIDING OFFICER. The question is on the motion to table the motion to reconsider.

Mr. HELMS. I thank the Chair.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Missouri (Mr. EAGLETON), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), and the Senator from Illinois (Mr. DIXON) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

On this vote, the Senator from Illinois (Mr. DIXON) is paired with the Senator from Montana (Mr. BAUCUS).

If present and voting, the Senator from Illinois would vote "yea" and the Senator from Montana would vote "nay."

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 54, nays 36, as follows:

[Rollcall Vote No. 378 Leg.]

YEAS—54

Abdnor	Ford	Nunn
Andrews	Grassley	Percy
Armstrong	Hatch	Proxmire
Baker	Hawkins	Quayle
Bentsen	Hayakawa	Randolph
Boren	Heflin	Roth
Byrd, Harry F., Jr.	Helms	Sasser
	Hollings	Schmitt
Byrd, Robert C.	Humphrey	Simpson
Cannon	Jepsen	Stennis
Chiles	Johnston	Stevens
Cochran	Kassebaum	Symms
D'Amato	Kasten	Thurmond
DeConcini	Laxalt	Tower
Denton	Lugar	Wallop

NOT VOTING—10

Baucus	Garn	Melcher
Dixon	Goldwater	Pressler
Durenberger	Leahy	
Eagleton	Long	

So the motion to lay on the table the motion to reconsider was agreed to.

EXECUTIVE SESSION

DEPARTMENT OF HEALTH AND HUMAN SERVICES

The PRESIDING OFFICER. Under the previcus order, the hour of 3:30 p.m. having come and gone, the Senate will now go into executive session to consider the nomination of C. Everett Koop, of Pennsylvania, to be Medical Director in the Regular Corps of the Public Health Service and the Surgeon General of the Public Health Service, on which there shall be 1 hour of debate, equally divided and controlled.

The Senate proceeded to the consideration of executive business.

NOMINATION OF C. EVERETT KOOP TO BE MEDICAL DIRECTOR IN THE REGULAR CORPS OF THE PUBLIC HEALTH SERVICE AND THE SURGEON GENERAL OF THE PUBLIC HEALTH SERVICE

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, the Senate will today be voting on the nomination of C. Everett Koop, M.D. to be Surgeon General of the United States. I speak for a majority of the Labor and Human Resources Committee when stating that Dr. Koop is a distinguished physician who is eminently qualified to hold this position. Not only is he a renowned surgeon and administrator but throughout his career has engaged in an incredibly numerous and varied set of public health activities. I urge each Senator to vote to confirm the nomination of Dr. Koop.

During Dr. Koop's confirmation hearing in the Labor and Human Resources Committee we were privileged to have testimony from Senators HATFIELD, SPECTER, and HEINZ on Dr. Koop's many

accomplishments and well-known compassion for his fellowman. He heard his medical colleagues and a distinguished businessman/hospital director speak of Dr. Koop's integrity, his ability to work with people of differing viewpoints, and of the high esteem with which he is held in the Philadelphia community, both as a physician and an individual.

The committee also listened to H. Arnold Muller, M.D., Secretary for Health for the State of Pennsylvania, and Ira L. Myers, M.D., M.P.H., Chief Health Officer for the State of Alabama. Each supported Dr. Koop and stated that he possessed "significant public health experience."

Finally, Representatives of this Nation's disabled community testified about Dr. Koop's advocacy for the disabled. Members of my committee were clearly impressed with the breadth of background and the sincerity of those who came before us to testify for Dr. Koop.

In addition, Dr. Koop's appointment has been endorsed by the Association of State Maternal and Child Health and Crippled Children's Services Directors and I know that every Member of the Senate has received many letters in his support.

Only two witnesses asked to testify against Dr. Koop. From their comments, and some negative letters which I received, I gather there are three objections to his candidacy:

First, the first objection is that of a national public health association that believes Dr. Koop does not have significant public health experience. I would point out in contrast the testimony of Drs. Muller and Myers, as noted above, which represent the views of two distinguished public health spokesmen that Dr. Koop does have the requisite experience.

Second, a second objection is that Dr. Koop has been an outspoken opponent of abortion and an advocate for the value of traditional roles for women. These are matters of great public debate and I can conceive of no reason why advocacy on these issues should affect Dr. Koop's fitness to be surgeon general. There has been no evidence, not even an allegation that Dr. Koop has ever treated a woman colleague unfairly.

Further, testimony was provided to the opposite: That Dr. Koop has been supportive of women professionals.

Third, a third objection has been that Dr. Koop should not be permitted to oversee or control certain programs within the Public Health Service. In fact the Surgeon General and all agency heads and senior officials in the PHS report directly to the Assistant Secretary for Health. This was made clear in a letter from DHHS to me which has been made available to every Senator and which I will have inserted in the RECORD at the conclusion of my statement.

Not surprisingly, all these objections come to little or nothing. This is clearly as it should be. Because this Nation should have only one emotion, pride, in having an individual of Dr. Koop's integrity and accomplishments as Surgeon General. I urge my colleagues to vote for Dr. Koop. It is the just and proper course of action.

I ask unanimous consent that background material on Dr. Koop, the testimony of Dr. Muller and Dr. Myers, the endorsement of the Association of State Material and Child Health and Crippled Children's Services Directors, and the HHS letters I referred to, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NOMINATION OF C. EVERETT KOOP, M.D. TO BE SURGEON GENERAL

BACKGROUND INFORMATION

The President has nominated C. Everett Koop, M.D., to be Surgeon General, the highest ranking commissioned officer in the U.S. Public Health Service Corps. Confirmation hearings before the Senate Labor and Human Resources Committee are expected in the very near future. A detailed curriculum vitae and publications listing is attached.

The Surgeon General reports to the Assistant Secretary for Health, the senior health official in the Department of Health and Human Services. The Surgeon General is assigned a number of duties by the Assistant Secretary for Health, and in addition, the Surgeon General has several functions specified in law. A listing of responsibilities and duties also is attached.

Dr. Koop's accomplishments in pediatric surgery are internationally known. Indeed, he was among the first physicians to enter the subspecialty of pediatric surgery and has practiced in that area longer than any other physician. However, he also has made his talents available to further public health outside of the operating room on a much broader scale, often on a volunteer basis. These interests have involved him in public health issues at that critical level where needs are identified and services are actually delivered to needy people. This aspect of Dr. Koop's past will be further developed at the confirmation hearings, but warrants separate mention here.

An important aspect of public health is arranging health services for large numbers of people. Services many range from education to actual care, and population size may vary. The common denominator is that public health rests on identifying the needs of a population and ensuring the availability of necessary services. Clearly a clinical background is useful in such an undertaking. But clinical skills alone are not sufficient. The Surgeon General must also have a command of large scale needs assessment, organization, logistics, and the ability to utilize specialized personnel such as epidemiologists, biostatisticians, health service administrators, and planners.

Public health has been defined as "the effort organized by society to protect, promote, and restore the people's health. The programs services, and institutions involved emphasize the prevention of disease and the health needs of the population as a whole." The following are brief examples of Dr. Koop's experience in the protection, promotion, and restoration of health. They attest to an extensive background in both clinical and public health services delivery—a lifetime of health experience and caring for and about people which well qualifies him for the position of Surgeon General.

PUBLIC HEALTH AS PROTECTION FROM DISEASE

During World War II, Dr. Koop was the surgical consultant to an epidemiology team lead by Joseph Stokes, M.D., who was assigned the task of investigating the incidence of hepatitis during the allied invasion of Italy. In the course of his work, he described the first transmission of the hepatitis virus across the placenta to affect the fetus without presenting any signs of the disease process in the mother.

When Dr. Koop entered the field of pediatric surgery more than 35 years ago, pediatricians were hesitant to consider solid cancers as a major problem in pediatrics although leukemia was recognized as a killer. One of Dr. Koop's first endeavors on arriving at the Children's hospital in Philadelphia in 1946 was to investigate cancer deaths among children recorded in the hospital's records. Dr. Koop identified a major public health problem among children and helped educate his colleagues and the public through his innovative therapies and the establishment of tumor registries. Childhood cancer is now the focus of a large body of research, supported in part by the National Institutes of Health.

Utilizing resources such as demographic reports, Dr. Koop studied the health facility needs of Philadelphia and surrounding areas in terms of the age and sex of the population and their effect on health planning for future needs. Dr. Koop was in the forefront of the planning group that built the present Children's Hospital of Philadelphia, one of the most comprehensive tertiary care models in the world.

While working with a committee of the American Academy of Pediatrics, Dr. Koop brought attention to the dangers of x-raying the feet of children to see whether or not their shoes fit properly. The result of this endeavor was to have the machines calibrated in some states and to eventually have the practice discontinued due to the inherent dangers. This is an example of a public health hazard being identified and corrected.

In the area of cost effective health care delivery modifications, Dr. Koop worked with several colleagues to encourage New Jersey and Pennsylvania to provide care for respirator dependent children in their homes at a cost of about 1/10 of hospital costs. Just as importantly, this method improved the quality of the care for the children.

In 1965, Dr. Koop brought together the State Department's Refugee and Migration Office and private citizens in the U.S. midwest for the purpose of planning and building a 180-bed hospital to serve a particular segment of underserved citizens in the Crown Colony of Hong Kong.

While Dr. Koop was a member of the Accident Prevention Committee of the American Academy of Pediatrics, he was particularly concerned with burns of the mouth and esophagus which increased when corrosive cleaners were colored green and scented with wintergreen, thus encouraging children to regard them as candy. The work of this committee in protecting the consumer was so effective that the court ordered the removal of the scent.

PUBLIC HEALTH AS HEALTH PROMOTION

For more than 25 years, Dr. Koop has maintained a strong humanitarian interest in the Tarascan tribe of Indians in Central Mexico. There was essentially no medical care for these people until Dr. Koop established several small clinics. He emphasized preventive health services through the provision of protein supplements and vitamins and, on occasion, family planning advice.

Dr. Koop became aware of the enormity of problems involving public health and poverty when delivering babies at homes in Harlem in 1941. In addition, from the time he began work with the Children's Hospital in 1946, he has been involved with the provision of care to medically underserved populations and the almost daily interaction between the public and private sector in assuring access to care.

In 1960, Dr. Koop, under the ageis of the State Department, traveled to Ghana and concluded an agreement for the establishment of an American-type medical school. In addition, he brought about an arrange-

ment with the Philadelphia College of Physicians through which a faculty was recruited for the school in Ghana.

Because of his concern for the health status of people in lesser developed countries, Dr. Koop sought and obtained funds from Readers Digest for a program managed by MAP International Inc. This program has been instrumental in sending over 750 medical students to medically underserved nations so that they might become acquainted with the rigors of practicing rural medicine in primitive circumstances. It is important to note that over 9% of these students have changed their career goals to public health medicine.

A focal point of Dr. Koop's career for the past 36 years has been caring for disabled children. This interest goes far beyond pure medical care to include rehabilitation, counseling, and planning for appropriate care facilities for these children, many of whom are disabled for life. Dr. Koop's teachings and writings on the dying child and his/her family are classics in the field.

PUBLIC HEALTH AS THE RESTORATION OF HEALTH

At the request of the Public Health Department of the Dominican Republic, Dr. Koop conducted an assessment of the needs stemming from a diarrhea epidemic during which the infant mortality rate reached 50–70%. He planned and established nine hydration stations for administering intravenous fluids, procured physicians and nurses for the stations, and arranged for the necessary supplies. The epidemic was stopped as a direct result of Dr. Koop's administrative and clinical skills.

One of Dr. Koop's most important public health contributions is his effort in the reduction of infant mortality, a serious public health problem in this country. He has been at the forefront of developing and refining medical care techniques such as pediatric anesthesiology and innovative surgery which have reduced the mortality of newborns, particularly those with congenital defects. Many of those defects resulted in mortality rates as high as 95%. Today it is the survival rate that is 95% in many newborn anomalies. Further, Dr. Koop's establishment of the first newborn intensive care unit in the U.S. has been instrumental in further reducing infant mortality rates. Dr. Koop also contributed to the surgical additions to the standard incubator for premature infants so that much more complex procedures can be accommodated in this environment.

This is but a sample of Dr. Koop's hands-on experience with public health matters; these and other projects will be developed further during the confirmation hearings. As brief as this sample is, it attests to a lifetime of clinical skills coupled with the ability and drive to ensure that the care his individual patients received is available to the population at large. Dr. Koop, with this vision of public health, deserves Congress' recognition and confirmation.

CURRICULUM VITAE

Home Address: 1123 Rock Creek Road, Gladwyne, Pennsylvania 19035.

Present Position: Deputy Assistant Secretary for Health, Department of Health and Human Services, 716G Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. 20201.

Social Security No.: 180–24–5146.

Date of Birth: October 14, 1916.

Place of Birth: New York City, New York.

Marital Status: Married 1938—Elizabeth; Children: Allen Van Benschoten, 1944; Norman Abel, 1946; David Charles Everett, 1947–1968; Elizabeth Thompson, 1951.

Education: 1937, A.B. Dartmouth College; 1941, M.D. Cornell Medical School; 1947, Sc.D. Graduate School of Medicine, University of PA (Med.).

Postgraduate Training and Fellowship Appointments: 1941–42, Intern in Medicine, Pennsylvania Hospital, Philadelphia, PA; 1942–47, Harrison Fellow in General Surgery and Research Surgery, University of Pennsylvania School of Medicine; 1946, Fellow in Pediatric Surgery, Children's Hospital, Boston, MA.

Faculty Appointments: 1942–44, Assistant Instructor in Surgery, University of Pennsylvania School of Medicine; 1944–47, Instructor in Surgery, University of Pennsylvania School of Medicine; 1946, Fellow in Surgery, Boston Children's Hospital; 1947–49, Associate in Surgery, University of Pennsylvania School of Medicine; 1949–51, Assistant Professor of Surgery, University of Pennsylvania School of Medicine; 1951–52, Assistant Professor of Pediatric Surgery, University of PA School of Medicine; 1952–59, Associate Professor of Pediatric Surgery, University of PA School of Medicine; 1953–60, Associate Professor of Pediatric Surgery, Graduate School of Medicine, University of PA; 1959–81, Professor of Pediatric Surgery, University of PA School of Medicine; 1960–81, Professor of Pediatric Surgery, Graduate School of Medicine, University of PA; 1976–81, Professor of Pediatrics, University of PA School of Medicine.

Hospital and Administrative Appointments: 1947, Assistant Surgeon, Hospital of the University of Pennsylvania; 1948–81, Surgeon-in-Chief, The Children's Hospital of Philadelphia; 1958–63, President, Active Staff, The Children's Hospital of Philadelphia; 1958–63, President, Executive Committee of the Medical Staff, The Children's Hospital of Philadelphia; 1963–78, Pediatric Surgical Consultant, U.S. Naval Hospital of Philadelphia; 1972–81, Consultant in Surgery (Pediatrics), Pennsylvania Hospital; 1973–74, President, Executive Committee of the Medical Staff, The Children's Hospital of Philadelphia.

Specialty Certification: 1942, Diplomate, National Board of Medical Examiners; 1948, Diplomate, American Board of Surgery; 1975, Special Competence in Pediatric Surgery, American Board of Surgery.

Licensure: Pennsylvania and New Jersey.

Awards, Honors and Membership in Honorary Societies: 1950, Sigma Xi; 1971, The Denis Browne Gold Medal presented by the British Association of Pediatric Surgeons; 1974, Jacob D. Ehrenzeller Award, Ex-Residents Association of Pennsylvania Hospital, Philadelphia; 1975, The Order Duarte, Sanchez, and Mella—The Dominion Republic's highest award presented by Joaquin Balaquer, President; 1975, Distinguished Achievement Award presented by the Golden Slipper Club of Philadelphia; 1975, Presbyterian Man of the Year Award—Presbyterian Social Union, Philadelphia; 1975, Medical Achievers Award presented by Wheels, Inc., Philadelphia; 1975, Super Achiever of the Year Award presented by the Philadelphia Chapter of the Juvenile Diabetes Fdn.; 1975, Drexel University Engineering and Science Day Award, Philadelphia; 1975, The Man of the Year Award presented by the Jewish Community Chaplaincy Service; 1976, Ladd Gold Medal of the American Academy of Pediatrics; 1977, Copernicus Medal, Surgical Society of Poland; 1930, Chevalier, French Legion of Honor; 1981, Gold Medal of Children's Hospital of Philadelphia; 1981, Medal of the City of Marseilles France.

MEMBERSHIP IN PROFESSIONAL AND SCIENTIFIC SOCIETIES

National-International Societies: American Surgical Association, American College of Surgeons (Fellow), American Academy of Pediatrics (Fellow), Society of University Surgeons, British Association of Pediatric Surgeons (Council 1963–70), Pan American Medical Association, Inc. (President, Section on Pediatric Surgery 1964–), International Society of Surgery, Deutschen Gesellschaft fur Kinderchirurgie, American Pediatric Surgical Association (President, 1971–72), Marseille Surgical Society, College of Surgeons of the Dominican Republic.

Local Societies: College of Physicians of Philadelphia (Fellow), Philadelphia Academy of Surgery, Philadelphia County Medical Society, Philadelphia Pediatric Society, Philadelphia Physiological Society.

Editorial Positions: 1961–64, Surgery Editor, Journal of Clinical Pediatrics; 1964–76, Editor-in-chief, Journal of Pediatric Surgery; 1964, Editorial Board, Zeitshrift fur Kinderchirurgie and Grenzgebiete; 1970, Editorial Consultant, Japanese Journal of Pediatric Surgery and Medicine.

COMMITTEE MEMBERSHIPS

National: Cancer Committee; American Academy of Pediatrics; Accident Prevention Committee, American Academy of Pediatrics; Commission on Cancer, American College of Surgeons, Committee on Patient Care and Research; Surgical Steering Committee, Children's Cancer Study Group; Cancer Committee, American Pediatric Surgical Association.

State: Arbitration Panel for Health Care, Commonwealth of PA; Member of Board for "Health, Occupation, Career and Placement Office, Inc.

Local: Committee on Medicine and Religion, Philadelphia County Medical Society.

Honorary Degrees: 1960, Eastern Baptist College, LL.D.; 1968, University of Liverpool, Degree Doctor of Medicine; 1968, Wheaton College, Doctor of Humane Letters; 1978, Gwynedd-Mercy College, Doctor of Medical Science; 1979; Washington and Jefferson College, Degree Doctor of Science; 1979, Philadelphia College of Osteopathic Medicine, Degree Doctor of Laws; 1980, Saint Charles Borromeo Seminary, Doctor of Humane Letters.

TESTIMONY OF H. ARNOLD MULLER, M.D., SECRETARY OF HEALTH, COMMONWEALTH OF PENNSYLVANIA BEFORE THE SENATE LABOR AND HUMAN RESOURCES COMMITTEE

Chairman Hatch and distinguished senators of the Senate Labor and Human Resources Committee. My name is Dr. H. Arnold Muller. I am the Secretary of Health and as such the chief public health officer for the Commonwealth of Pennsylvania. I greatly appreciate this opportunity to testify in support of the confirmation of Dr. C. Everett Koop as the Surgeon General of the United States.

I will limit my testimony to Dr. Koop's experience and qualifications in the area of public health. However, before I address Dr. Koop's experience in public health, I would like to outline a broad operational definition of public health.

Public health addresses those health problems that cannot be effectively dealt with by private health care practitioners or private health care institutions. Public health encompasses broad health systems issues such as planning, health facilities, services provided in health facilities, the development of networks of health service and health manpower development. It also includes recognition and solution of problems related to the control of communicable diseases, degenerative diseases such as hardening of the arteries and wasting diseases such as cancer. The public health aspects of neonatal disease include education of the populace regarding the hazards of rubella during the first trimester of pregnancy, provision and identification of centers for high risk mothers, assuring that a sufficient number of neonatal intensive care units are available and accessible and that the quality of such units and services are assured. The clinical aspects of neonatal intensive care, i.e. actual "hands on treatment" is the responsibility of clinical practitioners of neonatal medicine.

Dr. Koop's experience in public health may be evaluated in light of our understanding of this very important field of medicine. Indeed using this definition of public health I

would like to highlight some of Dr. Koop's experiences in two major spheres of public health, (1) health systems development and (2) disease prevention and control.

HEALTH SYSTEMS PROBLEMS

Dr. Koop has been involved in the development of health services in underdeveloped countries for most of his professional career. He has, for example, developed health clinics to care for medically underserved Tarascan Indians in central Mexico. These clinics are staffed by paraprofessionals trained to provide simple and basic health services. It has been demonstrated in similar programs, including the barefoot doctor program in China, that the provision of the simple basic health services to medically underserved people results in substantial improvements in their health.

Recognizing that many young medical students who are interested in international medicine often have an unrealistic concept of what their medical practice might be like in the third world countries, Dr. Koop was instrumental in developing a fellowship program in which medical school students could experience both the rewards and frustrations of practicing medicine in underdeveloped countries. This program has enabled over 750 medical students to decide, based on actual life experiences, whether they wish to devote their lives to international medicine.

The first neonatal intensive care unit in the United States was developed under the aegis of Dr. Koop at Children's Hospital in Philadelphia. The development of that unit and subsequent replication of like units throughout the country and abroad has resulted in a marked reduction in morbidity and mortality of neonates worldwide.

Ever aware of the needs of third world nations people for medical care, Dr. Koop, under the aegis of the State Department concluded an agreement with Ghana for the establishment of an American-type medical school. Subsequently he saw to it that the faculty of the school was sponsored for five years by the Philadelphia College of Physicians.

DISEASE PREVENTION AND CONTROL

The Dominican Republic requested Dr. Koop's assistance in controlling an epidemic of diarrhea affecting infants. As a result of dehydration, the mortality rate among the affected infants ranged from 50 to 70 percent. To combat this epidemic, Dr. Koop established nine hydration stations for the administration of intravenous fluids. The morality rate dropped precipitously thereafter.

As part of his work with the American Academy of Pediatrics, Dr. Koop was one of the first physicians to recognize the dangers of radiation exposure (increased risk of leukemia and cancers) when children's feet were x-rayed to determine if shoes fit properly. As a result of this work the practice of x-raying children's feet was discontinued and a public health hazard eliminated.

Utilizing personal observation and relevant data, Dr. Koop identified cancer as a major public health problem among children. As a consequence of this effort, cancer in children is the focus of a significant body of research which is supported in part by the National Institutes of Health.

As a member of the Accident Prevention Committee of American Academy of Pediatrics Dr. Koop participated in a program to eliminate wintergreen flavoring in certain corrosive cleaners. The use of flavoring in these cleaners resulted in children ingesting them with resultant severe burns of the mouth and the esophagus. Once again a public health hazard in children was eliminated with a resultant decrease of oral and esophageal burns and strictures.

Thus it can be clearly seen that Dr. Koop has worked in and made important contributions to a broad spectrum of public health endeavors.

Mr. Chairman, some additional comments are appropriate to Dr. Koop's nomination. I do not share Dr. Koop's views on the issue that has attracted some attention to this nomination. I do, however, believe that it is inherently destructive to our democratic process to judge a man's qualification for office on the basis of a single issue. It is fundamental to our democratic traditions that a person's qualifications for office be evaluated in the context of the whole of the person's experiences, knowledge and views. This principle must be equally applied whether the candidate is Judge Sandra Day O'Connor or Dr. C. Everett Koop.

In conclusion, Mr. Chairman, as the chief public health officer of one of the largest states, I look to the Surgeon General of the United States to provide leadership in the area of public health. Accordingly, I believe the person appointed to that position must be firmly committed to improving the health of our citizens, he must have experience in public health and clinical medicine and he must have the personal integrity to rise above partisan politics when necessary to address issues that are vital to maintaining and improving the public health.

Mr. Chairman, distinguished Senators, I believe Dr. Koop meets all these criteria and would be an outstanding Surgeon General. I therefore urge you to recommend to your colleagues in the Senate that they vote to confirm C. Everett Koop, M.D. as the Surgeon General to the United States. Thank you.

TESTIMONY FOR THE U.S. SENATE, COMMITTEE ON LABOR AND HUMAN RESOURCES, IRA L. MYERS, M.D., M.P.H.

Mr. Chairman and Members of the Committee, I am Ira L. Myers, a Physician, Epidemiologist, and Public Health Administrator. For 32 years I have been active in the field of Medicine and Public Health. My first seven years I was a Commissioned Officer with the U.S. Public Health Service, and for the past 25 years have served my native State of Alabama. I continue to hold an Inactive Reserve Commission in the Public Health Service, and have closely followed the leadership, capability, and qualifications of Surgeon Generals for the last 30 years. I am currently the second ranking State Health Official in terms of continuous service, having served 19 years as State Health Officer for the State of Alabama. I am pleased for the invitation and opportunity to testify on behalf of Dr. C. Everett Koop, as the Presidential Nominee for Surgeon General.

I am personally convinced this Nation needs the highest quality of medical leadership in Public Health programs. Wisdom, experience, and proven health and medical accomplishments are essential to sound Public Health programs. At a time when we are acutely aware of the need to be good stewards of our public service, this is a time of choosing priorities. We cannot afford the luxury of interesting theories and attempting to find new approaches when we already have proven methods that only need refinement and urgent application. We are dependent upon the sound application of productive methods of delivery of health care in its broadest aspect. At the same time, it appears that we need to be aware of the international needs, methods, and accomplishments for the delivery of the most efficient health care in today's world, and we need to share our technology with other Nations less fortunate than we.

I believe Dr. C. Everett Koop to be the man who meets the above qualifications and will add integrity, prestige, and sound judgment to the Office of Surgeon General. For several years I have known Dr. Koop's sensitivity to parental needs and his compassion for service to all people, regardless of geography or status.

Pediatricians have traditionally been recognized as prevention and public health oriented physicians, and staunch supporters of public health programs. Many of our current public health issues center on the needs of mothers and children. I consider the thoughtful touch of Dr. Koop, as an editor and writer, and the decisive hand of a surgeon, as positive factors in his nomination. A careful review of his background credentials, education, accomplishments, and recognitions make us proud for the quality of medical leadership in our country, as exemplified by Dr. Koop.

I highly commend Dr. C. Everett Koop to you for confirmation and, as a Public Health professional, endorse his nomination for this high office of trust, responsibility, and leadership.

Thank you once again for the opportunity and privilege to offer these viewpoints.

ASSOCIATION OF STATE MATERNAL AND CHILD HEALTH AND CRIPPLED CHILDREN'S SERVICES DIRECTORS

August 21, 1981.

Hon. ORRIN HATCH,
Chairman, Subcommittee on Health, Senate Labor and Human Resources Committee, Russell Building Washington, D.C.

DEAR SENATOR HATCH. The Association of State Maternal and Child Health and Crippled Children's Services Directors is pleased to support the nomination of C. Everett Koop, M.D., for the position of Surgeon General of the United States Public Health Service.

Dr. Koop has a long and distinguished career dedicated to the improvement of children's health both in this country and worldwide. Dr. Koop has been a pioneer in pediatric surgery and anesthesiology and has made enormous contributions to their growth through numerous authored publications. He has displayed a deep and abiding concern for his patients and their families. A brief review of Dr. Koop's extensive curriculum vitae attests to his outstanding accomplishments.

Dr. Koop has been instrumental in bringing together local community resources in order to care for the broad range of problems besetting the disabled child and his family. We applaud Dr. Koop's desire to assume the proper care for the disabled child as well as to seek primary preventive strategies to reduce these disabilities.

Throughout his career as a clinician, Dr. Koop has demonstrated a keen awareness for the multiplicity of issues that affect the individual patient's well being as well as those that affect the larger context. In this sense, Dr. Koop has appreciated the public health concerns associated with successful patient care.

As we understand Dr. Koop's present agenda for improving the public's health, it includes promoting the general health through effective prevention strategies, improving maternal and child health, reducing the incidence of and improving the care for disabilities, and bringing together the necessary components to care for the country's growing elderly population. We believe that the public's health will be well served by Dr. Koop's appointment as Surgeon General. We look forward to working together with him in addressing our primary public health cause—improving the health of children and their families in this great nation.

Sincerely,

JUDSON FORCE, M.D.,
President.

DEPARTMENT OF HEALTH
AND HUMAN SERVICES,
Washington, D.C., October 14, 1981.

Hon. ORRIN G. HATCH,
Chairman, Committee on Labor and Human Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: During the confirmation hearings on C. Everett Koop, M.D., to be Surgeon General, held on October 1, 1981, there were points raised during questioning which indicated that some members of the Committee may not fully understand the role of the Surgeon General in terms of management authority.

I have enclosed a description of the duties of the Surgeon General. You will note that the majority of those functions are at the discretion of the Assistant Secretary for Health, the senior health official in the Department. Several other responsibilities are specified in statute and are so noted.

In terms of management authority, the Surgeon General heads the Public Health Service Corps, a personnel system composed of approximately 7,000 health professionals serving in positions in various programs where specialized health experience is necessary. The Surgeon General is not in line authority over the Public Health Service which is composed of the Office of the Assistant Secretary for Health and the six agencies of the Public Health Service—the Alcohol, Drug Abuse and Mental Health Administration; the Centers for Disease Control; the Food and Drug Administration; the Health Resources Administration; the Health Services Administration; and the National Institutes of Health. The directors of these six agencies plus the senior officials in the staff offices in the Office of the Assistant Secretary for Health, report directly to the Assistant Secretary for Health—not through the Surgeon General.

I hope that this explanation of line management in the Public Health Service will clear up any possible misunderstanding of the duties and responsibilities of the Surgeon General. If I can be of further assistance, please don't hesitate to call on me.

Sincerely,

THOMAS R. DONNELLY, Jr.,
Assistant Secretary for Legislation.

Enclosure.

THE SURGEON GENERAL OF THE UNITED STATES PUBLIC HEALTH SERVICE FUNCTIONS AND LEGAL RESPONSIBILITIES

Prior to 1966 the Surgeon General was responsible for administration of the Public Health Service and for exercising the numerous authorities contained in the PHS Act. However, by Reorganization Plan No. 3, effective June 25, 1966, all functions of the Surgeon General and all other officers and employees of the Public Health Service were transferred to the Secretary of Health, Education, and Welfare (now Health and Human Services).

Pursuant to this Reorganization Plan, the majority of the responsibilities for administration of the Public Health Service and the commissioned corps personnel system have been delegated to the Assistant Secretary for Health. The Surgeon General, the highest ranking officer in the commissioned corps, supports the Assistant Secretary for Health through the following functions:

Supports the Assistant Secretary for Health in providing leadership and direction for 7,200 commissioned corps personnel.

Directs and coordinates activities of eleven Chief Professional Officers (CPOs) to identify and resolve any policy issues and assure that PHS policies are implemented uniformly.

At the direction of the Assistant Secretary for Health, directs, coordinates and evaluates intra and interagency departemental activities mandated by the White House, the Congress, and the Secretary (e.g. the White House Conference on Aging; Public Health Employees Assistance Program; International Year of the Disabled—1981).

At the direction of the Assistant Secretary for Health, serves on career personnel boards of health professional activities within PHS.

As directed, represents the Assistant Secretary for Health at national and international health and professional meetings to interpret Public Health Service philosophy, policies, organizational responsibilities and programs.

Serves as the principal health official at the Association of military Surgeons of the United States; Commissioned Officers Association; and Federal Council of Surgeon Generals and Program Chiefs.

Advises CPOD regarding the inactive reserve for all categories including orientation and proposed training.

Assists the Assistant Secretary for Health in cooperation with the Office of International Health in monitoring 20 multilateral international agreements with countries to assure health professional input and assure uniform interpretation of health policies.

Upon approval of the Assistant Secretary for Health, releases reports and advisories to the general public and to physicians about health hazards.

By charter with other uniformed services, represents the Secretary in approving the Joint Travel Regulations for the uniformed services.

Specific responsibilities of the Surgeon General vested by law:

Serves as Ex-Officio Member of the Board of Regents of the National Library of Medicine.

Serves as member of the Board of Regents of the Uniformed Services University of the Health Sciences and principal health official for the Public Health Service on all matters related to policies affecting the PHS faculty and students.

Responsible for reviewing the particulars of Department of Defense plans for transportation, open testing and disposal of lethal chemicals and biological agents, and recommending precautions necessary to protect the public health and safety. Recommendations are binding on the Secretary of the Department of Defense, and can only be overridden by the President (50 USC 1512).

Mr. HELMS. Mr. President, I strongly support the nomination of Dr. C. Everett Koop to be Surgeon General of the United States.

Perhaps best known for his successful surgery to separate Siamese twins, Dr. Koop has gained international recognition as a pioneer in pediatrics. He has served as chief of pediatric surgery at the Children's Hospital in Philadelphia for the past 35 years. Under his leadership, this hospital has become a training ground for pediatric surgeons around the world.

In addition to his work as a surgeon, Dr. Koop has shared his experience and knowledge through public health efforts, particularly in Third World nations. He has provided assistance in epidemic prevention in the Dominican Republic, trained Indian nurses in disease prevention within their isolated Mexican tribe, and assisted in the establishment of public health facilities in more than two dozen nations.

Dr. Koop's outstanding achievements in medicine have won him worldwide acclaim and respect. Among his awards are the Ladd Gold Medal of the American Academy of Pediatrics and the Denis Brown Gold Medal of the British Association of Pediatric Surgeons. He is also the recipient of the highest honor bestowed by the French Government, the Legion of Honor. In addition, he has been named man of the year by both the Jewish Community Chaplaincy Service and the Presbyterian Social Union of Philadelphia.

Through almost 200 articles and books he has written, Dr. Koop has continued to share his expertise with the Nation and the world. "Whatever Happened to the Human Race?" a book he coauthored with the eminent theologian Francis Schaeffer has been produced as a film documentary and gained international acclaim.

Mr. President, one of the more thoughtful articles I have seen concerning this nomination appeared in the Washington Post this summer. Although the piece first ran on July 19, it is relevant to this discussion. The writen, Mary Meehan, concludes with a statement which sums up our purpose here today:

Should Dr. Koop be confirmed as Surgeon General . . . the young, the old and the disabled will never have a finer or more compassionate advocate.

Mr. President, I ask unanimous consent that the full text of Ms. Meehan's article be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DR. KOOP IS THE MAN FOR THE JOB

(By Mary Meehan)

If Congress lets President Reagan appoint the person he wants for surgeon general of the United States, he will name Charles Everett Koop, a brilliant pediatric surgeon who currently holds the post of deputy assistant secretary for health. But Dr. Koop has the misfortune of being 64 years old—just over the age ceiling for the job of surgeon general. He has the added misfortune of having political opponents in Congress who, although on record against age discrimination, are using the age limit to delay his nomination. The usual faint whiff of fakery floats over Capitol Hill as liberal Democrats try to explain the difference between their principles and their actions, and as the 68-year-old speaker of the House helps block the appointment of a 64-year-old.

Age, of course, has nothing to do with the real issues at stake. No one suggests that Koop is over the hill or in the least bit decrepit; in fact, he appears to be healthier and more vigorous than many younger men. The main issue is abortion and Koop's articulate opposition to it. He is a special target of the proabortion lobby because, prior to joining the government this year, he served on the boards of three of the most effective right-to-life groups, spoke and wrote strongly against abortion, and helped put together the antiabortion movie, "Whatever Happened to the Human Race?" The movie, and a book with the same title that Koop coauthored, suggest that abortion, infanticide and euthanasia are connected, that one leads to the other. This is, to say the least, an unpopular view among supporters of abortion.

It was said of the great Confederate cavalry leader, Nathan Bedford Forrest, that he won his battles by always reaching the scene "fustest with the mostest."

Dr. Koop's opponents managed to do the same thing in reaching the media. His friends and family probably do not recognize him as he appears in the press. One observer

suggests that Koop has been made to appear as a "barefoot fundamentalist down from the hills," and others that he has been painted as a "neanderthal" and a "jerk."

To some extent these impressions result from deeply rooted stereotypes about anti-abortionists; and to some extent they result from quotes taken out of context from the doctor's speeches and given the worst possible interpretation. Newsweek, for example, lifted one vague sentence from a Koop speech to support its contention that "he has no brief for equal opportunity for women." In fact, he was training women surgeons long before this was popular. Dr. Louise Schnaufer, one of the surgeons he trained and worked with for many years, says that "he's trained a lot of women, and I think he's all for women in medicine. . . . He's very favorable."

Similarly with Koop's religion, which has been pictured as a negative force in his life, yet is clearly a constructive one.

A Presbyterian and an evangelical, he takes his religion seriously as a guide to action. He has long worked with a non-denominational agency called MAP International to provide substantial medical aid to Third World countries. He and his wife took an orphan into their home and raised her with their own children, and he helped set up an adoption agency in Philadelphia to find homes for other children who needed them.

His approach to religion includes humility: He has told parents who have tried to thank him for aiding their children, "My surgical skills are a gift from God. Thank Him for them." And he is not superficial about religion: Acknowledging to one interviewer that he had prayed before a critical operation, he added, "I don't pray in the sense of trying to cast a magic spell. Praying doesn't necessarily mean asking for something, you know. There's a lot of value in just sitting still and listening."

While allegations of religious fanaticism and antiwoman attitudes have been used against him, the up-front opposition to Koop is based on charges that he is unqualified for the job of Surgeon General. This opposition is led by the American Public Health Association, whose executive director says that Koop's position on abortion has nothing to do with their opposition to him. Right-to-life lobbyists find this hard to believe, since APHA has long been active on the pro-abortion side. But its charges about lack of qualification have been widely adopted by editorial writers and others, so they are worth a careful look.

The public health professionals do not dispute Dr. Koop's international reputation as a pioneer in pediatric surgery. He helped make anesthesia safe for children, did intensive work on the treatment of children with cancer, and performed difficult surgery in the separation of Siamese twins and in other cases previously thought to be hopeless. His awards include the highest that the French government bestows, the Legion of Honor.

In addition, Koop has accumulated much administrative experience in building and leading the outstanding pediatric surgery department at the Children's Hospital of Philadelphia. (This is something the public health people do not talk about; listening to them, one might have the impression that Koop is a Lone Ranger type.) And his whole record is one of much personal interest in his patients and their families. In 1978 he made a remark that sounds rare indeed for a great surgeon: "If you told me that I could never operate again, that would not bother me. But if you told me I couldn't have a relationship with patients' families I would be upset."

Given all of this, the average layperson is likely to think that we would be lucky to have Koop as chief health officer of the country. But the public health folks say that private medicine is focused on the cure of ailments in individuals, while public health is concerned more with prevention of disease in entire populations.

Dr. William H. McBeath, executive director of the American Public Health Association, recently told a congressional committee that the "almost exclusive orientation for one-to-one, provider-patient relationships, so advantageous for the clinician, can actually be a disadvantageous distortion for the community practitioner committed to the broader target of equitable programing for a total population."

If Dr. Koop's reputation were that of a narrow-gauged, "cut and run" surgeon, McBeath might have a point. But Koop's whole career indicates the very opposite of that. And he has extensive volunteer experience with public health problems in Third World nations: working against a dysentery epidemic in the Dominican Republic; teaching young women of an isolated Indian tribe in Mexico to dispense antidysentery and anti-worm medicines, vitamins and protein supplements; helping set up a medical school in Ghana. He also established a fellowship program to send medical students to rural hospitals in Third World nations, so they could obtain a realistic experience of international medicine and possibly decide on careers in it.

The public health professionals appear to be unimpressed with all of this, which leads one to believe that they are rather hard to please. There is also a hint of self-interest in their position; while they do not say it this way, one message that comes through loud and clear is: "This is our turf and we're going to keep it." The APHA leaders make a point of saying that never before in its 109-year history has their group opposed the nomination of anyone to be Surgeon General. But this becomes somewhat less impressive when one discovers that the decision to oppose Koop was made by a 16-member executive board. And APHA president Larry J. Gordon, who started the public controversy last March when he wrote President Reagan in opposition to Koop, is not even a doctor. He is an environmental health specialist.

All of which brings us back to the troublesome issues that underlie so much of the hostility to Koop: His opposition to abortion in general and to "selective abortion" in particular. Koop notes that his position "is not so outlandish," that it is shared by the President, the Secretary for Health and Human Services and the Assistant Secretary for Health. "I'm always amazed to see how their statements arouse no ire," he remarks, "but things I said two years ago, I have to die for." The list of abortion opponents outside the political right includes Lindy Boggs, Thomas Eagleton, Mark Hatfield, Jesse Jackson, Mary Rose Oakar, Graciela Olivarez and William Proxmire. Koop has some good company.

But he reached his position on his own, and largely as a result of his 35 years of medical practice. When Koop entered his specialty in the 1940s, he was one of only six surgeons in the country to devote his practice to children alone. And, he says, he found himself "very rapidly becoming an advocate for children, particularly for children who are handicapped or abused." He has probably seen nearly every birth defect that can occur, including ones that laypeople find hard to imagine.

He has successfully treated infants with intestinal obstructions, ones born with no connection between throat and stomach, ones with severe problems of the urinary tract, ones with dangerous and disfiguring tumors, and even a boy born with his heart outside of his chest. He has corrected problems of Down's Syndrome children and babies with spina bifida (cleft spine). In short, he has successfully treated many children who today might be aborted after amniocentesis detected their problems.

Amniocentesis is the procedure of withdrawing amniotic fluid from the womb when a fetus is 14 weeks or older. Analysis of the fluid for diagnostic purposes was first done in order to help both mother and child affected by the Rh problem, and Koop favors it when done for this purpose. But increasingly over the last 10 years, amniocentesis has been used to detect genetic problems so that the parents can have affected children aborted—even though the extent of their handicaps may not be known. Koop and others of the right-to-life persuasion call the amniocentesis/abortion combination a "search-and-destroy mission." Koop is a markedly effective critic of it because he knows how much handicapped children can be helped, he admires the way "they have such a good spirit and don't feel sorry for themselves" and he has seen many of them contribute substantially to their families and communities.

This is not to say that Koop or any other doctor can correct all birth defects. No cure has been found for the devastating Tay-Sachs disease, which kills all affected infants in their early years. There is no cure for sickle cell anemia, although some researchers now believe they can find a remedy for it. Some are also hopeful about finding a way to prevent or cure the mental retardation that usually accompanies Down's Syndrome. Today, most Down's Syndrome children, with proper training, can learn to walk and run, engage in sports and do household chores. Those who work with them often describe them as happy and very affectionate children. Many eventually learn and hold jobs in sheltered workshops. Yet the medical literature indicates that more children are aborted for Down's Syndrome than for any other genetic problem.

Koop say that it was his concern about infanticide that led him into the pro-life movement, "so you could say I came in by the side door or the back door." He remarks that "I don't think we ever would have come to our current practice of infanticide in this country if it hadn't been for the fact that we were performing well over a million abortions a year. I think that does something to the medical profession' understanding of its healing ministry. And when you make exceptions for the unborn, there's very little difference between making them for that group and for the newly born."

Koop's opponents suggest that he is alarmist about infanticide, but he points to an impressive amount of evidence: a 1973 article in the New England Journal of Medicine in which two pediatricians reported that, over a 2½-year period at the Yale-New Haven Hospital, 43 handicapped babies died after treatment was withheld or withdrawn from them; a 1973 proposal by Nobel laureate James D. Watson that a child not be declared alive until three days after birth, so that a doctor "could allow the child to die if the parents so chose and save a lot of misery and suffering"; and cases of Down's Syndrome children who starved to death after denial of simple operations to remove intestinal obstructions.

He also notes the recent case of Jeff and Scott Mueller, Siamese twins who were born in an Illinois hospital where one or more persons apparently felt it was all right to starve them to death rather than allow them to face life with serious handicaps. This, says Koop, shows that he "wasn't far off" in his early concern about infanticide.

There is also the case of Phillip Becker, which Dr. Koop calls a "tragic miscarriage of justice." In the Becker case, denial of treatment has been moved up into the teens and sanctioned by the courts. Phillip Becker is a 14-year-old Californian with Down's Syndrome whose parents have refused consent for heart surgery their son needs. Without the surgery, doctors say, he will suffer unnecessarily and probably die at an early age. Yet California courts upheld the parents in

their refusal to give consent, and last year the U.S. Supreme Court refused to hear an appeal on the boy's behalf.

How about the Koop suggestion that euthanasia of the elderly will be the next slide down the slippery slope? The same arguments made for abortion and infanticide can easily be made—and are made—for doing in older people who have serious disabilities. Such people, Koop believes, are in danger—"particularly if they're elderly, disabled and expensive."

But the one thing old folks have that babies lack is the vote. It is conceivable that sheer voting power will protect older people from euthanasia enthusiasts. One could say that political protection is better than no protection at all. On the other hand, it is not a firm barrier against the psychological pressures that Dr. Koop and theologian Francis A. Schaeffer spoke of in their book "Whatever Happened to the Human Race?" They suggested that consideration of euthanasia leads "to a degradation of the elderly and, ultimately, to inferior health care for the elderly—as well as encouraging the thought that those who do not want to 'shuffle off' quickly are somehow failing in their contribution to society."

Dr. Koop indicates that, if he becomes surgeon general, one of his chief goals will be to aid the handicapped and the elderly and to encourage more positive attitudes toward them. Liberal Democrats have long championed these groups; so if the Democrats can put down their brickbats long enough to listen to Koop, he may have a chance. The young, the old and the disabled will never have a finer or more compassionate advocate.

Mr. HATCH. Mr. President, I am pleased to yield such time as he needs to the distinguished Senator from Oregon.

The PRESIDING OFFICER. The Senator from Oregon is recognized.

Mr. HATFIELD. I thank the Senator from Utah.

Mr. President, on October 28, the Committee on Labor and Human Resources voted to approve the nomination of C. Everett Koop to be Surgeon General. Approval of his nomination was by a bipartisan vote of 11 to 5.

During confirmation hearings, Dr. Koop showed himself to be not only a world-renowned surgeon and clinician, but also a medical professional with extensive public health experience. I have had the distinct pleasure of knowing Dr. Koop for 12 years. I have followed his career and can say his credentials in the health field are most impressive. Beyond this background, I have the utmost respect for Dr. Koop as a man of highest integrity.

Dr. Koop is an individual with specialized training and significant experience in public health programs, particularly in pediatrics, consumer protection, international health care, and in work with disadvantaged people. He is currently Deputy Assistant Secretary of Health, Department of Health and Human Services. He was surgeon in chief of Children's Hospital of Philadelphia and author of more than 170 articles and books on the practice of medicine.

My admiration for Dr. Koop was nurtured, in part, by his work with disadvantaged and underprivileged people. Dr. Koop's work in Africa, Mexico, the Dominican Republic, Poland, and throughout Europe and Asia has also received wide recognition. Both the Dominican Republic and France have presented him with their highest civilian awards.

For the above reasons and for the many other excellent examples of his compassion and devotion to public service, I support Dr. Koop's confirmation as Surgeon General of the United States.

Mr. HATCH. Mr. President, I yield to the distinguished Senator from Massachusetts.

Mr. KENNEDY. Mr. President, as I understand it, we are under a time agreement of 1 hour, the time equally divided between the Senator from Utah and myself.

The PRESIDING OFFICER. That is correct.

Mr. KENNEDY. I yield myself such time as I may use.

I oppose the nomination of Dr. C. Everett Koop as Surgeon General of the Public Health Service.

The Surgeon General is America's preeminent professional in the field of public health. He leads the 7,299 members of the Public Health Service's Commissioned Corps, whose mission is to promote the protection and advancement of both the physical and mental health of all Americans. He provides inspiration and leadership to 545,000 public health professionals at the State and local level—physicians and nurses, environmental scientists and epidemiologists, nutritionists and educators. As our representative to international health forums, he offers the expertise of America's public health establishment to meet the critical public health needs of less developed countries. He speaks to all Americans when he alerts us to newly identified health hazards. In all these ways, in our own country and around the world, the Surgeon General is the voice of public health.

In my view, the administration's nominee for Surgeon General does not meet the exacting qualifications for this high office.

No one can deny that Dr. Koop is a gifted physician and an outstanding pediatric surgeon. His accomplishments include the establishment of pediatric surgery as a medical subspecialty and enhancing the life expectancy of at-risk infants. His own record—and the record of our hearings—reveals his compassion for the aged and disabled.

But a review of his record and the record of our hearings also reveals the essentially total absence of training or experience in public health. At his confirmation hearing, witness after witness testified to Dr. Koop's skill as a pediatric surgeon. They praised his efforts on behalf of aged and disabled individuals, they cited instances in which Dr. Koop offered his clinical expertise to meet medical needs of patients in less developed countries. But no one could make a satisfactory case that Dr. Koop has significant experience in public health, in programs emphasizing the prevention of disease, and the health needs of the population as a whole.

The American Public Health Association, the oldest and largest professional public health society in the world, broke with a hundred year tradition of silence on Presidential nominees for Surgeon General and vigorously opposed the nomination of Dr. Koop on the grounds that he is unqualified. I ask unanimous consent that the text of the American Public Health Association's testimony before our committee be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. KENNEDY. Mr. President, an even greater concern is Dr. Koop's seeming insensitivity to issues affecting women. In statement after statement, he has endorsed a cruel, outdated, patronizing, and discredited stereotype of women in society. He stands against the effort of women to achieve equal rights with men. He ignores the accomplishments of dedicated judges, doctors, scientists, lawyers, and other highly trained professionals who are women. He ignores the fact that more than 8 million families are headed by women; that more than half of all women with children under 18 years of age work, many because they must work in order to support their families.

A nominee so far out of touch with the role of women in our society should not be at the forefront of the Nation's Public Health Service. Millions of women throughout America would have no confidence in the public health pronouncements of a Surgeon General who disapproves the lives they have chosen or must live.

As the vice president of the National Organization for women, Jane Wells-Schooley, stated in testimony before our committee:

Dr. Koop's ideology and public record disclose a fundamental opposition to equality for women. If any candidate for surgeon general espoused such extremist views and attitudes toward racial equality, the nomination would never have been offered, let alone seriously considered by the Senate of the United States.

At a time of reduced budgets, when public health professionals across the country find themselves strapped for funds and facing serious public health problems, the Nation deserves the strongest public health leadership it can find. We deserve an individual who understands firsthand the public health needs of all Americans.

Dr. Koop is a warm, compassionate physician. He is a world renown pediatric surgeon. He cares about the aged and disabled; but he is the wrong choice for Surgeon General.

Mr. President, I ask unanimous consent to have printed in the RECORD a list of those groups who oppose the nomination.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

WHO OPPOSES DR. KOOP'S NOMINATION

The following is a partial listing of those group who oppose this nomination:

The American Public Health Association.

The United States Conference of City Health Officers.

The United Mine Workers of America.

The United Steelworkers of America.

The International Ladies Garment Workers.

The American Federation of State, County and Municipal Employees.

The Service Employees Union.

The Association of Teachers of Preventive Medicine.
Women and Health Roundtable.
The National Gay Health Coalition.
B'nai B'rith Women.
Planned Parenthood.
Center for Science in the Public Interest.
Women's Health Network.
National Organization for Women.
American Association of University Women.
The United Presbyterian Church in the U.S.A.

In addition, the following newspapers have opposed Dr. Koop's nomination:

The New York Times, Los Angeles Times, Boston Globe, Washington Star, Detroit Free Press, Philadelphia Bulletin, Louisville Times, Sacramento Bee, Philadelphia Inquirer, and the Miami Herald.

TESTIMONY ON CONFIRMATION OF THE SURGEON GENERAL NOMINEE C. EVERETT KOOP, M.D.

INTRODUCTION

Chairman Hatch, and members of this distinguished Committee. My name is William H. McBeath. I am a public health physician currently serving as Executive Director of the American Public Health Association. I am authorized to appear before you today on behalf of that organization.

APHA is the oldest and largest professional public health society in the world, having begun in 1872, and now having over 50,000 national and affiliate members across the country. We are a science-based, action-oriented, multi-disciplinary organization with an envied tradition and significant potential as a force in the movement toward valid national health policy and effective community health programming at federal, state, and local levels.

We appreciate this opportunity to present our views on the important subject before you for consideration today.

The issue: What public health qualifications does the USPHS Surgeon General need?

The American Public Health Association firmly believes that the health interests of the nation are best served only when the United States Public Health Service is headed by a Surgeon General who is a clearly qualified, specially trained, broadly experienced community health professional of demonstrated expertise and recognized ability.

Long-standing tradition and provisions of federal law have helped assure such leadership by requiring that the Surgeon General be appointed for fixed terms from the commissioned corps of career USPHS professional officers. Recent changes in the law permit the designation of a Surgeon General from outside the career corps, but only if that individual shall "have specialized training or significant experience in public health programs."

This Committee now has before it for consideration the nomination for Surgeon General of an individual who has not served in the USPHS career corps, who has no specialized training in public health, who has no significant experience in public health programs, and who is therefore clearly unqualified for this important office.

Accordingly, for the first time in over a century of collegial co-existence with the Public Health Service, we in the American Public Health Association are constrained to speak out against the appointment of a specific candidate being designated as Surgeon General. We strongly oppose the confirmation of Dr. C. Everett Koop as Surgeon General on the grounds that he is without the requisite qualifications for that position.

There is ample evidence that Dr. Koop is a distinguished pediatric surgeon. He is much honored, doubtless deservedly, as a practitioner and teacher in his chosen medical specialty. It is not our intention to cast the slightest shadow upon his reputation as highly skilled physician, exceptionally gifted in the art and science of surgery for infants and children. However, we must insist that these admirable qualities alone are wholly inadequate to equip one for national professional public health leadership; and Dr. Koop is otherwise almost uniquely unqualified.

We believe one aspiring to such national public health leadership must be well supplied with a familiar understanding of public health principles and a mastery of public health methods which together give an essential background for an effective approach to and solution of public health problems. The Congress, in its wisdom, has seen fit to include reference to such qualifications in the legislative language which now specifies the prerequisites of the Surgeon General. It is this expertise in public health which Dr. Koop is so utterly lacking, and which is clearly required by law of any Surgeon General candidate.

Why isn't any distinguished medical doctor considered a qualified public health practitioner?

Why do we say that being a specialized medical clinician is not sufficient qualification for Surgeon General? Are not the biomedical and clinical sciences at the core of medical education and practice, also importantly related to public health? Of course they are. But only the narrowest form of medical chauvinism would permit the view that any competent clinical physician is automatically equipped to direct organized community health endeavors.

A recent national commission had defined "public health" as "the effort organized by society to protect, promote, and restore the people's health, involving programs, services, and institutions which emphasize the prevention of disease and the health needs of the population as a whole;" as distinguished from the "clinical sciences" (including medicine) "which operate through a one-to-one, practitioner-patient relationship, and emphasize the empirical application of these fields to individual health problems."

Thus, physicians are especially and exquisitely trained to deal with the pathology of disease in the individual, rather than the public health focus on the active promotion of health in population groups. Medical science and technology is largely that of the treatment of a diseased patient, not the public health knowledge and skills for the prevention of ill health in aggregates. Private medicine is focused on the care of patients and the cure of their individual ailments, while public health is concerned with the varied causes of disease and their control in the community and its environment.

The almost exclusive orientation for one-to-one, provider-patient relationships so advantageous for the clinician, can actually be a disadvantageous distortion for the community practitioner committed to the broader goal of equitable programming for a total population.

In contrasting the patient care clinician and the community health practitioner, we attribute no inherent superiority to either. It is the significance of their differences we seek to emphasize, reflecting the distinctive contribution each can best make to human well-being, and also justifying the distinctive public health qualifications specified for the Surgeon General in the Public Health Service Act.

Training and experience in public health—what important differences does it make?

What is it about training and experience in public health that provides the substantive difference so essential to the qualifications of community health professionals? How does such training and experience make an important difference in public health professionals?

First, through education and work experience they come to share a unique body of knowledge basic to the principles and practice of public health, including certain measurement sciences, environmental sciences, social sciences, and management sciences. Epidemiology is the core science of community health. Other important courses of study at the heart of public health include behavioral science, biostatistics, community dynamics, demography, educational change, environmental protection, human ecology, public administration, and social policy.

Second, through training and experience they come to possess special skills related to community health methods and procedures, including the conduct of community development activities, controlled field trials, environmental inventories, epidemiologic investigations, health program planing and evaluation, health survey research, legislative implementation, mass communication, regulatory enforcement, and sanitary/safety inspections.

Third, through experience in organized public health efforts they come to comprise a characteristic working group of occupational disciplines in distinctive organizational settings. Community health educators, environmental health scientists, epidemiologists, health services administrators, health planners, industrial hygienists, nutritionists, public health dentists, public health nurses, public health physicians, sanitarians, statisticians, and others publicly identify themselves as career community health workers, and are employed jointly with others of these related community health disciplines, in formally organized program efforts set predominantly in governmental public health agencies and voluntary community health service organizations.

Thus, three distinctive characteristics generally shared by public health professionals as a result of their training and experience are: unique knowledge base, special skills ability, and work group identity. In contrasting these characteristics of public health professionals to those of the clinical physician, one notes that the clinical physician does not ordinarily master the areas of scientific study unique to community health service, does not usually develop the special skills and techniques common to community health practice and research, and does not customarily work in the same organized settings with community health disciplines.

What constitutes specialized training of significant experience in public health?

There are several real-world examples which clearly identify the essential form and content elements of public health training and experience.

For U.S. physicians, the definitive testimony to attainment of specialization within medicine is formal certification by an American specialty board recognized by the American Board of Medical Specialties. In 1948, the American Board of Preventive Medicine and Public Health was recognized to award specialty certification to qualifying public health physicians. To date, some 4,000 physicians have been certified by this Board as qualified medical specialists in public health and its related preventive medicine fields. (Dr. Koop is not among these 4,000. He, having chosen formal preparation for and active practice within the entirely different medical specialty of pediatric surgery, has been certified by the American Board of Surgery.)

In addition to the M.D. degree, a medical license, one year of postgraduate clinical training, and successful completion of a comprehensive, two-part, specialty examination, the training and experience requirements for board certification in public health include:

(1) Graduate course of academic study, in-

cluding biostatistics, epidemiology, health services administration, and environmental health, leading to a master's degree in preventive medicine or public health;

(2) One year residency of supervised preventive medicine practice experience, including planned instruction, observation, and active participation in comprehensive, organized, preventive medicine programs; and

(3) An additional year engaged in specialized public health activity (training, research, teaching, or practice).

It is true that federal law does not require the Surgeon General to be a board-certified physician specialist in public health but it does require that the Surgeon General have "specialized training" or "significant experience" in public health. Isn't it reasonable to demand that the type of public health training or experience to be possessed by a physician candidate for Surgeon General, should be the same type (but not the same amount) of training and experience defined by the recognized medical specialty board as appropriate for any physician seeking to qualify in public health?

(With regard to the nominee before you for consideration, our point is not that Dr. Koop hasn't yet completed all of the training and experience required of public health diplomates; our point is rather that Dr Koop hasn't even started any of the type training or experience specified as appropriate.)

Successful completion of graduate training at the master's level (only one of the requirements included above) has increasingly become the recognized norm for professional public health training within many health-related disciplines, including medicine, nursing, dentistry, environmental science, health services administration, etc. Beginning in 1956, the Congress has affirmed the value of such education by authorizing public health traineeships to support "professional health personnel" in "graduate or specialized training in public health." Since then, Congress has provided a variety of grant programs to support public health training in public and private non-profit graduate schools of public health, and other educational institutions. Since 1930, about 50,000 health professionals have received graduate public health degrees (usually the M.P.H.) from the nation's twenty-one, fully accredited, university-based, graduate cshools of public health alone.

It is estimated that over 35,000 of these are still professionally active, along with at least an equal number who hold equivalent graduate degrees from a variety of community health/preventive medicine/environmental health/health services administration programs in other degree-granting institutions. This cadre of graduate-trained professional public/community health personnel, educated with federal support, are additional evidence of the level and character of training Congress intends by the phrase "specialized training in public health." (Dr. Koop has had no graduate education or specialized training in public health.)

Where do we look for practical examples of what constitutes "significant experience in public health programs?" Where else than in the daily work experience of public/community health professionals? In a recent report to the Congress, the Secretary of Health, Education, and Welfare reported that this country has a core group of about 150,000 qualified professional and technical personnel with distinct public health competence who work exclusively in public health settings.

In addition to this large core of professional public health workers, the report goes on to enumerate supporting personnel in public health agencies and programs, and others whose primary work requires the performance of significant public health functions. This total public health workforce is over a half million personnel.

It is this community of public health workers—professional, technical, executive, operational, and supporting—which must be understood, motivated, and guided by expert leaders of recognized ability and demonstrated dedication, beginning with the Surgeon General. And it is the work experience of this group which must be shared by any Surgeon General candidate deemed to have "significant experience in public health programs." It is almost inconceivable that any Surgeon General candidate deemed to have that requisite "significant experience in public health programs" would not be part of this total public health workforce. Dr. Koop is not.

What makes for significant experience in public health programs?

It should be patently obvious that simple knowledge of, occasional exposure to, or even sympathetic interest in community health programs does not constitute "significant experience" in the present context. As revised, Section 204 of the Public Health Service Act is stating the job qualifications for Surgeon General. As with any job qualifications statement, the experience requirement refers to valid work experience of the candidate, demonstrated by prior substantial commitment of time and effort to a responsible occupational involvement (usually employment).

In the case of the Surgeon General, the experience is explicitly required to be in "public health programs;" but what quantity and quality of experience is "significant?" Logically, the requirement for public health programs experience is intended to provide and/or assure the capabilities (i.e., the knowledge, the skills, and the values) needed for public health programs leadership. Experience is therefore "significant" only if it is adequate to provide the needed capabilities. It is ludicrous to treat the USPHS Surgeon General as an entry-level public health career position. Particularly in the absence of any specialized training, only an extended and commendable career of professional public health program leadership would meet the "significant experience" test for Surgeon General.

What are the purported public health qualifications of Dr. C. Everett Koop?

In the openness of today's "information society," anyone with access to a good public library can freely examine the important public aspects of the personal and professional life of prominent individuals. Standard reference works such as Who's Who in America and the Directory of Medical Specialists are recognized as authoritative, readily available stores of biographical data and career information on many noteworthy persons in the world of health affairs.

By coincidence, page 1824 of the 40th edition of Who's Who in America lists only two physicians. Appearing almost side by side in adjacent columns, their life sketches reveal some interesting parallels between the two men, but also some clear career contrasts. They were both born in New York state less than a year apart, and eventually both graduated from medical school there in the 1940's. After a period of residency training (one in internal medicine, one in surgery) they began their practice careers in different states (one in North Carolina, one in Pennsylvania). Both became members of their local medical society and the American Medical Association, and each has engaged in private medical practice. However, as it turned out, each was to spend almost his entire professional career with a single institution, both men having now retired from the top jobs at each. Both have been active in civic affairs, and each has received awards and honors from his professional peers. Both record one marriage with four children; both are Presbyterian.

So much for the parallels; what of the career contrasts?

In 1946, the North Carolina internist began as assistant epidemiologist with the state board of health and, after periodic advancements, became state health director in 1966. During this time he had an interim two-year period of service with the U.S. Public Health Service; and obtained a graduate degree (M.P.H.) from the University of North Carolina School of Public Health, on which faculty he subsequently served, eventually attaining the rank of adjunct professor. His professional memberships include American Public Health Association, Association of State and Territorial Health Officials, Conference of State and Provincial Health Authorities, and Delta Omega—all public health groups.

In 1948, the Pennsylvania surgeon became surgeon-in-chief of Children's Hospital of Philadelphia, continuing in that post during 33 years of institutional growth. He served concurrently on the active faculty of the University of Pennsylvania School of Medicine, eventually becoming full professor of pediatric surgery and pediatrics. He became founding editor-in-chief of the Journal of Pediatric Surgery. His professional memberships include American College of Surgeons, American Surgical Association, Society of University Surgeons, International Society of Surgery, Surgical Section of the American Academy of Pediatrics, and the American Pediatric Surgical Association—all pediatric surgery groups.

Surely these eminently gifted physicians can both be cited as noteworthy for their contributions to human well-being resulting from distinguished careers, each in his own respective area of special competence. The question we raise here is this: Which one of these physicians has "specialized training and significant experience in public health programs" and which one is being nominated as USPHS Surgeon General?

Early this year, soon after Dr. Koop was named Deputy Assistant Secretary for Health, we requested and received a copy of his four-page curriculum vitae from the Department of Health and Human Services. We wanted to identify any public health experience in Dr. Koop's background in order to assess his qualifications for Surgeon General. Of course, his curriculum vitae elaborated considerably (and appropriately) upon the details of his distinguished professional career.

It listed three earned, and seven honorary degrees. It cited six years of postgraduate training and fellowship appointments. It mentions medical licensure in two states, and two certifications by a specialty board. It specified eleven faculty appointments in 36 years of active teaching at two institutions. It told of appointments to four hospital staffs. It named eleven awards and honors: professional, civic, and religious. It reported his membership in seventeen local, national, and international professional/scientific societies, plus several important offices and committee assignments therein. It gave four specialty journals he has edited. It included personal and family information.

But, at no point in the curriculum vitae is there direct or indirect reference to anything that could reasonably be called "specialized training or significant experience in public health programs." None of the education or training was public health focused. None of the faculty or hospital appointments were in preventive or community medicine. None of the society memberships were in public health organizations. None of the edited journals were community health periodicals. (A separate review of over 150 scientific papers authored by Dr. Koop revealed none on public health subjects, or in journals devoted to community health or preventive medicine.)

(For the record, we wish to add that more

recently, our request to the General Counsel of the Department of Health and Human Services for a copy of specific documentation of Dr. Koop's presumed public health qualifications was denied, although the possession of such documentation was admitted. To say the least, we were anxious as to the justification for such "confidentiality.")

Within the past few days, administration representatives have distributed "background information" materials on Dr. Koop's Surgeon General nomination to members of this Committee, and some of you have shared these with APHA. We sincerely appreciate even this brief opportunity to review and analyze therein the administration's claims of public health qualifications for their nomines.

Perhaps understandably, the materials never quote the legal qualifications for Surgeon General as defined by Congress and given in the Public Health Service Act: "specialized training or significant experience in public health programs." The administration apparently concedes that Dr. Koop has no specialized training in public health, since no reference is made in the materials to such training. Its apparent tactic is to dress up events in the nominee's clinical career which can hopefully be sold to this Committee and the Senate as "significant experience in public health programs." We urge you not to buy this thinly veiled attempt to disguise "examples" which, as we shall see, are usually not "public health", often not "programs", sometimes dubious as personal "experience", and never "significant."

The centerpiece of these materials is a four-page document entitled "background information" (which is attached hereto, and which we request be included as part of the record). After beginning with references to Dr. Koop's internationally known accomplishments in pediatric surgery, it goes on to quote a definition of "public health" previously cited in this testimony. Thereafter, under three headings taken from the definition, purported "examples of Dr. Koop's experience" are introduced which supposedly "attest to his extensive background in both clinical and public health services delivery." Each so-called example is presented as a brief "bulleted" paragraph under one of the three headings.

The paragraphs are peppered with "buzz words" and jargon, frequently underlined, but usually without direct relevance to the substance of the paragraph. Careful examination also reveals that the "example" paragraphs are assigned almost randomly to the three headings, with the paragraph subject actually bearing no significant relation to the heading it's placed under.

Some may lightly pass off these aberrations as simply a masterpiece of the publicist's art. More likely they are the deliberate attempt to mislead this Committee as to the public health qualifications of Dr. Koop.

Almost all of the fourteen "examples" refer to clinical patient care activities, not to "public health services" as alleged. Earlier in this testimony we sought to carefully distinguish between clinical patient care on the one hand, and public health programs on the other. To review, a quick rule of thumb (which can readily be applied by each of you to the "examples" cited here) is this: If the effort described is directed primarily at patients who are ill, it is clinical patient care. If the effort described is directed primarily at a group of relatively healthy people, it is public health services. Try that simple test on the core subject of each "example" paragraph (ignoring the "buzz" words and "puff" phrases) and you will quickly see that most of them do not relate to public health at all.

A few of the paragraphs admittedly do describe (or at least mention) public health type activities. However, the obvious attempt throughout this "background information" document to exaggerate to the point of distortion justifiably raises questions concerning the validity of even these as "significant experience in public health programs."

Neither can it be ignored that all these "examples" are here undocumented. Particularly, they almost never give us information on (and therefore leave room for legitimate doubt as to) the nominee's specific role vis-a-vis others, his degree of personal responsibility, the precise nature of his contribution, the extent and duration of his involvement, and his time and effort commitment.

Even assuming the most favorable verdict that available facts will permit, we are forced to conclude that all these "examples" in aggregate still fall far short of affording Dr. Koop the "specialized training or significant experience in public health programs" required by law.

Is it really imperative that the Surgeon General be a qualified public health practitioner?

We urge this Committee and the Senate not to minimize the importance of these mandated public health qualifications in the case of any Surgeon General nomination.

The Surgeon General is widely and appropriately viewed as a symbolic leader of the nation's public health movement. His role can be critical to stimulating the mobilization of the nation's total public health community, including a total work force of over a half million.

As the senior career public health professional in federal service, the Surgeon General is looked to for national public health leadership by professional counterparts serving as state health directors, county health commissioners, and city health officers across the nation. In a time of much heralded decentralization of public health responsibilities, there must be the maintenance of mutual respect and confidence at every intergovernmental facet.

Secretary Schweiker and Assistant Secretary Brandt have been eloquent in their language supporting health promotion and disease prevention. If this initiative is to continue and thrive, it must have committed expert public health leadership in the highest USPHS office.

In recent years, the Surgeon General has regained considerable traditional stature as a primary professional public health spokesperson for the nation, with a hard-earned reputation for authoritatively presenting scientifically objective positions on important matters of national public health policy, e.g., smoking, nutrition, influenza, and prevention. Public confidence in the quality and reliability of our official public health leadership should not be permitted to unnecessarily erode.

The U.S. Public Health Service, as a qualified career professional service, is the legislatively established, permanent, internal locus for technical expertise and professional public health competence within the federal government. Its community health staff leadership is an essential continuing national resource to be both used now, and strengthened for even greater future use.

CONCLUSION

This is not just another battle in the abortion war. Throughout our APHA effort to bring Dr. Koop's lack of public health qualifications to the attention of the President, the Congress, and the public, there has been a tendency for some media coverage to focus instead on Dr. Koop's controversial public statements on abortion, infanticide, and euthanasia. We regret this, because it tends to overshadow the less emotional issue of his public health qualifications. It is undeniable that APHA has long held that safe medical abortion should be available as an essential personal health service on a basis of need as defined by the choice of any woman and her physician.

Some of Dr. Koop's supporters have suggested the abortion issue is the real reason for APHA's unprecedented opposition to his nomination. This is flatly untrue. APHA has not opposed the selection of other high ranking federal officials in both parties who have disagreed with the Association's position on abortion. The real issue is one of individual qualifications. We are joined in that view by other national groups that have no policy position on abortion, e.g., U.S. Conference of City Health Officers, and Association of Teachers of Preventive Medicine and the United Mineworkers.

Dr. Koop's supporters sincerely feel that his extreme opinions should not disqualify him from appointive public office. We would also defend Dr. Koop's right to his position on the issues; but no views or opinions on issues, however dramatically presented, can be accepted as valid substitute for basic qualifications. That is the real issue which the administration and the nominee wish would go away.

This is not just a matter of President Reagan getting his choice. As a Presidential appointee, Dr. Koop is actually now already serving in the position of Deputy Assistant Secretary for Health. We have not objected to this distinguished pediatric surgeon thereby becoming one of President Reagan's top medical advisors; but the Surgeon General post is distinctive. It is clearly intended to be the top federal public health professional in career service, and this traditional office should not be capriciously prostituted to the cause of either political patronage or personal presumption.

This is not simply a guild issue involving territorial imperative. The public interest validity of our position is attested by: (1) a long history of national health policy positions which emphasize public needs and avoid narrow professional interest, and (2) an impressive list of newspapers which have joined us in editorial opposition to Dr. Koop's nomination on the basis he is not qualified:

The Detroit Free Press, Louisville Times, Los Angeles Times, Miami Herald, New York Times, Philadelphia Bulletin, Philadelphia Inquirer, St. Louis Post-Dispatch, and the Washington Star.

Copies of these editorials are attached for inclusion in the RECORD.

In conclusion, we earnestly urge the Committee on Labor & Human Resources to recommend the Senate reject the nomination of Dr. C. Everett Koop as Surgeon General of the USPHS on the grounds the nominee does not possess the statutory requirement of "specialized training or significant experience in public health programs."

Thank you.

[From the Detroit Free Press, June 5, 1981]

APPOINTEES: CABINET PICKS REFLECT A MUCH TOO TROUBLING CHANGE OF POLICIES

The saga of Ernest Lefever grows stranger by the minute. Surely the only surprise left will be if the Senate actually goes ahead and confirms him as an assistant secretary of state, after the uninspiring revelations of recent days.

Mr. Lefever has been under attack because his think tank may have accepted money from the Nestle Corp. with some strings attached. Now his brothers have told the press they think he has some decidedly questionable views on race. Those two incidents reflect badly on Mr. Lefever's judgment and sensitivity, but the primary reason for rejecting his nomination is still his position on human rights.

As assistant secretary for humanitarian affairs, Mr. Lefever says he would call appropriate attention to the brutalities of the Soviet bloc but would use "quiet diplomacy" when "friendly" governments tortured or killed their own people. Aside from being a refusal to ameliorate some of the worst forms of political repression abroad, this is also the sort of realpolitik that gets us indelibly identified with shahs and Somozas and ruthless colonels, an identification that not infrequently blows up in our face. There are several reasons for rejecting Mr. Lefever, but the most compelling is that he would be a watchdog who doesn't like to bark.

And then there is C. Everett Koop, the president's choice to be surgeon general of the U.S. Dr. Koop, a pediatric surgeon, is a person of strong views and weak qualifications so far as public health issues are concerned. He thinks Planned Parenthood is to blame for teenage sex. He believes advances in test-tube conception will encourage homosexuality. He denounces amniocentesis, a routine procedure for determining the existence of congenital and hereditary disorders in fetuses, as a "search-and-destroy mission."

A fundamentalist Christian and a leader board member of organizations that want to eliminate not only abortion but federally funded family planning, birth control, sex education, teenage counseling and world population control programs. If his nomination is approved by the Senate, he will be put in charge of many of the programs he is pledged to eliminate.

The Senate ought to look at what's going on here: The Reagan administration is using the power of appointment, quite deliberately, to alter the direction, even the existence, of programs mandated by Congress and taken for granted by many Americans. Dr. Koop's nomination is only one example.

Marjory Mecklenburg an anti-abortion leader who is opposed to the use of contraceptives, has been named head of the agency that is supposed to fund programs for pregnant teenagers and birth control counseling. The man who will set federal timber-cutting policies is John B. Crowell, lately general counsel to the Louisiana-Pacific Lumber Co., the single largest bidder for timber on federal lands. James R. Harris, the new head of the Office of Surface Mining, is a vigorous opponent of federal strip-mining regulations.

The list goes on: Retired Gen. Edward L. Rowny, a foe of the 1979 SALT agreement, is our new chief negotiator for arms control and disarmanent. Thorne G. Auchter, a former contractor who fought enforcement of worker health and safety rules, is the new assistant Labor secretary who will oversee the Occupational Safety and Health Administration.

Surely the Senate ought to question those prospective changes in policy just as it questions the credentials of the appointees themselves. In the case of both Dr. Koop and Mr. Lefever, their qualifications as well as their intentions leave far too much to be desired. The president is entitled to considerable leeway in the choosing of his soldiers. but on these two nominations, Mr. Reagan should no longer be given the benefit of the doubt.

[From the Louisville Times, Apr. 8, 1981]

IT'S NOT A MATTER OF AGE DISCRIMINATION: KOOP'S VIEWS SHOULD STOP APPOINTMENT AS SURGEON GENERAL

In an administration headed by a 70-year-old President, it shouldn't seem wrong to have a 64-year-old physician overseeing both public health and federal health research. Yet as the law stands, Dr. C. Everett Koop, a Philadelphia pediatrician, is too old to become U.S. surgeon general.

Straightforward arguments against age discrimination can be advanced for changing the law—and they should have been used by the administration and its allies in Congress. Instead, Sen. Jesse Helms of North Carolina tacked on to a minor bill dealing with credit cards an amendment exempting Dr. Koop from the age rule. The amendment sailed through the Senate, but it's being stalled in the House—with good reason.

Sen. Helm's attempt at deception affirms the idea that it isn't Dr. Koop's age that the administration seeks to protect from public scrutiny. It's Dr. Koop himself.

His medical background as chief of the prestigious Children's Hospital in Philadelphia is impressive. But, personally, he is a religious extremist who doubts the wisdom of the constitutional separation of church and state, opposes common forms of contraception, and condemns followers of mainline religious groups that don't agree with his rigid opposition to abortion.

Pushing aside temporarily those views, the fact is that Dr. Koop has never been involved in public health—although his job would be to run a corps of a half-million public health professionals. In the words of Dr. William H. McBeath, executive director of the American Public Health Association, Dr. Koop through lack of background in that field is "almost uniquely unqualified" to be surgeon general. Dr. McBeath's organization has, for the first time in a century, voted to oppose a candidate for surgeon general.

Dr. Koop's views—he is antagonistic toward both birth control and abortion—should disqualify him from another task of the surgeon general: overseeing the National Institutes for Health, which direct major medical research.

In that capacity he would be in a position to terminate vital research to identify and prevent birth defects. The "pro-life" movement has attacked some of these programs—notably those using a test to identify some birth defects through analysis of fluid in a pregnant woman's womb—because they may influence people to seek abortions.

Dr. Koop has never been shy about expressing what he believes. Those who doubt need refer only to a recent article in the Journal of the New Jersey Medical Society in which he attacked main-line Protestant denominations that have endorsed the Supreme Court's affirmation of the right of choice in abortion decisions. Adherents to that view, he wrote, engage in "superficial theology, lack of morality and an insensitivity to the eventual reward for their depravity."

In his book The Right to Live; The Right to Die, Dr. Koop stooped to a defense of the illegal back-alley abortion mills that flourished before legalization of abortion: "Consider for a moment how safe abortion has become for the abortionist. In the days when he was an 'illegal abortionist,' his motive was profit but with legal punishment hanging over his head were he caught, he took no chances, humanly speaking, with the mother's life. Now those chances are justified because the law says technically that he has the right to do what the mother says is her right, namely to kill her unborn child."

Statements such as those are ample clues to why Dr. Koop didn't show up at a hearing on the age-law exemption conducted by the House Health and Environment subcommittee. "Dr. Koop scares me," admits the subcommittee chairman, Rep. Henry Waxman of California.

Dr. Koop scares us, too. Although age should be no barrier to his confirmation, his position on important issues clearly disqualifies him from becoming surgeon general.

[From the Los Angeles Times, Sept. 24, 1981]

AN ISSUE OF QUALIFICATIONS

Dr. C. Everett Koop has been nominated to be U.S. surgeon general and, as such, would be the nation's top spokesman on public health. Yet Koop, a surgeon, has no significant background in public health. His nomination appears to be a political sop to anti-abortion forces, and it should not be approved.

Koop's appointment was delayed because he is 64, the age limit for holding the surgeon general's job. Congress lifted the age limit during the recent budget reconciliation process.

We said earlier that one's qualifications, not one's age, should be the main factor and that Koop appeared uniquely unqualified. Previous surgeon generals have had strong public health or public administration backgrounds, such as heads of the National Cancer Institute, or state health commissioners, or specialists in preventive medicine or epidemiology, the study of the spread of diseases.

Once again, abortion is an issue in this appointment. Koop thinks abortion will lead to infanticide, euthanasia and, ultimately, the political climate that created the Holocaust. Because abortion is such a divisive issue, and Koop's views are so extreme, his appointment can only politicize what should be a nonpartisan public health service.

Conservatism is not the issue here. Qualifications are.

We compare Koop's nomination with the report that M. E. Bradford, an English professor at the University of Dallas, may be named to the head of the National Endowment for the Humanities. Bradford, who does not object to being called an arch-conservative, may hold views about federal spending for academic research that differ with those of his critics. But even they do not quarrel with his record as a scholar.

Koop, on the other hand, lacks the qualifications to fit the job. The Senate should keep that in mind as his confirmation hearings begin next week.

[From the Los Angeles Times, June 8, 1981]

KOOP: BAD MEDICINE

The Reagan Administration has made clear its intention to nominate Dr. C. Everett Koop to be U.S. surgeon general. He appears to be uniquely unqualified for the job.

The surgeon general directs the 7,000 officers of the U.S. Public Health Service and, through reports on such questions as smoking and nutrition, is one of the nation's top spokesmen on public health. The person filling the job should have a background in community health—preventive medicine or disease control, for example.

Previous surgeons general have had such experience. Leonard A. Scheele, in the job from 1948 to 1956, had headed the National Cancer Institute. Leroy E. Burney, surgeon general from 1956 to 1961, had been an Indiana State Board of Health commissioner and a professor of public health and preventive medicine. Luther Terry, in the job from 1961 to 1965, headed clinics at the National Institutes of Health before his appointment. William Stewart, who served from 1965 to 1969, specialized in epidemiology and public administration. Jesse Steinfeld, the last surgeon general before President Nixon abolished the job in 1973, had been deputy director of the National Cancer Institute. All five were members of the Public Health Service's commissioned officer corps.

President Carter reestablished the job in 1977, and went outside government to find a surgeon general. He selected the widely respected Dr. Julius B. Richmond, the chairman of Harvard Medical School's department of preventive and social medicine.

Koop has no such background. He is a pediatric surgeon from Philadelphia, and is noted for operations to separate Siamese twins. His training, his teaching and his medical experience have all been in surgery. He has no experience in public health—not in disease control, not in environmental protection, not in behavioral science, not in public administration.

In extravagant language that must startle even some of his fellow believers, Koop has opposed not only abortion but also population control and amniocentesis.

He has labeled amniocentesis, a major development allowing parents to learn of possible genetic defects in their unborn children, as a "search-and-destroy mission."

In a commencement address in 1979 to the Philadelphia College of Osteopathic Medicine, Koop made disparaging remarks about "planned parenthood" and contended that population control represents "national suicide."

Speaking as though he were an observer looking back from the year 1999, Koop predicted that Americans would have to carry "internal passports" by then, and that no child would be "declared alive until 72 hours after birth in order to let its parents decide whether they wanted the baby or not."

Koop wrote in 1978 in the Journal of the Medical Society of New Jersey that abortion leads to infanticide and then to euthanasia—"indeed, to the very beginnings of the political climate that led to Auschwitz, Dachau and Belsen." The logic that compares a surgical procedure with the Holocaust is incomprehensible.

The American Public Health Assn. has opposed Koop's nomination, a step that the professional organization has never before taken in its 109-year history. William McBeath, the association's executive director, fears that Koop would politicize what has always been a nonpartisan office.

Koop's nomination has been delayed because of a technicality about his age. He is 64, and that is the limit for holding the surgeon general's job. But Koop's age should not not be the problem; the problem in his lack of background and his opinions. Final judgment on Koop's qualifications for the job must in fairness await his testimony after his nomination. But he certainly looks like the wrong choice.

[From the Washington Star, May 11, 1981]

THE WRONG JOB FOR DR. KOOP

A good government job surely could be found for Dr. C. Everett Koop, whom President Reagan is said to favor for Surgeon General of the U.S. Public Health Service. But it ought to be some other job.

Dr. Koop is surgeon-in-chief of Children's Hospital of Philadelphia and professor of pediatric surgery at the University of Pennsylvania Medical School. His gifts as a pediatric surgeon are said to be exceptional. He is a man of integrity and skill.

Why, then, do so many oppose him for the job of surgeon general? The answer is complicated by Dr. Koop's strong views on abortion and related matters. For example, he has called amniocentesis, a medical procedure used to spot Down's syndrome in fetuses, a "search and destroy mission." Such notions do not win universal applause, but they have confused the question.

But the real difficulty is that Dr. Koop, in spite of impressive medical credentials, has little background in public health. Although he served on the board of an organization which promoted hospital construction and other programs in Third World countries, and was active in procuring a grant from the late DeWitt Wallace to finance medical fellowships to poorer nations, his career has been devoted almost entirely to practicing, lecturing and writing in his own field.

It is that which has persuaded Dr. William H. McBeath, executive director of the American Public Health Association, to call him "uniquely unqualified" and to call his appointment" an unwarranted affront to every American public health worker." Dr. Koop's nomination is the first that the association has opposed in its 109 years.

Dr. McBeath put this way: "Why do we say that being a specialized medical clinician is not sufficient qualification for surgeon general? Are not the biomedical and clinical sciences at the core of medical education and practice, also importantly related to public health? Of course they are. But only the narrowest form of medical chauvinism would permit the view that any competent clinical physician is automatically equipped to direct organized community health endeavors."

Dr. Koop's medical credentials are impressive. But comparing a pediatrician to a public health expert, although both may be doctors, is like comparing an aerospace worker to a bridge builder, although both may be engineeers. Caring for individual patients, Dr. McBeath, observes, has little to do with the causes of disease and their control—the work of public health.

The surgeon general heads the Center for Disease Control, the National Institutes of Health, the Health Resources Administration, the Health Services Administration and the Alcohol, Drug Abuse and Mental Health Administration. He has become the nation's primary spokesman on public health issue. The post has been frequently filled from the corps of the U.S. Public Health Service—becoming what Dr. McBeath calls the "commanding officer." The exceptions to that, such as Dr. Julius B. Richmond, the most recent surgeon general, have nevertheless long been active in public health. Dr. Koop has not.

The Senate has the final say on a nomination, but the matter has been stalled in the House by Dr. Koop's age. He is 65 and under present law a surgeon general may be no older than 64. In an attempt to lift the legal age limit, Sen. Jesse Helms recently tried to amend an unrelated bill, which the House last week passed without the Helms amendment. But nothing can prevent the senator from trying again when that bill—or any bill—reaches the Senate.

It is a pity that it has come down to this technicality, for Dr. Koop certainly is not too old for the job. He is also entitled to his opinions, and the Reagan administration is entitled to appoint to high posts those who share its opinions.

Dr. Koop's views on various subjects may be distasteful to some and appealing to others; they don't disqualify (or qualify) him for various jobs in the Department of Health and Human Services or other agencies, although doctrinaire views are often a handicap. But for the job of surgeon general, his background—or lack of it—does raise insurmountable questions.

[From the Miami Herald]

DR. KOOP TO SURGERY, PLEASE

One of the more unsavory political skirmishes in Washington these days centers on the prospective nomination of Dr. Everett Koop to be U.S. Surgeon General.

Dr. Koop is an honorable man. He is a surgeon of rare skill. Until recently he was chief of surgery at Philadelphia Children's Hospital, where he gained fame for successfully surgically separating Siamese twins, a delicate and highly unusual procedure. His peers hold him in high professional esteem. He evinces a deeply compassionate concern for human life.

You would not know those things if all that you knew of Dr. Koop was furnished by those who oppose his nomination. They vilify him as a Neanderthal obsessed with raving fears.

Most of his critics' ammunition comes from a single commencement address that Dr. Koop gave at the Philadelphia College of Osteopathic Medicine in June 1979. Dr. Koop pretended to be an 82-year-old man addressing a graduating class in 1999. He portrayed a society that permitted infanticide, outlawed worship of God in deference to a state religion of secular humanism, and mass-produced homosexual test-tube babies to boost the gay movement's political clout.

It's easy to ridicule that speech. Yet fairness requires disclosing that the graduating class responded with a standing ovation for his Orwellian fantasy.

One pervasive belief motivated Dr. Koop's chilling, easily mocked vision. He believes that abortion is murder. Many Americans agree. He further believes that a society that legalizes abortion has begun the progressive devaluation of human life. Many Americans agree.

Many others don't, and never will. Dr. Koop crusades militantly against abortion. He intolerantly denounces his adversaries for "superficial theology, lack of morality, and an insensitivity to the eventual reward for their depravity."

The American Public Health Association opposes Dr. Koop's prospective nomination ostensibly because he lacks training in public health. Congressional opponents are blocking his nomination by refusing to lift a statute requiring prospective Surgeons General to be no older than 64. Dr. Koop is 64½.

Those issues are quite secondary. Abortion is the only real issue here. Why else would the Christian Action Council, a single-issue anti-abortion lobby, be leading the campaign to force Congress to lift the age limit now so that Dr. Koop can be nominated?

Dr. Koop's intolerance on abortion renders him unfit to be the Nation's chief doctor, regardless of his medical skills. Abortion will remain the choice of countless women even if outlawed. They should have the right to that choice.

Regardless of their position on this deeply divisive question, all Americans should recognize in the mutually antagonistic intolerance between Dr. Koop and his opponents the terrible price abortion is costing this Nation in the coin of essential political consensus. Installing Dr. Koop in this Nation's most prominent public-health post would only deepen that division.

[From the New York Times, April 9, 1981]

IN PRAISE OF (SOME) DOCTORS

DR. UNQUALIFIED

Although Dr. C. Everett Koop deserves his reputation as a fine pediatric surgeon, he is not deserving of the role in which the Reagan Administration hopes to place him—Surgeon General.

The Surgeon General, whose responsibilities include the National Institutes of Health, the Center for Disease Control and the Institute of Alcohol and Drug Abuse, has been, almost without exception, someone with significant experience in the special field of public health. Many Surgeons General, in fact, have come out of the Public Health Service. Dr. Koop has neither worked in the field nor, during his years at Children's Hospital in Philadelphia, shown any interest or influence in it.

Since he lacks the professional qualifications for the appointment and is, in fact, older than the law routinely permits his attractiveness to the Administration must lie elsewhere. That "elsewhere" may be his anti-abortion crusade. Two years ago he toured 20 cities with a film whose message was that abortion led inexorably to euthanasia for the elderly. And he has described amniocentesis, a procedure used to detect congenital disorders like Down's syndrome and Tay-Sachs disease in fetuses, as "a search-and-destroy mission."

Dr. Koop is, of course, entitled to his opinions, but opinions should not be construed as qualifications. We hope Congress will reject the the appointment, recognizing, as the Administration chooses not to, that it would be an affront both to the public health profession and the public.

[From the New York Times, May 26, 1981]

TIME FOR A NEW SURGEON GENERAL

Initially, the nomination of Dr. C. Everett Koop to be Surgeon General, the head of the Public Health Service, had been stalled on a technicality. He was, under present law, seven months too old for the job. The House now seems to have removed the age barrier. But there is, and always has been, a far more important reason to resist Dr. Koop's nomination. What should stop this appointment altogether is thoughtful consideration of the doctor's credentials. He is simply the wrong man for the job.

Dr. Koop is indisputably a distinguished pediatric surgeon. But unlike previous Surgeons General, he has had virtually no experience in public health. It is hardly surprising then, but surely significant, that his nomination to the post is the first the American Public Health Association has opposed in its 109 years.

Dr. Koop holds many opinions that make him attractive to the Reagan Administration, above all his opposition to abortion. But opinions are not qualifications. The nomination is a disservice not only to the Public Health Service and the public, but also to Dr. Koop. He is being honored for the most cynical of reasons—not for his medical skills but for his political compatibility.

WRONG FOR SURGEON GENERAL

Dr. C. Everett Koop may well be the finest pediatric surgeon of our time, but that doesn't make him the best choice for Surgeon General of the United States.

The Surgeon General ought to be a doctor with an outstanding record and a proven administrator in public health and preventive medicine.

A conservative administration would do well to resume the tradition of promoting Surgeons General from within the ranks of the U.S. Public Health Service. It would restore the agency to its former, autonomous status.

The Surgeon General is responsible for the National Institutes of Health, which form a medical world of their own, the Center for Disease Control, with its responsibility for tracking down such exotic mysteries as "Legionnaires' Disease," and the Institute of Alcohol and Drug Abuse. The Surgeon General is a manager and administrator, not a maker of health care policy.

Clearly it is Dr. Koop's personal philosophy—and notably his crusading opposition to abortion—that endears him to the Reagan Administration and to Secretary of Health and Human Services Richard S. Schweiker under whom he would serve.

In 1979 and 1980, Dr. Koop toured 20 American cities with a fervent, almost evangelistic presentation urging an end to what he called "anti-family trends." He's entitled to his own opinion, but it should not qualify him for the country's top public health job.

No one is taking anything away from Dr. Koop as a surgeon. His achievements as surgeon-in-chief at Children's Hospital and his success in separating the Siamese twins from the Dominican Republic in 1974 are acknowledged.

Dr. Koop doesn't need another title or another forum. He has already saved many lives and made others easier. But all that he has done does not qualify him to be Surgeon General, and he would serve neither his profession nor his country by continuing to seek that post.

A side issue has emerged. To make Dr. Koop Surgeon General, it would be necessary to remove an age-limit of 64½ years. The Public Health Service has an age limit because it is—with the Army and Navy—part of the uniformed forces.

Dr. Koop is close to 65. Sen Jesse Helms (R-NC), an ardent anti-abortionist himself, tried to erase the age restriction by tacking an amendment on to a credit card bill.

Speaker Thomas P. O'Neill and other House leaders, incensed by Helms' attempt to pull a fast one, blocked him and want to question Dr. Koop before they do anything.

The Reagan Administration would be wise to drop the nomination.

[From the Philadelphia Inquirer, June 3, 1981]

SENATE SHOULD REJECT KOOP

No one denied that Dr. C. Everett Koop, until recently surgeon-in-chief at Children's Hospital of Philadelphia, is a "distinguished pediatric surgeon." One of the opponents of his nomination to be surgeon general of the United States, Dr. William H. McBeath, executive director of the American Public Health Association, described him in those words. He added, however, that Dr. Koop is "otherwise almost uniquely unqualified" for the job.

In that job, Dr. Koop would be the nation's number-one spokesman on public health issues. He would have the responsibility of administering the programs of the National Institutes of Health, the Population Research Center and the Centers for Disease Control. He would be supervising the more than half a million people in the public health work force.

Why did President Reagan nominate him? Not for his experience in public health, of which he has virtually none. Not for his experience in administering large bureaucracies. Again, a virtual zero.

The reason for the nomination, the best that anyone can determine, is that Mr. Reagan agrees with Dr. Koop's opinions. Strong opinions. Dr. Koop is not simply opposed to abortion. He has been a crusader. He is not merely in favor of protecting and enhancing the American family. He has gone around the country denouncing what he calls "anti-family trends," one of which seems to be, according to him, the movement for equal rights for women, and denouncing those whose views differ from his own.

Dr. Koop is entitled to his opinions, and President Reagan is generally entitled to have people in his administration holding views compatible with his. The American people, however, are also entitled to public servants who, at least in jobs requiring certain professional skills and personal experience, have something more among their qualifications than political compatibility and ideological fervor.

It would be unthinkable to expect a government bureaucrat to perform a rare operation to separate Siamese twins. By the same token, the man who so brilliantly performed it, Dr. Koop, simply does not have the knowledge, the background or the temperament to perform as surgeon general. The Senate has gone along with many dubious nominations by Mr. Reagan. This is one it should reject.

[From the St. Louis Post-Dispatch, Sept. 11, 1981]

BAD CHOICE FOR SURGEON GENERAL

President Reagan has apparently decided to go ahead with plans to nominate Dr. C. Everett Koop, a pediatric surgeon, as surgeon general of the Public Health Service despite widespread opposition. In reviewing the nomination, however, the Senate should be persuaded by the objections of the American Public Health Association (APHA). These criticisms are important because they address Dr. Koop's qualifications for the office—or lack thereof—rather than his personal beliefs.

Some of the criticism of the selection of Dr. Koop is based on his fervent opposition to abortion. But abortion is not a public health issue; it is a social issue and a clinical matter between a patient and her doctor. The confusion over public health and clinical health care is at the base of the APHA's objections to Dr. Koop. The surgeon general is the chief public health official of the country. As such his task is to supervise the government's efforts to determine the causes of disease and its development of treatment and prevention techniques. A clinician treats individual patients. Dr. Koop has been lauded as a fine surgeon—a clinician. But he has practically no experience in the public health field.

Previous surgeons general have had extensive experience in public health—and it is needed to best run the many offices that come under the control of the surgeon general. These include the Center for Disease Control, the National Institutes of Health, the Health Resources Administration and the Health Services Administration. The Senate should insist that the president select a surgeon general who has experience in the field he is to head—public health.

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. MATHIAS. Mr. President, it is with regret that I oppose the President's nominee for the post of Surgeon General of the Public Health Service.

Dr. C. Everett Koop is a distinguished and gifted pediatric surgeon. He has been a teaching surgeon throughout his medical career and has pioneered in surgery to separate siamese twins. But I am compelled to question whether this background is appropriate preparation for the position of Surgeon General and Administrator of the Public Health Service.

The Surgeon General heads the Public Health Service Corps of 7,200 health professionals. The Public Health Service consists of six operating agencies: the National Institutes of Health; Alcohol, Drug Abuse and Mental Health Administration; Center for Disease Control; Food and Drug Administration; Health Resources Administration; and Health Services Administration.

The Public Health Act, as amended in August 1981, requires that the Surgeon General "have specialized training or significant experience in public health programs." In exercising its constitutional responsibility of confirmation, the Senate must judge whether the nominee meets the requirements of the law.

The following definition of public health is from the Discursive Dictionary of Health Care, published as a committee print by the Subcommittee on Health and the Environment of the House Committee on Interstate and Foreign Commerce in 1976:

The science dealing with the protection and improvement of community health by organized community effort. Public health activities are generally those which are less amenable to being undertaken or less effective when undertaken on an individual basis, and do not typically include direct personal health services. Immunizations, sanitation, preventive medicine, quarantine and other disease control activities, occupational health and safety programs, assurance of the healthfulness of air, water and food, health education, and epidemiology are recognized public health activities.

Other sources define public health in broader terms. A Glossary of Health Care Terminology, published by the World Health Organization (WHO) in 1975,

quotes an observation of a WHO Expert Committee in 1973 that:

The expression of public health is now used in a broad sense to encompass the problems affecting the health of the population, the collective status of health of the people, environmental health and health services, and the administration of health care services.

Using any definition of public health, the nominee whose name is before the Senate, despite his other achievements, is not qualified to guide the Nation's public health services. He has no specialized training in public health and no significant experience in public health programs. His efforts to provide and improve patient care, however commendable and laudable, do not constitute experience in public health. Therefore, in my judgment, he does not meet the statutory requirements for this important office.

Mr. DODD. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield such time as the Senator from Connecticut desires.

Mr. DODD. I thank the Senator for yielding.

Mr. President, I also oppose the confirmation of Dr. C. Everett Koop to be Surgeon General of the United States. I do so because I believe that Dr. Koop lacks the direct experience with public health programs necessary to qualify him for this position.

Mr. President, I do not question Dr. Koop's eminent experience as a distinguished pediatric surgeon. His work with infants and disabled children has earned him a most deserved worldwide renown. I greatly admire this work as well as his volunteer efforts overseas.

Nonetheless, Dr. Koop's experience as a pediatric surgeon does not qualify him to head the Public Health Service commissioned corps, the primary task of Surgeon General. Dr. Koop has spent his professional life working as a clinician, treating individuals' diseases. A Public Health Service official, in contrast, focuses on preventing and controlling diseases within the population-at-large. Clinicians concentrate on curing illnesses contracted by individual patients whereas Public Health Service officials concentrate on discovering and working to avert environmental conditions which cause such illness. These two tasks, both vitally important to the health and welfare of the American public, are different indeed.

Dr. Koop is the first nominee for Surgeon General in modern times to lack significant Public Health Service experience. For this reason, I must oppose his nomination.

Mr. President, the Surgeon General serves not only as this country's senior Federal public health professional but also as primary spokesperson on matters of national public health policy. Thus, Surgeon Generals in the past have issued reports and official pronouncements on such critical issues as smoking, nutrition, and the outbreaks of diseases such as legionnaires disease and swine flu. The Surgeon General's advice on these and other public health matters must be in the best interests of all Americans.

Dr. Koop has expressed publicly his extreme opposition to population control, whether by contraceptives or abortion. He has also strongly opposed the use of such medical procedures as amniocentesis which permits parents to find out about possible genetic defects in unborn children, test tube conception which allows infertile women to give birth, and drugs such as prostaglandin used to treat heart and skin ailments but which may also be used to induce abortion.

Given the importance of promoting safe, available health care for all groups in this country, a surgeon general must be able to assure that he or she will give fair and impartial advice on the delivery of health services and research into areas such as birth control and infertility. Dr. Koop's entire record to date indicates that his personal beliefs would inhibit him from giving such impartial judgment.

Dr. Koop's views on population and birth control, views which I do not share, are not the real issue here. However, the question the Senate must determine today is whether or not Dr. Koop is qualified by background, training, and experience to act as Surgeon General.

Mr. President, I believe that Dr. Koop is not so qualified and urge my colleagues to vote against confirmation of his nomination.

I appreciate the Senator from Massachusetts yielding.

Mr. KENNEDY. Mr. President, I withhold the remainder of our time.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. HATCH. Mr. President, I yield 2 minutes to the Senator from Iowa.

Mr. JEPSEN. Mr. President, I intend to vote in favor of the nomination of Dr. C. Everett Koop as U.S. Surgeon General.

Since the announcement of Dr. Koop's nomination, I have watched with amazement the vicious attacks directed toward him, all of them unfounded, all of them based on ideological disagreements having nothing to do with the Office of Surgeon General. As I will briefly outline, Dr. Koop's credentials are impeccable and criticism of them is completely misdirected.

Dr. Koop's critics come in two varieties: those who expressed concern over his evangelical and prolife views, calling him an extremist, as he has been called here today in this Chamber, and others who challenged his experience in the field of public health.

Dr. Koop has a great deal of experience in the field of public health in four areas: pediatrics, consumer protection, international health care, and work with the disadvantaged or underserved people.

He has helped reverse infant mortality rates by developing surgical procedures and improving pre- and post-operative care for children. He identified cancer as a leading cause of death among young people and worked to inform his colleagues and the public of the risk it presents.

Dr. Koop played a major role in eliminating the practice of X-raying children's feet to determine if their shoes fit, thus preventing exposure to harmful radiation. He also helped bring about a court order to remove coloring and mint flavoring from corrosive oven cleaners, which many children ingested when they assumed it was candy.

His role in international health care is well-known to those who care to take just 10 minutes to read. His deliveries of babies in the welfare homes of Harlem drew attention to the needs of the underserved. Throughout three decades at Children's Hospital in Philadelphia Dr. Koop worked to coordinate private and public care for ghetto dwellers.

As a pioneer of pediatric surgery, Dr. Koop has achieved many significant milestones. He has successfully operated on children with physical defects so severe that these children were once thought to have no hope of survival. He has made inroads in the war against cancer in children and done extensive work in making anesthesia safer for children.

As an administrator, Dr. Koop has been the chief builder of the well-known pediatric surgery department at the Children's Hospital of Philadelphia. As an active leader of public health medicine, he has been a volunteer in several Third World nations, fighting and working toward the prevention of ravaging diseases, building nutritional programs, and helping new doctors gain experience in the problems of international medicine, and many of them women, I might add.

Even this short background leads to the conclusion that Dr. Koop is profoundly qualified for the position of Surgeon General. From that office he promises to work with the handicapped and the elderly of the Nation, two segments of our society for whom the questions of public health are urgent indeed. Dr. Koop would bring a distinctive and critically necessary attitude to this office, a concern for the individual that is all too frequently lost when health professionals deal with populations and not persons.

Today the U.S. Senate has the opportunity to confirm the importance of the Office of the U.S. Surgeon General by placing in it such an excellent medical leader as Dr. C. Everett Koop. I challenge my distinguished colleagues to join me in that confirmation.

I thank the Chair.

The PRESIDING OFFICER (Mr. SPECTER). Who yields time?

Mr. HATCH. I yield such time as the Senator from Alabama may need.

Mr. DENTON. I thank my distinguished chairman and you, Mr. President.

I am pleased and honored to associate myself with those who have espoused their strong support for the nomination of Dr. C. Everett Koop to be Surgeon General. As a member of the Labor and Human Resources Committee which reported this nomination to the Senate floor, I submit that the President has made an inspired selection.

The Office of the Surgeon General should be filled not only by one with experience in and concern for the Nation's overall health and well-being, but one dedicated to the protection and promotion of it. Dr. Koop, in my estimation, is uniquely qualified in both respects.

As to his experience and concern, one need only look at the impressive list of appointments in which he has served. His skill has won international acclaim including, last year, receipt of the French Legion of Honor. These tributes have come not by pride or pageantry, but by hard work. It is a shame we have been so slow in this country to recognize and welcome Dr. Koop as the Nation's primary spokesman for public health policy.

Dr. Koop's personal philosophy of the healing arts is the best testament to his dedication. He understands that one of the first rights we claim as citizens of this great country is the right to life so that we can exercise our liberty and enjoy happiness. Throughout his career, Dr. Koop has worked to reaffirm civilization's and this Nation's respect for the sanctity of life, rather than preempt life by a presumptive judgment of the prospect in quality of someone else's life. He has never asked, "Should we treat?" but only "how?" What an example he will set as Surgeon General not only for the U.S. Public Health Service Commissioned Corps, which he will lead, but also for those entering all fields of health.

There are many words I could use to describe this outstanding individual, but the best appellation I can label him with is "friend." He is my friend. He is a friend of the handicapped, the young, the old, and the unborn. He is a friend of mankind, of civilization, of that which is best in this great Nation. I urge my colleagues to vote for this nomination.

Mr. HATCH. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 16 minutes and 10 seconds remaining.

Mr. HATCH. How much time does the other side have?

The PRESIDING OFFICER. Twenty minutes and 4 seconds.

Mr. HATCH. I would be happy to yield to the distinguished Senator from Mississippi.

Could the distinguished Senator from Massachusetts yield half the time if I do not have the time?

Mr. KENNEDY. I am prepared to yield back the remainder of the time and move to a vote.

Mr. HATCH. I have one more person who wants to speak.

Mr. KENNEDY. I will be glad to yield.

Mr. President, I would be glad to yield to the Senator from Mississippi whatever time he might want and I would hope his comments would appear after the vote on the Koop nomination.

The PRESIDING OFFICER. (Mr. WARNER). Without objection, the Senator from Mississippi is recognized.

Mr. STENNIS. I greatly appreciate the courtesies here of the managers of this matter. I am going to ask unanimous consent, Mr. President, to speak on an extraneous matter, but let me make clear that if someone comes in before voting time who wishes to speak on the pending matter, I will, of course, gladly yield the floor to him or her.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator may proceed.

Mr. STENNIS. Mr. President, if the Senator will permit me to make that unanimous-consent request, under the circumstances I ask unanimous consent that I may proceed on an extraneous matter, but if those come in who may wish to speak on the nomination I will defer.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. I thank the Senator.

(Mr. STENNIS' remarks will be found at an appropriate place elsewhere in the RECORD.)

Mr. METZENBAUM. Mr. President, I rise in opposition to the confirmation of Dr. C. Everett Koop as Surgeon General of the United States. It is no secret that there are many who differ strongly with Dr. Koop's views on the appropriate role of women in our society and on the specific issues of women's reproductive health. However, his views on these subjects alone would not be sufficient to disqualify him from consideration for this position.

I have made my position known, a number of times this year, that I believe to judge any person for public office or for confirmation on the basis of a single issue is unfair. I think is it unintelligent. Indeed, I think it is un-American. I therefore would not judge Dr. Koop on that basis alone. Strongly held views, no matter how adamantly one might disagree with them, should not in and of themselves preclude a person from public office.

But, Mr. President, the crucial question we must ask ourselves is whether Dr. Koop has the requisite qualifications to carry out the duties of this job.

There is no doubt that Dr. Koop has excellent medical credentials. I understand from some of his colleagues that Dr. Koop is a top flight pediatric surgeon. His advances in techniques to separate siamese twins and in developing procedures to correct birth defects have been important contributions to medical knowledge.

As impressive as all that may be, however, there is no necessary relationship between being a fine pediatric surgeon and meeting the legal qualifications for Surgeon General. The law explicitly provides that the Surgeon General must have "training or significant experience in public health." And regrettably, Dr. Koop has no experience—none whatever—in the public health field. He has no experience in disease control, no experience in occupational health issues, no experience in environmental protection, no experience in behavioral sciences, no experience in public administration. And for the first time in over 100 years, the American Public Health Association is opposing a nominee for Surgeon General.

The Senate has a responsibility which we cannot ignore—to insure that the role of Surgeon General of the United States is filled by a person competent to protect the public health of all persons in this Nation. Dr. Koop does not and cannot meet this requirement.

I do have respect for the gentleman. I have met him. I consider him an able person. I respect his views, whether or not they may disagree with mine. But I believe that on the issue of whether or not he should be confirmed for Surgeon General of the United States, regrettably I must urge my colleagues to vote "No."

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Massachusetts has 1 minute 53 seconds.

Mr. HATCH. How much time does the Senator from Utah have?

The PRESIDING OFFICER. The Senator from Utah has 14 minutes remaining.

Mr. HATCH. Mr. President, I yield to the Senator from Michigan.

Mr. LEVIN. I thank the Senator.

Mr. President, I would like to take a moment to state my reasons for opposing the nomination of C. Everett Koop to be Surgeon General.

First, Dr. Koop lacks the "significant experience in public health programs," which is a legal prerequisite to his appointment to be Surgeon General. He does not have specialized training in public health. While Dr. Koop is a leading pediatric surgeon, his experience in treating individual patients does not legally qualify him to be Surgeon General.

I am also disturbed by a number of extreme and intolerant statements which Dr. Koop has made. In his article, "The Sanctity of Human Life," which appeared in the Journal of the Medical Society of New Jersey (in January of 1978), Dr. Koop launches an attack on religious denominations and groups which have taken a prochoice stand on abortion. He accuses these religious groups of "superficial theology, lack of morality, and an insensitivity to the eventual reward for their depravity." These denominations and groups include the American Baptist Churches, the Episcopal Women's Caucus, the Unitarian Universalist Association, the B'nai B'rith Women, the United Methodist Church, the United Church of Christ, the United Presbyterian Church, USA, the United Synagogue of America, the National Council of Jewish Women, the Presbyterian Church in the United States and many others.

When questioned about his views on amniocentesis, a procedure used to detect neural tube defects, genetic disorders and metabolic disorders in fetuses, Dr. Koop repeatedly characterizes the procedure as a "search and destroy mission." Christianity Today, December 15, 1978. Volume 23. In doing so, Dr. Koop, completely ignores its many beneficial uses other than those relating to abortion and accuses each and every woman who decides to undergo the procedure of setting out to "search and destroy."

Dr. Koop has also made statements regarding the euthanasia movement in Germany during World War II which lead me to seriously question his fidelity to factual basis for many of his revelations. In "The Sanctity of Human Life", Dr. Koop states that 267,000 of "the mentally ill, the retarded, criminal, and defective babies" were "gassed and then destroyed by cremation" in Germany "before Hitler came to power." He stated

this as evidence that there was insufficient regard for the sanctity of human life among members of the medical community and that such disregard contributed to Hitler's coming into power. I have corresponded with Dr. Koop regarding his statement and have yet to see any documentation which indicates that these people were gassed and cremated before Hitler came to power.

Mr. President, Dr. Koop's passionate defense of human life does not justify his intolerance and castigation of those whose views do not parallel his own. Nor does it give him free reign to create facts in order to draw analogies between legalized abortion and what happened in Germany. Because of his extreme statements and intolerance of others, I have strong reservations about his ability to function as Surgeon General. Such extremism and intolerance may also prevent him from working with or gaining the support of the public as he attempts to find solutions to this country's public health problems.

I thank my friend from Utah for yielding.

Mr. HATCH. Mr. President, I yield such time as he may require to the distinguished Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I rise to support a very distinguished Pennsylvanian, Dr. C. Everett Koop, for the office of Surgeon General of the United States.

As a fellow Pennsylvanian, I have known Dr. Koop professionally for many years. I represented Dr. Koop and others on the staff of Children's Hospital in securing a court order in 1977 to authorize the separation of Siamese twins, who were born with a single heart, in order to preclude the possibility of a homicide prosecution. Prior to that, Dr. Koop testified on behalf of a client whom I represented. My former law firm, Dechert Price & Rhoads, has been counsel for many years to Children's Hospital of Philadelphia where Dr. Koop has served for many years.

I recommend Dr. Koop for confirmation notwithstanding our personal differences on an issue which has created substantial controversy over his appointment. Without elaborating on this complex issue, suffice it to say that I have been opposed to amending the U.S. Constitution to reverse Wade against Roe because of my view that it is unwise to amend the Constitution in response to specific Supreme Court decisions. Dr. Koop has, in the past, expressed himself in strong terms in opposition to abortion.

In my judgment, the abortion issue is not relevant to the issue of Dr. Koop's confirmation. The duties of the Surgeon General of the United States do not affect the administration of the laws relating to that subject. In addition, Dr. Koop has advised me that he has said and written all that he has to say about the subject of abortion and does not intend to use the position of Surgeon General to advance those views in any way.

Beyond that issue of controversy, I believe that Dr. Koop is a man of extraordinary ability who has the capability to perform the duties of Surgeon General with great distinction.

The Surgeon General has four major areas of responsibility:

First. Aging and care for the elderly;

Second. Care for the disabled;

Third. Administration of public health services; and

Fourth. Negotiation of bilateral health treaties with nations of the Third World.

In all these fields, it is my strong view that Dr. Koop is well qualified to discharge the duties of Surgeon General by reason of training, temperament and experience. He has extensive experience in care for the elderly. In fact, the issue of age was a potential disqualification which has since been removed. Notwithstanding Dr. Koop's own age, he has extraordinary stamina and vigor. While his own chronological age is not a disadvantage in terms of capability, it gives him special insights into the problems of those in their midsixties and beyond.

Dr. Koop has extensive experience in working with the disabled. This is the International Year of the Disabled, and Dr. Koop's background in this field gives him unique capabilities in the important work of the Surgeon General.

As to the administration of the Public Health Service, Dr. Koop is an experienced administrator and a doctor's doctor. His lack of specific experience in this field poses no impediment to his potential for fine service in this area.

Perhaps Dr. Koop's capabilities can best be evidenced in the negotiation of bilateral health treaties with some 30 nations in the Third World. He has already chaired a meeting in Japan in his capacity as Deputy Assistant Secretary of Health.

While medicine is obviously nonpolitical, it is of enormous benefit to the United States to have an experienced medical practitioner who can earn the good will of Third World nations by providing real medical service.

That kind of care on a matter of great importance then makes it easier for our State Department to function in the political arena.

Dr. Koop's 35 years of experience with Federal programs as a practicing physician gives him special insights into how to administer these programs. He knows, in a very practical sense, what to do and what not to do.

As a person, Dr. Koop possesses unusual strength and obvious capability.

Of the many physicians whom I have known, none has impressed me more with his or her credentials or capabilities.

Notwithstanding the issue of age or ideological differences, it is my conclusion that the U.S. Government will be fortunate to have Dr. Koop serve as Surgeon General.

Mr. President, I yield the floor.

Mr. HATCH. Mr. President, I yield 2 minutes to the distinguished Senator from Oklahoma.

Mr. NICKLES. Mr. President, I thank the distinguished Senator from Utah.

Mr. President, today I am honored to have the opportunity to express my confidence in the President's nomination for the U.S. Surgeon General, Dr. C. Everett Koop.

I have had the privilege of visiting with Dr. Koop and listening to his testimony and responses to the Labor and Human Resources Committee. In both encounters, I have been most favorably impressed with the nominee.

Mr. President, certainly the first thing that stands out to anyone who reviews Dr. Koop's qualifications is his tremendous contribution to the field of pediatric surgery. Indeed, he was among the first physicians to enter the subspecialty of pediatric surgery and has practiced in that area longer than any other physician.

Such excellence in his chosen field speaks to me of Dr. Koop's ability and motivation to excel and be the very best in everything that he undertakes.

Dr. Koop's medical involvements outside of pediatric surgery also attest to the fact that he is a man with experience and concern far broader than the area of pediatric surgery.

His involvements include such a diverse assortment as establishing health clinics with preventive health services for the Tarascan Tribe of Central Mexico, assisting the medically underserved in Harlem and Philadelphia, the establishment and continuation of rehabilitation and counseling for disabled children, and substantial contributions in the reduction of infant mortality through things such as the first newborn intensive care unit of the United States.

In examining the breadth of Dr. Koop's qualifications for the position of Surgeon General, of the Public Health Service, it is important to look also at the previous Surgeon Generals' backgrounds. Of the last seven, only one Surgeon General has had a masters degree in public health. The others came to the position much as Dr. Koop does, through excelling in their chosen medical fields, such as cancer specialization, pediatrics, and internal medicine. Mr. President, I am confident that Dr. Koop will serve our country well, as he takes his position as Surgeon General.

I wish him the very best and look forward to working with him in a joint effort to search out and alleviate areas of national need and priority in health.

I urge my colleagues to support the nomination.

Mr. HATCH. Mr. President, I yield 2 minutes to the distinguished Senator from South Carolina.

Mr. THURMOND. Mr. President, I thank the distinguished Senator from Utah.

Mr. President, today, I am pleased to support the nomination of Dr. C. Everett Koop to be Surgeon General of the Public Health Service.

For the past several months, Dr. Koop has been serving with distinction as Deputy Assistant Secretary for Health and Human Services. Prior to joining the Reagan administration, he was a prominent pediatric surgeon at Children's Hospital in Philadelphia. He was a pioneer in surgery on newborn children, was credited with improving anesthesia for children, and performed a heralded separation of Siamese twins in 1974.

Mr. President, Dr. Koop is a distin-

guished physician who is eminently qualified to hold this position.

His many accomplishments in the field of medicine, particularly his extensive background in public health services, are a testimonial of his dedication to continued improvements in the quality of health care delivered to disabled persons, older Americans, and children.

His term as Surgeon General will, I am confident, be a great service to our country, a service from which we all shall benefit.

Mr. President, I repeat, I am pleased to support Dr. Everett Koop to be Surgeon General of the Public Health Service, and I hope the Senate will confirm his nomination.

Mr. GRASSLEY. I intend to vote for the nomination of Dr. Koop to be Surgeon General. He meets the criteria of experience, wisdom, and proven medical accomplishment. His leadership in the field of pediatrics, both in practice and as an editor and writer, provides the proper dimensions needed in the field of public health.

Mr. President, I would be derelict in my duty as a member of the Senate Special Committee on Aging if I did not call my colleagues' attention to the devious games played with Dr. Koop's nomination in the name of age discrimination. I urge all my fellow Senators to check the record of proceedings on this nomination—particularly those Members who may vote against this nomination. Both in the Senate and in the other body, the matter of Dr. Koop's age became a technically legitimate issue for opposing his nomination.

Dr. Koop is over age 65 and therefore could technically be kept from filling this post for that reason alone. Fortunately, wording within the Omnibus Budget Reconciliation Act, agreed to in conference, "removes this arbitrary age restriction" from present law as it applies to appointees to Surgeon General of the U.S. Public Health Service Corps. This agreement goes on to specify that the nominee be judged only on "significant experience and specialized training in public health programs."

Dr. Koops, thanks to this amendment, will be judged by merit alone—but note, this amendment applies to this position only.

No Member of this body honestly believes this restriction should continue to apply in any sector of employment—public or private. Is it not time this body moved toward removing all age discrimination in employment? Is it not time we let ability rather than chronology determine employment in this country? Is it not time we removed this aid to pettifoggery from those who would use it to cloud other reasons for foreclosing employment to capable people like Dr. Koop?

Mr. HATCH. Mr. President, the only real issue that has been raised is, does Dr. Koop have significant health experience?

Clearly, it is up to the Senate to decide whether Dr. Koop meets the statutory requirements of "significant public health experience." A national association has said he does not have such experience and the main basis for their claim appears to be that he is not a career public health professional.

However, career dedication to public health is not the statutory standard, nor should it be. The standard is whether, in addition to a long and distinguished career as a clinician, Dr. Koop has also achieved "significant public health experience." We heard nine witnesses describe Dr. Koop's career and their favorable assessment of his public health work.

I asked Dr. Arnold Muller, Secretary of Health for the State of Pennsylvania, the Chief Public Health Officer in the State, "Does Dr. Koop have significant public health experience?"

He said yes. He also said about Dr. Koop:

He is imaginative, he is innovative, he has leadership qualities, and there is absolutely no question in my mind that he has contributed greatly to the broad area of public health.

I dare say that my colleagues in the public health field—many if not all of them would give their eye teeth to have contributed even one, let alone all, of the many things that this man has to American medicine and to American life.

I also asked Ira L. Myers, a physician with a masters in public health and the Chief Health Officer for the State of Alabama for the last 19 years, "Does Dr. Koop have significant public health experience?"

On the basis of his own long career as a public health professional, Dr. Myers unhesitatingly asserted:

I am personally convinced this Nation needs the highest quality of medical leadership in public health programs. Wisdom, experience and proven health and medical accomplishments are essential to sound public health programs . . . I believe Dr. C. Everett Koop to be the man who meets the above qualification and will add integrity, prestige, and sound judgment to the Office of Surgeon General.

I heard these two career public health professionals support Dr. Koop with regard to "significant public health experience." I have no reason to doubt their words or their ability to make sound judgment in this matter. The Senate should clearly heed their assessment.

As I noted, my committee heard from more than just Drs. Muller and Myers. I ask two of Dr. Koop's medical colleagues and a distinguished Philadelphia businessman and hospital director about Dr. Koop's experience in public health. The following discussion ensued:

Dr. D'ANGIO. I consider them, his public health credentials, to be extraordinary. I know of no other practicing physician who has extended himself so far around the world and in these areas. Very briefly, I think if an interest in and a demonstrated involvement in the health of the public is any measure, he has had extraordinary public health experience.

Dr. DOWNES. I would concur. I also would like to emphasize that in the evolution of the concept of care in Dr. Koop's mind it would be directed at several levels—the patient at hand, the group of patients we were dealing with at Children's Hospital, but almost immediately he would begin to think beyond that—What impact would this technique have on the care of children in the United States and around the world. He has always thought globally, as has been mentioned. If indeed the essence of public health is improvement of the health of the citizens of the country, I think Dr. Koop's habits of thought over a 40-year career will equip him to serve in that capacity.

Dr. WOOD. I am continually amazed in talking to him and reading of him of his worldwide connections, which deal largely with public health—many of them—in underdeveloped countries.

Further issues on which Dr. Koop responded during the hearing:

Why is public health experience not prominently displayed on Dr. Koop's résumé?

Dr. KOOP. I am not a person of narrow vision. . . . I saw a great many problems that were initiated in my own thinking by the clinical things that I faced. I saw them to be problems affecting more than people individually but segments of society. I addressed them and tried to establish leadership roles. I brought people together to accomplish these tasks. Many of them were done in the voluntary segment of my life. Therefore, they were not included in my curriculum vitae.

I never had planned to have a role in public life. If 35 years ago I had been planning for this at the end of my surgical career, I would certainly have included all those things as I went along the road surgically.

Will Dr. Koop use the post of Surgeon General to lecture the country on abortion?

Dr. KOOP. I think you should know first about the conversation I had with Secretary Schweiker the day that I arrived in Washington. I went and told him that I felt that I had said all that I should say and written all that I should write about the abortion issue. It was not my intent to use any post that I might have in the Government as a pulpit for an ideology. I thought that was improper.

What are Dr. Koop's views on family planning?

Dr. KOOP. I am not opposed to contraception; I am not opposed to family planning. I think we have to have as much research as is possible formed in these two fields because I think they are the answers to some of the things about which I am concerned in reference to abortion and other problems in medical ethics.

Senator KENNEDY. What responsibilities, if any, will you have in the administration of the family planning program?

Dr. KOOP. None at all that I know, sir.

What of his public health activities is Dr. Koop the proudest of?

Dr. KOOP. If public health is the protection of the public disease, if it is health promotion, and if it is the restoration of health, then I think the things I would be most proud of would be, in the public health realm, what I have done to reduce infant mortality. I think that was a really significant thing.

I think that what I did in reference to the "Readers Digest" fellowships to prepare a whole generation in public health, particularly for service in the Third World countries; I think the things I have done for children to protect them from injuries such as from radiation, from the burns that they got from corrosive materials, and the day-to-day life that I had in Philadelphia dealing with a very large underserved population in the black ghetto—I think these are public health service at its essence.

● Mr. PACKWOOD. Mr. President, women comprise over half the population of the United States. Their health and well-being are important aspects of public health. The nomination we are considering today is for the position of

Surgeon General—chief spokesperson for public health in this country. I do not believe the well-being of a majority of our society will be well-served by the confirmation of Dr. C. Everett Koop to be Surgeon General.

Dr. Koop has been a vocal opponent of legalized abortion, likening the post-Roe against Wade era to "the beginnings of the political climate that led to Auschwitz, Dachau and Belsen."

Dr. Koop has said he supports family planning, but he opposes any form of contraception. Distinguished between birth control and contraception, Dr. Koop said:

Birth control is a big umbrella that covers any kind of plan or procedure that prevents birth. Contraception is a form of birth control. Many people use the terms contraception and birth control as if they were synonyms; they're not.

The morning-after pill is not a contraceptive, but it is a birth control medication.

An IUD is not a contraceptive, it is something that's effective in birth control . . . The definition of pregnancy when I went to medical school and when you were born was that period of time between fertilization of the egg, or conception, and delivery of the baby.

Now, pregnancy is called that period of time between implantation of the fertilized egg in the uterine wall and the delivery of the baby. If pregnancy doesn't begin until implantation, and you prevent implantation with an IUD, the patient doesn't have to face the face that she is destroying a fertilized egg that could have become a baby.

If Dr. Koop, as Surgeon General, could impose his beliefs, he would deny the majority of women using contraception today a primary means of preventing pregnancy.

Dr. Koop contends that unwanted pregnancies are not a public health concern. I disagree. Today, even the best birth control measures are subject to substantial failure rates. The methods Dr. Koop opposes are widely used. If those methods were no longer available, we would have a major public health problem.

Dr. Koop opposes amniocentesis. He says:

The whole system is to find out if there is something wrong with the fetus. And if the fetus is defective some parents will decide to abort it. Since I take a high view of life, I see amniocentesis as a search and destroy mission.

Birth control, amniocentesis, abortion; Mr. President, Dr. Koop is no friend of the women of this country.

Certainly each and every public servant has the right to his or her own beliefs. But Dr. Koop has made this a personal crusade—one he would like to carry on from the visible public position of Surgeon General of this country.

For the first time in its history, the American Public Health Association is opposing a nominee for Surgeon General. Labor unions oppose Dr. Koop. And several other groups interested in public health in this country have announced their opposition to this nomination. I should submit for the RECORD a list of organizations and newspapers opposing Dr. Koop.

Mr. President, serious questions have been raised about the qualifications and activities of Dr. Koop. I urge my colleagues to join me today in opposing this nomination.

The list follows:

WHO OPPOSES DR. KOOP'S NOMINATION?

The following is a partial listing of those groups who oppose this nomination:

The American Public Health Association;
The United States Conference of City Health Officers;
The American Nurses Association;
The United Mine Workers of America;
The United Steelworkers of America;
The International Ladies Garment Workers;
The American Federation of State, County, and Municipal Employees;
The Service Employees Union;
The Association of Teachers of Preventive Medicine;
Women and Health Roundtable;
The National Gay Health Coalition;
B'nai B'rith Women;
Planned Parenthood;
Center for Science in the Public Interest;
Women's Health Network;
National Organization for Women;
American Association of University Women; and
The United Presbyterian Church in the U.S.A.

In addition, the following newspapers have opposed Dr. Koop's nomination:

The New York Times;
The Los Angeles Times;
The Boston Globe;
The Washington Star;
The Detroit Free Press;
St. Louis Post-Dispatch;
The Philadelphia Bulletin;
The Louisville Times;
The Sacramento Bee;
The Philadelphia Inquirer;
The Miami Herald; and
The Hartford Courant.

Mr. CRANSTON. Mr. President, I will vote against Senate confirmation of Charles Everett Koop to be Surgeon General of the U.S. Public Health Service.

The Surgeon General is generally regarded by the public as the Nation's chief health officer and top spokesperson on matters of public health. For example, reports of the Surgeon General on issues such as smoking, nutrition, personal health habits, the status of our Nation's health, and the adequacy of the work force to meet the health needs of our citizens, as well as the design of educational programs to train new health professionals, have had a profound effect on public and professional views. Without question, the Surgeon General's findings and recommendations strongly influence health policy in this country.

The Office of Surgeon General has long been a nonpartisan position because of its commonly accepted role of fostering the prevention of disease and promoting health for all our citizens. The Public Health Service Act provides that the Public Health Service shall be administered by the Surgeon General under the supervision of the Secretary of Health, Education, and Welfare—now Health and Human Services.

The Public Health Service consists of six agencies: the Alcohol, Drug Abuse, and Mental Health Administration; the Centers for Disease Control; the Food and Drug Administration; the Health Resources Administration; the Health Services Administration; and the National Institutes of Health. The major functions of these agencies are to assist communities with the development and improvement of health resources, to conduct and support research in the biomedical and related sciences, to disseminate scientific information; and to protect the public's health against communicable diseases, impure and unsafe foods, drugs, cosmetics, and other potential health hazards.

Although the 1966 reorganization plan transferred the line responsibility for daily administration of the Public Health Service to the Assistant Secretary of Health, the Surgeon General continues to play an important and prominent role in setting and influencing public health policy.

Dr. Koop's nomination is opposed by the American Public Health Association because of his lack of expertise or recognized ability in public health matters such as disease control, environmental protection, occupational health, and administration of public health programs. Dr. Koop is the first nominee for Surgeon General ever opposed by this respected association which is the oldest and largest professional public health society in the world.

His nomination is also opposed by many women's organizations because of his views on the role of women in our society and equal rights for women and his outspoken condemnation of medically accepted forms of contraception, of accepted medical procedures such as amniocentesis, and of biomedical research in the area of reproductive health. He has repeatedly, and in a highly public manner, expressed intolerance toward views that diverge from his own.

The administration, in an attempt to defuse the opposition that has grown to Dr. Koop's nomination, has asserted that the Surgeon General's authority is limited and that the directors of the agencies within the Public Health Service report directly to the Assistant Secretary for Health and not through the Surgeon General. In other words, the administration has indicated, if Dr. Koop is confirmed, his duties would be limited to largely symbolic duties. That argument misses wide of the mark.

The Office of Surgeon General is indeed a symbolic position, and its importance is mostly due to its symbolic significance. Surgeon General of the United States is in fact the Nation's most prominent health position. It seems to me to be a serious mistake to appoint to the position of health spokesperson for the Nation an individual whose views on major health issues are viewed by so many health professionals and organizations as extreme and intolerant. Such a divisive nomination can only serve to weaken the authority and respect which has historically been bestowed on the Surgeon General by the general public and by professionals in the health field.

Mr. President, Dr. Koop is, by all accounts, a respected pediatric surgeon and a man with a great sensitivity to children and disabled and handicapped individuals. I do not doubt his sincerity or devotion to the practice of medicine. However, his lack of significant experience in public health administration, his very strong

doctrinaire beliefs and pursuit of public policies in accordance with those beliefs, and his strident opposition to and intolerance toward those who do not share his views—irrespective of scientific opinion—lead me to conclude that the appointment of Dr. Koop to the position of Surgeon General would impede the effectiveness of this important office.

It is extremely important to retain the American people's trust that the advice, recommendations, and decisions made by the Surgeon General of the United States are politically unbiased and based on the most reliable medical and scientific data available. Dr. Koop's qualifications for the position of Surgeon General of the United States Public Health Service do not merit the Senate's vote of approval. I urge that the Senate not consent to this nomination.

Mr. President, I ask unanimous consent that editorials of June 8 and May 11, 1981, from the Los Angeles Times and the Washington Star be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, June 8, 1981]

KOOP: BAD MEDICINE

The Reagan Administration has made clear its intention to nominate Dr. C. Everett Koop to be U.S. surgeon general. He appears to be uniquely unqualified for the job.

The surgeon general directs the 7,000 officers of the U.S. Public Health Service and, through reports on such questions as smoking and nutrition, is one of the nation's top spokesmen on public health. The person filling the job should have a background in community health—preventive medicine or disease control, for example.

Previous surgeons general have had such experience. Leonard A. Scheele, in the job from 1948 to 1956, had headed the National Cancer Institute. Leroy E. Burney, surgeon general from 1956 to 1961, had been an Indiana State Board of Health commissioner and a professor of public health and preventive medicine. Luther Terry, in the job from 1961 to 1965, headed clinics at the National Institutes of Health before his appointment. William Stewart, who served from 1965 to 1969, specialized in epidemiology and public administration. Jesse Steinfield, the last surgeon general before President Nixon abolished the job in 1973, had been deputy director of the National Cancer Institute. All five were members of the Public Health Service's commissioned officer corps.

President Carter reestablished the job in 1977, and went outside government to find a surgeon general. He selected the widely respected Dr. Julius B. Richmond, the chairman of Harvard Medical School's department of preventive and social medicine.

Koop has no such background. He is a pediatric surgeon from Philadelphia, and is noted for operations to separate Siamese twins. His training, his teaching and his medical experience have all been in surgery. He has no experience in public health—not in disease control, not in environmental protection, not in behavioral science, not in public administration.

In extravagant language that must startle even some of his fellow believers, Koop has opposed not only abortion but also population control and amniocentesis.

He has labeled amniocentesis, a major development allowing parents to learn of possible genetic defects in their unborn children, as a "search-and-destroy mission."

In a commencement address in 1979 to the Philadelphia College of Osteopathic Medicine, Koop made disparaging remarks about "planned parenthood" and contended that population control represents "national suicide."

Speaking as though he were an observer looking back from the year 1999, Koop predicted that Americans would have to carry "internal passports" by then, and that no child would be "declared alive until 72 hours after birth in order to let its parents decide whether they wanted the baby or not."

Koop wrote in 1978 in the Journal of the Medical Society of New Jersey that abortion leads to infanticide and then to euthanasia—"indeed, to the very beginnings of the political climate that led to Auschwitz, Dachau and Belsen." The logic that compares a surgical procedure with the Holocaust is incomprehensible.

The American Public Health Assn. has opposed Koop's nomination, a step that the professional organization has never before taken in its 109-year history. William McBeath, the association's executive director, fears that Koop would politicize what has always been a nonpartisan office.

Koop's nomination has been delayed because of a technicality about his age. He is 64, and that is the limit for holding the surgeon general's job. But Koop's age should not be the problem; the problem is his lack of background and his opinions. Final judgments on Koop's qualifications for the job must in fairness await his testimony after his nomination. But he certainly looks like the wrong choice.

[From the Washington Star, May 11, 1981]

THE WRONG JOB FOR DR. KOOP

A good government job surely could be found for Dr. C. Everett Koop, whom President Reagan is said to favor for Surgeon General of the U.S. Public Health Service. But it ought to be some other job.

Dr. Koop is surgeon-in-chief of Children's Hospital of Philadelphia and professor of pediatric surgery at the University of Pennsylvania Medical School. His gifts as a pediatric surgeon are said to be exceptional. He is a man of integrity and skill.

Why, then, do so many oppose him for the job of surgeon general? The answer is complicated by Dr. Koop's strong views on abortion and related matters. For example, he has called amniocentesis, a medical procedure used to spot Down's syndrome in fetuses, a "search and destroy mission." Such notions do not win universal applause, but they have confused the question.

But the real difficulty is that Dr. Koop, in spite of impressive medical credentials, has little background in public health. Although he served on the board of an organization which promoted hospital construction and other programs in Third World countries, and was active in procuring a grant from the late DeWitt Wallace to finance medical fellowships to poorer nations, his career has been devoted almost entirely to practicing, lecturing and writing in his own field.

It is that which has persuaded Dr. William H. McBeath, executive director of the American Public Health Association, to call him "uniquely unqualified" and to call his appointment "an unwarranted affront to every American public health worker." Dr. Koop's nomination is the first that the association has opposed in its 109 years.

Dr. McBeath put this way: "Why do we say that being a specialized medical clinician is not sufficient qualification for surgeon general? Are not the biomedical and clinical sciences at the core of medical education and practice, also importantly related to public health? Of course they are. But only the narrowest form of medical chauvinism would permit the view that any competent clinical physician is automatically equipped to direct organized community health endeavors."

Dr. Koop's medical credentials are impressive. But comparing a pediatrician to a public health expert, although both may be doctors, is like comparing an aerospace worker to a bridge builder, although both may be engineers. Caring for individual patients, Dr. McBeath observes, has little to do with the causes of disease and their control—the work of public health.

The surgeon general heads the Center for Disease Control, the National Institutes of Health, the Health Resources Administration, the Health Services Administration and the Alcohol, Drug Abuse and Mental Health Administration. He has become the nation's primary spokesman on public health issues. The post has frequently been filled from the corps of the U.S. Public Health Service—becoming what Dr. McBeath calls the "commanding officer." The exceptions to that, such as Dr. Julius B. Richmond, the most recent surgeon general, have nevertheless long been active in public health. Dr. Koop has not.

The Senate has the final say on a nomination, but the matter has been stalled in the House by Dr. Koop's age. He is 65 and under present law a surgeon general may be no older than 64. In an attempt to lift the legal age limit, Sen. Jesse Helms recently tried to amend an unrelated bill, which the House last week passed without the Helms amendment. But nothing can prevent the senator from trying again when that bill—or any bill—reaches the Senate.

It is a pity that it has come down to this technicality, for Dr. Koop certainly is not too old for the job. He is also entitled to his opinions, and the Reagan administration is entitled to appoint to high posts those who share its opinions.

Dr. Koop's views on various subjects may be distasteful to some and appealing to others; they don't disqualify (or qualify) him for various jobs in the Department of Health and Human Services or other agencies, although doctrinaire views are often a handicap. But for the job of surgeon general, his background—or lack of it—does raise insurmountable questions.

● Mr. WEICKER. Mr. President, I rise today to oppose the nomination of C. Everett KOOP, M.D. to be Surgeon General of the United States.

Mr. President, as a member of the Labor and Human Resources Committee, I have had the opportunity to review the credentials of Dr. Koop in great detail. The committee, under the chairmanship of my good friend from Utah, Senator HATCH, held 1 full day of hearings on the nomination and received testimony from a wide range of groups both supporting and opposing Dr. Koop. In addition, I have had the pleasure to meet with Dr. Koop in person to discuss his nomination.

Mr. President, there is no doubt in my mind that Dr. Koop is an eminently qualified surgeon. His achievements in the field of pediatric surgery are internationally known and his commitment to both the young and the elderly in our society is without question. My concern surrounding the nomination of Dr. Koop deals primarily with his lack of public health experience.

Mr. President, let me say that I do not oppose Dr. Koop's nomination on the issue of abortion. While I do totally disagree with Dr. Koop's position, I do not feel that his religious or moral beliefs should be the basis for our judgment in this matter. Rather, I oppose Dr. Koop on the basis of his limited public health and preventive health experience.

As the Nation's No. 1 health professional, the Surgeon General role is critical in the development and implementation of programs to meet the health needs of every citizen of the United States. In this respect, the Surgeon General should be an individual with the strongest possible education and training in the field of public health. While Dr. Koop is a prominent surgeon, he is not by training or experience equipped to deal with the array of public health concerns ranging from epidemics to restaurant inspections, from rodent control to sewage treatment.

Dr. Koop's clinical training is especially and exclusively geared to the amelioration of diseases in individuals, rather than the active promotion of health and health care in population groups. In my view, these two diverse medical/scientific approaches—treatment as compared to prevention—constitute different orientations, skills, and outlooks.

As I noted above, Dr. Koop's clinical training and experience are outstanding. The question before us is whether he is similarly, or even acceptably, trained and experienced in the field of public health. The answer is regrettably no, and for that reason I must oppose his nomination.●

● Mr. TSONGAS. Mr. President, the nomination of Dr. C. Everett Koop to be Surgeon General of the United States gives me a sense of deja vu. Once again, the question is not whether or not a nominee of the administration is qualified in his field of specialization. We must decide whether or not he is qualified for this particular position. I suggest that he is not.

Dr. Koop is a renowned pediatric surgeon, and by all accounts a brilliant clinician. But he is not an expert in the field of public health.

Public health has been defined as—

> The effort organized by society to protect, promote and restore the people's health, involving programs, services and institutions which emphasize the prevention of disease and the health needs of the population as a whole.

Its practitioners have given this Nation one of the finest public health systems in the world. They have done it through the study of preventive health, including its social and psychological factors as well as the physical elements.

Nothing that I have read about Dr. Koop suggests that he has developed comprehensive skills in public health. His nomination is an affront to the thousands of health professionals who have dedicated their careers to promoting the Nation's public health as a whole.

The position of Surgeon General is the highest ranking commissioned officer in the U.S. Public Health Corps. I believe the position deserves to be held by an individual who has some of the finest credentials in the field of public health. Professional interest and concern for the Nation's public health is not enough.

I am also troubled by Dr. Koop's position on abortion. I feel that abortion is an extremely personal decision made by a woman and her physician.

Dr. Koop does not admit the possibility that an abortion may be medically necessary. In the case of a fetus known to be deformed, for example, even if those defects bar any chance of survival, he opposes the mother's right to terminate such a tragic pregnancy. He also opposes amniocentesis, the medical procedure that can detect critical deformities, labeling it a "search and destroy mission." I am deeply concerned that someone with such a dogmatic view of this basic medical procedure may become spokesman for the Nation's public health.

Mr. President, I urge my colleagues to consider the impact of Dr. Koop's nomination on the public health field in general, and on women in particular. I will vote "no" on this nomination because I do not believe that Dr. Koop is qualified to lead us in quest for improved public health.●

● Mr. HEINZ. Mr. President, I am pleased to join my distinguished colleagues, Senator HATCH, and Senator HATFIELD, in supporting the nomination of Dr. C. Everett Koop to be Surgeon General of the United States.

As a fellow Pennsylvanian, I have long been aware of Dr. Koop's remarkable achievements in the field of individual public health. His contributions to the field of medicine extend far beyond the boundaries of the Keystone State; and his contributions to the field of health care extend far beyond the care of individual patients.

From his establishment of the first intennsive care unit devoted exclusively to the surgical neonate, to his establishment of an American-type medical school for the country of Ghana; from his founding of the first organization of American pediatric surgeons, to his development of clinics for the Indians of Central Mexico; from his extensive writings on medical treatment of the acute pediatric surgical patient, to his works related to the handicapped, the chronically ill, and the dying child; Dr. Koop has demonstrated tremendous expertise and capability.

Mr. President, I am aware that Dr. Koop has been an outspoken opponent of abortion and an advocate for the value of traditional roles for women. However, I believe that his personal views on these matters will in no way interfere with the manner in which he carries out the duties of the Office of Surgeon General. I have met with Dr. Koop, and have been assured that the post of Surgeon General will not serve as a pulpit from which to espouse his own personal viewpoints.

Mr. President, I am convinced that Dr. Koop will bring to this position a tremendous sensitivity and deep interest in the needs of the disabled, the elderly, and the children of our Nation. It is my belief that Dr. Koop will bring the same individualized approach to health care problems that he brought to the people of Pennsylvania and the United States, and the medically underserved people throughout the world.

Mr. President, I am convinced the President has nominated a man of extraordinary talent and achievement, and I am pleased to join in supporting such a distinguished Pennsylvanian and distinguished physician for the post of Surgeon General of the United States.●

● Mr. RIEGLE. Mr. President, regrettably, I will cast my vote today in opposition to the confirmation of Dr. C. Everett Koop to the post of Surgeon General of the United States. I do so with a great deal of reluctance, but my evaluation of this nomination during its consideration in the Labor and Human Resources Committee, on which I sit, has left me with the belief that there are many troubling questions concerning Dr. Koop's qualifications and views as they relate to his ability to serve as the Nation's highest public health official.

The Surgeon General is the commanding officer of the 7,000-member Public Health Service Commissioned Corps, and the senior Federal public health professional. The individual in this position has a high public profile at home and abroad. He or she must inspire the confidence of the American people, who look to the Surgeon General for sound advice on a wide variety of public health questions.

The medical credentials of the nominee, Dr. Koop, are impressive and his contributions to the study and practice of pediatric surgery are well documented and acknowledged by his colleagues. However, there are critical differences between the private practice of clinical medicine, and the concerns and responsibilities of the Nation's No. 1 public health official. The focus of public health efforts is the active promotion of health and the prevention of ill health across the entire Nation. This monumental task calls for skills, expertise and experience not traditionally associated with the practice of clinical medicine—in the areas of disease control, environmental protection, behavioral science and public administration.

The American Public Health Association opposes the nomination of Dr. Koop to the post of Surgeon General precisely because they believe that Dr. Koop does not possess the requisite training or experience in these vital public health areas, as required by statute. Numerous other groups and organizations, representing the health needs of millions of Americans have joined the APHA in their opposition to this nomination. They include the National Organization for Women, Planned Parenthood, the American Nurses Association, the United Mine Workers, the United Steelworkers and B'nai B'rith Women.

These organizations and others have been joined by a score of newspapers who have lent editorial voices to the opposition to the President's nominee. These newspapers include the New York Times, the Los Angeles Times, the Boston Globe, the Washington Star, as well as the Detroit Free Press in my own home State of Michigan. These disparate organizations, groups and publications speak with one voice as they question the appropriateness of Dr. Koop's credentials for the post of Surgeon General. Regrettably, I must concur with their view.

In addition, the position of Surgeon

General requires a person able to enunciate broad public policy, even in those cases where it might conflict with one's private views or preferences. It is not a position that should ever be used to put forward one's private and personal ideological views. This assignment requires one who must discharge a broad public trust in behalf of an entire nation representing multiple viewpoints with balance, sensitivity and even-handedness.

I am concerned about the strongly held views Dr. Koop has expressed regarding the proper role of women and the nature of their participation in society. Dr. Koop is, of course, entitled to his own perspectives on any and all social issues. However, I cannot help but be concerned about his emphatic views about women impacting his ability to adequately deal with the public health needs of American women—fully half the population of the Nation.

While Dr. Koop may believe that women should devote themselves exclusively to the roles of wife and mother, the reality of most women's lives in 1981 is quite different. Women, by choice and/or necessity are in the workplace to stay, in addition to their family responsibilities. Women are increasingly vulnerable to various illnesses which have long been deemed public health problems, including alcoholism, drug abuse, and other stress-related conditions. If the public health needs of the women of America are to be met, there must be a recognition of and respect for the multiplicity of roles women play and will undoubtably continue to play in our society.

Dr. Koop has long years of dedicated service in his chosen profession, and his achievements in the area of pediatric medicine have been of important value. These efforts are worthy of recognition and praise, but they are no substitute for the broader credentials required for America's Surgeon General, qualifications Dr. Koop does not possess.●

Mr. MOYNIHAN. Mr. President, I rise today to address the nomination of Dr. C. Everett Koop to be Surgeon General and Medical Director of the Public Health Service. Dr. Koop is a brilliant pediatric surgeon who has distinguished himself through his pioneering work with handicapped, disabled, and dying children. His competence is unimpeachable, his compassion for his patients and their families well established. Yet I must now express my opposition to his appointment as the Nation's chief spokesperson on matters of public health policy.

The substance of my objection lies in Dr. Koop's inexperience in the area in which he has been nominated to serve. Among other duties the Surgeon General commands such agencies as the National Institute of Health, the Food and Drug Administration, and the Public Health Service. Scientific reports and official pronouncements on such vital issues as nutrition, smoking, disease prevention and health promotion are issued under the aegis of the Surgeon General. The appointee to this position becomes the senior Federal professional in the area of public health. The key phrase here is public health. As Dr. William H. McBeath, executive director of the American Public Health Association, has so pointedly asserted, there is a critical difference between private medicine focused on the care of ailments in individuals and public health, which is concerned more with prevention of diseases in entire populations. For this reason, Dr. Koop's almost exclusively clinical orientation, fruitful as it has been medically, is a severe handicap for the position of Surgeon General. I quote Dr. McBeath:

> The almost exclusive orientation for one-to-one, provider-patient relationships, so advantageous for the clinician, can actually be a disadvantageous distoration for the community practitioner committed to the broader target of equitable programming for a total population.

On these grounds, the American Public Health Association has concluded that Dr. Koop is almost "uniquely unqualified" on account of his "wholly inadequate background." Never before in its 109-year history has the APHA opposed a nomination for Surgeon General, and I take their reservations seriously.

Mr. President, I will be voting against Dr. Koop as the nominee to be Surgeon General and Medical Director of the Public Health Service, and urge my fellow Senators concerned with the importance of appropriate professional qualifications to do likewise.

Mr. BRADLEY. Mr. President, a Senator never lightly undertakes a vote in opposition to a presidential nomination. A President should be able to form his administration with appointees of his choice, so as to assure his command of executive branch policymaking. The Senate's "advise and consent" responsibilities under the Constitution should be withheld only in the rare cases where the nominee fails to meet the qualifications required for the performance of the job to be undertaken.

Mr. President, I find myself in the unhappy situation of opposing the nomination of Dr. C. Everett Koop for the position of U.S. Surgeon General, the commanding officer of the Public Health Service commissioned corps. I do not dispute his fine record in clinical medicine and service to individual patients. Nor do I believe that his age is relevant to the issue. But I do dispute his qualifications to hold the senior Federal public health job and to serve as the Nation's primary professional spokesperson on matters of national public health policy. After studying the record, I have concluded that Dr. Koop lacks any of the public health background that is essential for one who would hold the position of Surgeon General. He has never had responsibility for, nor had significant involvement in, public health programs at the international, national, State or local level.

Dr. Koop's record of service to individual patients is an impressive and laudable one. His career is exemplary in his work with newborns, with disabled and handicapped children, and with medically disadvantaged and underserved children. He has cared about the patients who sought his help. Even more, he reached out to individual children in need who might not otherwise have seen a doctor. His work in the Dominican Republic to provide treatment to sick children is an outstanding example of a physician extending himself to relieve individual suffering.

But let us be clear. These experiences, as admirable as they are, do not constitute a background in public health. They are primarily efforts at improving patient care, examples of the classic practice of clinical medicine.

Dr. Koop's extensive background in clinical medicine cannot substitute for public health experience, and the reasons lie in the differences between clinical medicine and public health. Clinical medicine is focused on the care of patients and the cure of their individual ailments; it is concerned with the diagnosis and treatment of disease in the individual. Public health, in contrast, focuses on the active promotion of health in the community as a whole and the prevention of ill health in population groups. Public health is concerned with the varied causes of disease and their control in the community and its larger environment through organized efforts. Examples would be environmental sanitation programs; public programs of education on topics such as nutrition, sanitation practices, smoking and exercise; and the organization of large-scale programs of disease prevention, such as inoculation against childhood illnesses. While individuals are the beneficiaries of such public health efforts, the emphasis is on setting in place systems of health promotion and disease prevention for the larger community and for at-risk groups within the population.

Dr. Koop has scant experience in these complex issues, which are so removed from the realm of individual patient care but so central to the public health responsibilities of the Surgeon General. I must therefore vote against Dr. Koop's confirmation and urge the President to seek an individual with public health experience for this vital position as America's spokesperson on public health.

Mr. GORTON. Mr. President, I would like to say a few words regarding my vote today on the nomination of Dr. C. Everett Koop as Surgeon General of the United States. I will vote in favor of the nomination of Dr. Koop because it is my belief that the President is, absent extraordinary circumstances, entitled to the appointment of his choice to officers in which the appointees serve at his pleasure. But I will vote for this nomination with severe reservations.

As Surgeon General, Dr. Koop will be charged with the duty of promoting the highest level of health care achievable for all Americans. It is my belief that in carrying out that duty there is no room for the imposition of personal value judgments. Dr. Koop is certainly entitled to his view on appropriate lifestyles or the proper role of women in society, but as Surgeon General he should not use his position directly or indirectly to impose his personal views on those whom he is charged with serving. I hope that Dr. Koop will recognize this fact and will

refrain from public statements or actions which would cast doubt on his objectivity. I urge him to avoid even the appearance that he may be unwilling to separate his personal beliefs from the great questions of public policy about the provision of health care with which he will be faced.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays have already been ordered.

The Senator from Massachusetts has 1 minute and 42 seconds remaining.

Mr. KENNEDY. I yield back my time, Mr. President.

Mr. HATCH. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is, Will the Senate advise and consent to the nomination of Dr. C. Everett Koop, of Pennsylvania, to be Medical Director in the Regular Corps of the Public Health Service, and Surgeon General of the Public Health Service? On this vote, the yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. BUMPERS (after having voted in the negative). On this vote I have a pair with the Senator from Missouri (Mr. EAGLETON). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Illinois (Mr. DIXON), the Senator from Missouri (Mr. EAGLETON), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Montana (Mr. BAUCUS) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 68, nays 24, as follows:

[Rollcall Vote No. 379 Ex.]

YEAS—68

Abdnor	Ford	Melcher
Andrews	Garn	Murkowski
Armstrong	Gorton	Nickles
Baker	Grassley	Nunn
Bentsen	Hatch	Pell
Boren	Hatfield	Percy
Boschwitz	Hawkins	Pryor
Byrd, Harry F., Jr.	Hayakawa	Quayle
Byrd, Robert C.	Heflin	Randolph
Cannon	Heinz	Roth
Chiles	Helms	Rudman
Cochran	Hollings	Sasser
Cohen	Huddleston	Simpson
D'Amato	Humphrey	Specter
Danforth	Jackson	Stafford
DeConcini	Jepsen	Stennis
Denton	Johnston	Stevens
Dole	Kassebaum	Symms
Domenici	Kasten	Thurmond
Durenberger	Lavalt	Tower
East	Lugar	Wallop
Exon	Mattingly	Warner
	McClure	Zorinsky

NAYS—24

Biden	Inouye	Packwood
Bradley	Kennedy	Proxmire
Burdick	Levin	Riegle
Chafee	Mathias	Sarbanes
Cranston	Matsunaga	Schmitt
Dodd	Metzenbaum	Tsongas
Glenn	Mitchell	Weicker
Hart	Moynihan	Williams

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Bumpers, against.

NOT VOTING—7

Baucus	Goldwater	Long
Dixon	Leahy	Pressler
Eagleton		

So the nomination was confirmed.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

THE U.S. STRATEGIC PROGRAM

(The following statement was made earlier and is printed at this point in the RECORD by unanimous consent:)

Mr STENNIS. Mr. President, we are soon going to be in the midst of decision time with reference to the highly important matter of our military appropriations bill and its provisions concerning primarily our strategic forces, particularly with reference to the B–1 bomber, the proposed Stealth bomber, the MX, and that part of the basing mode that may go with it under the most recent recommendation of the President.

I have been into this problem field a good number of years from the time that missiles were first developed, and on down through those years when we had the Arms Limitation Treaty passed, and when we had the MX–1 and the proposed MX–2, and on down to the present time.

I said here on the floor in reference to the AWACS proposal during the controlled time debate that I thought the most important problem we have before us now, even exceeding our financial problems, is the matter of some kind of agreement, effective agreement, over which we could have knowledge and be able to detect, make certain surveillance, of the use of nuclear weapons. I was referring primarily to an effective arms limitation with the Soviet Union.

I said, as I recall, in that debate that I believed that is the most important thing the President of the United States during his present 4-year term would have to contend with, and this would be his best opportunity to make a lasting contribution to mankind.

I sense, Mr. President, a very serious situation, as I see it, for instance, in Western Europe where the people are concerned there about the presence and the possible use of nuclear weapons.

Someone said, "Oh, that is just a crazy crowd," or, "That is just a trouble-making group."

I believe that is error. I believe there is a deep concern there on that subject matter, call it fear or whatever you want to call it.

I think it is possible for this matter to spread to other areas. I am not predicting that our people have a sense of fear now but it is possible, as this matter develops more acutely and more seriously and without any effective agreement that is balanced, that would mitigate against an unbridled race for more and more effective weapons in this field, until we make some development along that line, and I am sure we are headed in a dangerous direction, and the utmost that we can do should be done.

I have never been one that was always talking about being tough on the Russians or that I thought the Russians were 7 feet tall. But I have been tied with these limitation agreements enough to know that you have to be very severe, you have to be very firm; whoever is representing the Nation must be knowledgeable and must know how the give-and-take works, the intricacies of the problems that go with the weapons themselves and their possible operations. I am sure that we have competent men in that field. And I think it would finally come to the leaders of the respective nations, including our own President of the United States. I pray that he has a special capacity in that field and I believe that he does have or will develop and have a good capacity, even better than good.

But anyway we are confronted here in this bill with a situation for strategic weapons that are not entirely satisfactory, not entirely satisfactory to anyone, perhaps. It does not represent what I thought would have been a better field of weaponry and possibilities therein. But it is a very, very formidable program, Mr. President.

And I have decided that in view of this situation. I have all too briefly outlined about the need for a SALT agreement of the proper kind, that I could better serve the country by supporting this package as it is.

I know that the President already actively is considering a conference with reference to the use of the short-range weaponry in Western Europe. I know within reason that in time the further conference to which I have alluded will come about. So I think it would be a mistake to push this again to one side and wait another year.

Mr. President, this MX missile that you may hear criticized in the lack of the basing points, particularly, has already been approved seven times by the Senate with favorable votes. Nine votes have been favorably passed on here on this floor in the last 6 years on this B–1 bomber that we are talking about. In our Armed Services Committee, there were 7 MX votes favorable and 10 B–1 votes favorable during this same time. In the Senate, the Armed Services Committee and this Senator have always supported both the MX and the B–1 except once in 1977, when the President rescinded the funds for the B–1 bomber

and there was little chance to change that decision that year.

Now, we had that bill on the floor here, as I recall, and I was managing the appropriation bill when that order came rescinding the B–1. And we left in the money for the research and development, but it was generally agreed to take out and we did take out the rest of it for that time. And it has continued on in this R. & D. category since that time.

So we are not dealing with infant weapons or unknown weapons. These matters are old presentations. We backed off to a degree at the last minute on the MX basing mode, but we have continued fortunately on the MX missile itself and have moved forward in a very substantial part and seemed to be highly successful.

Now, frankly, I said at first that I could not see how I can support two bomber systems to be completed and carried on at the same time. But for the reasons that I have already given and some better understanding of the actual situation with reference to the need that a time will be covered, otherwise we could be exposed and become a prey to an aggressor, it is just not a bad thing at all to have both of these weapons moving in the right direction at the same time. Who can say how long it is going to take to perfect a modern bomber of what we now call the Stealth type? There are many new features, all complicated, much of it still unknown. And who can put his hand on the year or near the year with any certainty whatsoever as to when it would be that weapon would be useful and could be deployed? Which means there is an uncertain time in there which may be beyond the life of our B–52 that we have relied on so long and not yet ready for the so-called Stealth bomber; it is not ready at least for deployment.

So I see clearly where no one could be any ways near certain as to the probabilities there. The scientists, the technicians, the experts, the military people, to a large degree, disagree, naturally. They are being honest about it. They disagree as to the time to a considerable part.

So I hope that we could come out of the Appropriations Committee, maybe as soon as tomorrow, with a good, strong stand and majority there and find the same sentiment here as the presentation on this floor and that this Congress finally complete a program in this field.

We do not dare let circumstances develop whereby the President of the United States, whomever he may be, would have to face the situation of negotiating or trying to reach agreements or trying to make arrangements with an adversary unless he is backed himself by a very formidable force that at least is near to the best that we are capable of making. I was about to use the word "afford," not thinking in terms of money. But that does bring up the money question. There is far more money involved here than I would like to have to support. But if we can get a situation that leads to an effective and lasting and useful arms limitation of the kind that will serve us and still leave us in the reasonable certainty then there are far, far more billions of dollars saved by that development and that achievement than may be spent by the actual dollar cost of this weaponry.

I do not think the time would ever come when we could be certain of what was going to cost the least, or which way to go that was going to cost us the less. It is all a calculation and all a planning and then a matter of achievement.

There is an overriding need to put the President's new strategic program in place and do it now. It is an interim program but is essential to cover the next several years, a period of great uncertainty and great opportunity.

This need arises from the following reasons:

The single most pressing deficiency we have in the strategic field is the lack of some form of agreement with the Russians to limit nuclear arms. The President has announced the beginning of talks with the Russians on November 30 on the limitation of nuclear weapons in Europe.

I do not believe talks can be limited to Europe and must inevitably and quickly expand to cover all nuclear weapons. There is no practical way, no position of strength—from which to negotiate with the Russians if we reject the President's program. Rejection will weaken the military bargaining strength of the United States and the credibility of the American negotiators.

The single most pressing need we have in the whole military-international field is to preserve the NATO alliance and all the working military relationships that entails. Our strategic program is the foundation of nuclear deterrence for NATO as well as the United States. Western Europe is America's anchor across the Atlantic and NATO is the foundation of conventional deterrence against Russian military moves in Europe.

We cannot succeed politically, economically, or diplomatically in dealing with the world's problems without the friendship and help of our NATO allies. Militarily, West Europe provides 90 percent of the ground troops, 80 percent of the air power and 70 percent of the naval power of this Western alliance. But this support is contingent on America doing its part in the nuclear field.

It is a particularly sensitive time in Europe now with the question of new theater nuclear weapons located on Western European soil at the forefront of attention in the strongest NATO countries. If we refuse to move forward on the President's strategic program, we could be endangering the roots of the NATO alliance. The Europeans might see us as requiring them to accept nuclear weapons on their soil, while refusing to accept them on our own. This would gravely weaken the U.S. leadership role in the whole alliance.

The single most pressing need we have in the military-domestic field is to reassure the American people that America is strong and is not a second-rate, weak military power, exposed to attack or blackmail. For too long, and for a variety of reasons, there has been a dangerous undermining of the public confidence in our military strength. We must stop that tendency before the public either turns against our military or demands unwise military action in crises.

I am concerned that rejection of the President's strategic program will further undermine public confidence and will give the impression that our Government—Washington—is so split up it cannot move forward on a military program to protect our interests.

The strategic program in the fiscal year 1982 budget is an interim program. Everybody knows it is not the final answer. But, it is another step—in a series of increasingly difficult steps—to keep up our strength in this dangerous and vital field of nuclear weapons. Neither system will be completed for years. There is time to workout any flaws or make any needed improvements. The MX missile has been debated and supported year after year. The old shell game—the so-called MPS basing system with 4,600 shelters—is dead without Presidential support and a national consensus to install it.

We must find something new and that is what this program does—it goes forward with the missile, putting it temporarily in existing missile holes until a better system can be found. The executive branch feels it can find a new way to base the MX by 1984 or earlier. Similarly, the B–1 bomber is an interim step. I have been a strong supporter for years of the so-called advanced-technology bomber—Stealth—and believe it should be fielded as soon as technically possible. Beware of the testimony where the witness tries to be accurate as to the exact years.

It is still some time away from actual production and use. Time is required—we all know that. Furthermore, almost everybody agrees that we will have to begin replacing the old B–52's with something within the next decade. Why not move ahead with the B–1 while it can fill in before the ATB comes online and thereafter can make a fine conventional bomber? The research money—$4.5 billion worth—for it has already been spent, while any new plane would require more new research. It does hedge against slippage in the Stealth technology or some new defect being discovered in the old B–52's. It is not the ultimate solution, but it does provide a needed capacity both soon and well into the future.

The MX and the B–1 are not new problems. They have been around for years and have been voted on by the Senate many times. In the Senate, there have been nine favorable votes on the MX and 9 favorable votes on the B–1 in the past 6 years. In the Armed Services Committee, there were 7 MX votes and 10 B–1 votes during the same time. The Senate, the Armed Services Committee and this Senator have always supported both the MX and the B–1 except once in 1977 when the President rescinded the funds for the B–1 bomber and there was little chance to change that decision for that year. Thus, this new strategic program continues the basic items that have been supported by the Senate for years.

I believe the President's new strategic program is another needed step in this important field. The broader questions

of getting a meaningful SALT agreement, preserving the NATO alliance and limiting public doubt about our military strength outweigh the fact that this is an interim program and not an ultimate solution. For these reasons, I will vote for this strategic program and urge my colleagues to vote for it as well.

One more major part of our problem must be given the top priority of all considerations.

We are now facing the hard but certain facts and reality that our adversaries have nuclear weaponry of the kind and quality to literally destroy a major percentage of the land area of our 50 States and a major percentage of our people.

They have the capacity to deliver those nuclear weapons on targets chosen by them and do so with a high degree of accuracy. To meet this situation we do not have effective defensive military weapons like the antiballistic missile because none are yet attainable.

But these grave facts do not overwhelm me. I have lived with them a long time. I continue to be disturbed. I am confident of our capacity to strike them with even more destructive forces, on targets also previously selected. I refer here to the other two legs of our TRIAD defense, submarines and bombers.

Nothing stands still. Our adversaries move forward in the state of their weaponry and to avoid inferiority we have to move forward too.

I have noted too that each time the parties have to move forward it is far more difficult to approach equality again. The dollar price is terrific and mounting. In my view, the only effective answer to this program is a meaningful Arms Limitation Agreement, commonly called SALT.

I believe we now have the best chance we have ever had for an acceptable, meaningful agreement. SALT agreements so far have achieved little but they have pointed the way toward achievement. Hard-headed negotiating by highly competent individuals on each side, with reasonable time allotted, can make a helpful start. In the final analysis the agreement will have to feel the hand of the Chief Executive Officer of the two contracting powers. In our case, President Reagan will fill this role in a capable way as I believe.

In the final analysis, I think there is no time to lose. There is nothing new or hidden in the present strategic plan. Any plan adopted will have to be adjusted from time to time.

Time is running out. The problem of nuclear weapons as a whole is rapidly becoming complicated and in fact is alarming. The people in Western Europe are developing a state of fear. Our own people are puzzled more than ever on the entire subject and a state of fear could be aroused at home among our own people.

The deciding factor with me in supporting the proposed strategic plan in the bill is that it moves a step forward in weaponry. It keeps moving forward on the MX missile, and a temporary place to put it, the advanced technology bomber, and the B–1 bomber to fill in any potential gaps and the other major parts of our strategic program such as Trident, missiles, submarines, and cruise missiles. Such a step forward is necessary for an effective and useful SALT agreement to be negotiated by the President and considered by the Senate.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

Mr. BAKER. Mr. President, what is the business before the Senate?

The PRESIDING OFFICER. The pending matter is H.R. 4169.

Mr. BAKER. Which is the Commerce. Justice, and State appropriation bill, is it not?

The PRESIDING OFFICER. The majority leader is correct.

The Senate continued with the consideration of H.R. 4169.

Mr. BAKER. Mr. President, I hope we can continue making progress——

The PRESIDING OFFICER. Can we have order in the Senate as we listen to the words of the majority leader? The majority leader is recognized.

Mr. BAKER. Mr. President, I hope we can continue to make progress on this bill. I expect the Senate will remain on this measure for the remainder of this day. I would not expect to ask the Senate to recess over until, perhaps, 6:30 or thereabouts. If we can make progress by staying later than that I would be pleased to do that. I understand the sensitivities involved, but I continue to urge Senators to try to find some way to address their concerns and to finish this measure this evening as much as possible.

LEGISLATIVE SCHEDULE

OTHER MATTERS FACING SENATE CONSIDERATION

Mr. BAKER. Mr. President, we have a great deal yet to do. The continuing resolution, I believe, will be over here from the House tonight. We have a number of appropriation bills. Let me say to Senators notwithstanding there will be a continuing resolution I believe delivered to us as a House-passed message, it is the intention of the leadership to ask the Senate to continue consideration of appropriation bills as they are here and available. The reason for that, I think, is obvious; that is, the continuing resolution as it is likely to pass in either body will reference perhaps the lower of the House- or Senate-passed version or the conference level so there is still an opportunity for the Senate to make its mark and to express its judgment on funding levels in the continuing resolution.

I repeat, Mr. President, the Senate will be in session until 6:30 or 7. We will remain on this measure. It is my hope that we can complete this bill yet this evening.

Let me yield first to the distinguished senior Senator from West Virginia (Mr. RANDOLPH).

CONSIDERATION OF THE HIGHWAY BILL

Mr. RANDOLPH. Mr. President, this question could well be asked by the able chairman of the Committee on Environment and Public Works, Senator STAFFORD, but do you have an estimate in your planning for the Federal-aid highway bill to come to this Chamber during today's session?

Mr. BAKER. Mr. President, I must tell my friend, the former chairman of that committee, and who severed so long and so faithfully in that role while I was on the committee in the minority, I must confess to him, which I am reluctant to do, that I cannot tell him right now, but I will be glad to check with that part of the staff which does scheduling and see what preliminary estimates we may have.

May I now yield to the minority leader.

LEGISLATIVE PROGRAM FOR THE REMAINDER OF THE WEEK

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader.

I take the floor to inquire as to what the program will be for the rest of the week, if the majority leader should state it.

Mr. BAKER. Mr. President, It would be my expectation that we will continue on the State, Justice appropriations bill as long as that is necessary, this evening and tomorrow. It is also my hope that we can take up the Foreign Operations appropriations bill.

There is the matter of pipeline waivers that must be dealt with. It is a highly privileged matter and is available, and I hope that there might be an agreement among Senators that we could proceed to that waiver resolution either Tuesday or Wednesday.

It is my hope as well that if we receive the continuing resolution from the House tonight that the Appropriations Committee will consider it on Tuesday and, perhaps, report that measure to the floor on Tuesday evening.

If that is the case I would then almost certainly ask the distinguished minority leader if he would consider a waiver of the 1-day rule so that we could proceed to the consideration of the continuing resolution on Wednesday. That would give us then Thursday and Friday, Mr. President, to try to work the continuing resolution through the conference and to the President.

I must repeat what I said earlier today, Mr. President, that if perchance the President were to veto this measure or if the bill were to bog down in conference it would be absolutely necessary to ask the Senate to remain in session on Saturday and, perhaps, even on Sunday because the continuing resolution presently in effect expires Friday midnight.

So, Mr. President, I would expect we will be in session this week, it will be a busy week, there is a strong possibility that we will be in session on Saturday and even some possibility that we will be in session for all of the weekend if that is necessary to complete our work on the continuing resolution.

THE SMALL BUSINESS INNOVATION BILL

Mr. ROBERT C. BYRD. Mr. President, will the majority leader yield further?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. Could the majority leader state when he plans to call up the small business innovation bill?

Mr. BAKER. Mr. President, I cannot. I am afraid I must give the distinguished minority leader the same answer I gave to the distinguished senior Senator from West Virginia. I have not checked today on the status of that measure on our calendar, but I will be happy to do so and report further to the minority leader today.

Mr. ROBERT C. BYRD. I had promised the majority leader that I would inform him as to the amendments we expect on this side of the aisle. We only know of four: one by Mr. BENTSEN, which is an interest rate amendment. He may change it. There is an amendment by Mr. CHILES which is an interest rate amendment; an amendment by ROBERT C. BYRD which deals with unidentified budget cuts; and an amendment by ROBERT C. BYRD which would provide for the appointment of a small business representative on the Federal Reserve Board. There are just four amendments.

Mr. BAKER. I thank the minority leader. That will be helpful in trying to obtain clearance, and I will give him a further report as soon as I can.

CONSIDERATION OF THE HIGHWAY BILL

Mr. President, I am told that the highway bill is available, if the senior Senator from West Virginia is still here. The highway bill is here and available for action yet this evening on our side. So it may be that we can do that bill before we recess over tonight.

Mr. ROBERT C. BYRD. The distinguished senior Senator is here.

Mr. BAKER. May I repeat then what I said earlier? I thank the minority leader. Mr. President, on inquiry I found, may I say to the distinguished ranking member of the Public Works Committee, that we have the highway bill cleared, and if he wishes we may be able to do that this evening.

Mr. RANDOLPH. I think that is as it should be. The measure is ready, reported from the Committee on Environment and Public Works, and I am certain it would not take too long. It is an important bill. I think generally the Senate would appreciate the work that has been done by both Republicans and Democrats.

Mr. BAKER. I thank the distinguished Senator from West Virginia. I may say then that I will later ask the Senate to agree to temporarily lay aside the State, Justice appropriations bill so that we can proceed yet this evening to the highway bill.

THE SMALL BUSINESS INNOVATION BILL

On the SBA bill I am also told now by staff that there is a possibility that we can do that tomorrow. I understand negotiations are underway on a time agreement. We certainly would want to do that bill, and I would urge Senators to consult on the matter of giving a time agreement on that.

Now, Mr. President, I hope we might continue with the State, Justice appropriations bill while we consult with others on how long they might require on the highway bill.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GARN). Without objection, it is so ordered.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

Mr. MATHIAS. Mr. President, earlier today the Senate addressed the question of prayer in public schools. That, of course, is a subject that Congress has considered on a number of occasions over the years.

I was a Member of the other body at a time that a constitutional amendment was pending there. The matter was considered in great detail by the Judiciary Committee, which at that time was led by the chairman, Emanuel Celler of New York, and the ranking minority member, William McCulloch of Ohio.

One of the knowledgeable witnesses who was called before the committee was Philip B. Kurland, professor of constitutional law at the Law School of the University of Chicago, editor of the Supreme Court Review and author of "Religion and the Law—of Church and State and the Supreme Court," which was a piece that was published in 1962. So Professor Kurland was and is today an eminent authority on constitutional questions.

I raise his name because at that time he testified on precisely the point that we have been discussing here in the Senate, the question of whether there had been anything innovative or revolutionary about the Supreme Court decisions on the subject of school prayer. Professor Kurland in his testimony said that, "many people, including some Members of Congress, have indulged. The primary error is usually stated in terms of the revolutionary nature of these decisions."

He goes on to say that, "There is no basis for such a conclusion."

I am going to quote directly from Professor Kurland's testimony. He said:

> If laymen and churchmen were surprised by them, it was due only to their ignorance of the judicial precedents on which these judgments were based. I think that it is clear that students of the subject—whatever doubts they may have had about the standing of the plaintiffs to maintain the lawsuits—had few doubts that the merits of the case should properly be resolved in exactly the way that they were by the Court. The conclusions reached by the Court were dictated by their own precedents and the function that the religion clauses of the first amendment were intended to serve.

He goes on to say:

> The conclusions reached by the Supreme Court in these cases were long anticipated by similar decisions of State supreme courts a generation or two before the question ever came to the national High Court.

He quotes, among other people, a man who is seldom quoted, because he is properly believed to have said very little. That is Calvin Coolidge, who spoke in Baltimore, Md., in September 1924. At that time he said:

> Some people do not seem to understand fully the purpose of our constitutional restraints. They are not for protecting the majority, either in or out of Congress. They can protect themselves with their votes. We have adopted a written Constitution in order that the minority, even down to the most insignificant individual, might have their rights protected.

Now, Mr. President, we have hung Calvin Coolidge's portrait in the Capitol and we are placing special value these days on what Calvin Coolidge had to say. I hope that the Senate will take to heart these words of Calvin Coolidge, uttered in Baltimore in 1924. I think it is important to repeat at least part of it:

> We have adopted a written Constitution in order that the minority, even down to the most insignificant individual, might have their rights protected.

I think that is what the Senator from Connecticut has in mind. I think the Senator from Connecticut is clearly aware that the purpose of the language in this bill is to prevent the officers of the United States from discharging their sworn duty to uphold the Constitution and to enforce its terms.

That is just another way of amending the Constitution without going through the amendatory process. It is wrong in principle. It is wrong in practice. It violates the traditions of this Nation. It violates the express orders of the courts. It violates the principles as stated by Presidents such as Calvin Coolidge.

We should not tolerate this attempt to amend the first amendment without going through the amendatory process.

LEGAL SERVICES CORPORATION

● Mr. CHAFEE. Mr. President, I support funding the Legal Services Corporation at $241 million as recommended by the State, Justice, Commerce Subcommittee.

In the past year, we have undertaken the difficult task of cutting Federal spending with the goal of reviving our economy. As a result, we have been asked to vote for a number of cuts in a broad range of valuable social programs. Those of us who were concerned about the effects of many of these cuts have argued that—if they are to occur—they must be spread with some equability. In funding the Legal Services Corporation at $241 million, we meet that aim, for this figure represents a 25-percent reduction over fiscal year 1981 funding.

If we wish to give meaning to the concept of due process, if we wish to make all Americans equal before the law, then it is essential that we attempt to provide every citizen with equal access to our legal system. The Legal Services Corporation does precisely that.

Legal services is a democratic, locally-controlled, and extremely cost-effective program. The Corporation funds over 300 programs nationwide and serves all 1,400 counties in the Nation. Last year, it handled nearly 1.5 million cases, the vast majority of which were resolved informally. Though much has been made about the allegedly improper or political activities of Legal Services attorneys, the plain fact is Legal Services attorneys

represent poor people in cases which have little, if anything, to do with politics or impropriety, and much to do with economic survival.

The overwhelming majority of cases have enormous consequences for the individuals involved, yet deal with relatively routine legal matters such as housing, consumer, or family law. The oft-criticized Legal Services attorneys work long hours at modest wages to provide counsel to the Nation's poor. If those attorneys come into conflict with State or local government, it is largely because they represent individuals who seek to assert legitimate claims for rights or moneys to which those individuals may be entitled. If they incur the wrath of their legal opponents, it is because the legal system is by nature adversarial.

Some have complained that the private bar ought to do more than it presently does to represent poor people. I would agree; but in no way does that argue against the need for a strong Legal Services Corporation. With at least 30 million Americans existing on personal incomes of less than $5,000, or family incomes of under $9,400, the need for representation is overwhelming. Moreover, local legal services offices do work with the private bar and do refer numerous cases to outside attorneys.

In my State of Rhode Island, the local Legal Services organization has been particularly effective in working with the local bar to gain greater private participation in the representation of poor people. Yet, there are many cases which private attorneys simply will not take. Finally, Legal Services attorneys provide special expertise in handling the types of legal difficulties which poor people most often encounter.

If the Corporation has been guilty of abuses in the past—and the evidence of such activities is sparse, anecdotal, and blown out of all proportion—then the four restrictions recommended by the subcommittee will be more than sufficient to prevent further mishaps. Further restrictions are unnecessary and would undermine the very aim of legal services which is to provide equal access to the courts for all Americans.

While it may be necessary to limit the Legal Services budget to $241 million, we should not confuse the need to cut a budget with reckless criticism of a vital program.

Legal Services attorneys deserve our encouragement for doing well what few others would want to do at all.●

ADDITIONAL COSPONSOR TO U.P. AMENDMENT NO. 609

Mr. FORD. Mr. President, I ask unanimous consent that my name be added as a cosponsor of the amendment of the distinguished Senator from Florida (Mrs. HAWKINS), U.P. Amendment No. 609, to authorize the Attorney General to acquire and exchange information regarding certain deceased individuals and missing children.

The PRESIDING OFFICER. Without objection, it is so ordered.

ANNOUNCEMENT OF POSITION ON VOTE

Mr. HEINZ. Mr. President, I regret that I was unavoidably detained during rollcall vote No. 377. Had I been present, I would have voted "nay."

Mr. BAKER. Mr. President, we are prepared now to proceed to the consideration of the highway bill, if the minority is in a position to agree to that. While we await the final clearance on that, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, as I indicated earlier, the highway bill is here and available. I ask unanimous consent that the pending bill, the State-Justice-Commerce appropriations bill be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET ACT WAIVERS

Mr. BAKER. Mr. President, there are two budget waivers on the calendar. I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 345, dealing with the highway bill, and Calendar No. 346, a companion measure, also dealing with the highway bill.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET ACT WAIVER

The Senate proceeded to consider the resolution (S. Res. 223) to waive section 402(a) of the Congressional Budget Act with respect to the consideration of S. 1024, the Federal-Aid Highway Improvement Act of 1981, which was considered and agreed to, as follows:

S. RES. 223

Resolved, That section 402(a) of the Congressional Budget Act of 1974 is hereby waived with respect to the continuation of S. 1024, the Federal-Aid Highway Improvement Act of 1974.

SEC. 2. This waiver is necessary to consider this bill which was not reported prior to May 15. The levels of authorizations contained in this bill for fiscal year 1982 are $1,000,000,000 below those reported to the Senate in the March 15 report of the Committee on Environment and Public Works. The level is also below that contained in S. 1208 reported by the committee on May 15, 1981. The authorization level is also consistent with the recent request of the President for an additional 12 per centum reduction in Federal spending.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

BUDGET ACT WAIVER

The Senate proceeded to consider the resolution (S. Res. 224) waiving section 303(a) of the Congressional Budget Act of 1974 for consideration of S. 1024, was considered and agreed to, as follows:

S. RES. 224

Resolved, That section 303(a) of the Congressional Budget Act of 1974 is hereby waived with respect to the consideration of S. 1024, the Federal-aid Highway Improvement Act of 1981.

SEC. 2. This waiver is necessary so that multiyear highway legislation may be considered by the Senate. Highway authorizations are contract authority which when enacted creates new spending authority. To consider this multiyear highway bill such a waiver is required by section 303(a).

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

FEDERAL-AID HIGHWAY IMPROVEMENT ACT OF 1981

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 295, S. 1024, the Federal-Aid Highway Improvement Act of 1981.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1024) to authorize appropriations for the construction of certain highways in accordance with title XXII of the United States Code, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Environment and Public Works with amendments.

Mr. BAKER. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc and that they be considered as original text for the purpose of amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 2, line 11, strike "$3,300,000,000", and insert "$3,100,000,000";

On page 2, line 25, after the colon, insert the following: "Section 103 of title 23, United States Code, is amended by adding the following new subsection";

On page 3, line 4, strike "this";

On page 3, line 4, after "subsection", insert the following: "(b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, after the date of enactment of this subsection";

On page 3, line 7, strike "October 1, 1981", and insert the following: "prior to enactment of this subsection";

On page 3, line 10, strike "which are not yet open to traffic.";

On page 3, line 15, strike "four", and insert "six";

On page 3, beginning on line 15, strike "urban and";

On page 3, line 17, strike "six", and insert "eight";

On page 3, line 17, strike "over", and insert "of";

On page 3, line 18, after "populations", insert "or more";

On page 3, line 19, strike "this";

On page 3, line 20, after "subsection", insert the following: "(b) of section 108 of the Federal-Aid Highway Act of 1956";

On page 5, line 17, strike "$600,000", and insert "$400,000,000";

On page 5, line 25, strike "$800,000,000", and insert "$600,000,000";

On page 6, line 23, strike "$900,000,000", and insert "$700,000,000";

On page 7, line 12, strike "and 1984,", and insert the following: "1984, 1985, 1986, and 1987";

On page 8, line 4, strike "and";

On page 8, line 6, strike "year", and insert "years";

On page 8, line 7, strike "and $300,000,000 for fiscal years";

On page 8, line 9, strike "year", and insert "years";

On page 8, line 10, strike "and $300,000,000 for fiscal years";

On page 10, line 22, strike "(a)";

On page 11, line 2, strike "section", and insert "sections";

On page 11, line 2, after "section", insert "and 139(c)";

On page 11, after line 3, insert the following: not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978);

On page 11, line 9, strike "section", and insert "sections";

On page 11, line 9, after "103", insert "and 139(c)";

On page 11, line 10, after "roads", insert the following: not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State;

On page 11, strike lines 19 and 20;

On page 11, line 22, strike "(a)";

On page 12, line 13, strike "section", and insert "sections";

On page 12, line 13, after "103", insert "and 139(c)";

On page 12, line 14, strike ", which", through and including "roads," on line 15, and insert the following: (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978),;

On page 12, line 23, after "104(b)(1)", insert the following: "of title 23, United States Code. Such sums may also be obligated for projects for resurfacing, restoring, rehabilitating and reconstructing a toll road which has been designated as a part of the Interstate System if an agreement satisfactory to the Secretary of Transportation has been reached with the State highway department and any public authority with jurisdiction over such toll road prior to the approval of such project that the toll road will become free to the public upon the collection of tolls sufficient to liquidate the cost of the toll road or any bonds outstanding at the time constituting a valid lien against it, and the cost of maintenance and operation and debt service during the period of toll collections. The agreement referred to in the preceding sentence shall contain a provision requiring that if, for any reason, a toll road receiving Federal assistance under this section does not become free to the public upon collection of sufficient tolls, as specified in the preceding sentence, Federal funds used for projects on such toll road pursuant to this section shall be repaid to the Federal Treasury.".

On page 13, strike lines 18 and 19;

On page 14, line 1, beginning with "(other", strike through and including "1978).'";

On page 14, line 4, strike "section", and insert "sections";

On page 14, line 5, after "103", insert "and 139(c)";

On page 14, line 5, beginning with "title", strike through and including line 6, and insert "this title";

On page 14, strike lines 7 and 8, and insert the following:

(b) Section 119 of title 23, United States Code, is further amended by adding the following new subsection:

"(b) Reconstructing as authorized in subsection (a) of this section may include, but is not limited to, the addition of travel lanes and the reconstruction of interchanges and overcrossings along existing completed interstate routes, including the acquisition of right-of-way where necessary.".

On page 14, strike line 16, through and including line 24;

On page 15, line 2, strike "109.", and insert "108.";

On page 15, line 4, strike "23 U.S.C.", and insert "section";

On page 15, line 5, after "(B)", insert "of title 23, United States Code";

On page 15, line 6, strike "23 U.S.C.", and insert "section";

On page 15, line 7, after "(5)", insert "of title 23, United States Code";

On page 15, line 9, strike "23 U.S.C.", and insert "section";

On page 15, line 9, after "(5)", insert "of title 23, United States Code";

On page 15, line 10, strike "under the law as it is before", and insert "prior to";

On page 15, line 13, strike "110.", and insert "109.";

On page 15, line 15, strike "23 U.S.C.", and insert "section";

On page 15, line 15, after "(4)", insert "of title 23, United States Code";

On page 15, line 25, after "in", insert "the general fund of";

On page 18, line 8, strike "111.", and insert "110.";

On page 19, line 2, strike "112.", and insert "111.";

On page 9, line, strike "(a)";

On page 9, line 6, strike "urbanized", and insert "urban";

On page 19, line 11, strike "urbanized", and insert "urban";

On page 19, line 9, strike "urbanized", and insert "urban";

On page 20, line 4, strike "113.", and insert "112.";

On page 20, line 16, after "and", insert "those";

On page 20, line 16, strike "urbanized", and insert "urban";

On page 21, line 2, strike "114.", and insert "113.";

On page 21, line 7, strike "115.", and insert "114.";

On page 22, after line 8, insert the following:

"(c) Of the funds authorized to carry out this section each State shall expend 35 per centum of the sums apportioned for projects under section 203 of the Highway Safety Act of 1973 unless the State requests the Secretary to waive this minimum and the Secretary finds other safety projects are of a higher priority.

On page 22, line 15, strike "'(e)(1)'", and insert "'(d)(1)'";

On page 23, line 5, strike "'(d)", and insert "'(e)";

On page 23, line 18, strike "'(e)", and insert "'(f)";

On page 23, line 24, strike "'(f)", and insert "'(g)";

On page 23, line 25, strike "apportioned", and insert "made available";

On page 24, line 7, strike "'(g)", and insert "'(h)";

On page 25, line 5, strike "116.", and insert "115.";

On page 25, line 11, strike "or", and insert "and";

On page 25, line 13, strike "or", and insert "and";

On page 25, line 22, beginning with "its", strike through and including "basis;" on line 23, and insert the following: the average national unit cost, on a State-by-State basis, as determined by the Secretary;

On page 26, after line 9, insert the following:

(b) Notwithstanding any other provision of law or Federal regulation, any new bridge which is to be constructed pursuant to section 144 of title 23, United States Code, in tandem with any existing major structure built after June 28, 1969, with no more than 2.7 miles of highway between them need not carry a roadway width in excess of 69 feet.

On page 26, line 17, strike "117.", and insert "116.";

On page 26, line 20, strike "be treated under", and insert "receive";

On page 26, line 22, strike "part of", and insert "under";

On page 27, line 7, strike "118.", and insert "117.";

On page 27, line 8, beginning with "after", strike through and including the quotes on line 9, and insert the following: before the words "may amount to 100 per centum".

On page 29, line 8, strike "119.", and insert "118.";

On page 30, line 10, strike "23 U.S.C.", and insert "section";

On page 30, line 10, after "125", insert "of title 23, United States Code";

On page 31, line 11, strike "90", and insert "75";

On page 32, line 18, strike "120.", and insert "119.";

On page 33, line 8, strike "121.", and insert "120.";

On page 34, line 5, strike "122.", and insert "121.";

On page 34, line 21, strike "123.", and insert "122.";

On page 35, line 11, strike "124.", and insert "123.";

On page 35, line 19, strike "ACCEPTANCE", and insert "DEMONSTRATION";

On page 35, strike line 20, through and including line 3 on page 39, and insert the following:

SEC. 124. The Secretary of Transportation is directed to conduct a demonstration program in not more than four States of geographic and population diversity to study the impacts of expanding the availability of the procedures under the Certification Acceptance and Secondary Road Plan programs to other Federal-aid systems or payments as now provided by section 117 of title 23, United States Code. The demonstration program should study the impacts of allowing the Secretary of Transportation to discharge his responsibilities under any Federal law relative to a Federal-aid highway project provided certification is made by the States pursuant to section 117 of title 23, United States Code, and other requirements of Federal law.

On page 39, line 18, strike "126.", and insert "125.";

On page 40, line 2, strike "127.", and insert "126.";

On page 40, line 19, strike "be", and insert "by";

On page 40, line 20, strike "to read", and insert "as";

On page 41, line 2, strike "October 1, 1981", and insert "July 1, 1982";

On page 42, line 5, strike "128.", and insert "127.";

On page 43, line 2, strike "129.", and insert "128.";

On page 43, line 9, strike "chapter", and insert "title";

On page 43, line 11, strike "(j)", and insert "(i)";

On page 44, strike line 1, through and including line 10 on page 47, and insert the following:

BRIDGE RECONSTRUCTION

SEC. 129. (a) The Secretary of Transportation may approve any project for the reconstruction, resurfacing, restoration, or rehabilitation of any bridge on the Interstate System which is both owned by the United States Government and located in two States and the District of Columbia, whenever both such States and the District shall submit to the Secretary for approval appropriate plans, specifications, and estimates for any such project.

(b) The Secretary of Transportation shall prior to approval of such project enter into

an agreement with such States and the District for future maintenance and rehabilitation of the bridge.

(c) There is hereby authorized to be appropriated $60,000,000, out of the Highway Trust Fund, to be available until expended, to carry out the provisions of this section. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned for the Interstate System under chapter 1 of title 23, United States Code. The Federal share of the project cost shall be 100 per centum.

(d) In making any revised estimate of the cost completing the Interstate System, which estimate is required by section 104(b)(5)(A) of title 23, United States Code, to be transmitted to the Congress after the date of enactment of this Act, the Secretary of Transportation shall not include any costs for any bridge eligible for approval under subsection (a). The Secretary shall reduce apportionments made under section 104(b)(5) of title 23, United States Code, to such States or District by an amount, if any, equal to amounts apportioned under such section to any such State or District with respect to any such bridge for any fiscal year ending before October 1, 1981. The reduction, if any, made by the preceding sentence for each State or the District shall be made out of apportionments under such section to such State or the District, beginning with the apportionment for the fiscal year ending September 30, 1983, and shall be made, in equal shares, over the number of fiscal years in which apportionments described in the preceding sentence were made.

On page 49, line 2, strike "130.", and insert "131.";

On page 50, line 6, strike "132.", and insert "131.";

On page 51, after line 8, insert the following:

(b) The analysis of chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Interagency agreements.".

On page 51, line 13, strike "133.", and insert "132.";

On page 51, line 16, after "system", insert the following: and for projects to resurface, restore, rehabilitate, and reconstruct the Federal-aid Interstate System.

On page 51, line 20, after the quotes, insert the following: and (2) by adding the following new sentence at the end thereof: "The Federal share payable on account of any project under the Federal-aid rural program or the Federal-aid urban program which the Secretary has approved prior to enactment of the Federal-Aid Highway Improvement Act of 1981 shall not exceed 75 per centum of the cost of construction subject to the conditions set forth in this subsection or at the option of the State the Federal share may be revised to 50 per centum of such cost, but the Federal share payable for any such project which the Secretary approves after enactment of such Act shall not exceed 50 per centum of the cost of construction subject to the conditions set forth in this subsection.".

On page 52, strike line 9, through and including line 25 on page 53, and insert the following:

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 133. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1982 shall not exceed $7,200,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 147 of the Surface Transportation Assistance Act of 1978, Sections 109 and 129 of the Federal-Aid Highway Improvement Act of 1981, and the third sentence of subsection 218(a) of title 23, United States Code, as added by this Act. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For the fiscal year 1982, the Secretary shall distribute the limitation imposed by subsection (a) by allocation of the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the periods October 1 through December 31, 1981, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1982, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

TRUCK WEIGHTS

SEC. 134. Section 127 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and adding the following: "*Provided further*, That each State shall establish a single axle load of not less then twenty thousand pounds; a tandem axle load limit of not less than thirty-four thousand pounds; and an overall gross weight limit of not less than eighty thousand pounds.".

NATIONAL MAXIMUM SPEED LIMIT

SEC. 135. Section 154(f) of title 23, United States Code, is amended to read as follows:

"(f) If the data submitted by a State pursuant to subsection (e) of this section show that the percentage of motor vehicles exceeding fifty-five miles per hour is greater than 50 per centum, the Secretary shall reduce the State's apportionment of Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 5 per centum of the amount to be apportioned for the following fiscal year.".

MARYLAND TRANSPORTATION AUTHORITY

SEC. 136. (a) The Act entitled "An Act authorizing the State of Maryland, by and through its State Roads Commission of the successors of said Commission, to construct, maintain, and operate certain bridges across streams, rivers, and navigable waters which are wholly or partly within the State", approved April 7, 1938, and the Act of June 16, 1948 (62 Stat. 463, Public Law 654, 80th Congress), as amended by the Act of November 17, 1967 (81 Stat. 466, Public Law 144, 90th Congress), are hereby repealed.

(b) The State of Maryland, by and through the Maryland Transportation Authority or the successors of such Authority, is authorized, subject to all applicable Federal laws, (1) to continue to collect tolls after the date of enactment of this Act from its existing transportation facilities projects, as defined on the date of enactment of this Act in the laws of the State of Maryland, and (2) to use the revenues from such tolls for transportation projects of the type which the State or the Maryland Transportation Authority is authorized to construct, operate, or maintain under the laws of the State of Maryland as such laws exist on the date of enactment of this Act.

INTERSTATE SYSTEM ADDITIONS

SEC. 137. Section 139 of title 23, United States Code, is amended by adding a new subsection (c) as follows:

"(c) The Secretary shall designate those portions of highway segments on the Federal-aid primary system in States which have no Interstate System that are logical components to a system serving the State's principal cities, national defense needs and military installations, and traffic generated by rail, water, and air transportation modes. The designated segments shall have been constructed to the geometric and construction standards adequate for current and probable future traffic demands and the needs of the locality of the segment. The mileage of any highway designated as part of the Interstate System under this subsection shall not be charged against the limitation established by the first sentence of section 103(e)(1) of this title. The designation of a highway under this subsection shall create no Federal financial responsibility with respect to such highway, except that the State involved may use Federal-aid highway funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title, for the resurfacing, rehabilitation, restoration, and reconstruction of a highway designated as a route on the Interstate System under this subsection.".

ALASKA HIGHWAY

SEC. 138. (a) Subsection (a) of section 218 of title 23, United States Code, is amended by adding after the second sentence the following: "In addition to such funds, the State of Alaska is authorized to expend on such highway any Federal-aid highway funds apportioned to the State of Alaska under this title as its Federal share. Notwithstanding any other provision of law any obligation limitation enacted for fiscal year 1982 or for any fiscal year thereafter shall not apply to projects authorized by the previous sentence.".

(b) This amendment shall be effective upon the date of the enactment of this Act.

THE MAINE TURNPIKE

SEC. 139. Section 145 of the Federal-Aid Highway Act of 1978 is amended to read as follows:

"SEC. 145. (a) Upon satisfaction by the State of Maine or the Maine Turnpike Authority of the following conditions, the State of Maine and the Maine Turnpike Authority shall be free of all restrictions with respect to the imposition and collection of tolls or other charges on the Maine Turnpike or for the use thereof contained in title 23, United States Code, or in any regulation or agreement thereunder:

"(1) repayment by the State of Maine or the Maine Turnpike Authority to the Treasurer of the United States of the sum of $8,577,900 which is the amount of Federal-aid highway funds received for construction of interchanges or connections with the Maine Turnpike at West Gardiner, Kennebec County, Maine, at York, York County, Maine, and at Scarborough-South Portland, Cumberland County, Maine. The amount to be repaid shall be deposited to the credit of the appropriation for 'Federal-Aid Highway (Trust Fund)'. Such repayment shall be

credited to the unprogramed balance of the Federal-aid highway funds of the classes determined by the Secretary to and in cooperation with the State of Maine. The amount so credited shall be in addition to all other funds then apportioned to such State and shall be available for expenditure in accordance with the provisions of title 23, United States Code.

"(b) The State of Maine and the Maine Turnpike Authority are deemed to be in compliance with section 129(c) of title 23, United States Code: *Provided*, That the conditions of subsection (a) are satisfied.".

On page 60, line 9, strike "135.", and insert "140.":

On page 70, line 1, after "amended", insert "as follows";

On page 71, after line 17, insert the following:

(dd) Section 117 is amended as follows:

(1) By inserting in subsection (a) the words "or under any Federal-aid programs" immediately after the words "Federal-aid systems".

(2) By deleting in subsection (f)(1) the words "secondary system" where they appear and inserting in lieu thereof the words "rural program".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 101. This Act may be cited as the "Federal-Aid Highway Improvement Act of 1981".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. (a) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,200,000,000 for the fiscal year ending September 30, 1983", and all that follows through the period at the end of the sentence and by inserting in lieu thereof the following: "the additional sum of $3,100,000,000 for the fiscal year ending September 30, 1983, the additional sum of $3,500,000,000 for the fiscal year ending September 30, 1984, the additional sum of $3,400,000,000 for the fiscal year ending September 30, 1985, the additional sum of $3,400,000,000 for the fiscal year ending September 30, 1986, the additional sum of $3,500,000,000 for the fiscal year ending September 30, 1987, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1988, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1989, and the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1990.".

(b) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding at the end thereof the following: Section 103 of title 23, United States Code, is amended by adding the following new subsection:

"(g) The obligation of funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, after the date of enactment of this subsection, except for advance construction interstate projects approved prior to enactment of this subsection, shall be limited to essential construction necessary to complete routes and portions on the Interstate System. Essential construction consists of (1) full access control; (2) a pavement design to accommodate the types and volumes of traffic anticipated for the twenty-year period from date of authorization of the initial basic construction contract; and (3) a design of not more than six lanes in rural areas and all urbanized areas under four hundred thousand population, and up to eight lanes in urbanized areas of four hundred thousand population or more as shown in the 1980 Federal census. The obligation of funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956 shall be further limited to the design concepts, locations, geometrics, and other construction features included in the 1981 Interstate Cost Estimate.".

(c) Section 104(b)(5)(A) of title 23, United States Code, is amended by adding at the end thereof the following new sentence:

"Notwithstanding any other provisions of this subparagraph, the Secretary in making the revised estimate of the cost of completing the then designated Interstate System for the purpose of transmitting it to the Senate and House of Representatives within ten days subsequent to January 2, 1983, or thereafter, shall include only those costs eligible for funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, and as further amended by section 102(b) of the Federal-Aid Highway Improvement Act of 1981.".

AUTHORIZATION OF USE OF COST ESTIMATES FOR APPORTIONMENT OF INTERSTATE FUNDS

SEC. 103. The Secretary of Transportation shall apportion for the fiscal years ending September 30, 1983, and September 30, 1984, the sums authorized to be appropriated for such periods by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in table of Committee Print of the Committee on Public Works and Transportation of the House of Representatives.

HIGHWAY AUTHORIZATION

SEC. 104. (a) Each of the authorizations for the fiscal year ending September 30, 1982, contained in section 104 of the Federal-Aid Highway Act of 1978 is hereby repealed. For the purpose of carrying out the following provisions of title 23, United States Code, the following sums are authorized to be appropriated out of the Highway Trust Fund:

(1) For the Federal-aid primary program, $1,500,000,000 for the fiscal year ending September 30, 1982, $1,500,000,000 for the fiscal year ending September 30, 1983, $1,600,000,000 for the fiscal year ending September 30, 1984, $1,600,000,000 for the fiscal year ending September 30, 1985, and $1,600,000,000 for the fiscal year ending September 30, 1986.

(2) For the Federal-aid rural program, $400,000,000 for the fiscal year ending September 30, 1982, $500,000,000 for the fiscal year ending September 30, 1983, $500,000,000 for the fiscal year ending September 30, 1984, $500,000,000 for the fiscal year ending September 30, 1985, and $400,000,000 for the fiscal year ending September 30, 1986.

(3) For the Federal-aid urban program, $600,000,000 for the fiscal year ending September 30, 1982, $700,000,000 for the fiscal year ending September 30, 1983, $700,000,000 for the fiscal year ending September 30, 1984, $700,000,000 for the fiscal year ending September 30, 1985, and $300,000,000 for the fiscal year ending September 30, 1986.

(4) For forest highways, $34,000,000 for the fiscal year ending September 30, 1982, $34,000,000 for the fiscal year ending September 30, 1983, $34,000,000 for the fiscal year ending September 30, 1984, $34,000,000 for the fiscal year ending September 30, 1985, and $34,000,000 for the fiscal year ending September 30, 1986.

(5) For public lands highways, $16,000,000 for the fiscal year ending September 30, 1982, $16,000,000 for the fiscal year ending September 30, 1983, $16,000,000 for the fiscal year ending September 30, 1984, $16,000,000 for the fiscal year ending September 30, 1985, and $16,000,000 for the fiscal year ending September 30, 1986.

(6) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, $700,000,000 for the fiscal year ending September 30, 1982, $1,100,000,000 for the fiscal year ending September 30, 1983, $1,300,000,000 for the fiscal year ending September 30, 1984, $1,300,000,000 for the fiscal year ending September 30, 1985, and $1,300,000,000 for the fiscal year ending September 30, 1986.

(7) For the highway safety improvement program, $100,000,000 for the fiscal year ending September 30, 1982, $100,000,000 for the fiscal year ending September 30, 1983, $50,000,000 for the fiscal year ending September 30, 1984, $50,000,000 for the fiscal year ending September 30, 1985, and $50,000,000 for the fiscal year ending September 30, 1986.

(b)(1) For each of the fiscal years 1983, 1984, 1985, 1986, and 1987, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(2) Subsection (g) of section 144 of title 23, United States Code, is amended as follows:

"(g) Of the amount authorized per fiscal year, for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, all but $200,000,000 for fiscal years 1982, 1983, 1984, 1985, and 1986 shall be apportioned as provided in subsection (e) of this section; $200,000,000 for fiscal years 1982, 1983, 1984, 1985, and 1986 of the amount authorized shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such sums shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement and rehabilitation cost of each of which is more than $10,000,000 and for any project for a highway bridge replacement or rehabilitation cost of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Not less than 15 per centum of the amount apportioned to each State in a fiscal year shall be expended for projects to replace or rehabilitate bridges located on public roads other than those on public roads functionally classified as arterials or major collectors. The Secretary after consultation with State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on public roads functionally classified as arterials or major collectors when he determines that such State has inadequate needs to justify such expenditure.".

(3) Paragraph (3) of section 202 of the Highway Safety Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982." and inserting in lieu thereof the following: "and September 30, 1981.".

(4) Paragraph (6) of section 202 of the Highway Safety Act of 1978 is amended by striking out "$1,300,000,000 for the fiscal year ending September 30, 1981, and $900,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof the following: "and $1,300,000,000 for the fiscal year ending September 30, 1981.".

(5) Paragraph (8) of section 202 of the Highway Safety Act of 1978 is amended by striking out "$150,000,000 for the fiscal year ending September 30, 1981, and $200,000,000 for the fiscal year ending September 30,

1982." and inserting in lieu thereof the following: "and $150,000,000 for the fiscal year ending September 30, 1982.".

(c) The unobligated balance of contract authority established in paragraph (15) of section 104(a) of the Federal-Aid Highway Act of 1978 shall lapse September 30, 1981.

(d) Section 203(b) of the Highway Safety Act of 1973, as amended by section 203(a) of the Highway Safety Act of 1978, is amended by striking out "September 30, 1981, and September 30, 1982." and inserting in lieu thereof "and September 30, 1981.".

(e) Section 163 of the Federal-Aid Highway Act of 1973, as amended by section 134 (c) of the Federal-Aid Highway Act of 1978, is further amended by striking out "$100,000,000 for the fiscal year ending September 30, 1981, and $100,000,000 for the fiscal year ending September 30, 1982, except that" and inserting in lieu thereof "and $100,000,000 for the fiscal year ending September 30, 1981, except that".

(f) Section 141(1) of the Federal-Aid Highway Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982," and inserting in lieu thereof "and September 30, 1981,".

INTERSTATE SYSTEM RESURFACING APPORTIONMENT

SEC. 105. Section 104(b)(5)(B) of title 23, United States Code, is amended to read as follows:

"(B) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

"60 per centum in the ratio that lane miles on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such lane miles in all States; and 40 per centum in the ratio that vehicle miles traveled on lanes on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such vehicle miles in all States. Notwithstanding the preceding sentence, no State excluding any State that has no interstate lane miles shall receive less than one-half of 1 per centum of the total apportionment made by this subparagraph for any fiscal year.".

INTERSTATE SYSTEM RESURFACING AUTHORIZATION

SEC. 106. Section 105 of the Federal-Aid Highway Act of 1978 is amended to read as follows: "In addition to any funds authorized to be appropriated, there is authorized to be appropriated out of the Highway Trust Fund, not to exceed $175,000,000 per fiscal year for each of the fiscal years ending September 30, 1980, and September 30, 1981, not to exceed $275,000,000 for the fiscal year ending September 30, 1982, not to exceed $800,000,000 for the fiscal year ending September 30, 1983, not to exceed $1,300,000,000 for the fiscal year ending September 30, 1984, not to exceed $1,700,000,000 for the fiscal year ending September 30, 1985, not to exceed $1,700,000,000 for the fiscal year ending September 30, 1986, and not to exceed $2,200,000,000 for the fiscal year ending September 30, 1987. Such sums shall be obligated for projects for resurfacing, restoring, rehabilitating, and reconstructing routes of the Interstate System designated under sections 103 and 139(c) of title 23, United States Code (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978), except that where a State certifies to the Secretary that any part of such sums are in excess of the needs of such State for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System and the Secretary accepts such certification, such State may transfer sums apportioned to it under section 104(b)(5)(B) to its apportionment under section 104(b)(1) of title 23, United States Code. Such sums may also be obligated for projects for resurfacing, restoring, rehabilitating and reconstructing a toll road which has been designated as a part of the Interstate System if an agreement satisfactory to the Secretary of Transportation has been reached with the State highway department and any public authority with jurisdiction over such toll road prior to the approval of such project that the toll road will become free to the public upon the collection of tolls sufficient to liquidate the cost of the toll road or any bonds outstanding at the time constituting a valid lien against it, and the cost of maintenance and operation and debt service during the period of toll collections. The agreement referred to in the preceding sentence shall contain a provision requiring that if, for any reason, a toll road receiving Federal assistance under this section does not become free to the public upon collection of sufficient tolls, as specified in the preceding sentence, Federal funds used for projects on such toll road pursuant to this section shall be repaid to the Federal Treasury.".

INTERSTATE SYSTEM RESURFACING

SEC. 107. (a) Section 119(a) of title 23, United States Code, is amended by striking out the words "and rehabilitating" and by inserting in lieu thereof the words "rehabilitating, and reconstructing" and by striking out the words "those lanes in use for more than five years on the Interstate System" and inserting in lieu thereof the words "routes of the Interstate System designated under sections 103 and 139(c) of this title.".

(b) Section 119 of title 23, United States Code, is further amended by adding the following new subsection:

"(b) Reconstructing as authorized in subsection (a) of this section may include, but is not limited to, the addition of travel lanes and the reconstruction of interchanges and overcrossings along existing completed interstate routes, including the acquisition of right-of-way where necessary.".

HOLD HARMLESS—INTERSTATE RESURFACING

SEC. 108. The amount a State, excluding any State that has no interstate mileage, receives by apportionment on October 1, 1981, under section 104(b)(5)(B) of title 23, United States Code, shall be sufficient to assure that its total apportionments under section 104(b)(5) of title 23, United States Code, are not less than that which would have been made on October 1, 1981, to such State under section 104(b)(5) of title 23, United States Code, prior to the enactment of this Act.

INTERSTATE SUBSTITUTION AUTHORIZATION

SEC. 109. (a) There is authorized to be appropriated out of the Highway Trust Fund for substitute highway projects under section 103(e)(4) of title 23, United States Code, $200,000,000 for the fiscal year ending September 30, 1982, $225,000,000 for the fiscal year ending September 30, 1983, $250,000,000 for the fiscal year ending September 30, 1984, $250,000,000 for the fiscal year ending September 30, 1985, and $300,000,000 for the fiscal year ending September 30, 1986.

(b) Section 103(e)(4) of title 23, United States Code, is amended by striking the eighth sentence and inserting in lieu thereof the following: "There are authorized to be appropriated out of any money in the general fund of the Treasury not otherwise appropriated for liquidation of the obligations incurred under this paragraph for substitute transit projects such sums as may be necessary.".

(c)(1) The first sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which is within an urbanized area or which passes through and connects urbanized areas within a State and".

(2) The second sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which will serve the urbanized area and the connecting nonurbanized area corridor from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or area to be served, and which are submitted by the Governor of the State in which the withdrawn route was located," and inserting in lieu thereof, "which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or areas to be served if the withdrawn interstate route or portion thereof was within an urbanized area or passed through and connected urbanized areas, which are selected by the Governors of the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Governors of the States in which the withdrawn route was located.".

(d) Section 103(e)(4) of title 23, United States Code, is amended as follows:

(1) In the second sentence by inserting after the words "approved by Congress," the words "or as included in the approved 1983 interstate cost estimate, whichever is earlier,".

(2) In the second sentence by striking "enactment of the Federal-Aid Highway Act of 1976 or the date of approved of each substitute project under this paragraph, whichever is later" and inserting in lieu thereof "the date of the withdrawal or September 30, 1983, for substitute projects approved after September 30, 1983,".

(3) In the second sentence after "the basis of the latest cost estimate," add "or that is the basis of the approved 1983 interstate cost estimate, whichever is earlier,"

(e) Section 103(e)(4) of title 23, United States Code, is amended by adding at the end of such subsection the following: "Any route or segment thereof added to the Interstate System after March 7, 1978, pursuant to specific legislation will not be eligible for withdrawal and substitution under this subsection.".

(f) The first sentence of section 120(d) of title 23, United States Code, is amended by inserting after the words "traffic control signalization," the following: "including traffic control signalization projects under section 103(e)(4) of this title, notwithstanding the provisions of the fifth sentence of section 103(e)(4),".

PRIMARY PROGRAM

SEC. 110. (a) The first sentence of subsection (b)(1) of section 104 of title 23, United States Code, is amended by striking out "and priority primary routes".

(b) The first sentence of subsection (c) of section 104 of the Federal-Aid Highway Act of 1978 is amended by striking out "September 30, 1981 and September 30, 1982," and inserting in lieu thereof the following: "and September 30, 1981,".

(c) Section 147 of title 23, United States Code, is repealed.

(d) The analysis of chapter 1 of title 23 is amended by deleting

"147. Priority Primary Routes."

and inserting in lieu thereof

"147. Repealed.".

FEDERAL-AID URBAN PROGRAM

SEC. 111. Section 103 of title 23, United States Code, is amended by deleting subsec-

tion (d) and inserting in lieu thereof the following:

"(d) The Secretary may approve Federal-aid urban programs in urban areas which programs shall be selected by the appropriate local officials so as to serve the goals and objectives of the community, with the concurrence of the State highway department, as provided in section 105 of this title. The programs shall facilitate transportation in the urban area and include projects to: reduce congestion and improve the flow of traffic on arterial and collector routes, aid integration of different transportation modes to and from airports and other terminals and business districts, support clean air and energy conservation objectives, make highway capital improvements, improve highway safety, eliminate safety hazards and roadside obstacles, implement transportation systems management activities and serve other national goals and objectives. All public roads in urban areas are eligible except those on the primary system and the Interstate System. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to urban programs, except those provisions determined by the Secretary to be inconsistent with this subsection. The Secretary shall not waive the applicability of the planning requirements of section 134 of this title.".

FEDERAL-AID RURAL PROGRAM

SEC. 112. Section 103 of title 23, United States Code, is amended by deleting subsection (c) and inserting in lieu thereof:

"(c) The Federal-aid rural program shall be selected by the State highway agencies and the appropriate local road officials in cooperation with each other, subject to approval by the Secretary as provided in subsection (f) of this section and section 105 of this title. In making such selections, the needs of agriculture roads, rural mail routes, public school bus routes, local rural roads, airport and water port access roads, and goods movement shall be considered. All public roads, except those on the primary system, the Interstate System, and those in urban areas are eligible. Projects to improve highway safety and nonurbanized public transportation projects, including facilities and technical assistance, are also eligible for assistance under this section. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to rural programs, except those provisions determined by the Secretary to be inconsistent with this subsection.".

TRANSFERABILITY

SEC. 113. Paragraphs (1) and (2) of subsection (d) of section 104 of title 23, United States Code, are amended by striking out "50" each place it appears and inserting in lieu thereof at each such place "100".

HIGHWAY SAFETY IMPROVEMENT PROGRAM

SEC. 114. (a) Section 151 of title 23, United States Code, is amended to read as follows:

"§ 151. Highway safety improvement program

"(a) The Secretary shall establish a highway safety improvement program for projects on any public road or street in rural or urban areas. Assistance shall be available under this program for highway safety improvement projects, as defined in subsection (a) of section 101 of this title; for railway-highway crossing projects as provided for in section 130 of this title; for the implementation of highway-related safety requirements and guidelines issued by the Secretary under section 402 of this title; and for the development, implementation, and evaluation of the highway safety improvement program required under subsection (b) of this section.

"(b) Each State shall develop and implement on a continuing basis a highway safety improvement program including procedures for the planning, implementation, and evaluation of highway safety improvement projects on all highways, with the specific objective if reducing the number and severity of highway traffic accidents. Each State shall have a process for collecting, maintaining, and analyzing accident, traffic, and highway data; for conducting engineering studies of hazardous locations, sections and elements, for assigning priorities to the various types of hazards identified; for implementing safety improvement projects in accordance with the priorities developed; and for the evaluation of the safety benefits obtained.

"(c) Of the funds authorized to carry out this section each State shall expend 35 per centum of the sums apportioned for projects under section 203 of the Highway Safety Act of 1973 unless the State requests the Secretary to waive this minimum and the Secretary finds other safety projects are of a higher priority.

"(d)(1) Funds authorized to carry out this section shall be available for expenditure for projects on any public road (other than the Interstate System).

"(2) The Federal share payable on any project under this section shall not exceed 90 per centum of the cost thereof except that the Federal share of safety improvements projects for the elimination of hazards of rail-highway crossings shall not exceed that as provided in section 120(d) of this title.

"(3) The unobligated balance of contract authority established prior to enactment of this section for carrying out section 402 by the Federal Highway Administration shall remain available for obligation as provided prior to enactment of this section and shall lapse not later than September 30, 1984.

"(e) Funds authorized to be appropriated to carry out this section shall be apportioned to the States as follows: 60 per centum in the ratio which the population of each State bears to the total population of all States, and 40 per centum in the ratio which the public road mileage in each State bears to the total public road mileage in all States. The annual apportionment for each State shall not be less than one-half of 1 per centum of the total apportionment. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under section 104(b)(1), except that the Secretary is authorized to waive such provisions of this title that he deems inconsistent with the purposes of this section.

"(f) In any State wherein the State is without legal authority to construct or maintain a project under this section, such State shall enter into a formal agreement for such construction or maintenance with the appropriate local officials of the county or municipality in which such project is located.

"(g) One-half of 1 per centum of funds authorized for carrying out this section shall be made available to the Secretary of the Interior, who shall exercise the responsibilities assigned to State under subsection (b) of this section in carrying out this section on Indian reservations. Such funds shall be subject to a deduction of not to exceed 5 per centum for the necessary costs of administering the provisions of this section

"(h) Each State shall report to the Secretary of Transporation not later than December 30 of each year, on the progress being made to implement the highway safety improvement program and the effectiveness of safety improvements in reducing the number and severity of accidents. The Secretary of Transportation shall submit a report to the Congress not later than April 1 of each year on the progress being made by the States in implementing the highway safety improvement program.".

(b) Section 152 of title 23, United States Code, is repealed.

(c) The analysis of chapter 1 of title 23, "151. Pavement marking demonstration program.", and
United States Code, is amended by deleting "152. Hazard elimination program.",
and inserting in lieu thereof
"151. Highway safety improvement program.", and
"152. Repealed.".

(d) Section 203(e) of the Highway Safety Act of 1973 (Public Law 93-87), as amended by the Congressional Reports Elimination Act of 1980 (Public Law 96-470), is repealed.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM APPORTIONED FUNDS

SEC. 115. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the following formula: All deficient bridges will be divided into four categories: (1) Federal-aid system bridges, and bridges on public roads functionally classified as major collectors, eligible for replacement, (2) Federal-aid system bridges and bridges on public roads functionally classified as major collectors, eligible for rehabilitation, (3) off-system bridges eligible for replacement, and (4) off-system bridges eligible for rehabilitation. The square footage of deficient Federal-aid system bridges, or bridges on public roads functionally classified as major collectors, both those eligible for replacement and those eligible for rehabilitation, shall be multiplied by a factor of two. The square footage of deficient bridges in each category shall be multiplied by the average national unit cost, on a State-by-State basis, as determined by the Secretary; and the total cost of each State divided by the total cost of the Nation's deficient bridges shall yield the apportionment factors. No State shall receive more than 9 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds authorized to carry out this section which are apportioned under this section shall be available for expenditure for three years after the close of the fiscal year for which they are authorized.".

(b) Notwithstanding any other provision of law or Federal regulation, any new bridge which is to be constructed pursuant to section 144 of title 23, United States Code, in tandem with any existing major structure built after June 28, 1969, with no more than 2.7 miles of highway between them need not carry a roadway width in excess of 69 feet.

FEDERAL LANDS HIGHWAYS

SEC. 116. Section 101 of title 23, United States Code, is amended by adding the following subsection:

"(f) It is the sense of Congress that Federal roads which are public roads receive the same uniform policies as roads which are on the Federal-aid systems or under the Federal-aid programs. The Congress therefore finds that in order to accomplish this objective there shall be a coordinated Federal lands highway program which shall consist of the forest highways, park roads, parkways, Indian reservation roads, and public lands highways. Appropriations for the construction and improvement of such Federal roads shall be administered by the Secretary in conformity with regulations jointly approved by him and the Secretaries of the appropriate Federal land managing agencies."

CARPOOL AND VANPOOL PROJECTS

SEC. 117. (a) Section 120(d) of title 23, United States Code, is amended by inserting before the words "may amount to 100 per

centum" the words "or commuter carpooling or vanpooling".

(b) Section 142 of title 23, United States Code, is amended as follows:

(1) In subsection (a)(1) delete in the first sentence the words "bus lanes" and inserting in lieu thereof the following: "high occupancy vehicle lanes" and by deleting the words "bus and other" and inserting in lieu thereof the following: "high occupancy vehicle and".

(2) In subsection (b) delete the word "bus" and in lieu thereof insert "high occupancy vehicle".

(3) In subsection (f) delete the words "public mass transportation systems" and in lieu thereof insert "high occupancy vehicles".

(c) The Secretary of Transportation is authorized and directed to expend such sums as are necessary out of the administrative funds authorized by subsection (a), section 104, title 23, United States Code to carry out the provisions of subsection (d), section 126 of the Federal-Aid Highway Act of 1978.

(d) Section 146 of title 23, United States Code, is amended by redesignating existing subsection (b) as subsection (c) and by inserting the following new subsection (b):

"(b)(1) The Secretary may approve for Federal financial assistance from funds apportioned under section 104(b)(5)(B) of this title, projects for designating existing facilities, or for acquisition of rights of way or construction of new facilities, for use as preferential parking for carpools, provided that such facilities (1) are located outside of a central business district and within an interstate highway corridor, and (2) have as their primary purpose the reduction of vehicular traffic on the interstate highway.

"(2) Nothing in this subsection, or in any rule or regulation issued under this subsection, or in any agreement required by this subsection, shall prohibit (1) any State, political subdivision, or agency or instrumentality thereof, from contracting with any person to operate any parking facility designated or constructed under this subsection, or (2) any such person from so operating such facility. Any fees charged for the use of any such facility in connection with the purpose of this subsection shall not be in excess of the amount required for operation and maintenance, including compensation to any person for operating the facility.

"(3) For the purposes of this subsection, the terms "facilities" and "parking facilities" are synonymous and shall have the same meaning given "parking facilities" in section 137 of this title.".

EMERGENCY RELIEF

SEC. 118. (a)(1) The first sentence of subsection (a) of section 125 of title 23, United States Code, is amended by striking the first sentence thereof and inserting in lieu thereof the following: "An emergency fund is authorized for expenditure by the Secretary subject to the provisions of this section and section 120 of this title, for the repair or reconstruction of highways, roads, and trails which the Secretary shall find have suffered serious damage as the result of (1) natural disaster over a wide area such as by floods, hurricanes, tidal waves, earthquakes, severe storms, or landslides, or (2) catastrophic failures from any external cause, in any part of the United States. In no event shall funds be used pursuant to this section for the repair or reconstruction of bridges which have been permanently closed to all vehicular traffic by the State because of imminent danger of collapse due to structural deficiencies or physical deterioration.".

(2) Subsection (a) of section 125 of title 23, United States Code, is further amended by inserting in the second sentence, as that sentence read prior to the amendments made by paragraph (1) of this subsection, after the word "appropriated" the words "from the Highway Trust Fund" by striking the colon in the second sentence and inserting in lieu thereof a period by deleting "(1)" after the colon in the second sentence; by inserting a period after the words "in such years" and by striking the remainder of the sentence following "in such years".

(b) Notwithstanding any other provision of law, all expenditures made under section 125 of title 23, United States Code, prior to the fiscal year ending September 30, 1978, are authorized to be appropriated from the Highway Trust Fund.

(c) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the words "after September 30, 1976," the words "and not more than $150,000,000 is authorized to be expended in any one fiscal year commencing after September 30, 1980.".

(d) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following: *"Provided*, That obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (c) of this section, resulting from a single natural disaster or a single catastrophic failure shall not exceed $30,000,000 in any State.".

(e) The amendments made by subsection (d) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the data of enactment of this section.

(f) Subsection (f) of section 120 of title 23, United States Code, is amended to read as follows:

"(f) The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title shall not exceed 75 per centum of the cost thereof: *Provided*, That the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 per centum of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, "a comparable facility" shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.".

(g) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

(h)(1) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the words "the Federal-aid highway systems, including the Interstate System" and by inserting in lieu thereof the words "the Interstate System, the Primary System, and on any routes functionally classified as arterials or major collectors," in the two places the stricken words appear.

(2) Subsection (c) of section 125 of title 23, United States Code, is amended by striking the words "on any of the Federal-aid highway systems" and inserting in lieu thereof the words "routes functionally classified as arterials or major collectors".

ACCESS TO LAKES

SEC. 119. (a) Section 155 of title 23, United States Code, is amended by deleting subsection (e) and inserting in lieu thereof:

"(e) Sums apportioned in accordance with paragraph (2) of section 104(b) of this title shall be available for projects under this section.".

(b) Sums authorized under section 155 of title 23, United States Code, prior to enactment of the section shall continue to be available for the fiscal year authorized and for the three succeeding fiscal years.

(c) Section 104(a)(18) of the Surface Transportation Assistance Act of 1978 is amended by deleting "September 30, 1981, and September 30, 1982" and inserting in lieu thereof "and September 30, 1981".

TERRITORIAL HIGHWAY PROGRAM

SEC. 120. (a) Section 215 of title 23, United States Code, is hereby repealed.

(b)(1) The unobligated balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, shall remain available for obligation under the conditions applicable prior to such enactment.

(2) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, is rescinded.

(c) Section 120(1) of title 23, United States Code, is repealed.

(d) Section 401 of title 23, United States Code, is amended by deleting the second sentence thereof.

(e) The sixth sentence of section 402(c) of title 23, United States Code, is amended to read as follows: "The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportionment.".

(f) The analysis of chapter 2 of title 23, United States Code, is amended by deleting:

"215. Territories highway development program."

and inserting in lieu thereof:

"215. Repealed.".

BICYCLE TRANSPORTATION PROGRAM

SEC. 121. Section 217 of title 23, United States Code, is amended—

(1) by striking in the first sentence of subsection (a), the words "and the multiple use of highway rights-of-way" and "on or in conjunction with highway rights-of-way";

(2) by inserting after the first sentence in subsection (a) the following: "Federal-aid highway projects may include nonconstruction programs or projects which can reasonably be expected to enhance the safety and use of bicycles.";

(3) by striking out in subsection (b) the words "that provided in section 120 of this title" and inserting in lieu thereof "100 per centum"; and

(4) by striking out subsection (e).

HIGHLAND SCENIC HIGHWAY

SEC. 122. Section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, is further amended to read as follows:

"(f) The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed. Commercial use by trucks may be limited and controlled by permit.".

ALLOCATION OF URBAN FUNDS

SEC. 123. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds

allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon approval of the appropriate local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

CERTIFICATION DEMONSTRATION

SEC. 124. The Secretary of Transportation is directed to conduct a demonstration program in not more than four States of geographic and population diversity to study the impacts of expanding the availability of the procedures under the Certification Acceptance and Secondary Road Plan programs to other Federal-aid systems or programs as now provided by section 117 of title 23, United States Code. The demonstration program should study the impacts of allowing the Secretary of Transportation to discharge his responsibilities under any Federal law relative to a Federal-aid highway project provided certification is made by the States pursuant to section 117 of title 23, United States Code, and other requirements of Federal law.

DEFENSE ACCESS ROAD

SEC. 125. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)", and inserting in lieu thereof "Funds appropriated for defense maneuvers and exercises".

MAINTENANCE

SEC. 126. (a) Subsection (a) of section 116 of title 23, United States Code, is amended by striking the second sentence.

(b) Subsection (b) of section 116 of title 23, United States Code, is amended by striking "constructed on the Federal-aid secondary system or within a municipality,".

(c) The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State, in which such project shall be located, as he deems most appropriate until such project shall have been put in proper condition of maintenance.".

(d) Section 109 of title 23, United States Code, is amended by striking subsection (m) and by relettering subsection (n) as (m).

(e) Section 116 of title 23, United States Code, is amended by adding subsection (f) as follows:

"(f) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to insure that the condition of these routes is maintained at the level required by the purposes for which they were designed. The initial guidelines shall be issued no later than July 1, 1982.".

(f) Section 119 of title 23, United States Code, is amended by striking subsection (b).

(g) Section 116 of title 23, United States Code, is amended by adding subsection (g) as follows:

"(g) Not later than one year after the date of issuance of initial guidelines under subsection (f) of this section each State shall have a program for the Interstate System in accordance with such guidelines. Each State shall certify on January 1 of each year that it has such a program and the Interstate System is maintained in accordance with the program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate System in accordance with such program, the next apportionment of funds to such State for the Interstate System shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If, within one year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate System in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. If the Secretary does not make such a determination within such one year period, the amount withheld shall be reapportioned to all other eligible States.".

CONSTRUCTION

SEC. 127. (a) Subsection (a) of section 114 of title 23, United States Code is amended to read as follows:

"(a) The construction of any highways or portions of highways located on a Federal-aid system or under a Federal-aid program shall be undertaken by the respective State highway departments or under their direct supervision. The construction work and labor in each State shall be in accordance with the laws of that State and applicable Federal laws. Except as provided in section 117 of this title, the Secretary shall establish procedures for the inspection and approval of such construction. Construction may begin as soon as funds are available pursuant to subsection (a) of section 118 of this title. The State highway department shall not erect any informational signs other than official traffic control devices conforming with standards developed by the Secretary on any project where actual construction is in progress and visible to highway users.".

(b) Subsection (c) of section 121 of title 23, United States Code is amended by striking the words "following inspections".

RESEARCH AND PLANNING

SEC. 128. (a) Subsection (c) of section 307, title 23, United States Code, is amended by adding paragraph (5) as follows:

"(5) The sums provided pursuant to paragraph (2) of this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under section 104(b)(1) of this title.".

(b) Section 120 of title 23, United States Code, is amended by adding a subsection (i) as follows:

"(i) The Federal share payable on account of any project financed under section 307(c) of this title shall be 85 per centum, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 95 per centum of the total cost of any such project.".

BRIDGE RECONSTRUCTION

SEC. 129. (a) The Secretary of Transportation may approve any project for the reconstruction, resurfacing, restoration, or rehabilitation of any bridge on the Interstate System which is both owned by the United States Government and located in two States and the District of Columbia, whenever both such States and the District shall submit to the Secretary for approval appropriate plans, specifications, and estimates for any such project.

(b) The Secretary of Transportation shall prior to approval of such project enter into an agreement with such States and the District for future maintenance and rehabilitation of the bridge.

(c) There is hereby authorized to be appropriated $70,000,000 out of the Highway Trust Fund, to be available until expended, to carry out the provisions of this section. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned for the Interstate System under chapter 1 of title 23, United States Code. The Federal share of the project cost shall be 100 per centum.

(d) In making any revised estimate of the cost completing the Interstate System, which estimate is required by section 104(b)(5)(A) of title 23, United States Code, to be transmitted to the Congress after the date of enactment of this Act, the Secretary of Transportation shall not include any costs for any bridge eligible for approval under subsection (a). The Secretary shall reduce apportionments made under section 104(b)(5) of title 23, United States Code, to such States or District by an amount, if any, equal to amounts apportioned under such section to any such State or District with respect to any such bridge for any fiscal year ending before October 1, 1981. The reduction, if any, made by the preceding sentence for each State or the District shall be made out of apportionments under such section to such State or the District, beginning with the apportionment for the fiscal year ending September 30, 1983, and shall be made, in equal shares, over the number of fiscal years in which apportionments described in the preceding sentence were made.

NONDISCRIMINATION

SEC. 130. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking the words "or national origin" and inserting in lieu thereof the words "national origin or sex".

(b) Section 140 of title 23, United States Code, is amended by adding new subsection (c) as follows:

"(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete, on an equal basis, for contracts and subcontracts. Whenever apportionments are made under subsection 104(b) of this title, the Secretary shall deduct such sums as he may deem necessary, not to exceed $10,000,000 per fiscal year, for the administration of this subsection. The provisions of section 3709 of the Revised Statute, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of 41 U.S.C. 252(e).".

(c) The title of section 140 of title 23, United States Code, is amended to read:

"§ 140. Nondiscrimination"

and the analysis of chapter 1 of title 23, United States Code, is amended by striking out

"140. Equal employment opportunity."

and inserting in lieu thereof

"140. Nondiscrimination.".

INTERAGENCY AGREEMENTS

SEC. 131. (a) Chapter 1 of title 23, United States Code, is amended by adding after section 156 the following new section:

"§ 157. Interagency agreements

"Not later than one hundred and eighty days after the date of enactment of this section, the Secretary shall enter into agreements with the Secretaries of the Departments of Interior and Defense, the Administrator of the Environmental Protection Agency, and the heads of such other Federal departments, agencies, and instrumentalities as the Secretary determines, to minimize,

to the greatest extent possible, duplication, paperwork, and delays in the development and approval of projects under this title and any other provision of law relating to the Federal highway programs. Notwithstanding any other provision of law, such agreements shall provide that actions on applications or requests for permits, licenses, findings, and other approvals and determinations required for such projects will be fully coordinated by the Department of Transportation with the review process established under the National Environmental Policy Act of 1969, as amended, and, to the greatest extent practicable, that a decision with respect to each such application or request will be made contemporaneously with approval of the environmental impact statement, finding of no significant impact, or categorical exclusion required for such project, but in no event later than ninety days after the date of approval of such environmental review document.".

(b) The analysis of chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Interagency agreements.".

FEDERAL SHARE—FEDERAL-AID RURAL AND URBAN PROGRAMS

SEC. 132. Section 120(a) of title 23, United States Code, is amended (1) by adding after "75 per centum of the cost of construction" whenever it occurs the following: "for projects on the Federal-aid primary system and for projects to resurface, restore, rehabilitate, and reconstruct the Federal-aid Interstate System and 50 per centum of the cost of construction for projects under the Federal-aid rural program and the Federal-aid urban program," and (2) by adding the following new sentence at the end thereof: "The Federal share payable on account of any project under the Federal-aid rural program or the Federal-aid urban program which the Secretary has approved prior to enactment of the Federal-Aid Highway Improvement Act of 1981 shall not exceed 75 per centum of the cost of construction subject to the conditions set forth in this subsection or at the option of the State the Federal share may be revised to 50 per centum of such cost, but the Federal share payable for any such project which the Secretary approves after enactment of such Act shall not exceed 50 per centum of the cost of construction subject to the conditions set forth in this subsection.".

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 133. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1982 shall not exceed $7,200,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 147 of the Surface Transportation Assistance Act of 1978, Sections 109 and 129 of the Federal-Aid Highway Improvement Act of 1981, and the third sentence of subsection 218(a) of title 23, United States Code, as added by this Act. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For the fiscal year 1982, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the periods October 1 through December 31, 1981, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1982, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

TRUCK WEIGHTS

SEC. 134. Section 127 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and adding the following: "*Provided further*, That each State shall establish a single axle load of not less than twenty thousand pounds; a tandem axle load limit of not less than thirty-four thousand pounds; and an overall gross weight limit of not less than eighty thousand pounds.".

NATIONAL MAXIMUM SPEED LIMIT

SEC. 135. Section 154(f) of title 23, United States Code, is amended to read as follows:

"(f) If the data submitted by a State pursuant to subsection (e) of this section show that the percentage of motor vehicles exceeding fifty-five miles per hour is greater than 50 per centum, the Secretary shall reduce the State's apportionment of Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 5 per centum of the amount to be apportioned for the following fiscal year.".

MARYLAND TRANSPORTATION AUTHORITY

SEC. 136. (a) The Act entitled "An Act authorizing the State of Maryland, by and through its State Roads Commission or the successors of said Commission, to construct, maintain, and operate certain bridges across streams, rivers, and navigable waters which are wholly or partly within the State", approved April 7, 1938, and the Act of June 16, 1948 (62 Stat. 463, Public Law 654, 80th Congress), as amended by the Act of November 17, 1967 (81 Stat. 466, Public Law 144, 90th Congress), are hereby repealed.

(b) The State of Maryland, by and through the Maryland Transportation Authority or the successors of such Authority, is authorized, subject to all applicable Federal laws, (1) to continue to collect tolls after the date of enactment of this Act from its existing transportation facilities projects, as defined on the date of enactment of this Act in the laws of the State of Maryland, and (2) to use the revenues from such tolls for transportation projects of the type which the State or the Maryland Transportation Authority is authorized to construct, operate, or maintain under the laws of the State of Maryland as such laws exist on the date of enactment of this Act.

INTERSTATE SYSTEM ADDITIONS

SEC. 137. Section 139 of title 23, United States Code, is amended by adding a new subsection (c) as follows:

"(c) The Secretary shall designate those portions of highway segments on the Federal-aid primary system in States which have no Interstate System that are logical components to a system serving the State's principal cities, national defense needs and military installations, and traffic generated by rail, water, and air transportation modes. The designated segments shall have been constructed to the geometric and construction standards adequate for current and probable future traffic demands and the needs of the locality of the segment. The mileage of any highway designated as part of the Interstate System under this subsection shall not be charged against the limitation established by the first sentence of section 103(e)(1) of this title. The designation of a highway under this subsection shall create no Federal financial responsibility with respect to such highway, except that the State involved may use Federal-aid highway funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title, for the resurfacing, rehabilitation, restoration, and reconstruction of a highway designated as a route on the Interstate System under this subsection.".

ALASKA HIGHWAY

SEC. 138. (a) Subsection (a) of section 218 of title 23, United States Code, is amended by adding after the second sentence the following: "In addition to such funds, the State of Alaska is authorized to expend on such highway any Federal-aid highway funds apportioned to the State of Alaska under this title as its Federal share. Notwithstanding any other provisions of law any obligation limitation enacted for fiscal year 1982 or for any fiscal year thereafter shall not apply to projects authorized by the previous sentence.".

(b) This amendment shall be effective upon the date of the enactment of this Act.

THE MAINE TURNPIKE

SEC. 139. Section 145 of the Federal-Aid Highway Act of 1978 is amended to read as follows:

"SEC. 145. (a) Upon satisfaction by the State of Maine or the Maine Turnpike Authority of the following conditions, the State of Maine and the Maine Turnpike Authority shall be free of all restrictions with respect to the imposition and collection of tolls or other charges on the Maine Turnpike or for the use thereof contained in title 23, United States Code, or in any regulation or agreement thereunder:

"(1) repayment by the State of Maine or the Maine Turnpike Authority to the Treasurer of the United States of the sum of $8,577,900 which is the amount of Federal-aid highway funds received for construction of interchanges or connections with the Maine Turnpike at West Gardiner, Kennebec County, Maine, at York, York County, Maine, and at Scarborough-South Portland, Cumberland County, Maine. The amount to be repaid shall be deposited to the credit of the appropriation for 'Federal-Aid Highway (Trust Fund)'. Such repayment shall be credited to the unprogramed balance of the Federal-aid highway funds of the classes determined by the Secretary to and in cooperation with the State of Maine. The amount so credited shall be in addition to all other funds then apportioned to such State and shall be available for expenditure in accordance with the provisions of title 23, United States Code.

"(b) The State of Maine and the Maine Turnpike Authority are deemed to be in compliance with section 129(c) of title 23, United States Code: *Provided*, That the conditions of subsection (a) are satisfied.".

TECHNICAL AMENDMENTS

SEC. 140. (a) Section 101(a) is amended as follows:

(1) In the tenth sentence, by inserting the words "or under one of the Federal-aid programs" immediately after the words "Federal-aid systems";

(2) In the nineteenth sentence, by striking the period at the end thereof and adding the words "or under the Federal-aid programs.";

(3) In the thirtieth sentence, by deleting the words "secondary system" and inserting in lieu thereof the words "rural program", and by deleting the word "system" and inserting in lieu thereof the word "program";

(4) In the thirty-first sentence, by deleting the word "system" each time it appears and inserting in lieu thereof the word "program"; and

(5) by adding after the twenty-eighth sentence the following sentence: "The term 'Federal-Aid program' means any one of the Federal-Aid highway programs described in section 103 of this title.".

(b)(1) Section 103 is amended by adding to the title the words "and programs" after the words "Federal-Aid systems";

(2) Section 103(a) is amended to read as follows: "For the purpose of this title, the Federal-Aid systems, which consist of the primary system and the Interstate System, along with the Federal-aid programs, which consist of the Federal-aid rural programs and the Federal-aid urban program, are established and continued pursuant to the provisions of this section.";

(3) Section 103(f) is amended to read as follows: "The Secretary shall have authority to approve in whole or in part the Federal-aid primary system, the Federal-aid rural program, the Federal-aid urban program, and the Interstate System, as and when such systems and programs or portions thereof are designated, or to require modifications or revisions thereof. No Federal-aid system or program or portion thereof shall be eligible for projects in which Federal funds participate until approved by the Secretary.";

(4) Subsections (g) and (h) of section 103 are repealed; and

(5) The analysis of chapter 1 of title 23 is amended by deleting

"103. Federal-aid systems."

and inserting in lieu thereof

"103. Federal-aid systems and programs.".

(c) Section 104 is amended as follows:

(1) In subsection (a) and (b)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems" each time they appear;

(2) In paragraph (2) of section 104(b), by deleting the words "secondary system" and inserting in lieu thereof the words "rural program";

(3) By deleting paragraph (4) of section 104(b);

(4) By redesignating paragraph "(5)" as paragraph "(4)", and by deleting therein the first full sentence and the fifth sentence through the twenty-first sentence;

(5) By redesignating paragraph "(6)" as paragraph "(5)", and by deleting the word "system" and inserting in lieu thereof the word "program";

(6) In subsection (c)(1), by deleting the phrase ", commencing with the apportionment of funds authorized to be appropriated under subsection (a) of section 102 of the Federal-aid Highway Act of 1956 (70 Stat. 374),"; and

(7) In subsection (f)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems".

(d) Section 105 is amended as follows:

(1) In the first sentence of subsection (a) by inserting the words "and programs" after the words "Federal-aid systems", and by deleting in the third sentence the comma and all that follows and inserting a period after the word "part"; and

(2) In subsection (d) by deleting the words "programs for" and by deleting the words "on the Federal-aid urban system" and inserting in lieu thereof the words "under the Federal-aid urban program".

(e) Section 106(d) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(f)(1) Section 108(a) is amended by inserting the words "or under any of the Federal-aid highway programs," immediately after the words "Interstate System," the first time they appear, and by inserting the words "and programs" immediately after the words "Federal-aid highway systems" the second time they appear;

(2) Section 108(c)(2) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system"; and

(3) The last sentence of section 108(c)(3) is amended by inserting the words "or under the Federal-aid program" immediately after the words "Federal-aid system".

(g)(1) Section 109(a) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(2) Section 109(c) is amended by deleting the words "Projects on the Federal-aid secondary system" and inserting in lieu thereof the words "Federal-aid rural program projects";

(3) Section 109(e) is amended by deleting the phrase "No funds shall be approved for expenditure on any Federal-aid highway," and inserting in lieu thereof the following phrase: "No funds shall be approved for expenditure on any highway on the Federal-aid highway system or under the Federal-aid highway program";

(4) Section 109(h) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(5) Section 109(i) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system" each time they appear in the first and second sentences, by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system" in the third sentence, by inserting the words "or program" immediately after the words "Federal-aid system" in the fifth sentence, and by inserting the words "or under" immediately after the word "on" in such sentence; and

(6) Section 109(l)(1) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(h)(1) Section 113(a) is amended by deleting the words "the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems," and inserting in lieu thereof the words "the primary as well as its extensions in urban areas, and the Interstate System, or under the Federal-aid programs, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems and programs,"; and

(2) Section 113(b) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(i) Section 115(a) is amended to read as follows: "(a) When a State has obligated all funds for the primary system or for any of the Federal-aid programs apportioned to it under section 104 of this title, and proceeds to construct any projects without the aid of Federal funds, including one or more parts of any project, on the primary system or under any of the Federal-aid programs in such State, as that system may be designated or any of those programs may be comprised at that time, in accordance with all procedures and all requirements applicable to projects on the primary system or under any such program, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under section 104 of this title if—

(1) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects on the primary system or under the Federal-aid program involved, and

(2) the project conforms to the applicable standards adopted under section 109 of this title.

The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State and that no application may be approved which will exceed the State's expected apportionment of such authorization.".

(j) Section 118(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(k)(1) Section 120(a) is amended by deleting in the first sentence all of the words between "(a)" and "(A)" and inserting in lieu thereof the words "Subject to the provisions of subsection (d) of this section, the Federal share payable on account of any project, financed with primary, rural, or urban funds, on the Federal-aid primary system, under the Federal-aid rural program, and under the Federal-aid urban program shall either"; and

(2) Section 120(g) is amended by deleting the words "Federal-aid highways" and inserting in lieu thereof the words "Federal-aid projects".

(l) Section 121(c) is amended by inserting the words "or under a Federal-aid Program" immediately after the words Federal-aid system".

(m) Section 123(a) is amended by deleting the words "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting in lieu thereof the words "a Federal-aid system or under a Federal-aid program,".

(n) Section 124(a) is amended by inserting the words "or under any of the Federal-aid programs," immediately after the phrase "including the Interstate System,".

(o) Section 129 is amended as follows:

(1) In subsection (c), by inserting the words "and programs" immediately after the words "Federal-aid highway systems";

(2) In subsections (f) and (g)(2), by inserting the words "or programs" immediately after the words "Federal-aid systems" each time they appear; and

(3) In subsection (l), by deleting the words "Federal-aid system, other than the Interstate System," and inserting in lieu thereof the words "Federal-aid project other than one of the Interstate System,".

(p) Section 135(b) is amended by placing a period after the word "flow" and deleting the remainder of the sentence.

(q) Section 137(a) is amended by deleting the words "project on the Federal-aid urban system" and inserting in lieu thereof the words "project under the Federal-aid urban program".

(r) Section 140(a) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(s) Section 141(b) of title 23, United States Code, is amended to read as follows:

"(b) Each State shall certify to the Secretary before January 1 of each year that it is enforcing in accordance with section 127 of this title all State laws respecting maximum vehicle size and weights permitted on all roads receiving funds under the Federal-aid program, including the primary system,

the Interstate System, and is a route functionally classified as an arterial or major collector.".

(t) Section 142 is amended as follows:

(1) In subsection (a)(1) by inserting the words "and highways under the Federal-aid programs" immediately after the words "Federal-aid systems", and by deleting the words "as a project on any Federal-aid system";

(2) In subsection (a)(2) by deleting the words "project on the Federal-aid urban system" each place it appears and inserting in lieu thereof "project under the Federal-aid urban program",; and

(3) In subsection (e)(2) by deleting the words "projects on the Federal-aid urban system" and inserting in lieu thereof "projects under the urban program".

(u) Section 143 is amended as follows:

(1) In subsection (a), (b), and (c) by inserting the words "or under a Federal-aid program" immediately after the words "a Federal-aid system (other than the Interstate System)" each place they appear, and

(2) In subsection (d) and (e) by deleting the words "Federal-aid system on" each time they appear and inserting in lieu thereof the words "Federal-aid system or program on or under".

(v) Section 149 is amended as follows—

(1) by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(2) by amending the analysis of chapter 1 of title 23, United States Code, by deleting:

"150. Allocation of urban system funds.".

and inserting in lieu thereof:

"150. Allocation of urban program funds.".

(w) Section 150 is amended by deleting the word "system" in the title and inserting the word "program" in lieu thereof.

(x) Section 302(b) is amended by deleting the words "on the Federal-aid secondary system," and inserting in lieu thereof the words "under the Federal-aid rural program", and by deleting the words "secondary funds," and inserting in lieu thereof the words "rural funds,".

(y) Section 304 is amended by inserting the words "and highways under the Federal-aid programs" between the word "systems" and the comma.

(z) Section 317(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(aa) Section 320(a) is amended by inserting the words "or programs" immediately after the words "highway systems" in the second sentence.

(bb) Section 322 is amended as follows:

(1) In subsection (c)(1) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is a route functionally classified as an arterial or major collector,"; and

(2) In subsection (c)(2) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is not a route functionally classified as an arterial or major collector,".

(cc) Section 402(d) is amended by inserting the words "and programs" immediately after the words "Federal-aid systems".

(dd) Section 117 is amended as follows:

(1) By inserting in subsection (a) the words "or under any Federal-aid programs" immediately after the words "Federal-aid systems".

(2) By deleting in subsection (f)(1) the words "secondary system" where they appear and inserting in lieu thereof the words "rural program".

Mr. DOMENICI. Mr. President, I would like to take this opportunity to commend Senator STAFFORD and Senator RANDOLPH, the distinguished chairman and ranking minority member of the Environment and Public Works Committee for the fiscal restraint they have demonstrated in S. 1024—the Federal-Aid Highway Improvement Act of 1981. Senator SYMMS, the distinguished subcommittee chairman also deserves special recognition for his leadership in accepting the President's request for a reduction in highway obligations beyond the level agreed to by the committee earlier this year in deliberations on the reconciliation bill.

As a result of the $7.7 billion highway obligation limitation included in S. 1024, the bill is $0.4 billion below the first budget resolution targets for fiscal year 1982. As a member of the Environment and Public Works Committee, I am aware of the great reluctance with which the committee accepted this reduction in highway spending. Mr. President, I ask unanimous consent that a table showing the relationship of the highway obligation ceiling in S. 1024 to the President's requests, transportation appropriations action, and the Reconciliation Act be printed in the RECORD at the conclusion of my remarks.

The Federal-aid highway system is one of our Nation's most valuable resources, critical to the flow of interstate commerce and our national defense capabilities. During the extensive series of hearings the committee conducted in Washington and throughout the country, it became evident that escalating construction costs—much of which is attributable to inflation—is severely constraining the States ability to construct and maintain our Nation's highways. According to the General Accounting Office, highway construction and maintenance costs have increased 145 percent and 105 percent, respectively, from 1970–79, while the Consumer Price Index increased 87 percent.

Recognizing the dramatic inflation in construction costs in recent years and limited Federal resources the committee has made a valiant effort in S. 1024 to restructure the highway program in order to target funds to areas of clear Federal interest. This bill also enables the States to have greater flexibility to determine which projects are of highest priority to them.

Perhaps the most significant aspect of this legislation is the redefinition of completion of the interstate. The definition, included in S. 1024 will save the Federal Government nearly $20 billion over the next decade by eliminating highway construction items that are not essential to completion of the interstate. With the revised "cost-to-complete" definition, this Nation will be able to have an Interstate System which is fully connected, meets our Nation's national defense and commerce requirements and is completed at a reasonable cost to the taxpayer.

Mr. President, there are many other important highway improvement and safety programs provided for in S. 1024. By consolidating many small categorical grant programs, redefining the cost to complete the interstate, and giving States greater flexibility to choose projects, the Environment and Public Works Committee has demonstrated laudable fiscal restraint. As chairman of the Budget Committee, I urge my colleagues to resist pressures on the Senate floor and in conference with the House to add nonessential spending items to S. 1024.

The health of this economy cannot be restored and inflation—including highway construction inflation—cannot be reduced, if we do not make every reasonable attempt to reduce spending in all Government programs in order to achieve our goal of a balanced budget by 1984.

HIGHWAY OBLIGATION CEILING COMPARISON

[In billions of dollars, fiscal years]

	Obligation ceiling		
	1982	1983	1984
S. 1024 (as amended)	7.7	(1)	(1)
President's September request	7.2	----	----
Senate transportation appropriations action	7.7	----	----
Transportation Appropriations Conference Agreement	8.0	----	----
President's March request (First Budget Resolution)	8.15	8.7	8.8
Reconciliation Act	8.2	8.8	(1)
House bill	8.2	(1)	(1)

[1] No provision.

UP AMENDMENT NO. 630

(Purpose: To amend various authorizations in the bill and to authorize additional expenditures)

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished Senator from Idaho (Mr. SYMMS), and I ask for its consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. SYMMS, proposes an unprinted amendment numbered 630.

Mr. BAKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 14, strike "and (3)" and insert in lieu thereof the following: "(3) essential environmental requirements; and (4)";

On page 5, line 17, strike "$400,000,000" and insert in lieu thereof: "$525,000,000";

On page 5, line 25, strike "$600,000,000" and insert in lieu thereof: "$725,000,000";

On page 6, line 23, strike "$700,000,000" and insert in lieu thereof: "$775,000,000";

On page 7, after line 11, insert the following:

"(8) For carrying out section 215(a) of title 23, United States Code—

"(A) for the Virgin Islands, not to exceed $5,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

"(B) for Guam, not to exceed $5,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

"(C) for American Samoa, not to exceed $1,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September

30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

"Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

"(9) For the Commonwealth of the Northern Mariana Islands, not to exceed $1,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986. Sums authorized by this paragraph shall be expended in the same manner as sums authorized to carry out section 215 of title 23. United States Code. Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.".

On page 12, line 4, strike "$800,000,000" and insert in lieu thereof: "$875,000,000".

On page 15, line 2, insert "(a)" after "Sec. 108." and adding the following new subsection:

"(b) There is hereby authorized to be appropriated out of the Highway Trust Fund, $100,000,000 for the fiscal year ending September 30, 1983 to carry out this section. Funds authorized to be appropriated by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code.".

On page 15, line 13, strike all through line 21 and insert in lieu thereof the following:

"SEC. 109. (a) In addition to any funds authorized to be appropriated out of the general fund, there is authorized to be appropriated, out of the Highway Trust Fund, for substitute highway projects under section 103(e)(4) of title 23, United States Code, $225,000,000 for the fiscal year ending September 30, 1983, $250,000,000 for the fiscal year ending September 30, 1984, $250,000,000 for the fiscal year ending September 30, 1985, and $300,000,000 for the fiscal year ending September 30, 1986. Funds authorized to carry out this section shall be available for obligation in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.".

On page 15, line 22, strike all through line 3 on page 16 and renumber succeeding subsections accordingly.

On page 17, strike lines 3 through 19 and renumber the succeeding paragraphs accordingly.

On page 33, line 7, strike all through line 3 on page 34 and renumber succeeding sections accordingly.

On page 54, line 5, strike "$7,200,000,000" and insert in lieu thereof: "$7,700,000,000";

On page 54, line 7, strike "or projects covered under" and insert in lieu thereof the following: "or projects covered under section 320 of title 23. United States Code,";

On page 55, line 23, strike all through page 56 line 6 and renumber succeeding sections accordingly.

On page 60, after line 7, insert the following new section:

"REDWOOD BYPASS HIGHWAY

SEC. 140. Section 152 of the Federal-Aid Highway Act of 1978 is amended by adding after "fiscal year 1981" the following "and $55,000,000 for fiscal year 1983";

On page 60, after line 7, add the following new section:

"VENDING MACHINE DEMONSTRATION PROJECT EXTENSION

SEC. 141. The vending machine demonstration project authorized by section 153 of the Surface Transportation Assistance Act of 1978 shall be extended for a period not later than two years after the date of enactment of this section.";

On page 60, after line 7, add the following new section:

"REIMBURSEMENT

SEC. 142. In any case in which the city of Santa Rosa, California, has incurred costs on behalf of the State of California for the acquisition, between the date of enactment of Public Law 94-154 and the date of enactment of the Federal-Aid Highway Act of 1976 (Public Law 94-280), of land which was utilized in a Federal-aid urban system project at an intersection with a segment of the Federal-aid primary system, the Secretary of Transportation is authorized, notwithstanding any other provision of law, to reimburse the State of California from funds apportioned to the State of California under section 104(b)(6) of title 23, United States Code, 75 per centum of such costs.";

On page 60, after line 7, insert the following new section:

"INTERSTATE WITHDRAWAL STUDY

SEC. 143. The Secretary of Transportation is directed to study problems relating to sections of the Interstate System which do not provide connectivity and could be withdrawn for a substitute highway project. Such study shall include alternative funding methods available if such section is withdrawn under section 103(e)(4) of title 23, United States Code. The study together with recommendations shall be transmitted to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives not later than March 31, 1982.".

Mr. SYMMS. Mr. President, the Committee on Environment and Public Works reported S. 1024, the Federal-Aid Highway Improvement Act of 1981, favorably by a vote of 14 to 2. I commend this legislation to my distinguished colleagues.

The Senate last considered highway legislation in 1978 which was enacted into law as title I of the Surface Transportation Assistance Act of 1978. Recognizing that the States must do long-range planning in order to have an effective highway program, the 1978 act authorized funds for 4 years. The committee believes that long-range planning for this program is essential and, therefore, S. 1024 provides new authorizations for 4 years, through fiscal year 1986.

During consideration of the 1978 act, it became necessary to reduce the fiscal year 1982 highway authorizations in order for the legislation to be signed into law. Those reductions were made with the understanding that the Congress would review the highway program during 1981. The committee has undertaken both a review of the 1982 authorization levels and the entire Federal-aid highway program in view of the current economic situation. A series of hearings were held in Washington and throughout the country on both S. 1024 and S. 841, the administration's proposed legislation.

It was evident from testimony received during those hearings that rising construction costs—a significant portion of which is due to inflation—have severely impacted the States' ability to construct and adequately maintain the Nation's highway system.

Both the Department of Transportation and the private sector have completed studies assessing the condition of our highway system and its long-term needs. The results of these studies show that our highway system is deteriorating at an alarming rate. Over 10 percent of the interstate needs major rehabilitation right now; during the next 15 years, over 90 percent of the primary system in rural areas will need resurfacing and 95 percent of the secondary system will need reconstruction. In addition, it will cost over $40 billion to replace or rehabilitate all the deficient bridges in this country.

Revenues dedicated for use on the highway system, both at the State and Federal levels, have been declining because of more fuel efficient vehicles, tax exemptions, and reduced gasoline consumption.

This means that at the Federal level, careful consideration must be given to what role the Federal Government should have in this program and what responsibilities can be best carried out at the State and local level. Once this determination is made, the Federal Government must provide adequate revenues to carry out its responsibilities. Most States, recognizing their additional responsibilities, have recently considered measures to increase State gasoline taxes.

In view of rising construction costs and declining resources, the committee believes funds must be targeted to areas of clear Federal interest, and the States must be given maximum flexibility in determining projects of highest priority. S. 1024 takes a significant step in achieving those objectives.

Completing a safe, connected, Interstate System in a reasonable period of time remains a high Federal priority. The 1981 interstate cost estimate is now $53.8 billion which will buy us 5 percent of the Interstate System. This is an unacceptable cost when the existing Interstate Highway System is in urgent need of major rehabilitation and reconstructiono. S. 1024 defines what is necessary for a connected, serviceable Interstate System which adequately provides for mobility, interstate commerce, and the national defense.

There is currently no definition of completion because even segments that have been built with Federal-aid interstate funds, are open to traffic, and were considered complete according to the design originally approved, are eligible for interstate funds at 90/10 Federal-State matching ratio to incorporate new design standards or new technologies. Many of these improved design standards can and are being incorporated by the States during reconstruction work on these open-to-traffic segments.

The committee believes that certain routes—specifically gaps, staged construction, and segments originally built without interstate funds which require major upgrading work—which have not had full participation in interstate funds as the FAI built segments have, should be given additional consideration with regard to additional lanes and essential environmental requirements. S. 1024 gives them this consideration.

The new completion definition would permit six lanes per designated Interstate Highway in rural areas and urban areas of up to 400,000 population and

eight lanes per designated Interstate Highway in areas of 400,000 population and above. All items which are no longer eligible for Interstate construction funds would be eligible for Interstate 4R funds.

When the Interstate Highway System was first conceived, the intent was that the Federal Government would provide the major capital outlay to construct the system and the States would be responsible for maintaining it. A significant portion of the Interstate System is now reaching the end of its design life and it is becoming clear that the States do not have adequate resources to do both the major reconstruction needed on the Interstate System and maintain the other Federal-aid systems at an adequate level.

Because of the large capital investment the Federal Government has made in the Interstate System, the committee believes that it is necessary to redirect Federal resources to protect this investment and has expanded the existing Interstate 3R program to include reconstruction as the fourth R, increasing funding for this program by almost 300 percent.

S. 1024 provides substantial funding for the Primary System—$7.8 billion through fiscal 1986—recognizing that the Primary System is the backbone of our State highway network. S. 1024 eliminates the special priority primary category. These routes are eligible for funding from Primary funds and I believe this is the proper source of funding. The committee also maintains its commitment to the bridge replacement and rehabilitation program. Bridges are vital links in the highway network, and the States continue to need assistance in addressing the tremendous bridge problems in this country.

S. 1024 also continues Federal participation in the rural, urban, and safety programs. While there is a lesser Federal interest in these programs, the committee recognizes that the States are taking on additional responsibilities in many areas and will need sufficient time to raise additional revenues to adequately support these important programs. I believe the rural program is particularly important. The farm-to-market roads in this country are a critical part of the highway system which contributes to our economic well-being.

S. 1024 removes the secondary and urban system designations and establishes urban and rural programs. The committee believes that the States and localities are best able to determine priority projects on these two systems and is convinced that they will target scarce resources at their most important projects. Recognizing the larger interest of State and local governments in these two programs, S. 1024 changes the Federal-State matching share to 50-50.

The committee believes ongoing attention to safety is also important. Safety concerns vary among the States and in order to give States the maximum ability to address their most pressing problems each year, the committee has consolidated a number of small safety programs into the highway safety improvement program. S. 1024 directs the States to spend at least 35 percent of these funds on highway-railway crossings. However, the committee also recognizes that there may be States in which this type of work is not its biggest safety problem during any given year. Therefore, S. 1024 permits the Secretary to waive this requirement if the State determines that other safety problems have a higher priority.

In addition, this legislation authorizes funds to rehabilitate the Woodrow Wilson Bridge. This bridge is a federally owned bridge on the Interstate System and is located in three jurisdictions—Maryland, Virginia, and the District of Columbia. S. 1024 also designates Interstate mileage in Alaska, the only State which did not receive mileage when the Interstate was designated. This mileage would be designated as completed and would not be eligible for Interstate construction funds. Alaska would be eligible, as all other States are, for Interstate 4R funds.

Finally, this legislation attempts to provide the States with maximum flexibility in targeting scarce resources to their highest priority projects. This is accomplished by consolidating several small categorical grant programs. No project is eliminated from eligibility for Federal-aid funds.

Rather, these projects would be eligible for funding through the larger Federal-aid categories. In addition, the States ability to transfer funds from category to category is enhanced. As is the case in current law, the applicable Federal-State matching ratio will be that of the category to which funds have been transferred. Hopefully, this will permit States to address problems which are unique within their own State.

Mr. President, I want to express my agreement with the Federal Highway Administration's recent determination that highway projects funded under the 3–R Program—rehabilitation, resurfacing, and restoration—are not subject to the Davis-Bacon Act provisions of 23 U.S. Code 113. I believe the Federal Highway Administration is correct in concluding that the phrase "initial construction" in section 113 excludes work to rehabilitate, resurface, or restore Federal-aid highways once they have initially been constructed.

Even with the expansion of the current 3–R program into a 4–R program by the addition of the fourth R—reconstruction—projects that constitute rehabilitation, resurfacing, or restoration continue to be excluded from the provisions of section 113.

Included in the legislative history at the time section 113 was amended and reenacted in 1968, Mr. HOWARD proposed to delete by a floor amendment the term "initial" from section 113 in the process of expanding the application of section 113 to cover the primary, secondary, and urban systems as well as the Interstate System originally covered by section 113. The attempt to delete the term "initial" was met with strong opposition by then-Representative Cramer.

On the floor of the House, Mr. Cramer stated that he opposed the amendment because it would have the effect of including under Davis-Bacon the previously excluded construction work "that is performed after the highway is built such as minor reconstruction, major repairs, possibly some maintenance functions and other small improvement or betterment projects." Mr. Cramer noted that "initial" was specifically written into the basic law for the purpose of limiting the application of Davis-Bacon "to the actual first construction of a highway, not its upkeep." Mr. Cramer asked Mr. HOWARD why he proposed deleting the term "initial" and Mr. HOWARD replied that his proposal was drafted to apply to the Davis-Bacon Act in a general manner to the ABC highway program.

Mr. Cramer offered a substitute amendment for the purpose of retaining the term "initial" while still expanding the coverage of the Davis-Bacon Act to the noninterstate Federal-aid systems. His amendment was accepted by Mr. Kluczynski, as chairman of the subcommittee, and Mr. HOWARD, whose own proposal was therefore withdrawn. The amendment as proposed by Mr. Cramer was passed by the House and was identical to the provision subsequently adopted by Congress.

A legal opinion written by the Federal Highway Administration's Office of Chief Counsel on April 29, 1977, specifically addressed the 3–R program and section 113 and concluded, as follows, that the 3–R program is not subject to the Davis-Bacon Act provisions:

> You are advised that 23 U.S.C. 113 requiring the application of Federally established wage rates to Federal-aid highway projects does not extend to the R-R-R program. That section 113, by its terms, is limited to initial construction and the R-R-R program is designed to improve or restore the usability of existing roads, being thus predicated upon the existence of a highway facility that has already been constructed. Thus the R-R-R program precludes the initial construction element upon which the application of section 113 of Title 23, United States Code, is based.

I also note that the Department of Labor's regulations have always recognized that "the term 'initial construction' in the Federal-Aid Highway Act of 1956 does not include repair or maintenance works." 29 CFR 5.2(h); 3–R projects are by their nature repair projects. Among other projects, the 3–R program was intended to apply to the restoration of existing roadways to their original safe and usable condition; the strengthening or reconditioning of deteriorated or weakened sections of existing pavement to their original condition; the replacing of malfunctioning joints; the redoing of pavement undersealing to restore structural capability; the raising of the grade in areas of settlement; and the reworking, conditioning, and recompacting of existing materials.

I believe the approach adopted by the Federal Highway Administration with regard to the applicability of Davis-Bacon is a sound one.

I believe that Federal-aid highway program has reached a crossroads. This country now has a highway system unequaled in the world. Scarce revenues must be directed toward maintaining that system rather than at major new construction. The States must be pro-

vided with a stable, long-term program in order for them to use their resources in the most effective and efficient manner possible. For that reason, I believe multiyear highway legislation is absolutely essential. The legislation before the Senate today would provide stable, long-term funding and I urge my colleagues to adopt this legislation.

Mr. President, I want to express my deep appreciation to the distinguished chairman of the Environment and Public Works Committee (Senator STAFFORD) whose knowledge of this program and outstanding leadership has been of invaluable help to me during this process.

I also want to express my sincere appreciation to the distinguished Senator from West Virginia (Senator RANDOLPH) who is the most able ranking minority member of the Environment and Public Works Committee, and to the distinguished Senator from Texas (Senator BENTSEN) who served with great distinction for many years as chairman of the Transportation Subcommittee. Their cooperation and assistance throughout the consideration of this legislation has been of greatest benefit to me and I look forward to a long and productive working relationship.

Mr. President, S. 1024 as reported contained a provision which would have provided a uniform truck weight standard for the Interstate Highway System. I believe that uniform standard of an 80,000 pound gross weight with not less than 20,000 pounds on a single axle and 34,000 pounds on a tandem axle is necessary. It would increase the efficiency of transporting commodities and would save fuel. I have reluctantly agreed to postpone the consideration of this provision until the cost allocation study is completed this January. I believe Congress must address this issue as soon as that report is completed.

The Environment and Public Works Committee has included several amendments in the committee amendment on behalf of other distinguished Members of the Senate. Deletion of the truck weight provision is offered on behalf of Senators PERCY, DIXON, DANFORTH and EAGLETON. The Interstate transfer inflation cap amendment is offered on behalf of Senator PERCY and Senator DIXON. The amendments regarding Santa Rosa and the Redwood Bypass are offered on behalf of Senator HAYAKAWA. The amendment regarding Territorial Highways is offered on behalf of Senator WEICKER. The amendment clarifying that additional funds may be appropriated from general revenues for Interstate transfer highway projects, and that sums authorized in S. 1024 for this purpose in contract authority is offered on behalf of Senator WEICKER and Senator DODD. The amendment regarding the Interstate withdrawal study is offered on behalf of Senator GRASSLEY and Senator JEPSEN. The amendment regarding the bridge over dams program is offered on behalf of Senator BAKER.

Mr. President, the Kootenai River Bridge—more commonly known as the Bonner's Ferry Bridge because of its location in the town of Bonners Ferry—is a vital link in North-South U.S. Highway 95 and East-West U.S. Highway 2 in northern Idaho. U.S. Highways 95 and 2 are the only major in-State highways connecting southern Idaho with the northern sections of the State as well as the whole of Idaho with northwest Montana, eastern Washington, and Canada. The importance of these highways to Idaho's commerce cannot be overstated. They provide a conduit for commercial traffic within Idaho, between sister States, and with Canada.

Many industries in Idaho including the forest products, mineral extraction, and agricultural industries, are dependent on these highways for their growth and well-being. Further, there are high levels of private travel, including tourism, using these convenient routes as a means of travel within the Pacific Northwest.

However, the continued use of U.S. Highway 95 and U.S. Highway 2 is jeopardized by the deterioration and unsafe condition of the Kootenai River Bridge. This vital link in U.S. Highway 95 and 2 was built almost a half century ago in 1933. It is a two lane multiple span steel truss bridge 1,256 feet long and 19.8 feet wide. It was adequate for the kind and level of traffic for which it was designed almost 50 years ago but is now unsafe for highway travel. Its current sufficiency rating is an extremely hazardous 2.6.

It is imperative that funds be allocated to the replacement of this bridge. We are fortunate that the condition of the bridge has not resulted in any accident fatalities, but we cannot wait until someone is killed or injured before we address this matter. There have been several instances where heavily loaded trucks have gone out of control on the bridge and its approaches. The outmoded engineering standards and design of the bridge are major factors in causing these situations. The bridge is only 19.8-feet wide and yet supports two lanes of traffic traveling in opposite directions. The approaches to the bridge are characterized by an extremely steep downhill grade on one side and a very sharp elbow turn on the other. There are no suitable alternate or detour routes to relieve the high volume of traffic much of which consists of heavy load truck traffic.

The cost of replacing this structure with a much needed four-lane structure is estimated to be about $12.2 million and will take approximately two construction seasons to complete. Idaho's fiscal year 1982 apportionment bridge replacement and rehabilitation funds are projected to be only $4.1 million. The cost of replacing the Kootenai River Bridge is almost three times the State's annual bridge apportionment.

There is no doubt that this bridge needs replacement and that such work should begin immediately. It was projects such as this which the Congress had in mind when they created the Discretionary Highway Bridge Replacement and Rehabilitation Fund. I urge the Secretary of Transportation to give the Kootenai River Bridge priority consideration.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 630) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a table, revised table 5, to reflect the decisions made by the committee with respect to the redefinition of interstate completion and to reflect other changes as noted in the table.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

REVISED TABLE 5.—ESTIMATED FEDERAL-AID AND STATE MATCHING FUNDS TO COMPLETE THE SYSTEM AND APPORTIONMENT FACTORS FOR DISTRIBUTION OF FISCAL YEARS 1983 AND 1984 AUTHORIZATIONS

[Revised from addendum table 5 of Committee Print 97-1 to reflect: (1) withdrawals under 23 U.S.C. 103(e)(4) of interstate routes in California, Indiana, Maryland, Minnesota, New Jersey, and Tennessee; (2) adjustments to unobligated apportionments resulting from withdrawals and changes in discretionary allocations; (3) corrections to cost to complete in District of Columbia, Kentucky, Maine, and Montana; (4) limited additional lane costs; and, (5) essential environmental requirements]

State	Estimated (required to complete system, in thousands)		Apportionment factors (percent)
	Federal-aid and State matching funds	Federal share of funds	
Alabama	$813,498	$732,148	2.682

Mr. PROXMIRE. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. PROXMIRE. I wish to have a very short colloquy involving the Senator from New York and the Senator from Idaho (Mr. SYMMS), and I understand that has been cleared by the various parties involved. If we can proceed, I believe we can handle it in less than 2 minutes.

Mr. BAKER. Will the Senators withhold that colloquy until the chairman of the committee has an opportunity to make a statement at this point?

Mr. STAFFORD. Will the distinguished Senator yield?

Mr. BAKER. I yield.

Mr. STAFFORD. Mr. President, on April 28, I joined several of my distinguished colleagues in introducing S. 1024, the Federal-Aid Highway Improvement Act of 1981. On September 30, the Environment and Public Works Committee favorably reported S. 1024 by a vote of 14 to 2.

The committee held 10 days of hearings in Washington and throughout the country on the needs of the Federal-aid highway program and received testimony from the Department of Transportation, State and local transportation officials, environmentalists, industry representatives, and private citizens.

Testimony received during the hearing process indicates that the highway needs in this country are great and growing every day. At the same time, revenue sources are shrinking and inflation has increased the cost of highway construction far beyond what any of us could have imagined 10 years ago. During the last 10 years, the cost of maintaining a mile of road has increased over 110 percent. and the cost of constructing or reconstructing a mile of road has increased over 190 percent.

Federal participation in this country's highway program goes back to the Federal-Aid Road Act of 1916. One of the important components of the policy established by that act was the kind of Federal-State relationship whereby the responsibility for the construction, ownership and maintenance of the highways belonged to the States.

During the last 65 years, the primary role of the Federal Government has been to provide a substantial portion of the capital funds for new construction. Those funds have provided this country with a highway network that provides our commerce and our citizens with mobility unsurpassed in the history of the world.

Having achieved that goal, we must reassess the Federal interest in the highway program.

The Federal Government can no longer afford the massive capital investment required for major new construction projects. Resources must be directed to the protection and maintenance of the capital investment already made by Federal, State and local governments in existing roads.

Revenues at all levels of Government are experiencing a decline. After the cost allocation study is completed next year, the Environment and Public Works Committee will be examining the revenue structure of the highway trust fund including the equitable distribution of fees among all classes of highway users. Because of finite resources, Federal funds will have to be more carefully targeted where there is a clear Federal interest. S. 1024 takes a significant step in accomplishing that goal.

First, this bill will expedite completion of the Interstate System by providing a definition of what a safe, connected, environmentally responsible Interstate System is and make that goal attainable in a reasonable amount of time. The Interstate Highway System celebrated its 25th birthday this year. When the highway trust fund was authorized in 1956, the Interstate System's 41,000 miles was envisioned to be completed by 1969 at a cost of $27 billion. Now 25 years later, 40,000 miles of the system are open to traffic and it is the safest network of roads in the world.

However, the remaining 5 percent of the system now has a price tag of $53.8 billion. Because of inflation and the eligibility of upgrading items on segments that are considered complete, the current level of spending is not reducing this figure at all. In fact, we are finding ourselves further and further from completing the system.

The redefinition of interstate completion in this legislation does not change any of the environmental statutes which currently apply to projects constructed with Federal-aid highway funds. All of these requirements will continue to apply to interstate construction projects as they have in the past. The committee amendment offered today further clarifies that on gap segments, approved staged construction, and segments originally built without interstate funds which require major upgrading work essential environmental requirements including pedestrian/bikeways, noise abatement measures, landscaping, rest areas and scenic overlooks will continue to be eligible for interstate construction funds.

The interstate completion definition in S. 1024 will permit remaining resources to be concentrated on maintenance of the existing system. S. 1024 expands the interstate 3R program by adding the fourth R—reconstruction—and makes $7.7 billion available in this category from fiscal year 1982 through 1986.

This legislation also preserves a minimum one-half percent interstate construction apportionment for all States. Those States who made an early commitment to expeditiously complete the Interstate System, often at the expense of the rest of their highway network, should not be penalized.

Second, this legislation continues the Federal commitment to the primary system and the bridge program. S. 1024 authorizes $7.8 billion for the primary system and $5.7 billion for the bridge program through fiscal year 1986.

Third, this legislation continues the Federal participation in the rural, urban, and safety programs, recognizing in particular the importance of the rural system's farm-to-market roads in the economy of this country. I believe this also recognizes that States and localities are assuming responsibility for many additional programs and they must be given sufficient time to raise additional revenues.

Finally, this legislation consolidates many of the small, categorical grant programs in order to give States and local governments improved ability to set their own priorities.

Through the reconciliation process, an obligation limitation was established for the Federal-aid highway program for fiscal year 1982 of $8.2 billion. Subsequently, the President requested an additional 12-percent reduction for all programs including the highway program. During committee consideration of this legislation, the President's additional budget reduction request was incorporated into S. 1024 and the obligation limitation for fiscal year 1982 was reduced to $7.2 billion. This reduction was incorporated with the understanding that the obligation limitation would be reviewed during further consideration of S. 1024 by the full Senate. The Environment and Public Works Committee will carefully consider the action taken by the Senate Appropriations Committee in setting an obligation limitation of $7.7 billion for fiscal year 1982.

A great challenge lies ahead. The existing network of roads and bridges that serves us so well must not be allowed to deteriorate beyond reasonable repair because replacing this system is beyond our financial capability. At the same time, preserving this system must be accomplished with a finite amount of financial resources.

I do not believe it is the proper role of the Federal Government to provide funds to meet all the States' highway needs. S. 1024 seeks to determine what the Federal Government can best accomplish and what can best be done at the State and local level. I believe S. 1024 represents a commitment of the Federal Government to work with the States and localities in responsibly preserving the existing highway system. I believe our highway needs can be met with the cooperation of Federal, State, and local governments, and all those who have an interest in this country's highway system.

I thank my distinguished colleague from West Virginia, Senator RANDOLPH, who served this committee as chairman for many years and now serves it with equal distinction as the ranking minority member. I also want to thank my distinguished colleague from Idaho, Senator SYMMS, who has so ably served the committee as chairman of the Transportation Subcommittee, and my distinguished colleague from Texas, Senator BENTSEN, as the very able ranking minority member of the Transportation Subcommittee.

As chairman of the Environment and Public Works Committee, it has been my intention to carry on the spirit of cooperation and commitment of working together established by my distinguished predecessor. I am very gratified by the cooperation which has been exhibited throughout this process by my distinguished colleagues.

Mr. BAKER. Mr. President, I yield now to the distinguished ranking minority

member of the committee, the former chairman of the Environment and Public Works Committee, the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I join with my colleague in supporting S. 1024, reported from the Committee on Environment and Public Works on October 7, 1981. This bill continues the existing Federal-aid highway program for 5 years through fiscal year 1986. The total level of funding authorized is $45 billion.

This authorization level, on an average basis, is somewhat lower than that contained in the Surface Transportation Assistance Act of 1978 which authorized $42 billion for highway improvements through fiscal year 1982. This year the committee has reviewed the fiscal year 1982 authorization levels. He reviewed the overall needs of the highway program through the middle of this decade. Major hearings were held in Washington, D.C. and in other parts of the country as part of this effort.

Evidence gathered indicated several deep-rooted and increasing problems face the highway program, not only the further construction of our highways but also the rehabilitation of our highways which is something that we must give attention to not only at the Federal level but particularly in the State levels.

First, since the Federal gasoline tax of 4 cents per gallon has not been increased since 1959, revenue into the highway trust fund has begun to decline. It is anticipated in the current fiscal year total revenues will be lower than expenditures. This is the second consecutive year for this problem. Second, rising construction costs, particularly related to inflation, have hampered the ability of the States to construct and adequately maintain this country's highway network. Third, many segments of our highways, particularly on the Interstate System, are beginning to reach their design life. They need major rehabilitation.

Given these problems and the fact that States have also experienced declining revenues for highway work, the Federal Government should carefully examine its role and responsibilities in the highway program. The committee has begun to do this by reporting to the Senate S. 1024. This legislation, for the first time in many years, reflects a smaller Federal involvement in the highway construction program. This legislation gives the Federal interest primarily its role in completing and maintaining the Federal-Aid Interstate System. The Federal Government has made a substantial investment, approximately $70 million, in building 95 percent of the designated 42,500-mile system. This investment must be maintained and this bill, while continuing the goal of completing the system, begins to provide sufficient authority to the States to do a better maintenance job on this vital network of roads.

This does not indicate that other needs do not exist on our highways and that the Federal Government should not meet these needs. The Federal-aid primary system is important in providing mobility of our people and in moving goods to market. Replacement and rehabilitation of deteriorating bridges is also a critical problem and one in which the Federal Government must be involved. We must provide a safe and efficient transportation system. The second annual report to the Congress on the bridge program by the Secretary of Transportation estimates that $41 million is needed to replace or rehabilitate the deficient bridges in this country.

S. 1024 provides authorizations for the bridge program, while not totally adequate, at least the authorization levels indicate the continued support of the Senate for this vital program.

Mr. President, while viewing these problems in perspective, the most pressing need in our highway program is to complete the Interstate System. For the past 25 years under the Federal-Aid Highway Act of 1956, the States, as partners with the Federal Government, have been working on a national system of interstate and defense highways. Congress authorized this system at 42,000 miles and provided authority for the Secretary of Transportatiin, in consultation with the States, to designate the routes on this system.

As of the end of fiscal year 1981, Federal and State governments have expended approximately $70 billion to complete 96 percent of the designated Interstate System. In January of 1981 the Department of Transportation submitted the biannual estimate of the cost to complete this highway system which is required for apportioning authorized funds among the States. That document estimates the remaining cost of the system to be $53.1 billion for approximately 4 percent of the mileage.

Mr. President, at current authorization levels this could take another 20 years or more to complete our Interstate Highway System. With the continuing inflation which the highway program has experienced, this $53.1 billion could rise to equate the remaining 4 percent with the cost of the previously completed 96 percent. Coupled with this completion problem is the growing concern that approximately 10 percent of the Interstate System is currently in need of full rehabilitation and restoration. To catch up on the backlog of unmet needs could cost $18 to $20 billion and an additional several billion dollars added to this backlog each year as segments of the Interstate System grow older and carry greater traffic volumes than anticipated.

I seriously question if interstate completion is a realistically achieveable goal. The committee shared this view and studied various alternatives to revise the definition of completion. Based on the hearings held, the committee ultimately decided to reduce the items eligible for inclusion in the cost estimate to a total of $35.1 billion. Under the new definition of completion, lanes on the Interstate System would be limited to six in rural areas and urban areas of up to 400,000 population and eight lanes in areas of 400,000 population or more. Completion would include full access control, engineering, minimum right-of-way requirements, grading, erosion control, drainage, interchanges structures, pavement, shoulders, signing, lighting, guardrails, and fencing. In addition, on segments currently open to traffic but not to full standard, work could include additional lanes, redesigning of interstate interchanges and grade separate structures.

Generally speaking, items no longer eligible for interstate construction funds would include weigh stations, pedestrian and bikeway facilities and certain added costs for special features not essential to meet highway design and safety needs or environmental requirements.

It is important to note that in setting lane limitations on the Interstate System for approval by the Secretary that it is not the committee's intent to limit to eight lanes those portions of interstate highways which carry more than one route. If two routes on the Interstate System have a common right-of-way and alinement for some miles, the Secretary should then approve lanes in excess if studies indicate they are necessary to handle anticipated traffic volumes.

Section 102(b) of this bill also limits the costs eligible for regular interstate funds to those items, locations, and design concepts, included in the 1981 interstate cost estimate. This provision prevents the States from redesigning an interstate segment which would result in a higher cost and constitutes an actual ceiling exclusive of inflation on construction projects. The bill amends the authorization for interstate construction to authorize $3.1 billion for fiscal year 1983; $3.5 billion for fiscal year 1984; $3.4 billion for fiscal year 1985, 1986, and 1987; and $3.65 billion for each of the fiscal years 1988 through 1990. With these authorizations in place, it is hoped that sufficient funding will be provided to complete the Interstate System by the early 1990's. I fimly believe that this is the most important part of our Federal road program at this time.

No less important is the increased emphasis given to the reconstruction and rehabilitation program. This program, referred to as the 4R program, is designed to provide funds to the States to maintain the Federal investments in our interstate Highway System and to provide the States with moneys to undertake work that has been excluded as part of initial interstate construction under the new definition provided in this measure. The bill changes the formula for apportionment for this program to 60-percent lane miles and 40-percent vehicle miles traveled. This change is made necessary by the increased burdens placed on our highway pavement because of traffic volume.

However, of greatest importance in this program is the new funding levels provided by the legislation. For fiscal year 1982, the bill raises the authorization from $275 million, and increases it in subsequent fiscal years to $1.3 billion, $1.7 billion, $2.2 billion by fiscal year 1987. This funding level increase demonstrates the committee's commitment to the maintenance of our investment in the Interstate System. It shows that this should be the highest priority next to completion of the interstate.

With respect to the 4R program, an additional item should be discussed. Under a recent interpretation by the Federal

Highway Administration, the Davis-Bacon Act regarding prevailing wage rate determinations would not apply to the rehabilitation category. I do not believe that by using the phrase "initial construction" in 23 U.S.C. 113(a) that the Congress intended to limit this to only first-time construction. Reconstruction or rehabilitation is certainly major work not usually done by force account. It is my interpretation that "initial" was placed in the statute to distinguish construction from routine maintenance. The use of the term highway project is significant.

When a new road is built with Federal funds, the work being done on that highway project is subject to Davis-Bacon. When the same road is reconstructed or resurfaced 20 years later with Federal funds, it is not the same highway project, but rather a new highway project with a new project number. The initial work on the new highway project is also subject to Davis-Bacon. The language cannot be interpreted differently.

To confirm the intent of the phrase "initial construction work" we only need to look at Senate report 1340 which accompanied S. 3418 on June 28, 1968. Let me read you the title of that section of the committee report: "Extension of Davis-Bacon Act To Construction on All Federal-Aid Highway Projects." Quoting further from the report:

> The major exception, however, is the regular Federal-aid highway construction program. The committee can find no reasonable basis for this exception. Therefore, the committee recommends that the provisions of the Davis-Bacon Act be extended to cover the construction workers on the ABC highway system.
>
> The Committee further recommends amendment of the application of the Davis-Bacon Act to all Federal-aid highway projects by withholding its application to apprentices or those in skill improvement programs operated in connection with the equal opportunity program.

Thus, in extending the application of Davis-Bacon to the regular Federal-aid highway program, there can be no doubt the Congress intended that Davis-Bacon apply to all Federal-aid highway programs.

One further category of Federal assistance deserves mention because of its importance to our overall highway program. The bridge replacement and rehabilitation program is an integral category in our Federal program. With an estimated cost of over $41 billion to replace and rehabilitate deficient bridges the Congress cannot do otherwise than provide funding. Authorizations for this program are $700 million for fiscal year 1982, increasing to $1.1 billion for fiscal year 1983 and $1.3 billion for fiscal years 1984 through 1986. The bill continues the $200 million discretionary bridge program designed to fund unusually high cost bridges over major waterways.

With the bridge inventory over 95 percent complete, the committee chose to modify the formula for distribution of these funds. Under this formula, bridges are divided into four categories. The committee determined that Federal-aid system bridges should have the highest priority. To take this into consideration, the square footage of each deficient bridge on the Federal-aid system is multiplied by a factor of 2 when determining the State's apportionment. To equate costs, the committee further provided that square footage of deficient bridges in each category is multiplied by a national average unit cost on a State-by-State basis and the total cost in each State is divided by the total cost of the Nation's deficient bridges to yield the apportionment factor.

In continuing the discretionary bridge program, the committee designated three bridges as eligible for funding under this category. Earlier this year, in the supplemental appropriations bill, the Congress, by legislative history made in the Weirton-Steubenville Bridge eligible for participation under this program. I emphasize the importance of constructing a replacement bridge at Weirton to the efficient flow of people and goods across the Ohio River in this major industrial area. The $65 million needed for this project will be well spent by reducing dangers to the traveling public and increasing the effective movement of goods.

Mr. President, as highway costs rise, particularly for asphalt pavement, the highway programs of this Nation must look for innovative technologies which will reduce the cost of building and reconstructing our highways. One such innovation is a process called "Chem-Crete" which has been developed as an asphalt paving material which will significantly reduce the life-cycle cost of asphalt pavement. This technique promotes durability and increases asphalt properties such as strength characteristics. Many States should undertake pilot demonstration programs to determine if Chem-Crete will provide the benefits claimed by its producers. I recommend that the Federal Highway Administration become actively involved in promoting the use of innovative technologies such as Chem-Crete.

Mr. President, I discuss the funding level for fiscal year 1982 contained in this bill. In 1978 the conference committee on the Surface Transportation Act authorized $7.8 billion for the Federal-aid highway program for fiscal year 1982. This level was set in a somewhat lower level than in prior years as the committee attempted to reach a $42 billion target authorization level. It was the stated intent at that time to review this funding level prior to the beginning of fiscal year 1982.

Earlier this year the committee reported to the Senate its views on Federal-aid highway needs over the next 5 years. The level of authorizations was targeted at $48 billion, which included an authorization level for fiscal year 1982 of $8.6 billion. When S. 1024 was marked up by the committee on September 30, the fiscal year 1982 funding level was reduced to $7.6 billion with a related obligation ceiling of $7.2 billion. This is a reduction of $1 billion in each from the level established earlier for authorizations and in the reconciliation bill for obligations.

While S. 1024 continues to provide highway funding, the level of assistance is dramatically reduced. States must share a greater responsibility for meeting highway transportation needs on systems below the interstate and primary levels. I question this additional 12-percent reduction in the program and believe that the funding levels endorsed earlier this year by the committee is the best way to meet these needs. I am against a meat-ax approach to budget reductions. I endorse a reasoned, commonsense approach to such reductions.

The highway program is paid for by the users through the imposition of fuel and excise taxes and should not bear this further reduction. A program funded through a trust fund composed of dedicated taxes should not be used as a balanced budget tool. Users who pay for a system should be entitled to an adequate highway system for which they paid.

Mr. President, even with these concerns, I support S. 1024 but would hope that a reasoned approach to authorization levels can be worked out during consideration of this bill. My major concern is the fiscal year 1982 funding level. The funding for the bill in the other fiscal years is adequate even though a most prudent program would call for higher levels of funding. I urge my colleagues to support the bill as recommended by the committee to provide long-term certainty for the Federal-aid highway program.

Mr. President, I wish to thank the staff of the Environment and Public Works Committee for their diligent efforts to bring this measure to this Chamber. I commend Jean Schrag, Richard Harris, Mike Nee, Lee Fuller, Sam Routson, Bailey Guard, and John Vago.

I thank the Presiding Officer and also the able chairman of the committee, Mr. STAFFORD.

Mr. STAFFORD. I thank the distinguished Senator from West Virginia.

I yield to Senator PROXMIRE for the purposes of a colloquy.

Mr. PROXMIRE. Mr. President, I inquire of the distinguished manager of this bill the intention of the language contained on page 5 of the committee report relative to the Westway project (I–478) in New York City. Under the interstate cost estimate submitted by the Department of Transportation earlier this year, the estimated cost of this project is $1.4 billion in 1979 dollars. The committee's redefinition of the Interstate System would have reduced Westway costs by approximately $30 million by eliminating certain environmental features of the project.

I ask the distinguished floor manager if it is his understanding that the language contained in the committee report would restore only this $30 million to the cost estimate?

Mr. SYMMS. Mr. President, the Senator from Wisconsin is correct. The language contained in the committee report was intended to restore to the cost estimate for Westway costs associated with environmental features particularly landscaping and HOV lanes. The committee has now agreed to an amendment which restores environmental requirements to the interstate cost estimate for gap segments. This amendment makes the language contained in the committee

report moot since the exact same features are covered by both provisions.

Mr. MOYNIHAN. Mr. President, I concur in the views of the distinguished floor manager. It was my intent when I offered report language that this be limited to features deleted by the interstate redefinition. It was not my intention to expand the items of eligibility associated with the Westway project but rather to clarify that the project as designed and approved by the FHWA is eligible for 90 percent Federal funding. Neither the amendment nor the report language adds features or elements to the interstate cost estimate for this project which are not currently eligible under existing law.

Mr. SYMMS. Mr. President, I ask unanimous consent that a memorandum describing the adjustments to the Westway project cost estimate be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DESCRIPTION OF FEDERAL HIGHWAY ADMINISTRATION ADJUSTMENTS TO 1981 INTERSTATE COST ESTIMATE FOR I-478 WESTWAY AS SUBMITTED BY NEW YORK STATE

Under Title 23 of the United States Code, Federal-aid funds are available to States for completion of the Interstate System, with Federal share funding at 90 percent of the actual cost of Interstate construction projects. Federal Interstate funds are apportioned annually on the basis of each State's relative share of the cost of completing the total Interstate System. The State apportionment ratios are revised every 2 years on the basis of current estimates of cost of the completion of the then designated Interstate System, prepared by the Federal Highway Administration, in cooperation with State highway departments, and approved by the Congress.

In preparing the report to the Congress on the 1981 Interstate Cost Estimate, the Federal Highway Administration reviewed individual route-by-route estimates submitted by States to assure that only those costs eligible for Interstate funding were included and to assure that any potential cost savings or monetary benefits which might be realized as a result of particular projects were credited to the estimated cost.

In the review of the 1981 cost estimate for the Westway Highway, I-478, in New York City, approximately $352 million in costs were identified as items not likely to be eligible for Interstate financing, items subject to potential cost savings, and items generating credits to the project. In the report to the Congress, these items were used to adjust New York's estimate of cost for the Westway. The adjustments were made without prejudice to future decisions on the extent of Federal-aid Interstate participation and on credits to the project. Actual amounts will be decided during the project development, right-of-way acquisition, and construction phases.

Further, these deductions will be subject to review and appropriate modification in future cost estimates as project development activities advance and decisions are made on eligibility and credits. Comparable adjustments were made to the 1977 and 1979 New York cost estimates. The following breakdown summarizes the specific adjustments made to the 1981 New York cost estimate:

Combined Federal and State Shares

	In billions of dollars
New York State cost estimate	$1.762
Total estimate allowed by DOT	1.410
Adjustments	0.352

Breakdown of adjustments—State and Federal

	In thousands of dollars
Items not eligible for FAI funding because of statutory restrictions:	
Extension of northbound roadway to accommodate toll connections	8,045
Additional access roads at Brooklyn-Battery toll tunnel	2,874
Total	10,919
Items not eligible for FAI funding because not in accordance with DOT design policies and standards:	
Connection of new elevated portion of highway to existing viaduct at 41st Street	6,900
Local street improvements and associated right-of-way costs on 14th and 15th Streets, east of West Street	25,454
Excess sewer capacity to be provided for maintenance and cleaning purposes	21,801
Unnecessary structure over 14th Street between ventilation buildings	594
Previously authorized demolition work	440
Total	55,189
Review findings resulting in a net cost increase:	
A net increase in right-of-way acquisition costs resulted when errors found in the right-of-way cost estimate for one major parcel exceeded the deduction made for a betterment in the functional replacement of the Gansevoort Incinerator	3,292
Total increase	3,292
Savings anticipated as result of design refinements:	
Reduction in unit costs and quantities of work associated with excavation at tunnel; concrete for footings, pile caps, and walls of the tunnel; and lighting at the tunnel	61,541
Total	61,541
Cost reduction based on future value of landfill:	
A landfill between Battery Park City and 34th Street will create excess land not required for highway purposes but expected to have substantial tangible value for commercial purposes. The current estimated value must be credited to the project costs. Final decisions on the amount of credit and the method of crediting it will be made as the project develops	227,865
Subtotal	227,865
Total	352,222

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. MOYNIHAN. Mr. President, I thank the distinguished floor manager and my friend from Wisconsin for their cooperation in this matter.

Mr. PROXMIRE. I thank both Senators for their very helpful responses.

Mr. STAFFORD. Mr. President, I am glad to yield to the distinguished Senator from West Virginia.

Mr. RANDOLPH. I have this further comment in connection with the measure currently being considered. I feel that sometimes someone might say it is rather customary or window dressing but as Senators know we do change in our committee structure and we have new members of this committee who come to us. This is certainly true this year and Senator SYMMS is doing a fine job as new chairman of our Subcommittee on Transportation.

I wish the RECORD to reflect that I, a member of the minority, look with favor as I always do upon Senator STAFFORD because of the cooperative effort. But we are dealing with subject matter which does not allow itself to have a surfacing of politics. This is America which needs the mobility of its people, moving back and forth across this great highway system. We need this system of highways, roads, and bridges to do what? Move the products of the field, the factory, and the mine to the consuming public.

I appreciate the work done especially by Senator SYMMS, the chairman of the subcommittee, as I have indicated acting with all members of our committee in matters of importance which we attach to this developmental program for the betterment of America and our people.

Mr. SYMMS. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. SYMMS. I thank the distinguished Senator from West Virginia for those kind remarks and I wish personally to thank him and Senator BENTSEN and others in the minority of their cooperation in bringing this bill to the floor of the Senate.

And I certainly wish to express my appreciation to our distinguished chairman, Senator STAFFORD, for his help and also for the very able support of all the staff of both the Republicans and the Democrats for their cooperative effort to bring this bill here so that it can be passed in the most expeditious manner. I wish to thank Bailey Guard, John Yago, Jean Schrag, Sam Routson, Dick Harris, Mike Nee and Lee Fuller for their assistance.

I quite agree with the Senator from West Virginia that there is no room for partisanship when it comes to the highways of this country and we certainly need to continue with a highway program that will see that we can get the products moved from the cities, the farms, and so forth. And I thank the Senator.

Mr. RANDOLPH. Mr. President, will the Senator yield again to me?

Mr. STAFFORD. I yield.

Mr. RANDOLPH. I note the presence in the Chamber of the ranking minority member of the Subcommittee on Transportation. We remember him, of course, earlier when he was chairman of the Subcommittee on Roads. That is what we used to call the subcommittee.

Mr. BENTSEN. That time may come again.

Mr. RANDOLPH. It may come again but we do know that the subcommittee through Senator BENTSEN's leadership has given us a broader look than just the road system of the country. The transportation complex is one that is very challenging.

Mr. BENTSEN. I made reference to the chairmanship.

Mr. STAFFORD. Mr. President, I wish to be associated with what my dear friend

Senator RANDOLPH has said about the chairman of our subcommittee, Senator SYMMS. I think it was most appropriately said.

I yield now to Senator BENTSEN.

Mr. BENTSEN. Mr. President, I also wish to add my comments about my pleasure in working with Senator SYMMS. He has been most cooperative with the minority and I think we have brought forth a good bill. We had extended days of hearings and we are facing the problem, of course, with the ice estimates, with completion of the intercontinental highway system and in that situation some of these States are running out of money. It is terribly important that we get this bill through.

I hope we frankly can resolve our differences with the colleagues over in the other House in order to see that we have fruitful legislation passed and in effect in very short order.

I enjoyed working with the distinguished chairman of the committee and with my old friend the former chairman who has had such a great interest in the highway systems of this country.

Mr. President, S. 1024, the Federal Aid Highway Improvement Act of 1981 is a major effort to reform the Federal-aid highway system and a responsible effort to make maximum effective use of limited Federal revenues.

S. 1024 is a product of many days of hearings at which witnesses from the administration, State, local, and regional governments, the highway industry, environmental groups and others presented testimony. Throughout these hearings and during deliberations by the Committee on Environment and Public Works it was evident that only a fiscally responsible bill would do—a bill that reflected our willingness to live within the limits of the highway trust fund and yet a bill that addressed the most urgent national highway needs.

We all know that in these times of fiscal austerity, in these times of rising construction costs—a significant portion of which is due to inflation—that our ability to construct and adequately maintain our Nation's highway system has been severely hampered. The basic question then, is not only how much money the Federal highway program needs, it is how best to allocate severely limited Federal resources to the various categories, the sum total of which comprise the Federal-aid highway program. It is how to target the funds to areas of greatest Federal interest.

Mr. President, in my view, S. 1024 is a step in the right direction toward achieving this objective. Completion of the Interstate System continues to be a high priority. The estimated cost-to-complete definition is changed from the unacceptable cost definition contained in existing law to one that is achievable when actual resources are considered. By adding a fourth R—reconstruction—to the 3R program that currently exists, S. 1024 recognizes that much of the Interstate System is reaching the end of its design life and requires major reconstruction.

S. 1024 recognizes that a Federal interest in the rural and urban system exists but is not as great as in the primary system. S. 1024 continues to address the bridge needs of our Nation but it recognizes that bridges on the Federal-aid highway system are of greater interest to the Federal Government than those off the Federal-aid highway system.

Mr. President, I would like to comment on the level of funding proposed. S. 1024 is a 5-year bill. The authorization level of $7.2 billion in 1982 increases to more than $10 billion in 1986. It provides an obligation limitation of $7.2 billion in 1982. The Senate this week, in passing the Department of Transportation appropriations bill, raised the obligation limitation from the $7.2 billion contained in S. 1024 to $7.7 billion.

Whether $7.2 billion or $7.7 billion, these figures should not be construed as a true measure of the magnitude of our Nation's actual highway needs. The program could use substantially higher levels of funding.

However, Mr. President, these are prudent levels of funding. We have chosen to live within our means. We have maintained the user pay principle. We have provided levels of expenditures that are consistent with present economic realities.

Now, allow me to highlight the more important aspects of this bill.

First it provides a definition of interstate completion that will reduce the current interstate cost estimate from approximately $53.8 billion to approximately $35 billion. It is essential that we take this step. During the 25 years that Federal funds have been provided to construct the Interstate Systems, in excess of $65 billion have been expended to complete slightly more than 95 percent of the designated interstate mileage.

For Congress to approve the current $53.8 billion cost estimate as a part of a major reform bill would be fiscally irresponsible. To retain such a definition of cost-to-complete will make it impossible to complete the Interstate System by 1990 or even by the end of the century. A more realistic estimate and level of Federal fiscal exposure is necessary and has been provided by this bill.

While reducing the interstate cost-to-complete by approximately $18 billion, S. 1024 will still provide acceptable service for users of the Interstate System. S. 1024 provides for full access control, for pavement designed to accommodate traffic anticipated for the 20-year life expectancy of the highway, a design of six lanes in rural areas and all urbanized areas under 400,000 population and up to eight lanes in urbanized areas of over 400,000 population.

When considering how to reduce the size of the interstate cost estimate, the Environment and Public Works Committee quite correctly took the position that it would be inequitable to apply a new restriction on the number of lanes that may be built on interstate gap segments, on staged interstate segments, or on those interstate segments that are open to traffic but that were built without Federal-aid interstate funds. In the past, States have been entitled to "one whole bite per interstate segment of the Federal-Aid interstate construction fund apple." For reasons of simple equity, States should continue to be so entitled in the future.

On the other hand, if a State desires to add lanes, intersections, or other improvements to an existing interstate segment that was originally built with Federal-aid interstate funds. It is reasonable to bar the further use of Federal-aid interstate construction funds, but permit the use of interstate 4R funds, on the basis that the State has had its "one bite."

Under the new definition of completion, those items eligible generally include engineering, minimum right of way, utility relocation, grading, erosion control, drainage, signing, lighting and guardrails. Generally excluded from eligibility for interstate construction funding would be items such as weigh stations, landscaping, pedestrian bike way facilities, noise abatement devices, some safety work and high occupancy vehicle lanes above the six- and eight-lane limitations set forth by the basic definition of the bill.

Mr. President, I will emphasize that the redefinition of S. 1024 does not prevent a State from building the features that have been excluded from the definition of the interstate cost estimate. Those items in the current interstate cost estimate that are no longer eligible for interstate construction funding will be eligible for interstate 4R funding.

S. 1024 provides $3.1 billion for interstate construction in fiscal year 1983 and a total of $27.775 billion through 1990. This is not enough money to complete the projected Interstate System anticipated by this bill to cost approximately $35 billion, but it is as much as may be responsibly contemplated for expenditure at this time. A future Congress will have to resolve the question of whether to further increase interstate construction funds or further reduce the ice.

Finally, S. 1024 retains ½ percent minimum funding for all States. This is significant because such a provision has not been retained in House bill 3210 passed this year.

Perhaps the most significant reform in this bill is that the existing interstate 3R program is expanded to include a fourth R—reconstruction. Mr. President, every study we have looked at indicates that highway deterioration is acute and accelerating. This bill recognizes that fact by providing $800 million of interstate 4R funding in 1982 up from the $275 million of funding in 1981 and a total of $7.7 billion from fiscal year 1982 through 1986.

I can think of no single provision in this bill, Mr. President, that is more important than this one. Maintenance of our investment in the Interstate System is as high a priority as completion of the Interstate System as expeditiously as possible.

The committee considered changing the Federal share from the 75 percent in the existing 3R program to 90 percent as provided for interstate construction. However, considering the austere times in which we live, the committee decided it is more appropriate to continue the

existing share of 75 percent so as to leverage more State funds with each Federal dollar.

The primary program remains unchanged except the priority primary program is eliminated. Mr. President, I know that elimination of the priority program is controversial and opposed by some States. I can only say that the program is simply not a priority item when compared to other Federal highway needs.

Both the Federal urban and the Federal secondary programs are significantly reformed. The existing Federal-aid urban system is abolished and all public roads in urbanized areas are eligible for Federal funds except those on the interstate or primary systems.

Similarly, the Federal aid secondary program is eliminated and a consolidated rural program is established making Federal funds available for all rural roads other than primary and Interstate Systems roads. S. 1024 further combines eligible projects now under the nonsafety portion of the safer off-system program and others.

S. 1024 amends section 120A of title 23 by providing that all new urban and rural projects will be funded with 50-percent Federal funds and 50-percent State matching shares rather than the 75-percent matching share of existing law. S. 1024 permits the States to transfer 100 percent of their apportionments between the primary system and both the rural and urban programs. If urban or rural program funds are used on primary roads, the Federal share would be raised to 75 percent without changing any States total apportionment. If primary program funds are used on rural or urban roads, however, the Federal share would be 50 percent.

S. 1024 places the decision of how best to spend their noninterstate Federal shares squarely with the States even while the bill induces the States to concentrate their Federal dollars on the primary roads that are a principle Federal responsibility, second only to the Interstate System itself.

Some limited funding is retained for highway safety improvement programs and individual safety categories are combined such as hazard elimination, rail highway crossing, rail relocation projects and safer off-system roads. S. 1024 provides that each State should expend 35 percent of its funds apportioned for highway safety improvements on rail grade crossing projects.

Mr. President, S. 1024 recognizes the continuing interest the Federal Government has in highway bridge replacement and rehabilitation. It recognizes, however, that the Federal interest in on-system bridges is greater than its interest in off-system bridges by multiplying by a factor of two for apportionment purposes, those deficient Federal aid on-system bridges or public roads functionally classified as major collectors.

Mr. President, S. 1024 also provides a number of other important sections that I will only mention in passing. These sections include emergency relief, rehabilitation of the Woodrow Wilson Bridge, gross vehicle truck weights on the Interstate System and designating of approximately 1,000 miles of Alaskan roads as completed interstate, thus making Alaska eligible, as are all other States, for interstate 4R funding.

Mr. President as we debate S. 1024 I hope that we will recognize that it is a step in the right direction—not a perfect bill, but a proper bill at this time.

It is a bill with inadequate funding when all our highway needs are considered but the best level of funding that could be provided.

It is a bill that recognizes the diverse needs of all the various States, and yet preserves the greatest amount of Federal funding for the Interstate System, both construction and reconstruction.

It is a bill that cuts back significantly the size of the interstate cost estimate.

It is a bill that funds each of the programs at levels in approximate proportions to the interests that the Federal Government has in these programs.

It is a bill that recognizes that an effective highway program requires long-range planning and long-range funding and as such S. 1024 is a 5-year bill.

Finally, Mr. President, S. 1024 conforms to the President's request that Federal expenditures for 1982 be reduced.

I hope that the Senate will keep these factors in mind as we move to consider this legislation.

UP AMENDMENT NO. 631

(Purpose: To close off priority primary funding to routes which have not received such funding and on which construction has not commenced)

Mr. PERCY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) for himself, Mr. EAST, Mr. DECONCINI, Mr. GOLDWATER, Mr. PRYOR, Mr. DIXON, Mr. CHILES, Mr. BUMPERS, Mr. MOYNIHAN, Mr. HUMPHREY, Mr. D'AMATO, Mrs. HAWKINS, Mr. RUDMAN, Mr. JEPSEN, and Mr. JOHNSTON, proposes an unprinted amendment numbered 631.

Mr. PERCY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, insert the following after line 25:

(2) $125,000,000 per fiscal year of the sums authorized for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, and September 30, 1985, by subsection (a)(1) of this section, shall not be apportioned. Such $125,000,000 of each such authorized sum shall be available for obligation on the date of apportionment of funds for each such fiscal year, in the same manner and to the same extent as the sums apportioned on such date, except that such $125,000,000 shall be available for obligation at the discretion of the Secretary of Transportation only for routes on which there have been obligated priority primary funds authorized by sections 104(c) of the Surface Transportation Assistance Act of 1978 and on which construction has commenced as of the date of enactment of this Act.

On page 8, line 1, strike out "(2)" and substitute "(3)".

On page 9, line 8, strike out "(3)" the first time it appears and substitute "(4)".

On page 9, line 12, strike out "(4)" and substitute "(5)".

On page 9, line 19, strike out "(5)" and substitute "(6)".

Mr. PERCY. Mr. President, the Federal Aid Highway Improvement Act, as reported by the Senate Environment and Public Works Committee, includes a provision eliminating the priority primary program. Along with my cosponsors, Senators EAST, DECONCINI, GOLDWATER, PRYOR, DIXON, CHILES, BUMPERS, MOYNIHAN, HUMPHREY, D'AMATO, HAWKINS, RUDMAN, JEPSEN, and JOHNSTON, I seek to amend this provision by restoring the program and closing off further funding to routes which have not received such funding and on which construction has not commenced. The priority primary program funds projects of unusually high cost which require long periods of time for their construction. Congress established the program in 1973 and reasserted its commitment in 1978 by increasing the level of funding to $125 million. The States are unable to undertake these projects without the special assistance provided by the priority primary program. The projects are essential for economic development and highway safety, and in my judgment, it would be false economy to eliminate their funding.

Let me briefly comment on two projects in my State with which I am familiar and I think by now Congress is quite familiar.

For more than 30 years, the Rockford to Decatur route has been the subject of discussion and study. For years, the route was considered as part of the recommended Interstate System, only to be dropped from the system during final review. Three years ago, the Congress declared the highway as a Federal priority. Today, the present two-lane highway has the highest ratio of trucks-to-cars in the State and carries over 10,000 vehicles per day—a number that rivals segments of the present Interstate System. It is projected that within the decade this route will carry more vehicles per day than presently travel Interstate 80 in Illinois.

The Quincy to Peoria route is equally crucial. The Department of Defense views this corridor as part of the Nation's strategic network and the narrow pavement, the deficient bridges and the insufficient capacity of sections of that highway demand attention.

Illinois has the busiest segment of the Interstate System and these routes are important to relieve interstate traffic. Mr. Chairman, these projects are not only vital to Illinois and the Midwest, but indeed to the country as a whole because of their strategic location.

Under the priority primary program we have given the participating States a clear and constant and continued signal of support. States have initiated plans, conducted engineering reports, purchased rights-of-way and proceeded with construction in anticipation of continued Federal support. It is important, as we seek to hold the line on Federal expenditures, that we not turn our backs on this commitment.

I recognize the budgetary restraints under which the committee must operate in assembling a comprehensive high-

way bill. I also recognize that we must concentrate limited Federal resources on programs of greatest concern, balancing budgetary needs.

For these reasons, I offer this amendment to establish a mechanism for those States which have committed substantial priority primary investments. Where States have adopted their highway plans and investments to reflect the Federal commitment to priority primary routes, the hold-harmless or grandfathering approach would be particularly appropriate. This amendment may be accommodated within the overall spending ceiling for programs under the highway trust fund.

The Senator from Idaho is aware of my concern for this program. I have testified before his subcommittee regarding this and, along with numerous colleagues, have written to him. Mr. President, I ask unanimous consent that the letter cosigned by my colleagues appear at this point in the RECORD, as well as a letter from Governor Thompson of Illinois.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., September 24, 1981.

Hon. STEVE SYMMS,
U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: We wish to express our strong support for continued funding for existing highway projects under the Priority Primary program.

The multi-year highway authorization bill now under consideration by the Committee, S. 1024, eliminates funding for the Priority Primary program. Under this program, states have received clear and constant and continued support from the federal government. States have initiated plans, conducted engineering studies, purchased rights-of-way, and proceeded with construction in anticipation of federal support.

It is important that we not turn our backs on this commitment and, for this reason, we believe that any proposal to eliminate the program should be done in concert with assistance to states that have committed substantial investments. We propose that the Committee consider coupling any recommendation to eliminate funding with a "hold-harmless" or "grandfather" provision for those projects currently underway.

Our request can be accommodated within the overall spending ceiling for programs under the Highway Trust Fund. Therefore, we hope you will restore funding for those priority projects for which the states have made substantial investments.

Charles H. Percy, Barry Goldwater, Alfonse D'Amato, John P. East, Paula Hawkins, Warren B. Rudman, Gordon J. Humphrey, Strom Thurmond, Mack Mattingly, Harrison Schmitt, Charles Grassley, Roger W. Jepsen, Daniel Patrick Moynihan, Dennis DeConcini, David Pryor, Dale Bumpers, Alan J. Dixon, Lawton Chiles, Sam Nunn, J. Bennett Johnston, United States Senators.

OFFICE OF THE GOVERNOR,
Springfield, Ill., October 30, 1981.

Hon. CHARLES H. PERCY,
U.S. Senator,
Washington, D.C.

DEAR CHUCK: I want to thank you for your past support for the Priority Primary Program and for your current efforts to retain this important program in the Senate multi-year highway bill, S. 1024. Your public testimony before the Senate Environment and Public Works Subcommittee on Transportation (which drafted the bill) was vital in presenting the case for retaining the Priority Primary Program.

Priority Primary funding is an important component of Illinois' highway program, enabling the construction of highways designed for high traffic volumes in two Priority Primary corridors, U.S. 51 from Rockford to Decatur and the portion of the Chicago-Kansas City Expressway from I–180 to Quincy. Because of the high cost of these highway projects, it would be very difficult for Illinois to undertake them without the special assistance provided by Priority Primary funding. In Illinois, portions of new highway have been opened to traffic and work is underway which will soon result in additional completed mileage. The State has spent more than $260 million on its two Priority Primary routes.

The future of the Priority Primary Program is in doubt. As reported from the Committee, the highway bill, S. 1024, would totally eliminate the program. Such an action would seriously disrupt highway programs in those states which participate in the Priority Primary Program. Of course, the Committee must consider fiscal constraints when assembling a multiyear highway bill, but continuing this program would not require any increased funding.

I commend your vigorous efforts to convince your Senate colleagues to retain the Priority Primary Program in the future, even in a limited form. I will be happy to support this effort in any way possible.

Sincerely,

JAMES R. THOMPSON.

Mr. PERCY. Mr. President, I understand that the distinguished chairman of the subcommittee, the Senator from Idaho (Mr. SYMMS), would object to this amendment and would do so despite the fact that the 26-member delegation from Illinois is solidly for it.

We have, as you can see, a very large number of Senators who are cosponsoring it. This is one of the most popular programs of Representatives. I would appreciate an explanation as to why the Senator would object.

Mr. SYMMS. The Senator is correct. I understand the Senator's concerns. I think the Senator has made it very clear to me both personally and again here today on the floor, and I understand the problem that the Senator and the other Members of the Senate have.

I would just like to assure the Senator that we will view these concerns with understanding at the time we are in conference with the other body. I think that would be the best we could do today.

Mr. PERCY. What was that, that was the best that could be done?

Mr. SYMMS. I think the Senator has made his case very well and we are very sympathetic with his case.

I understand the Senator's concerns with the program, and I agree to share those views with understanding in conference with the other body.

Mr. DIXON. Mr. President, I am pleased to join my distinguished senior colleague from Illinois, Senator PERCY, in offering an amendment that would continue the priority primary program, although in a restricted manner. This is an important program, one that, with a relatively small amount of funding, plays an important role in providing vitally needed additions to our Nation's highway system.

Both the 1976 and the 1978 Federal Aid Highway Acts set aside funds for distribution at the discretion of the Secretary of Transportation in order to construct priority primary routes which are of unusually high cost and which require lengthy construction periods. Congress cited 11 routes in the 1978 act, including 2 in Illinois, and has added 7 more routes since then. Illinois and 13 other States—Arizona, Arkansas, California, Florida, Georgia, Iowa, Louisiana, New Hampshire, New Mexico, New York, North Carolina, South Carolina, and Texas—currently have projects underway.

These States, like all the States, are forced to use their regular primary program apportionments to maintain primary system routes. Highways around the Nation are wearing out more than twice as fast as they are being maintained, so rehabilitation and maintenance have to be the States' No. 1 priority. Nonetheless, there is a continuing need for funds to upgrade and add needed capacity to high priority, heavily used primary system roads.

Consequently, highway legislation now pending in the House of Representatives does not end the priority primary program. Rather, it increases funding to $175 million from the current $125 million authorization. Increasing the program level in this era of shrinking Federal highway programs provides an indication of the importance of and the continued need for the priority primary program.

The amendment Senator PERCY and I are offering will help provide the States with the extra help they need to continue to finance these high priority projects.

Mr. President, two Illinois projects are good examples of the types of projects that the priority primary program assists—the Rockford-Decatur expressway and the Chicago-Kansas City highway.

The Rockford-Decatur route runs for 156 miles through the center of Illinois. Because of the heavy traffic on this route, the State of Illinois is expanding the present inadequate two-lane road into a four-lane divided highway. Discussion and study of this project have been going on for over 30 years.

The project is important to Illinois. It provides the connection between Rockford and Decatur, the second and fifth largest cities in the State. It acts as a connector for five existing interstate routes; I–90, I–80, I–35, I–74 and I–72. This route was included in every recommended Interstate System plan since 1945, but was dropped from the plan that was finally adopted for cost reasons.

The Chicago-Kansas City route is another example of the type of project that is being aided by priority primary funding. The proposed freeway has been under discussion for over 20 years; it was the subject of a special study mandated by the Federal Aid Highway Act of 1973. In 1977, the Department of Defense called for upgrading the Chicago-Kansas City corridor as part of the Nation's strategic highway corridor network.

The segment of the route between Peoria and Quincy, a distance of 172 miles, is now served only by two-lane highways. These roads are inadequate, due to deficient bridges, narrow pavement, and insufficient capacity.

The problem caused by the inadequate highways along this route are continuing to grow. The area is rich in agricultural and coal resources. The urban areas along the route, including Peoria, Macomb, and Quincy, are sites of numerous manufacturing firms. The existing highways cannot meet the demand generated by economic growth in the area, and unless they are upgraded, might, in fact, impede that growth.

So far, the State of Illinois has spent more than $260 million in Federal and State funds on its two priority primary routes. Remaining work, however, could cost as much as $850 to $950 million more.

The State is moving ahead with the routes as rapidly as the dollars will allow. During fiscal 1982, Illinois alone is ready to proceed with projects that could effectively use more than $100 million in Federal funds. Federal priority primary allocations should be increased, or at least continued at current levels, therefore, so that work on these needed projects, and similar projects in the other 13 States, can continue.

Mr. President, I believe that it is particularly important to continue the priority primary program because the 14 States with projects relied on the Federal commitment—and particularly on Congress expression of support for the 18 projects now underway. Based on the Federal commitment, the States committed substantial resources of their own toward completing projects that they could not realistically finance any other way.

I think my colleagues should understand that, unless we keep the priority primary program alive for those projects on which work is now underway, construction on those projects will not just slow, but will probably cease altogether. Given the pressures on State road programs, they have no other choice.

I urge my colleagues, therefore, to support the amendment that my senior colleague from Illinois and I have offered. It is a modest amendment. It seeks to assure that the Federal Government will keep the commitment it made in the 1978 Highway Act. We have a responsibility to the States who relied on that commitment. We should not abandon it.

Mr. PERCY. I have had a request from my distinguished colleague from Florida (Mrs. HAWKINS) to make a comment at this point, and I am very happy to yield to her for that purpose.

The PRESIDING OFFICER. The Senator from Florida.

Mrs. HAWKINS. Mr. President, I thank the distinguished Senator from Illinois.

Mr. President, I want to associate myself with the remarks of the Senator from Illinois concerning the importance of retaining the priority primary program. This program is designed to fund high-priority projects on the primary highway system. Projects funded under this program in every case, connect to the Interstate System and are in fact an extension of that system. Primary projects are selected by each State highway department in consultation with appropriate local officials and are subject to the approval of the Secretary of Transportation.

Elimination of the priority primary program would cause serious delays in the completion of two essential projects in Florida. One project involves U.S. 19, between St. Petersburg and New Port Richey, and has an estimated completion cost of $175 million. The other project that would be adversely affected is Jacksonville's State road 9A which runs from the north end of Danes Point Bridge to Interstate 95. Actually the completion of State road 9A involves five projects with a total cost of $16 million. Completion of U.S. 19 and State road 9A have been selected due to the exceptional traffic volume they now carry. It would be a major transportation error to cut off funding for these projects in the middle of their construction and deny sorely needed service improvements to affected areas.

Mr. President, the funding provided for the regular program is inadequate to cover the funding requirements of these projects. So, retaining funding for the priority primary program is essential.

Historically, the State of Florida has not fared well under the highway trust fund program. According to a table prepared by the Federal Highway Administration, Florida has received only 81 cents of every $1 it has paid into the highway fund since 1957. And when inflation is taken into account, the return rate is even lower. That is because the State received less than 81 cents per dollar in the 1960's when the dollar was worth more than it is today and has recovered a higher percentage of inflated dollars in the 1970's, driving the average up to 80 percent. In fact, the balance of payments deficit through fiscal year 1980 is an astounding $750 million. This is just under half the funds needed to complete the Florida interstate program envisioned in this bill.

For these reasons, it is especially important that the priority primary program be continued. If this program is retained, Florida will recover a part of what is rightfully ours. Had there been no trust fund, these two important highway projects would have been completed years ago out of that $750 million.

Mr. President, I ask unanimous consent that the table prepared by the Federal Highway Administration I referred to documenting the balance of payments of all States under the trust fund be printed in the RECORD, and I recommend that it be studied by my colleagues.

I thank the Senator from Idaho and the Senator from Illinois.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COMPARISON OF ESTIMATED STATE PAYMENTS INTO THE HIGHWAY TRUST FUND AND FEDERAL-AID APPORTIONMENTS FROM THE FUND, FISCAL YEARS 1957-80

[Dollar amounts in thousands; cumulated since July 1, 1956]

State	Payments into the fund [1]	Apportionments from the fund [2]	Ratio, apportionments/payments
Alabama	$2,033,155	$2,309,555	1.14
Alaska	151,845	1,426,151	9.39
Arizona	1,216,808	1,740,892	1.43
Arkansas	1,329,023	1,319,290	.99
California	11,070,612	8,646,577	.78
Colorado	1,408,331	1,710,829	1.21
Connecticut	1,377,212	1,840,158	1.34
Delaware	323,935	464,771	1.43
District of Columbia	269,952	1,252,661	4.64
Florida	4,025,878	3,267,459	.81
Georgia	2,902,169	2,629,013	.91
Hawaii	275,771	848,875	3.08
Idaho	534,760	825,744	1.54
Illinois	5,321,388	5,795,464	1.09
Indiana	3,144,845	2,531,757	.81
Iowa	1,792,375	1,751,000	.98
Kansas	1,508,952	1,565,527	1.04
Kentucky	1,815,665	2,102,310	1.16
Louisiana	1,965,584	2,789,146	1.42
Maine	585,618	661,602	1.13
Maryland	1,848,838	2,558,198	1.38
Massachusetts	2,398,704	2,566,644	1.07
Michigan	4,801,145	3,952,581	.82
Minnesota	2,171,817	2,615,585	1.20
Mississippi	1,324,318	1,325,449	1.00
Missouri	2,888,462	2,829,333	.98

Mr. PERCY. I thank my distinguished colleague, and her statement is a further indication of the deep interest that appears in this amendment.

THE PRIORITY PRIMARY PROGRAM

Mr. DECONCINI. Mr. President, I am a cosponsor of the Senator from Illinois' amendment and feel it is of major importance to those communities whose economic future rests with the continuation of this program. I am greatly concerned about the consequences the elimination of the priority primary program will have for a transportation project in my own State.

The priority primary program was

created to fund long-term, high-cost primary projects which represent a vital link in a State's overall transportation systems. In 1978, the Congress named the Kolb-Valencia Roads project in Tucson, Ariz., as a priority primary route and, subsequently, the Federal Highway Administration gave its approval to the project. Since that time, the people of Tucson have made a substantial investment in the Kolb-Valencia project by making available the local portion of the costs to be incurred under the Federal program. The effect, albeit I am sure unintended, of eliminating the specific funding category for the project when the community is beginning its initial phases of construction, is to leave the impression that the Federal Government is an unreliable partner.

Mr. President, I recognize that the members of the Environment and Public Works Committee have had an extremely difficult job in attempting to fashion a bill which protects our national highway needs while responding to the fiscal pressures we face. I commend the committee members for doing an excellent job in that respect.

This amendment will not upset the balance the committee has achieved nor will it breach the committee's budget ceiling in the legislation. It will instead just redistribute a portion of the primary funds in the bill to some of these highly critical projects which have already been initiated by communities relying on Federal commitments. Approval of this amendment will have the effect of protecting existing pipeline priority primary projects while precluding any new starts under this category. It will do so without placing a major financial burden on communities like Tucson which have acted in good faith in accordance with the provisions of the 1978 Surface Transportation and Assistance Act.

Mr. President, I will not belabor this point—I have discussed the Kolb project with the Senator from Idaho, Mr. SYMMS, and Secretary Lewis on numerous occasions. I am sure they recognize how important the priority primary program is to Members who have existing projects in their States. I just want to reemphasize my concern for maintaining a limited priority primary program and hope that the members of the Transportation Subcommittee will take this concern to the conference committee on the Federal Aid to Highways Improvement Act of 1981.

Mr. CHILES. Mr. President, I am pleased to join with Senators PERCY and DIXON and several other of my colleagues in offering an amendment to continue the priority primary program. I feel that it would be shortsighted to discontinue this program entirely without at least providing for the completion of the several projects which have already been initiated.

The importance of the priority primary program is best illustrated by the fact that the program greatly increases the usefulness of our Interstate System by providing essential links to funnel traffic to and from the interstate routes in areas of high-traffic volume.

An excellent example of how the priority primary routes will function can be realized by an understanding of the particular roads selected by Florida for this system. On the lower gulf coast of our State we have a major collector of traffic in U.S. 19. This road passes through the heart of one of our most densely inhabited counties. It serves a very large proportion of the north and south traffic in St. Petersburg and the adjacent cities just north. Not only is this route most used by residents, it is also a provider of service to many of the State's 30 million or so yearly visitors. The continued growth of the western Tampa Bay area has placed an increasing burden on U.S. 19 until it has earned a reputation of appearing, at times, to be a 50-mile long parking lot. While this may be a local problem, it also has national significance because U.S. 19 is the road which connects to Interstate Route 275. Therefore, if U.S. 19 is not functioning, I–275 cannot be made accessible to many of the nearly 1 million people living in and visiting the area.

To alleviate this problem, Florida has undertaken a two-stage process of improvements to U.S. 19 under the priority primary program.

The other route Florida has selected for programing under priority primary is State road 9–A in Jacksonville. This road in effect is the easterly loop of Interstate 295. At present, the westerly loop of I–295 has been completed and is providing excellent service as an urban bypass. When this priority primary program permits the continued construction of SR 9–A, equally efficient service can be expected east of Jacksonville.

This road will accomplish two important things. It will permit visitors coming to this gateway city an opportunity to gain access to the beaches without traveling through the heart of a major city, and it will permit the fast growing population of eastern Jacksonville access to Interstate 95 without having to negotiate the center city traffic.

Mr. BUMPERS. Mr. President, I am happy to join my distinguished colleague from Illinois on his amendment to add a grandfather provision to language in this bill eliminating the priority primary program. This provision would allow States which have already committed substantial funds to continue their projects with Federal assistance.

This program was enacted to help States construct highways which are unusually expensive and requires long periods of construction. The Federal Government made a commitment to those States which have ongoing priority primary projects. The Federal Government approved those projects and committed funds to those States for construction of them. Now, Congress is trying to back out of that commitment and leave those States with major construction projects only partially completed.

Considering the other reductions in Federal highway funds, it is very unfair to back out of this program and tell the States they are going to have to carry it alone. Further, it is unrealistic to think the State highway departments can meet their responsibilities in these projects. They are already suffering major reductions in funds and they just cannot take up all the slack.

Everyone is trying to do his share of carrying the burden of budget cuts and working to reduce Federal spending. However, in those areas where a commitment has already been made and undue hardships would result, we should not withdraw our support. This amendment authorizes the Federal Government to honor its commitment to those States, and I urge my colleagues to support it.

Mr. HUMPHREY. Mr. President, I wish to join with Senator PERCY in support of his effort to retain funding for priority primary program projects now initiated in a great many of our States. Very substantial investments of money, time, and energy have been made in existing projects which have to date been funded in part by the priority primary program. To abandon support for the existing projects now underway constitutes a gross injustice not only to the States which have acted solely in reliance upon continued Federal participation, but also to the Federal taxpayers in general whose significant investment will, in all likelihood, prove worthless. The injustice is further exacerbated by the fact that these projects can be accommodated within the overall spending ceiling of the Highway Trust Fund.

In light of this situation, I strongly advocate the inclusion of a grandfather provision in the Federal-Aid Highway Improvement Act of 1981 to insure continued Federal funding for the numerous affected projects.

Mr. PERCY. Mr. President, I appreciate very much my distinguished colleague's candor and, given the number of colleagues joining with me in this effort today and very strong and powerful statement made by my distinguished colleague from my native State of Florida, I know that when he says he will present our case in a very forceful manner he speaks with a good deal of confidence because he has always done that in the past when he believes in a cause.

The other body has reported a similar highway bill that increases the authorization for this program from $125 to $175 million annually. All I would need would be assurances from my distinguished colleague, the chairman of the subcommittee, the Senator from Idaho, that he would carry our concern with his usual sense of conviction on this program to the conference, and that our point of view might then prevail.

Mr. SYMMS. Is it my understanding, if my distinguished friend will yield, that if we can do the best we can, as the Senator is outlining, and make the best case possible that the Senator is willing to withdraw the amendment at this time?

Mr. PERCY. With that understanding and the sense of confidence that I place in my colleague's hands, and I realize it would probably be just as well not to take the time of the Senate at this time of evening to vote on this matter, I do understand the desirability of not withdrawing the amendment and letting it be settled in conference.

So with the strong support of the House in this position and the strong

support of our colleagues, we can leave it so. I ask unanimous consent that I may withdraw the amendment at this time.

Mr. SYMMS. I thank the distinguished Senator for his interest in this matter.

Mr. PERCY. I thank very much my distinguished colleague.

The PRESIDING OFFICER. The amendment is withdrawn.

AMENDMENT REGARDING TRUCK WEIGHTS

Mr. PERCY. Mr. President, the Federal-Aid Highway Improvement Act, as reported by the Senate Committee on Environment and Public Works, includes a provision requiring all States to allow trucks with a gross vehicle weight of 80,000 pounds. Along with my colleagues from Arkansas, Missouri, and Illinois, I sought to amend this provision and am pleased the distinguished floor manager at our request has agreed to delete this provision.

The 1974 Highway Act allowed States, at their discretion, to raise the gross vehicle weight limit for trucks using the Interstate System from 73,280 pounds to 80,000 pounds. With the exception of Arkansas and Illinois, all 50 States have increased limits to 80,000. While the Missouri Legislature has passed and the Governor has signed a bill increasing the weight limit to 80.000 pounds, a public referendum is pending that may suspend that statute.

The committee's bill, however, would have deprived these States of the right to determine weight limits and would have denied highway funds to anv State that falls below a mandated Federal minimum. This approach is antithetical to the administration's philosophy of returning policymaking to local and State levels of government.

Mr. President, our Illinois roads are unlike those here in Washington. Our soil is rich and produces the finest agricultural products, but serves as a poor foundation for roadways compared to the clay earth of other States. Our State is a leading producer of manufactured goods and draws an uncommon number of trucks to transport these goods. Our weather conditions expedite road deterioration because of frequent thaws and freezes during the winter. And, our State is the transportation hub of the Nation with the busiest segment of the Interstate System. Mr. President, Illinoisans know best what Illinois roads can carry.

Higher weight limits expedite road deterioration and increase attendant maintenance costs. The committee provision would have imposed on Arkansas, Missouri, and Illinois additional highway costs and, yet, not provided the revenue for these States to absorb costs. American Association of State Highway and Transportation Officials' road tests in Ottawa. Ill., indicate that 80,000-pound trucks may do as much as one-third more damage than trucks loaded to 73,280 pounds and that a single heavy truck can do the damage of 9,600 automobiles.

The Illinois Department of Transportation has testified that increased weight limits will decrease pavement life on most existing State highways by an average of approximately 17 percent and require $35 million annually in new revenue for the State road fund. Mr. President, I ask unanimous consent that an Illinois Department of Transportation position paper on truck weights be included in the RECORD at this point.

There being no objection, the position paper was ordered to be printed in the RECORD, as follows:

POSITION PAPER OF THE ILLINOIS DEPARTMENT OF TRANSPORTATION

The American Association of State Highway Officials designed, authorized, and financed a comprehensive research project regarding the relationship between axle-load magnitudes and the number of applications of such loads that could be placed on various types of pavement designs before the pavement deteriorated to an unserviceable condition. The research was conducted in Ottawa, Illinois between 1956 and 1960. With the distribution of the first report of that research, engineers immediately started debating the results delineated in the report. We have continued during the intervening years to conduct additional research and make statistical improvements in the data accumulated throughout the years.

Regardless of the amount of work done, we have never reached a unanimous agreement among professionals as to the exact relationship between axle weight and pavement design over long periods of time. We have, however, determined to our satisfaction that if consistent interpretations of available data are applied to our pavement designs, the results are predictable and repeatable. Our choice for a pavement thickness to support a particular design volume of traffic would generally be the same figure that would be utilized in another state.

There has always been some misunderstanding among the public and even some engineers as to the criteria used for designing a particular pavement thickness and cross section at a specific location. The State of Illinois does not design pavements for a specific weight of vehicle. In preparation for selecting a pavement design, we determine the number of years the pavement should last, then predict the volume of traffic that will use that pavement during the design number of years, and lastly select a factor that represents the percentage of single-unit trucks operating at various weights.

These volumes of trucks and weights are based upon Loadometer field tests and represent actual conditions. With this information, we can determine that during the design life of the pavement, a specific number of 18,000-pound axle loads will be applied to that pavement. Using that information and factors for the type of soil support, the thickness of pavement necessary to carry that number of 18,000-pound applications is determined. Once that pavement is constructed, we anticipate, of course, a number of overloaded vehicles and recognize that each such vehicle will reduce the expected life of the pavement.

If the volume of trucks or the volume of automobiles, for that matter, exceeds the number predicted within the design life, then the pavement will not reach the number of years selected at the point of design. As we all know, most pavements within this State have at one time or another carried loads far in excess of the legal load authorized by statute.

As an example, we recently moved a magnetometer across the State on Interstate Route 80. That piece of equipment, plus the weight of the vehicle designed specifically to carry it, exceeded a quarter of million pounds. Obviously, the pavement and bridges withstood that weight. They could not, however, withstand repeated applications of that weight over an extended period of time.

In Illinois, the general design life span selected for our pavements is 20 years. We have now developed approximately 20 years of experience since conclusion of the AASHTO Road Test. We were fortunate in having a number of our employees directly involved in the research work done at Ottawa and the follow-up computations and preparation of reports. Some of those employees have been involved in subsequent Illinois studies and decisions having to do with pavement design and structural integrity over long periods of time.

While I am sure there are isolated instances of pavement behavior radically different from that anticipated from interpreting research data, we are convinced the general parameters utilized in selecting pavement thickness and anticipating pavement life are valid and have proven to be consistently predictable in Illinois.

We are in total agreement with those who argue that pavement life depends upon a multitude of factors other than the number and size of load applications. Those other factors are among the reasons that the 13 states along the Mississippi River for many years consistently opposed increasing axle and tandem loads in order to extend pavement life. The type of construction materials available, the type of subgrade on which pavements are built, the annual rainfall, the number of freeze and thaw cycles, and the level of maintenance applied are among the factors having a direct bearing on the expected life of any pavement.

We again point out, however, that predicted values of life expectancy must be based on a given set of criteria, and as long as those criteria remain essentially the same, the predicted results are generally achieved. While our particular materials and our freeze-thaw cycles may be different from any other state, if we use that data correctly, we can consistently predict the life expectancy of the pavement.

The accumulative wisdom of the AASHTO Road Test and 20 years of experience subsequent to that test have convinced us that an increase in legal axle weights from 18,000 pounds to 20,000 pounds and a gross maximum load increase from 73,280 pounds to 80,000 pounds will result in a reduction in the service life of our pavements by 17 percent.

This percentage reduction in service life recognizes that many trucks will not obtain any benefit from the increased axle and gross weights because of the type of commodity being transported. If all trucks could carry the additional weight, the reduction could be as much as 34 percent to 42 percent.

Our prediction has been presented to various groups on previous occasions. It has been supported, questioned, criticized, and even refuted. We are convinced, however, it is a conservative figure and actual reduction in service life on certain types and kinds of pavement in high-volume corridors will be greater. We have reviewed recent literature, such as reports by the General Accounting Office and other studies sponsored by the Transportation Research Board, containing estimates as high as 35 percent for a similar change in weight.

Once the magnitude of pavement life reduction that will be experienced by a given increase in legal weight has been determined, the question of cost to the taxpayers of Illinois is a mathematical determination based on the costs to construct and maintain pavements and to rehabilitate those pavements at the conclusion of their serviceable life.

Based on the current cost index, the change in axle and gross loads proposed before this commission will cost Illinois taxpayers 35 million dollars each year. The fiscal note developed for Senate Bill 1202 expands this cost computation.

Mr. PERCY. Similarly, Arkansas studies show a need for $29 million annually in additional funding and Missouri about $10.5 million annually to absorb the maintenance costs of higher weight limits.

Additionally, studies have revealed concerns of safety and have shown that more deaths could occur due to heavier trucks. As trucks get larger and cars smaller, our highways become more hazardous. Mr. President, I ask unanimous consent that a paper prepared by the Central States Resource Center of Urbana, Ill. on the impacts of larger trucks be included at this point in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

IMPACTS OF LARGER TRUCKS: SUMMARY POINTS

Fatal accidents involving heavy trucks increased 47.6 percent between 1975 and 1978. 1975 was the first year that 80,000 pound trucks were legal in some states.

Although heavy trucks make up only about one percent of the registered vehicles, they are involved in about ten percent of all traffic fatalities.

The government is requiring cars to become smaller at the same time it allows trucks to become larger. This creates a dangerous situation for the motoring public.

In collisions between heavy trucks and smaller vehicles, 91 percent of the fatalities are occupants of the smaller vehicles.

Even though trucks are allowed greater braking distances than cars, only 65 percent of the five-axle tractor-trailers and 44 percent of tractors with twin trailers could stop within the required distance during tests conducted in 1974.

Thirty-four percent of the trucks inspected by the Bureau of Motor Carrier Safety during random checks have safety violations serious enough to put them out of service. Brake deficiencies are the most frequently recorded serious violations.

Twin trailer trucks require twice as much stopping distance as the cars with which they share the highways.

American highways are deteriorating 50 percent faster than they are being repaired, according to the General Accounting Office.

Tests conducted by the American Association of State Highway Officials demonstrated that an increase in truck weights from 73,280 pounds to 80,000 pounds will decrease remaining pavement life between 25 and 40 percent.

Increasing truck weights to 90,000 pounds could decrease remaining pavement life by up to 60 percent.

The vast majority of the highways and bridges in the nation were built when trucks did not exceed 60,000 pounds. Sixty-four percent of the bridges on the primary highway system cannot handle 73,280 pound trucks without reducing their serviceable life.

The bulk of the $104 billion Interstate Highway System was designed for trucks weighing 73,280 pounds.

The Federal Highway Administration estimated in 1978 that only 15 percent of the Interstate System bridges, nine percent of the primary system bridges, and four percent of the secondary system bridges, could safely handle 80,000 pound trucks without reducing serviceable life.

The National Transportation Policy-Study Commission reported in 1979 that the highway system would require an expenditure of $900 billion by the year 2000.

A five axle truck loaded to 73,280 pounds does as much road damage as approximately 6,000 cars. An 80,000 pound truck does as much damage as 9,600 cars.

The Arkansas Highway Department points out that a 73,280 pound truck causes as much road damage as 6,075 cars. The truck pays $3,517 in taxes and fees while the cars collectively pay $4,078,640.

In Indiana heavy trucks pay 19 percent of the federal user fees, but are responsible for 30 percent of the traffic on Indiana roads.

A 1978 Georgia allocation study showed that only cars and light trucks are paying taxes and fees equal to or greater than the highway costs they occasion.

A 1969 Federal Highway Administration cost allocation study showed that combination trucks paid only 76 percent of their allocated costs.

DOT estimated in 1975 that maintaining 1975 highway conditions until 1990 would require 329.2 billion 1975 dollars.

Twenty-two percent of all tractor-trailer combinations weighed by the Federal Highway Administration exceeded state weight limits.

State weight laws are lightly enforced and weigh stations are easily avoided. For example, half the truck traffic on I-55 near Chicago exits at Bolingbrook to avoid scales.

The General Accounting Office found widespread deliberate weight violations among trucks hauling grain, coal, steel, sand and many other products.

Soil and weather conditions are important factors which affect road life. Since these conditions vary from state to state, it is reasonable for weight limits to vary.

Two Chicago Tribune reporters found that two out of three trucks on Chicago expressways exceed the speed limit.

Trucks use at least three times as much fuel as railroads to move a ton-mile of freight.

Although heavy trucks use less fuel per ton-mile than their lighter counterparts, weight increases will save fuel nationally only if fewer trucks operate.

Truck weight increases will allow individual trucks to operate more efficiently and divert traffic from railroads. Since railroads use far less fuel per ton-mile than trucks, the nation will suffer a net fuel loss.

If truck trailer lengths are allowed to reach 48 feet, railroad cars will no longer be able to carry two standard trailers. This will cripple fuel efficent piggyback service.

Mr. PERCY. The administration has proposed user charges for waterways and ports and intends to make recommendations for highways in the near future. The Federal Highway Cost Allocation Study, which was mandated by Congress in the Surface Transportation Assistance Act of 1978, is scheduled to be released in January of next year; and last month, when Secretary of Transportation Drew Lewis submitted to the Congress a study of truck size and weight limits, he indicated his desire to coordinate truck weight limit legislation with user charges. Secretary Lewis wrote:

I firmly believe that size and weight legislation (for trucks) should be developed in concert with user charge legislation. Therefore, I plan to develop and present a coordinated position on both issues following completion of the Highway Cost Allocation Study early next year.

This amendment will delete the committee's provision and maintain current law, thus permitting the administration to submit a proposal on user charges before the imposition of heavier truck weights. In line with this, the State legislatures of Arkansas and Illinois and the voters of Missouri will have the opportunity to work their will.

I am pleased that the distinguished floor manager of the bill, the Senator from Idaho, and the distinguished manager for the minority, the Senator from Texas, have agreed to accept the amendment. I thank these Senators for their cooperation.

Mr. President, I ask unanimous consent that editorials appearing in Illinois newspapers concerning truck weights and letters from interested parties regarding this amendment appear at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Chicago Tribune, May 26, 1981]

TRUCKS ARE BIG ENOUGH

The highway-busting trucking industry is urging the Illinois General Assembly to increase the legal limit on gross vehicle weight from 73,280 to 80,000 pounds. It wants single-axle loads increased from 18,000 to 20,000 pounds. It wants S.B. 1202 passed to achieve these goals.

In view of the damage their bill would do to the highways that they use, the truckers have to be taking a very short-term view of their own interests. They also have to be assuming that the federal government (the only one that can print money) will replace destroyed roads and bridges no matter how fantastic the cost.

Reasons for opposing S.B. 1202 are compelling. The Chicago Motor Club summarizes them thus: the bill "would speed the break-up of street and highway pavements by an estimated 40 per cent" and "would increase the safety hazards to all highway users." There is ample documentation for each of these judgments.

Almost two years ago the General Accounting Office issued a report to Congress entitled "Excessive Truck Weight: An Expensive Burden We Can No Longer Support." It begins: "The nation's highways are deteriorating at an accelerated rate and sufficient funds are not available to meet current needs or future requirements. Excessive truck weight is a major cause of highway damage."

The Federal Highway Administration says only about 15 per cent of interstate highway bridges, and much smaller proportions of primary and secondary system bridges, can handle 80,000-pound trucks without curtailment of their serviceable life. Most highways and bridges were built when trucks did not exceed 60,000 pounds in weight. Subjecting them to stresses in excess of their originally designed limits hastens their collapse, at a time when construction costs are skyhigh.

The highway juggernauts already have a terrible safety record. Though they comprise only one per cent of registered vehicles, they are involved in 10 per cent of the fatal accidents—in which 91 per cent of the fatalities are in the smaller vehicles. Their stopping distance is far greater than that of a passenger car. They jackknife. Their brakes, tires, and steering gear are often below standard. They are routinely overloaded. Their drivers disregard speed limits and regulations to limit fatigue. Raising the weight limit on trucks would be little if any short of homicide.

There are additional arguments. Trucks are less fuel-efficient than freight trains; and two larger trucks would not fit on a piggy-back flat car, so increasing the size would discourage a means of transport that should be used more, not less. Illinois' fertile farmlands provide a less solid roadbed than exists in other regions, so roads in this state are especially vulnerable to damage by heavy trucks. The present generation of heavy trucks does not contribute its fair share in user fees. To increase their weight would increase a subsidy that should be reduced.

For the Illinois General Assembly to enact S.B. 1202 would be widely extravagant and would compound a serious danger confronting all motorists. Do we want to rush into a dilemma in which we must either write off much of our road system as unusable or replace it at ruinous expense? Do we want the intimidating giants of the roads to become even bigger than they are, while passenger cars get smaller?

ROCKY ROAD TO STATE RIGHTS

(By Bob Wiedrich)

One of the reasons Ronald Reagan got to the White House was his campaign oratory in behalf of restoring states' rights.

The President has tried to keep that promise by slashing deeply into the maze of federal regulations that intrude on individual rights and the ability of the 50 states and their local municipalities to chart their destinies.

Right now, the trucking industry is attempting to make a mockery of that Reagan commitment to federalism. It is lobbying heavily in behalf of a Senate bill that would mandate an 80,000-pound maximum weight for over-the-road vehicles.

That is in keeping with a national trend toward heavier trucks under the 1974 federal highway act that allowed states to raise gross vehicle weights from 73,280 to 80,000 pounds at their discretion.

However, in this revision of the 1974 act, proponents want to make permission for the heavier trucks mandatory rather than discretionary.

And that means that states like Illinois that also want to force truckers to help pay for the cost of pavement destruction by charging user fees will be thwarted if the legislation is enacted.

That, to me, represents a gross revival of federal interference in the rights of states to manage their financial affairs. And it is an injustice President Reagan should not permit to happen in a Senate controlled by Republicans.

The bill, as now written, contains no state or federal mechanism for financing road repairs necessitated by operation of heavier trucks.

The American Association of Railroads and highway user and taxpayer groups argue that states should have the right to decide whether operators of heavier trucks should be required to pay at least a part of the expense for pavement repair and rehabilitation.

And Illinois Senators Charles Percy and Alan Dixon have responded to requests by Gov. Thompson for more discussion of the possible adverse impact of the bill on highways by placing a hold on the measure until Thursday.

However, there is little doubt the act will pass in its present form unless there is White House pressure on those Senate Republicans promoting the trucking industry's cause without regard for the financial consequences.

Since the 1974 federal act permitting discretionary increases in gross vehicle weights, all 50 states except Illinois and Arkansas have taken such action. Missouri enacted a similar provision, but public opposition forced the question to a referendum to be held next year.

In Illinois last spring, a bill was introduced in the Senate to make local law conform with the laws in a majority of the states. However, an amendment was also offered that would provide for the imposition of an estimated $80 million a year in user fees on truckers desiring to operate 80,000-pound vehicles.

Naturally, the amendment provoked an uproar from trucking interests. The measure was buried in the Senate Transportation Committee, along with the amendment, where it presumably could resurface in the 1982 legislative session.

In the interim, the Illinois Department of Transportation prepared a fiscal note for the General Assembly estimating that $35 million in new revenue for the road fund would be required to repair damage expected from heavier trucks.

The memorandum warned that pavement life would be decreased an average of 17 per cent if gross weights were increased.

And it pointed out that a section of road designed to last 20 years under present weight limits and anticipated traffic volume would start crumbling within 16½ years under the pounding of heavier trucks.

The trucking industry argues that an 80,000-pound weight limit will promote greater fuel efficiency by permitting one vehicle to haul more cargo.

Conversely, safety experts contend that the weight and sizes of trucks should not be increased at a time when passenger cars are becoming smaller, also in the interests of fuel efficiency.

At a time when the Illinois road fund is in dire straits of its own, it makes sense to me that truck operators electing to operate heavier vehicles should be required to pay at least a portion of the expense of repairing the damage wrought by their behemoths.

On Oct. 14, the Illinois Motor Vehicle Laws Commission directed its staff to draft legislation allowing heavier trucks if user fees totaling $25 million annually are raised. That represents a compromise between the $35 million estimated by the Transportation Department and the $15 million suggested by the trucking industry.

Either way, the Illinois General Assembly should be capable of thrashing out an equitable and fair method of financing highway repair. But first, Congress has to permit the 50 states to decide their own fates without the federal government again poking its nose where it doesn't belong.

[From the Chicago Tribune, Mar. 29, 1981]

HEAVIER TRUCKS LAST STRAW ON WEAR-WEARY ROADS

(By Jack Mabley)

Illinois highways and bridges are falling apart. The governor wants a huge tax increase to patch them up. The trucking industry is mounting a campaign to increase the maximum weight of trucks.

The present limit is 73,280 pounds, and between 10 and 20 per cent of the big trucks on the road overload in violation of the limit. The truck industry wants an 80,000-pound maximum.

We asked a state highway engineer, Larry Shoudel, what the weight increase would do to the roads. He cited federal highway tests.

"There'd be a 17-per-cent decrease in road life with an 80,000-pound limit," Shoudel reported. "That means that if a road has a 20-year life with the present limit, it will wear out three of four years sooner."

"Of course, maintenance costs will go up. The estimate is $113 million more in the state for highway rehabilitation with the bigger loads, and $12.4 million in maintenance over the next four years."

"There's a backlog in road repairs, and this would add to it. There's not enough money in the road fund now."

Jack Thomas, a truck driver, called to warn us of the truck companies' campaign.

The truckers are expected to hire Mike Howlett, former secretary of state, to try to persuade legislators to see things the truckers' way.

"We drivers are dead set against the increase," said Thomas, who is treasurer of the Chicago-area Professional Drivers Council, (PROD), a small and vocal group of drivers.

Aside from the economics, Thomas said, "There will inevitably be more deaths and injuries. Trucking companies say their accident rate is higher than automobiles' because their exposure is greater, but break it down to miles traveled and trucks kill two times as many people as cars.

"But the companies want to make them bigger and heavier. With cars getting smaller, that just exacerbates the problem until it gets ridiculous.

"The drivers' job is already dangerous enough. The kill ratio for truckers is 90 out of every 100,000. With coal miners it's only 70 per 100,000, yet people say they have the most dangerous job."

Illinois, Indiana, Missouri, and Arkansas are the only four states retaining the 73,250 load limit. The others are 80,000 pounds.

Is everybody out of step but these four? The engineers in charge of keeping Illinois highways safe and driveable think so.

The main argument for lifting the limit is the economy of running an 80,000-pound truck from coast to coast. The industry claims it loses millions because of the "wall" in these four states.

The Chicago Motor Club is a vigorous opponent of the higher weight. In legislative testimony, Jerome Zienty of the Motor Club stated:

"Truckers claim energy conservation benefits in handling heavier loads. We question whether such benefits would be appreciable. We suggest, however, that if the trucking companies are seriously interested in conserving energy there are a number of other means available.

"According to the Regulated Common Carrier Conference, the fuel savings from observance of the 55-m.p.h. speed limit are from 26 to 32 per cent. Tests by the same group and the Society of Automotive Engineers indicate as much as 21 per cent more fuel can be saved by a combination of design, engineering and maintenance techniques, such as air deflectors, smooth-sided trailers, synthetic lubricants, and proper tire inflation."

Government tests show that one 80,000-pound truck passing over one section of highway has the same impact as 9,600 automobiles.

Proponents and opponents go around in circles on whether a truck gets more dangerous when it gets bigger. There can be little question it is harder to maneuver. It blocks traffic longer in a turn. Braking distance for heavy trucks is 2½ times as far as for passenger cars.

Every truck has to enter an expressway traffic flow in an acceleration lane, and if traffic is heavy the risk of rear-end collisions increases with the bulk of the truck. An auto going 25 m.p.h. on an entrance ramp can accelerate to 60 m.p.h. in eight seconds. A heavy truck will require 20 seconds to accelerate to 40. Rarely can trucks travel more than 35 as they enter the traffic flow.

In an accident of truck vs. auto, the truck driver has 38 times more chance of survival than the auto occupants.

BIGGER TRUCKS, BIGGER TAXES

Even if the Missouri Legislature doesn't do much worthwhile in its present session, it promises to do something dismal: allow bigger trucks to help the state's deteriorating highways deteriorate further while shifting more of the burden for upkeep to motorists.

The Legislature has passed a big truck bill and given Gov. Bond an opportunity to exercise a proper veto. The measure would increase total truck weight to 80,000 pounds from 73,280, with various axle weight increases, and to increase the length limit to 60 feet from 55. The bill also raises truck fees 25 percent, and that's not enough. A fiscal note attached to the measure shows that by the 1983 fiscal year, the income from the fee rise would be $2 million short of what the Highway Department would need to repair damage caused by the trucks.

No matter, the legislators are working on ways to improve road funding that would more than make up the difference. The House wants to raise the state gasoline tax from 7 cents to 10 cents and to increase fees sharply for licenses and vehicle titles. The Senate has a somewhat different idea. It would raise the gas tax by only 2 cents, but then increase the state general sales tax from 3⅛ to 3¼ cents to support a $250 million road bond issue. The two chambers are working on ways to compromise on their versions, and probably will. In that case, motorists would be expected to help pick up the check for the truckers.

In reaching this point, the Legislature has reflected a good deal of the highway lobby's hypocrisy. For example, voters would be asked to approve the gas tax legislation and also to exempt the additional revenue it produces from the Hancock amendment. That amendment requires refunds to income tax payers when state revenue exceeds a complicated ratio. But when Sens. Murray, Creve Coeur, Republican, proposed submitting the truck bill to the voters, the senators killed it on a 14–12 count. They knew what would happen if voters got their hands on the issue of bigger trucks.

That is not all. One of the strongest advocates of the gas tax increase is the Missouri Farm Bureau Federation. It also was the chief promoter of the Hancock amendment. The Farm Bureau clearly is willing to make an end run around its amendment in order to obtain better rural roads. Indeed, much of the push for these highway measures is coming from outstate legislators. Only two St. Louis senators voted for the truckers' proposal.

That is understandable enough. The St. Louis metropolitan area has produced much of the state's highway revenues, but officials here have for long felt that the area did not get a fair return in road work. St. Louis even had to sue to abolish a long-standing Highway Commission policy requiring larger cities to share in right-of-way costs for state highways. Both St. Louis County Executive McNary and former Mayor Conway said that the state had not been responsive to metropolitan highway needs and suggested restructuring its highway agency.

Certainly a Legislature that has been busily engaged in holding back on or cutting mental health, welfare and practically every other state service has not made a case that highways and trucks deserve far better treatment. A time of austerity ought to prompt legislators to make a considered review of such expansions. That is not what they are doing, but that is what Gov. Bond ought to require them to do before assenting to bigger trucks and more highway taxes.

[From the St. Louis Post-Dispatch, Apr. 1, 1981]

CONVOY SET FOR ILLINOIS

The Illinois Legislature may well be the next target of trucking industry lobbying for higher weight limits. Missouri, Illinois, Indiana and Arkansas are now the only states that set the load limit at 73,250 pounds. The others have 80,000-pound limits. The pressure to support the big truck bill has not been severe in Illinois because the Indiana and Missouri weight limits serve as buffers. Now, however, the industry believes it has a good chance of getting the higher limits in Missouri and Indiana. Hence, Illinois is next. The move for 80,000 pound limit still could be—and should be—detoured in Missouri. In any case, it should not be allowed in Illinois.

Like Missouri, Illinois is faced with the prospect of increasing taxes to meet highway needs. The proposed tax on oil products, however, would only provide enough money to reduce the rate of growth in the backlog of roads that need repair. It would not eliminate the miles of crumbling highway. Government studies have shown that the damage from one 80,000 pound truck equals that from 9,600 mid-size cars and that the larger trucks would increase pavement damage 17 percent. Illinois cannot afford the added deterioration.

Safety is another important consideration. The truck industry argues that all the other states in the continental U.S. have found the safety trade-off to be satisfactory. That is hardly a persuasive case for the higher load limit. As today's Mirror of Public Opinion notes, larger, heavier trucks are more dangerous. For the people's safety and pocketbooks, the Illinois Legislature (and the Missouri Senate) should say No to bigger trucks.

[From the St. Louis Globe-Democrat, Apr. 1, 1981]

ROADWISE ILLINOISANS

Maybe one of the reasons why passage of a big truck bill appears to face a rougher road in Illinois than in Missouri is that Illinoisans have taken a closer look at their rough roads than Missourians have at theirs.

Illinois officials, eyeing a deteriorating, pothole-marred highway system, say raising the limit to 80,000 pounds would further damage roads. Missouri officials have said the same thing, but seem now to think that higher truck fees would prove adequate compensation for the increased damage.

Illinois officials also believe that bigger trucks could result in a rise in traffic fatalities. Safety experts in Missouri expressed a similar belief.

Rep. Herbert V. Huskey, R-Oak Lawn, chairman of the Illinois House Motor Vehicle Committee, is against the higher limit. "This comes up every year, and I don't see the General Assembly buying it this year."

Another committee member, Rep. James P. McCourt, R-Evanston, said, "There is almost a human cry about how the trucking industry is taking over our highways. It's high time to stop their influence on the Illinois road system."

State Transportation Department spokesman Richard L. Adorjan said the department consistently has been opposed to increasing the weight limit because of the damage it would do to roads. The higher limit, he said, would increase pavement damage 17 percent.

Adorjan pointed out that the U.S. General Accounting Office found that one 80,000-pound truck does the damage of 9,600 mid-size cars. If Illinois raises the limit, he said, truckers should have to pay for the additional damage.

This would be the only fair way to do it. There are serious doubts, however, that the higher fees, such as those proposed for Missouri, would pay for more than a portion of the increase in damage.

The trucking industry is expected to make a strong push for bigger trucks in Illinois. This is because former opponents of a higher limit, neighbors Missouri and Indiana, may approve higher limits this year.

No matter what route others may take, Illinoisans who are against bigger trucks on their highways should stick to their guns. The state's roads are in bad enough shape as it is—as Illinois drivers well know. Why go out of the way to make them worse?

[From the St. Louis Globe, June 5, 1981]

DOUBLE RIP-OFF ON HIGHWAYS

Having been steamrollered by a big truck bill in this season of the General Assembly, Missouri motorists may have thought nothing worse could happen to them.

There'll be no such luck if a compromise plan for highway financing is approved. House-Senate conferees have drafted a proposal calling for most passenger car license fees to be increased from 41 percent to 67 percent, while fees for big trucks would remain unchanged.

The outrageous proposal is paired with a staggered 3-cent increase in the motor fuel tax, looking toward raising $116 million more per year for highway construction and maintenance.

Besides the higher vehicle fees, the plan would triple the cost of a driver's license from $3 to $9 and raise the cost of a chauffeur's license from $10 to $15.

Curiously Sen. Norman N. Merrell, D-Monticello, reasons that big trucks, which do the most damage to highway pavements shouldn't have their license fees increased because they pay more than passenger cars in taxes by using more fuel.

Merrell, President Pro Tem of the Senate, long has been a champion of bigger trucks. He is sponsor of the resolution which critics rightly call a "double rip-off."

According to Merrell, automobile drivers shouldn't mind paying more for their licenses. They should be understanding toward truck operators, to whom license fee increases would represent considerably more money, Merrell contends.

Doesn't Merrell understand that private automobiles are driven at great expense to the owners, while trucks are operated for a profit? How brazen can the apologists for the trucking lobby be? And how stupidly gullible do they think the voters are?

Fortunately for the public, the double rip-off scheme would be in the form of a constitutional amendment requiring voter approval before becoming effective.

The public is not yet ready to pass judgment on whether a combined proposal for license fee increases and higher gasoline taxes is the right approach for raising money to maintain highways.

Legislators should be put on notice that the people are not prepared to submit supinely to higher licenses that discriminate against passenger car motorists while giving a blank check to truckers.

The bill for heavier trucks, signed last week by Gov. Christopher S. Bond, was a bitter enough pill for the public to swallow. The latest proposal to stick it to the motorists again is more than reasonable people can stomach.

The Missouri compromisers will have to come up with a better plan, one that is equitable, if they hope to gain any measure of support.

[From the Chicago-Urbana News-Gazette, June 10, 1981]

BEWARE OF PLAN TO RAISE TRUCK WEIGHTS

Thanks to Sen. Prescott Bloom, R-Peoria, the Legislature may have stymied an attempt to raise truck weights in Illinois to a pavement-pounding 80,000 pounds.

Bloom added an amendment to the truck weight increase bill that would make truckers pay for the increased damage they do to Illinois highways. He suggests a weight-distance tax that would raise about $115 million annually.

For some reason the truckers didn't like that idea. Their godfather in Springfield, Sen. Charles Chew, D-Chicago, complained that truckers were willing to pay for the increased truck weight—but only up to $2 million.

Great idea, Sen. Chew. Unfortunately, you can't even pave two miles of interstate highway for $2 million anymore. But thank you for your genorosity.

The Legislature will be in session at least another three weeks so there's plenty of time for Chew and his cronies to slap their truck weight increase proposal on the back of another bill. Consider yourself forewarned.

We suggest that Illinois motorists who think the current method of financing highway repairs is unfair (wherein automobiles and light trucks pay about 70 percent of all

user charges) should urge their state lawmakers to fight any effort to raise truck weights without a large corresponding increase in large truck user fees.

Various studies performed by various groups in various states all come to the same conclusion: big trucks do more damage to highways than thousands of cars. The State of Oregon says that 80 percent of highway deterioration is directly attributable to heavy trucks. One percent can be blamed on automobiles and light trucks and 19 percent is caused by weather conditions.

An Illinois Department of Transportation study shows that an increase in maximum truck weights from 73,280 to 80,000 pounds would increase pavement damage 20 percent. American Association of State Highway Officials research found that one 80,000-pound truck causes as much damage as 10,000 cars.

The largest truck allowed on an Illinois road now pays the state $1,560 in registration fees. That compares to $30 a year for most motorists. We suggest truckers are getting a good deal now—and they want even more.

Meanwhile, too many railroads are struggling along because they have to cover all of their right-of-way expenses without subsidies.

There's also a safety factor. Most states raised the maximum truck weight limit to 80,000 pounds in 1974 or 1975 (even though most highways were built to withstand weights of only 50,000 pounds) and between 1975 and 1978, there was a 40 percent increase in the number of fatal accidents involving heavy trucks. During that same period, accidents involving passenger cars increased by only 7 percent.

Nearly two years ago, Illinois Transportation Secretary John Kramer estimated it would cost an extra 59 million a year to pay for the increased damage—to interstate highways alone—if maximum truck weight limits were increased.

That amount surely has increased in the last two years. We suggest that if truckers are interested in higher truck weights and equity in sharing the cost of highway maintenance they'll support Sen. Bloom's proposal.

If they're interested in continuing to sponge off automobile motorists they'll support Sen. Chew's pitiful plan to raise another $2 million to make up for $15 million or more in increased roadway damage.

[From the Chicago-Urbana News-Gazette, May 11, 1981]

WRECKING THE HIGHWAYS EVEN FASTER

To the surprise of no one, the Senate Transportation Committee Thursday approved legislation that will increase to 80,000 pounds the limit for truck loads on Illinois highways.

That wasn't a surprise because the transportation committee always has given the trucking industry whatever it wanted. This year, however, the committee added some spice by recommending an increase in the speed limit on limited-access highways to 65 mph.

Committee Chairman Charles Chew, D-Chicago, said the measures are necessary because President Reagan supports the higher speed limit and because Illinois truckers are at a disadvantage with the state's 73,280-pound weight limit.

On the first point—the issue of the speed limits—we haven't seen any indication from the president recently that indicate he's about to recommend increasing the speed limit. The 65 mph speed limit was included in the Republican Party Platform—much to the embarrassment of many Republicans—but the issue wisely has been buried beneath more important business.

Increasing the truck load limits fortunately remains at the discretion of the individual states. After all, they are paying the full share of maintaining highways. Illinois—a crossroads for transportation with more miles of interstate highway than any other state—has a great deal to lose with the higher load limits. More than a year ago, officials estimated it would cost the state an extra $9 million to increase load limits on Interstate highways alone. One 80,000-pound truck does as much damage as 9,600 automobiles, state transportation officials argue.

Sen. Chew says he will offer an amendment to increase trucker registration fees, but we wonder how willing the trucking industry will be to fork over another $10 to $15 million annually to pay for the damage their mammoth machines cause to roads.

[From the Journal Star, May 30, 1981]

STOP BIGGER TRUCKS

Illinois highways being what they are—the worst, or among the worst, in the country—this is surely not the time for the Legislature to be considering letting bigger trucks haul freight on them.

Truckers want the right to increase gross weights from the present 73,280 pounds to 80,000 pounds. We think that would be a mistake—dangerous and costly.

The Illinois Department of Transportation, which builds and maintains state highways, estimated several years ago that 80,000-pound trucks would cut 20 percent off the life of a highway. For example, a road that might be expected to hold up for 20 years would deteriorate in 16.

We have enough deterioration already, we don't need more.

Illinois highways don't hold up as well as those in some other states for a variety of reasons:

Being a big industrial state, and the Midwest transportation hub of the country, our highways get extraordinary use by large trucks of all kinds.

The ground in states north of here freezes solid in winter and pretty much stays frozen until spring. States to the south rarely, if ever, freeze solid. Illinois freezes and thaws frequently during the winter, and this puts an extra burden on our roads.

Illinois soil, a lot of it the fertile black ground that makes us such a rich agricultural state, is not the best kind to build roads on. It is relatively less solid than the clay and sandy soils of other parts of the country, and the concrete tends to bounce and crack.

There is no question that heavy trucks break up pavement far faster than private automobiles and that truckers do not pay taxes and fees that come anywhere close to being commensurate with the damage they do.

As long ago as 1958–60, the American Association of State highway Officials conducted a detailed engineering test of truck and car damage on a specially-constructed road near Ottawa, Ill., that later was incorporated into Interstate 80.

This two-year test showed that a typical 1960 passenger car weighing two tons had an axle load of 2,000 pounds and did essentially no damage to the pavement. A five-axle truck loaded to the 73,280-pound limit, however, did as much damage as approximately 6,000 cars. It has been estimated that an 80,000-pound truck would do as much damage as 9,600 cars.

As we have pointed out before, when you see a truck bearing a sign saying, "This truck pays $4,876 a year in highway taxes," don't feel sorry for the owner. Six thousand cars would pay 30 or 40 times that much in license fees alone.

There are other arguments against letting trucks get heavier and longer. One of them is safety, especially when so many of us are driving smaller and smaller cars. Another is the cost of energy, since railroad trains use fuel more efficiently; it makes no sense to turn the Interstate Highway System into a concrete freight train line for trucks.

But the main argument is damage to roads and the amount this will cost all of us who use them. Gov. James Thompson has assured us that we have a financial crisis in highway maintenance. Let's not make it even worse by speeding up the deterioration.

[From the Pike Press, May 13, 1981]

ABOUT SPEED LIMITS AND TRUCK WEIGHTS

The Illinois Senate has before it a bill to raise highway speed limits from 55 mph to 65 mph on limited access highways and another bill to increase by more than 7,000 pounds the weight limits of trucks traveling on designated Illinois highways.

The first idea has some merit, as long as the 55 mph limit stays in effect for all but four-lane highways. Our local two-lane highways are not fit for safe travel at more than 55 mph.

The truck load and truck length limits should be left where they are.

The Illinois Department of Transportation says one 80,000 pound truck (the proposed new limit) does as much damage to roads as 9,600 automobiles.

Our state highways in this area are already going to pot soon enough and a modern four-lane highway through the county is at least 10 years away due to the Valley City bridge hang-up. The fact is, it's at least an even bet neither the bridge nor highway will ever be built.

Reason enough to oppose any heavier or longer trucks hurtling through the county, tearing up that much sooner what roads we now have.

[From the Centralia (Ill.) Sentinel, May 27, 1981]

HIGHER TRUCK WEIGHTS POSE THREAT TO ILLINOIS

A bill is now pending in the Illinois General Assembly which would increase truck weights from the present limit of 73,280 pounds to 80,000 pounds.

There are several reasons why we believe this bill should be rejected even though Illinois is one of just four states where the higher weight is not permitted. Chief among these reasons are the greater danger to the general safety of the motoring public and the increased damage to road surfaces which will occur if heavier trucks are allowed on our highways.

Illinois roads are particularly vulnerable to damage because of climate and soil conditions prevalent in the state. Illinois has one of the highest freeze-thaw cycles in the nation and this is particularly true in Southern Illinois where fluctuating winter temperatures are a normal occurrence. These continual variations in temperature result in the enlargement of cracks and holes through the natural weathering action of ice on the pavement.

The deep prairie soils of central Illinois, while excellent for agriculture, also contribute to the problem as they do not provide a firm base for highway construction. Poor subsoil drainage is also a factor and many Illinois roads are far more prone to settling under heavy weights than those constructed on bedrock or gravel.

With the greater popularity of small cars and gasoline conservation by the motoring public, less tax money is being collected for highway construction or repair. Several studies by state highway departments in Indiana, Georgia and Arkansas indicated that trucks are not paying license fees or taxes commensurate with the damage they produce. Many Illinois roads and bridges are already in poor condition and it is doubtful whether the trucking industry will compen-

sate for the greater damage that can be expected to occur if weights are further increased.

But damage to public highways is of small concern to most people when human life is involved. Between the years 1975 and 1978, accidents involving heavy trucks increased 47.6 percent: 1975 was the first year that 80,000-pound trucks were legal in some states.

As truck size has increased, private automobiles have continued to become smaller. While you may be just as dead if you collide with a 73,000-pound truck as an 80,000-pound vehicle, a heavier truck requires a greater distance to stop and the driver therefore has less time to avoid a collision. The danger of accidents also is related to the higher speeds at which trucks often travel: and many drivers use their CB radios to make sure the road is clear so they can exceed the speed limits.

These factors are reflected in the fatality statistics which indicate that although heavy trucks only makes up 1 percent of all registered motor vehicles, they are involved in about 10 percent of all fatal traffic accidents.

We believe that if a poll of Illinois, voters were taken, most would oppose the increased weight limits for trucks. We would hope that the General Assembly will place the safety of the motoring public and the continued maintenance of our highway system above the interests of the trucking industry.

BIGGER TRUCKS UNDESIRABLE

The Illinois legislature has before it Senate Bill 1202 which is a proposal to allow an increase in the maximum weight of trucks to 80,000 pounds. Here are several reasons for being opposed to the adoption of the bill:

Fatal accidents involved heavy trucks increased 47.6 percent between 1975 and 1978, 1975 was the first year that 80,000-pound trucks were legal in some states.

Although heavy trucks make up only about one percent of the registered vehicles, they are involved in about ten percent of all traffic fatalities.

The government is requiring cars to become smaller at the same time it allows trucks to become larger. This creates a dangerous situation for the motoring public.

In collisions between heavy trucks and smaller vehicles, 91 percent of the fatalities are occupants of the smaller vehicles.

Even though trucks are allowed greater braking distances than cars, only 65 percent of five-axle tractor-trailers and 44 percent of tractors with twin trailers could stop within the required distance during tests conducted in 1974.

Thirty-four percent of the trucks inspected by the Bureau of Motor Carrier Safety during random checks have safety violations serious enough to put them out of service. Brake deficiencies are the most frequently recorded serious violations.

Twin trailer trucks require twice as much stopping distance as the cars with which they share the highways.

American highways are deteriorating 50 percent faster than they are being repaired, according to the General Accounting Office.

Tests conducted by the American Association of State Highway Officials demonstrated that an increase in truck weights from 73,280 pounds to 80,000 pounds will decrease remaining pavement life between 25 and 40 percent.

Increasing truck weights to 90,000 pounds could decrease remaining pavement life by up to 60 percent.

The vast majority of the highways and bridges in the nation were built when trucks did not exceed 60,000 pounds. Sixty-four percent of the bridges on the primary highway system cannot handle 73,280 pound trucks without reducing their serviceable life.

The bulk of the $104 billion Interstate Highway System was designed for trucks weighing 73,280 pounds.

The Federal Highway Administration estimated in 1978 that only 15 percent of the Interstate System bridges, nine percent of the primary system bridges, and four percent of the secondary system bridges, could safely handle 80,000 pound trucks without reducing serviceable life.

The National Transportation Policy Study Commission reported in 1979 that the highway system would require an expenditure of $900 billion by the year 2000.

A five axle truck loaded to 73,280 pounds does as much road damage as approximately 6,000 cars. An 80,000 pound truck does as much damage as 9,600 cars.

The Arkansas Highway Department points out that a 73,280 pound truck causes as much road damage as 6,075 cars. The truck pays $3,517 in taxes and fees while the cars collectively pay $4,078,640.

In Indiana heavy trucks pay 19 percent of the federal user fees, but are responsible for 30 percent of the traffic on Indiana roads.

A 1978 Georgia cost allocation study showed that only cars and light trucks are paying taxes and fees equal to or greater than the highway costs they occasion.

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., November 3, 1981.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR CHUCK: This is in response to your recent letter in which you expressed your concern that truck size and weight legislation be developed in concert with user charge legislation. I am pleased to hear that we both share the same belief that these two subjects be dealt with in concert. The Department plans to develop a coordinated position on both issues following completion of the Highway Cost Allocation Study early next year.

With respect to the weight provision in S. 1024, as reported by Senate Environment and Public Works Committee, the Department's position remains unchanged. We would prefer to address the question of vehicle weight after completion and consideration of the Cost Allocation Study by the appropriate Congressional committees.

Thank you for sharing your concerns with me. I look forward to working with you and other members of Congress as deliberations on this issue continue.

Sincerely,

DREW.

STATE OF ILLINOIS,
OFFICE OF THE GOVERNOR.
Springfield, Ill., October 30, 1981.

Hon. CHARLES H. PERCY,
U.S. Senator,
Dirksen Senate Office Building,
Washington, D.C.

DEAR CHUCK: I want to thank you and lend my support for your proposed amendment to the Senate highway bill (S. 1024) regarding truck weights. We in Illinois are extremely concerned about this bill's provision for a federal 80,000 pound gross weight mandate. I am very pleased with your proposal to delay the effective date of this provision.

As you know, Illinois is experiencing a very serious highway deterioration problem. Our sources of funding have been unable to keep pace with our growing needs. A federal gross weight mandate would only exacerbate this situation. We estimate that the weight increase could cost us at least $35 million more per year in road damages. We are also concerned about the possible traffic safety risks and the effects on other transportation users and providers.

I feel that the imposition of the heavy truck mandate is entirely inappropriate. This is an issue which should be decided at the state level. We welcome your amendment which would postpone the effective date of the weight increase to January 1, 1984. This time extension will allow the results of the Federal Highway Administration's cost allocation study of highway users to be included in any consideration of a uniform weight standard. It will also provide a period of adjustment for those states with lower weight limits so that the relationships between truck weights and highway maintenance costs can be re-evaluated.

We in Illinois strongly support your efforts to delay the gross weight mandate. I hope that your colleagues will favor this amendment, guided by your leadership.

Sincerely,

JAMES R. THOMPSON.

AAA-CHICAGO MOTOR CLUB,
October 29, 1981.

Re: S. 1024 and S. 1402.

Hon. CHARLES H. PERCY,
U.S. Senate,
Senate Office Building,
Washington, D.C.

DEAR SENATOR PERCY: We understand that the Senate Committee on Environment and Public Works has reported out S. 1024, the "Federal-Aid Highway Improvement Act of 1981", which would force every state to allow trucks with 20,000 pound single axle loads, 34,000 pound tandem axle loads, and 80,000 pound gross weights. (Sec. 135)

These limits necessarily would apply not only to highways in the Interstate system, but also to a large number of connecting and access highways.

As you know, the States of Illinois and Arkansas continue to retain the traditional limits of 18,000 pounds per axle, 32,000 pounds for tandems and 73,280 pounds overall gross weight.

We ask your assistance in opposing the mandate in S. 1024 for the higher limits, for these reasons:

(1) We believe the individual state governments are best able to determine the appropriate size and weight limits for the highways in their jurisdictions and should retain the prerogative to do so.

(2) Heavier trucks as would be authorized under S. 1024 will shorten the useful life of existing pavements by an estimated 17 percent. Few pavements were built to carry those weights.

(3) Engineers for the Illinois Department of Transportation conclude that the higher truck weight limits, if adopted in Illinois, would increase highway costs by $35 million annually. No provision has been made for funding this additional expense.

(4) Heavier trucks and smaller, lighter passenger cars would create a traffic mix resulting in substantially increased deaths and injuries.

(5) Public opinion against heavier trucks.

In the September/October, 1981 issue of our magazine Home & Away, we invited readers to give their opinions on various issues, including the question:

"Do you believe Illinois should permit 80,000 pound truck weights on its highways?"

Responses were 21.6 percent Yes, 78.4 percent No. Interestingly, testimony at a recent hearing held by the Illinois Motor Vehicle Laws Commission indicated that opinions of truckers themselves are divided on this subject, with many independent truckers against any change in present Illinois law.

For similar engineering and safety considerations, we also urge you to vote against the provisions of S. 1402. The Uniform Motor Vehicle Standards Act of 1981, which would force states to allow longer and wider trucks than the laws of Illinois and many other States now permit. In the matter of mandating 65 foot "double-bottom" truck-trailer combinations, recently developed

statistics indicate greater accident involvement with such combinations.

For your information we are enclosing copies of two booklets which state the case against larger and heavier trucks in more detail.

Sincerely yours,

NELS L. PIERSON,
President and Chairman of the Board.

AMERICAN AUTOMOBILE ASSOC.,
Falls Church, Va., October 28, 1981.

Senator CHARLES H. PERCY,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR PERCY: One of the provisions in S. 1024, "Federal Aid Highway Improvements Act of 1981," mandates that states permit single axle weights of 20,000 lbs., tandem axle weights of 34,000 lbs., and gross weights of 80,000 lbs. This provision thus establishes a minimum weight standard with which all states must comply.

The American Automobile Association believes that this provision of S. 1024 is ill-advised and premature. As you know, Congress has mandated a truck size and weight report under section 161 of the Surface Transportation Assistance Act of 1978 and the Highway Cost Allocation Study under section 506 of the same act. The former has just recently been reported to Congress but tha latter is not due to be reported until mid-January 1982. In addition, the U.S. Treasury is committed to make a report and recommendation on user tax exercises by section 507 of the aforementioned law and its report is due in April 1982.

All of these studies are interrelated and the AAA believes that Congress should have an opportunity to review the findings of these studies and the cost implications of the recommendations therein prior to making any policy decision on changes in applicable truck sizes and weight standards.

Since Illinois is one of the two remaining states to hold the pre-1974 weight standards, I hope that you will use your good offices to either remove this section from the pending highway legislation or delay its implementation until after Congress has had an opportunity to review these studies and hold public hearings on their findings and recommendations.

Sincerely,

CHARLES N. BRADY,
Director, Highway Department.

NATIONAL TAXPAYERS UNION,
Washington, D.C., October 29, 1981.

Hon. CHARLES H. PERCY,
U.S. Senate, Dirksen Senate Office Bldg., Washington, D.C.

DEAR SENATOR PERCY: We understand that you will be offering an amendment to the Federal-Aid Highway Improvement Act of 1981 (S. 1024) that will impact upon the whole area of user charge legislation.

As you know, in the past NTU has supported the concept of equitable user charges for all modes of transportation. We believe that the recipients of government provided services should pay their fair share. This should be applied evenly across the Board without regard to parochial or special interests. Any special interest group that benefits from a government subsidy, be it industry or private citizen, should not expect taxpayers to pay a share of the costs for which they receive no tangible or intangible benefits.

Since the Cost Allocation Study will not be completed until early next year, we support your amendment to delay legislation until this study is completed. At the time, we hope that the Department of Transportation and the Senate Environment and Public Works Committee will develop a comprehensive and fair system of user charges for all transportation modes.

Sincerely,

GEORGE SNYDER,
President.

ENVIRONMENTAL POLICY CENTER,
Washington, D.C., October 28, 1981.

Senator CHARLES PERCY,
Dirksen Office Building,
Washington, D.C.

DEAR SENATOR PERCY: On September 30th, the Environment and Public Works Committee completed mark-up of S. 1024. The Environmental Policy Center would like to express its opposition to Section 134 of the bill, which would require all states to permit 80,000 lb. trucks on their federal-aid highways. Presently, the 80,000 lbs. is an upper limit to which states have the option of raising their state limits. Several states, including Illinois, have maintained a limit of 73,280 lbs., which was the federal maximum limit until 1975. Such states should not have higher limits imposed upon them, against the express will of their legislatures and citizens.

Studies have shown that there is a relationship between axle weight and road damage: road damage increases exponentially with axle weight. Further, results of many state highway cost allocation studies (Florida, Georgia, Oregon) indicate that trucks are significantly underpaying in taxes compared to their cost responsibility. The heaviest trucks are only paying about 50 percent of their cost responsibility, according to these studies (see attachment). Concern with equity and effciency of the total transportation system call for a restructuring of the current highway user fee tax structure. This is particularly critical at the present time when highway revenues are not keeping pace with the needs for maintenance and repair.

Out of concern for these issues, Congress requested in the Surface Transportation Act of 1978, that the Department of Transportation undertake a Federal Highway Cost Allocation Study. The final report to Congress is due in January 1982.

While the Environmental Policy Center opposes any increase in truck weights, we would, at least, recommend that the Senate postpone any action on truck weight increases until it has received the final Highway Cost Allocation study and had ample time to analyze its findings. Furthermore, the Environmental Policy Center would oppose any amendments to S. 1024 on the Senate floor which would increase truck widths and lengths.

We thank you for your consideration of these concerns.

Sincerely,

HARRIETT HOLTZMAN-PARCELLS,
Washington Representative.

ASSOCIATION OF AMERICAN RAILROADS,
Washington, D.C., November 2, 1981.

Hon. CHARLES H. PERCY,
Chairman, Senate Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR SENATOR PERCY: Your decision to offer an amendment to the Federal-Aid Highway Authorization Act of 1981 with respect to the 80,000 pound weight limit to postpone implementation of that provision of the Act until January 1, 1984, is welcomed by and has the strong support of the Association of American Railroads.

As you are aware, the Federal Highway Cost Allocation Study, mandated by Congress under Section 506, Public Law 95-599, the Surface Transportation Assistance Act of 1978, will be published by the U.S. Department of Transportation in the early part of 1982. The Study's results will have a significant bearing on future transportation policy in the United States. In particular, the study will make recommendations concerning the appropriate level and form of heavy truck user charges. The AAR opposes any increases in truck weight and size limits without full cost recovery user charges. Your attempt to postpone pre-emption of state weight limits is, therefore, well advised, and the Association offers your our good offices in this endeavor.

Sincerely,

WILLIAM H. DEMPSEY.

ILLINOIS CENTRAL GULF,
Chicago, Ill., October 28, 1981.

Hon. CHARLES H. PERCY,
U.S. Senate, Washington, D.C.

DEAR SENATOR PERCY: I am writing to express the Illinois Central Gulf's appreciation of your efforts to amend S. 1024, The Highway Authorization Act of 1981, to postpone Illinois' truck weight limit increase until January 1, 1984.

Without your amendment, the legislation would deprive Illinois of the right to determine the maximum weight of trucks operating over its highways and just as unfortunate, provide no new revenue to enable Illinois to meet the increased costs of greater highway deterioration.

We appreciate your interest and advocacy.

Sincerely,

WILLIAM J. TAYLOR.

Mr. DIXON. Mr. President, S. 1024, the Federal-Aid Highway Improvement Act of 1981, as reported from the Committee on Environment and Public Works, raises the gross vehicle weight limit for trucks using the Interstate System from 73,280 pounds to 80,000 pounds. This provision has the effect of requiring Illinois and Arkansas to permit trucks with a gross vehicle weight of 80,000 pounds on their Interstates, and to permit axle weight increases of 2,000 pounds to 20,000 pounds for single axles and 34,000 pounds for tandem axles. It would also moot the efforts of those in Missouri who would like to rescind that State's recent truck increase.

I understand the concerns that motivated the committee to include this provision in the bill. I agree, in principle, that a uniform weight standard is important. However, I question whether it is appropriate to force States to raise their weight limits at a time when we are severely cutting Federal aid to State highway programs.

Further, it should be noted that, while Federal aid to highways is significant, it is the States and local governments that provide most highway funding, particularly in the area of maintenence. As I am sure all my colleagues will recognize, truck weight limits can have a significant impact on maintenance costs.

The State of Illinois, for example, estimates that the increase in truck weights could cost it more than $125 million in additional maintenance costs over the next 4 years. The Illinois State Department of Transportation believes that road life could be decreased by as much as 17 percent if truck weight limits are increased. Highways designed to last 20 years under present weight limits would only last approximately 16 years under an 80,000 pound limit.

Illinois highways, like highways around the Nation, are currently wearing out more than twice as fast as they are being maintained.

Illinois has over 7,500 miles of rough, narrow highways, and that amount is growing at a rate of about 5,000 miles per year. Illinois has more than 2,000 deficient, inadequate bridges, with more than 800 bridges joining the list each year.

In fact, only about 45 percent of Illinois' highway needs over the next 5 years

can be satisfied with existing revenue sources, and this assumes the continuation of Federal highway programs at recent year levels, an unlikely prospect, as the committee bill demonstrates. This estimate also does not take into account the added burden of increased truck weights. However, the result of an 80,000 pound limit is easy to predict—it makes an already bad situation worse.

These problems are not unique to Illinois. As the January 1981, report of the Secretary of Transportation, entitled "The Status of the Nation's Highways; Conditions and Performance," points out, roads and bridges are wearing out around the Nation, to the point where the ability of our highway system to continue to meet transportation needs could soon be threatened.

Mr. President, the burden imposed by heavy trucks is a significant cause of highway deterioration. I do not believe that the Federal Government should impose a higher weight limit on any State without first considering the other issues involved.

One of the principal other issues involved is the added revenue needed to handle heavier trucks and the question of the source of that additional revenue.

Congress considered this issue in 1978. As part of 1978 highway legislation, Congress directed the Department of Transportation to conduct a 4-year study of the costs of the highway system and the share of the costs assumed by each class of highway user.

The results of that study will be presented to Congress on January 15, 1982—little more than 2 months from now. This study should provide new information on whether heavy trucks are paying their share of the costs they impose on the system, or whether, as many maintain, they are imposing costs in excess of the user charges they pay.

I do not believe that Congress should act to impose higher weight limits on any State until it has an opportunity to analyze the results of that study. Further, I believe States need an opportunity to review the results of the study in order to determine whether they need to adjust the charges that heavier trucks would have to pay.

I am pleased to see, therefore, that the committee has agreed to delete the mandatory 80,000 pound limit from the bill. I appreciate the consideration the managers of the bill have given to the problems facing Illinois, Arkansas, and Missouri.

Deleting the provision will give both Congress and the States the time they need to consider the weight issue as it relates to highway revenue needs, and to a number of issues I have not raised today, such as the impact of heavier trucks on highway safety.

Deleting the provision provides the committee, the States, and all interested parties the time they need to begin to work together to try to achieve a consensus on how to draw a balance between the many competing claims raised by a weight limit increase.

Again, I am grateful for the cooperation of the managers of the bill, the distinguished Senators from Idaho (Mr. SYMMS) and Texas (Mr. BENTSEN).

AMENDMENT REGARDING INTERSTATE TRANSFER PROGRAM

Mr. PERCY. Mr. President, the interstate transfer program was created to permit States to withdraw unbuilt segments of the Interstate Highway System and use the funds freed by this move for substitute highway and transit projects. The Federal Aid Highway Improvement Act, as reported by the Senate Environment and Public Works Committee, eliminates the inflation adjustment and caps the amount which may be authorized for the program. I am pleased to join my colleague from Illinois, Senator DIXON, in offering an amendment to remove these provisions in the bill.

The removal of the crosstown expressway in northeastern Illinois from the Interstate System has freed approximately $450 million for substitute projects in the six county Chicago area. Illinois' unfunded transfer balance, however, now stands at more than $2 billion, representing 40 percent of the nationwide total unfunded transfer balance. Illinois withdrew its interstate highway projects under a signed agreement with the Federal Government and expects to receive full funding.

Had the States and local governments chosen to build their interstate segments, they would have received a regular allocation under the highway trust fund. And, these States would have received an amount adjusted for inflated construction costs. It is simply unfair, now that an agreement is signed and sealed, to go back and deny these States full funding.

I am pleased that, along with my colleague from Illinois, we were able to reach agreement with the distinguished floor managers on this matter. I know they will agree that it is only right for the Federal Government to live up to its part of the agreement and I thank those Senators involved.

Mr. DIXON. Mr. President, S. 1024, the Federal-Aid Highway Act of 1981, makes a number of changes that are troubling to me. With our highways wearing out more than twice as fast as they are being maintained, I am concerned about the wisdom of further cutting the already reduced Federal commitment to a sound, efficient surface transportation system that will meet our economic needs. I am particularly concerned about the changes the bill seeks to make in the Interstate highway transfer program.

Under the committee bill, the inflation adjustment feature of the program would be eliminated. This change will have a potentially devastating impact on the interstate transfer programs now underway in 17 States, including Illinois.

I had intended to offer an amendment to delete the committee provision, along with my senior colleague from Illinois and the distinguished Senator from Maryland (Mr. SARBANES.) I am pleased to see the managers offer a committee amendment that accomplishes that purpose. I appreciate the cooperation and understanding that the Senators from Idaho (Mr. SYMMS) and Texas (Mr. BENTSEN) have shown. By restoring current law, we now have time to address the issues that have arisen under the interstate transfer program in a comprehensive way.

The interstate transfer program was created to help resolve longstanding conflicts involving controversial interstate segments in urban areas. In Illinois, for example, the State of Illinois and the city of Chicago agreed, in two stages, to withdraw the crosstown expressway from the Interstate System and to build substitute highway and transit projects in the Chicago metropolitan area in its place. This agreement ended a longstanding controversy regarding the crosstown, and has formed the basis for the entire State and local transportation program in northeastern Illinois.

Under that program, and under signed agreements between the State and local governments, on the one hand, and the Federal Government, on the other, interstate segments in 16 other States were also withdrawn. Construction of substitute projects is underway in Boston, Philadelphia, the District of Columbia area, Hartford, Conn., Portland, Tucson, Salem, Oreg., Denver, Albany, Minneapolis, the New York City metropolitan area, Cleveland, Pittsburgh, Omaha, Sacramento, San Francisco, Memphis, Duluth, as well as in the Chicago area.

Under the interstate highway program, had these States and local governments chosen to build their interstate segments, they would have received regular allocations of Federal highway funds from the highway trust fund to cover construction costs. They would have received sufficient funds to complete the segments, even if the construction costs inflated rapidly during the long period of time it takes to build these roads.

Now I understand that the committee has reduced the latest cost to complete estimate, the mechanism used to make this inflation adjustment. The committee decided to reduce the estimate by limiting the features of the interstate that would be eligible for Federal reimbursement. The committee excluded from eligibility for interstate funding many items, such as landscaping and high-occupancy vehicle lanes, which, in the past, have been eligible for funding. However, the committee did not apply these changes to projects which were in the advanced construction stage. For these projects, the existing estimate was retained. They will continue to receive full adjustments for inflation in construction costs during the period it will take to complete them.

Mr. President, I think that it is important that full inflation adjustment also be continued for substitute projects under the interstate transfer program. The Federal Government made a commitment to the States and local governments involved. The Federal Government—by written agreement—approved the withdrawal requests. The Federal Government—by written agreement—approved the substitute projects. If the provision in the committee bill is enacted, the Federal Government will have effectively repudiated these commitments. It will, in effect, be telling States and local governments around this country that the Federal Government will not fund projects that it committed—by written agreement—to fund.

The result will surely be that highway and transit projects around the country that are now underway because of this program will face a halt in construction. How can any State or local government continue to work on a highway or transit project under this program if it can no longer be sure that the funds will be available to complete them.

I think that it is important to note that I am not arguing to keep the inflation adjustment to cover up mismanagement in building these projects. The unfortunate fact is that construction costs for highway projects, for transit projects, for all construction projects, have increased rapidly in recent years. This type of inflation is not unique to the civil construction area.

I am sure that I do not have to remind my colleagues of the inflation that seems to plague many of our military procurement programs.

What I am suggesting is that we continue to do in the interstate transfer areas what already we do in the military area—make a judgment on whether we should proceed with a project, and, if so, to pay the cost, including the costs due to inflation. I believe that is what we committed to do under the interstate transfer program. In reliance on this commitment, States and local governments have spent substantial amounts of their own funds. Many of the projects involved are well underway. They are often large, and they are all important. They simply cannot be completed if the Federal Government abandons its promise.

Mr. President, I think we should reflect on whether it is wise to try to change the terms of this written agreement after both parties have signed and after the States and local governments involved have acted in reliance on those agreements. I think many of the State and local governments involved would not have agreed to withdraw their interstate segments if they had known at the time that the Federal Government would renege on its commitment.

I understand the pressures to reduce Federal spending, and to reduce the claims on inadequate Federal revenues. I believe, however, that the Federal Government should live up to the commitments it made under this program.

These substitute transit and highway projects can contribute importantly to economic growth in the areas where they are located. A sound, efficient transportation system is one of the building blocks of economic growth. We should not let transportation systems, and other vital parts of our Nation's infrastructure, deteriorate in order to meet short-term budget objectives, as important as these objectives may be. Delaying, or worse, not building these projects will result in much greater costs for the Federal budget and the Nation's economy in the long run. We can save more money overall by continuing to proceed with these projects and by not erecting additional obstacles to their completion.

Finally I do not believe that it is either necessary or desirable to address the question of the inflation adjustment now. Under the interstate transfer program, all substitute projects have to be approved by the Secretary of Transportation by September 30, 1983. The provision in the committee bill does not take effect until that date. I believe we should take the intervening time to examine how we can keep the Federal commitment while addressing the budget issues involved. Doing so will have no impact on program spending now. Current authorization and appropriations will not be affected by delaying a decision on this issue.

Again, I thank my colleagues on the Environment and Public Works Committee for their help on an issue that is of great importance to my State and to the other States involved with the interstate transfer program. I look forward to working with them, and with the members of the other interested committees, including the Banking Committee on which I serve, in a cooperative effort to address this issue and a number of other issues affecting the future of the interstate transfer program that I have not addressed here.

Adoption of the inflation adjustment provision in the committee amendment will permit that process to occur in an unbiased atmosphere.

Mr. CHILES. Mr. President, I rise to compliment Senator SYMMS, the chairman of the Transportation Subcommittee on Environment and Public Works, and the ranking Democrat, Senator BENTSEN, for their hard work in bringing this bill to the floor today. It is indeed difficult to craft a bill such as a highway authorization bill when the funding needs are so great and our resources are becoming so limited. It is also difficult to reduce the items eligible for interstate completion thereby taking away from the States items they had been expecting. I, however, recognize the need to do this even though this will have a great impact on my State of Florida which has approximately 20 percent of the incompleted interstate miles.

We all recognize that we are now in a decade of fiscal restraint. I believe regardless of what party would be in the White House or what party would be in control of the Senate the underlying expenditure trends require retrenchment. While I do not object to the constraints that are reflected in the highway bill before us today, I am concerned about several matters of equity.

When our interstate dollars are shrinking now is the time more than ever before to insure that those dollars go where they are needed to complete the Interstate System. I feel this matter of equity applies also to the other highway programs. Clearly our ever diminishing highway dollars should go where they are most needed to reconstruct deteriorated highways and bridges.

Instead of sending the dollars where they are most needed, the bill before us today includes several provisions to send the funds disproportionately to several small States and toward areas of relatively small population.

Mr. President, as the Members know, small, rural States, and States with relatively smaller populations are heavily represented on the Senate Committee on Environment and Public Works. It is curious to note that the States represented on the committee have received an average 2.1 times the money back from the highway trust fund that they have contributed to it. My State, for example, has only received 81 percent of the money back from the trust fund that it has contributed to it since the creation of the fund in 1956. Florida has contributed almost $1 billion more to the trust fund than it has received back.

Mr. President, there are three provisions in this bill before the Members today that I would like to highlight. These provisions benefit relatively few States at the expense of many States. I also believe they are all inconsistent with the principle I stated earlier of trying to direct our scarce dollars to the areas of greatest need.

Mr. President, first, section 104 of the bill provides that each State shall receive one-half of 1 percent of the interstate moneys prior to allocation of the remaining balances based on the relative need of the States for these dollars to complete the Interstate System. This provides interstate construction funding to three States that have already completed their interstate construction and one State for which there are no interstate miles at all. In total, Mr. President, this provision benefits 14 States; conversely it has a negative impact on 36 States. The administration has recommended elimination of this provision, and the bill passed by the House eliminates this provision. Mr. President, half of the States that are benefited by this provision are represented on the Senate Committee on Environment and Public Works.

Mr. President, second, section 105 of the bill provides a formula for the distribution of interstate reconstruction moneys based 60 percent on lane miles and 40 percent on vehicle miles. The House bill and the one recommended by the administration provides for a formula that would be based 50 percent on lane miles and 50 percent on vehicle miles. These funds are used to reconstruct segments of our Interstate System that are wearing out due to heavy use. It seems to me to be both fair and logical to use the formula recommended by the House and the one recommended by the administration as it gives greater consideration to traffic levels. After all, the amount of traffic is the most significant determinate of the amount of deterioration that has occurred. A 50/50 formula also would benefit 30 States with no impact on 7 States. The 60/40 formula recommended by the Senate Committee on Environment and Public Works benefits only 13 States.

Mr. President, the third provision I want to call to the Members' attention is section 108 which is the interstate 4–R hold-harmless provision. This provision would assure all States would receive an apportionment of interstate and 4–R funds which would not be less than the amount they would receive under current law. Only a few States would benefit from this provision and 31 States would lose. For example, my State of Florida would lose over $5.5 million in

fiscal year 1983 interstate 4–R funding. This seems to me to be another item in the Senate bill that benefits relatively few States. It is also harmful in view of the fact that we have inadequate amounts of money to repair and reconstruct the many deficient miles of interstate. Instead of directing the money to those areas of greatest need, the provision chooses to benefit a few States at the expense of the many.

Mr. President, I have taken the time to make these comments in the hope that our colleagues in the Senate will be aware of these problems all of which can be addressed in conference with the House. I am sure that our Senate conferees out of a sense of fairness and equity will accommodate these several concerns when they meet with the House.

Mr. BAKER. Mr. President, I rise in support of the committee amendment to the Federal-Aid Highway Improvement Act of 1981. This amendment would exempt the cost of the Chickamauga Dam Bridge from the State of Tennessee's highway obligational limitation for fiscal year 1982.

The Chickamauga Dam was built over the Tennessee River near Chattanooga in 1953. It is part of the Tennessee Valley Authority's reservoir system which helps regulate flood control, navigation, and power production. A two-lane bidge was originally built over the dam, but due to continued high usage of the bridge, plans to widen the bridge began in 1973. During 1980, average daily traffic over the bridge was 37,940 vehicles, causing a severe bottleneck of traffic into Chattanooga.

Usually, when average daily traffic over a bridge reaches 5,000 vehicles, it is considered for widening to four lanes. In order to close the Chickamauga Dam bridge and begin widening it, a detour bridge had to be built and was just completed in May of this year. Last week, the State of Tennessee completed the access road to the detour bridge; now all traffic can be diverted to the detour bridge and the Chickamauga Dam bridge can be closed for widening.

Tennessee is one of three States affected by the bridge on Federal dams program. In the past, the obligational limitation had no impact on these projects because the States were not able to spend all the funds within their limitation. Now, however, due to budget cuts and the impact of inflation, States now come within reach of their obligational limitations. When the Chickamauga Dam bridge project was begun in 1973, the possibility of the State reaching its obligational limitation was not considered. Now that the project has come to fruition, the State will be crippled by the additional cost of this project in its fiscal year 1982 funds.

With this amendment, the State of Tennessee will now be able to complete this important project as well as continue with its highway program. I thank the committee for its understanding and consideration of Tennessee's situation.

I am also aware that the committee has asked that priority consideration be given to allocating discretionary bridge rehabilitation and replacement funds to the Walnut Street Bridge in Chattanooga, Tenn. This is a vital project for the development of downtown Chattanooga, and I again thank the committee for its assistance with this project.

Mr. MURKOWSKI. Mr. President, I rise in support of S. 1024, the Federal aid to highways authorization legislation. The bill is the result of careful consideration by the Environment and Public Works Committee. My colleague from Idaho, Senator SYMMS, the chairman of the Transportation Subcommittee, has worked with determination to complete this worthwhile bill. Senator STAFFORD, the chairman of the full committee, has shown leadership in shepherding this bill through the full committee.

As a member of the committee I proposed an amendment to include the State of Alaska in the Interstate System. This amendment is now part of the bill. After 12 years of negotiations between State and the Federal Government, with this bill Alaska will finally be included in the Nation's Interstate System. For years, Alaska has been the only State excluded from the system. Under this legislation we will receive equal consideration with other States.

Alaska has been treated in special categories in previous highway authorizations. With S. 1024, my State can participate in the Interstate System without affecting the total mileage or the cost of completion. This bill directs the Secretary of Transportation to designate Alaska's portions of the interstate as completed. The Department will work with the State of Alaska to determine which roads will be incorporated into the system.

The designation of Alaska's highways as interstates is consistent with the purposes of the Interstate System. The Environment and Public Works Committee has advocated the designation. Secretary Lewis and the Department of Transportation have committed to work with the State of Alaska on this matter vital to my State.

I again thank the Senators from Idaho and Vermont for their aid and assistance on this matter. I urge my colleagues in the Senate to support the passage of S. 1024.

Mr. NUNN. Mr. President, I would like to commend Senator STAFFORD and Senator SYMMS and their counterparts on the minority side, especially my distinguished colleague Senator RANDOLPH, for their efforts in getting this highway authorization bill to the floor of the Senate.

I am especially pleased to note that the bill as reported is a tremendous improvement over the bill introduced last April. Members of the Committee on Environment and Public Works have responded to the concerns about this legislation which Senator MATTINGLY and I expressed in testimony before the Transportation Subcommittee. As now reported the bill will permit the Atlanta freeway construction program and other Interstate construction projects in Georgia to proceed on schedule rather than being defined out of the interstate construction program. I would like to thank Senator SYMMS and his very able staff on the Transportation Subcommittee for the changes in S. 1024 which made this possible.

APPROVAL OF INTERSTATE COST ESTIMATE

There are several things about the bill which cause me some concern. First, I have the uneasy feeling that there are going to be major difficulties in getting this bill through conference within any reasonable period of time. In the meantime the States are faced with the distinct prospect of having to shut down the interstate construction program because the Senate and House have not approved the interstate cost estimate so that the Federal funds authorized in this bill can be apportioned. The State of Georgia has already obligated all of its apportioned interstate funds, and will obligate all of its advance construction interstate funds by December.

You are aware, as I am, that the construction industry in this country is in a deep recession. Highway construction, like other segments of the industry, has suffered severe damage because of high interest rates and lack of work. Failure to approve the ICE soon will further complicate their problems—and may force many out of business.

I would be interested to know how we plan to approach this problem in the event this bill does not go to conference promptly.

PRIORITY PRIMARY PROGRAM

The bill before us would eliminate the priority primary program. This is a very important program to the State of Georgia, and a number of other States with projects under construction. Corridor Z in Georgia between Brunswick and Columbus is being funded under this program. It is very important to the entire south Georgia area that this project be completed.

For these reasons, I would support an amendment to this bill to reauthorize the priority primary program within the regular primary program at the present authorization level. It probably would be wise considering the present budget constraints to include language which would freeze the program in place. That is, the program would terminate after the projects now in the program are completed.

IMPORTANCE OF HOV LANES

As I indicated previously, I am delighted that the committee was able to accommodate the Atlanta Freeway System in the redefinition of the Interstate to be completed. I would suggest that in our negotiations with the other body we keep in mind that high occupancy vehicle (HOV) lanes are an excellent buy in terms of moving people in urban areas such as Atlanta. If there are going to be restrictions on the number of lanes which can be constructed in our heavily urbanized areas, as proposed in this bill, it makes sense to authorize State and local officials to build HOV lanes if that is their preference. I would hope that language in the conference agreement would reflect this view.

REIMBURSEMENT FOR INTEREST ON BONDS ISSUED FOR INTERSTATE CONSTRUCTION

Section 115, Title 23, U.S. Code, authorizes reimbursement as an eligible cost

of construction, of the interest on bonds, issued by a State, county, city, or other political subdivision of a State for advance construction on the Interstate System for any project under construction on January 1, 1978, and converted to a regularly funded project after January 1, 1978. The House bill, H.R. 3210, would change these dates to January 1, 1982, to accommodate those States which have, in good faith, issued bonds to advance construction of their Interstate Systems thereby contributing to the achievement of an important national objective.

I hope the conferees will see fit to include language in the conference agreement covering Section 115 similar to the House bill.

CONCLUSION

Let me conclude my remarks by saying that Senator STAFFORD and Senator SYMMS and their staffs have done an excellent job in developing this bill and getting it to the Senate floor. Although some further accommodations appear to be in order to improve several provisions, I believe that there is nothing that cannot be worked out in conference to meet the needs of most of the States. Subject to these comments the bill has my full support.

PROVIDING ADDITIONAL FUNDING IN 1983 FOR A BYPASS HIGHWAY AROUND REDWOOD NATIONAL PARK

Mr. HAYAKAWA. Mr. President, a provision included in the committee amendment to S. 1024 provides $55 million in 1983 for the construction of a bypass highway around Redwood National Park. This amendment is necessary to assure the California State Department of Transportation that the Federal Government will fulfill its commitment to provide the full share of funding for completion of the project.

This highway project was an integral part of the legislation establishing Redwood National Park, as reflected in Public Law 95–599. Because the project has not been initiated, the cost estimates are no longer realistic. Concern has been expressed by State officials that, as a result, adequate funding will not be available to complete the project.

This provision makes it clear that funding will be available, and encourages the State of California to follow the intent of Congress by beginning construction on this project.

The provision is, I believe, acceptable to the managers of the bill.

CLARIFYING REIMBURSEMENT FOR REAL PROPERTY IN SANTA ROSA, CALIF.

Mr. President, a second provision of the committee amendment to S. 1024 clarifies the question of reimbursement for real property acquired by the city of Santa Rosa, Calif. This provision adds no additional spending to the bill, but merely allows the California Department of Transportation to use part of its allotment to reimburse the city.

Specifically, it provides the Secretary of Transportation with the necessary authority to waive technical compliance with Federal requirements in the acquisition of real property for the Russell Avenue overcrossing of U.S. 101, in Santa Rosa, Calif. All parties agree that the city of Santa Rosa acted in good faith in acquiring the property, and that the negotiated price was fair to both the landowner and the city. No one questions that the purchase should be reimbursed, but a procedural technicality casts doubt as to whether Santa Rosa can be reimbursed. This provision removes any doubt, to the satisfaction of all concerned.

The provision is identical to language in the House-passed bill, H.R. 3210, and has been cleared on both sides of the aisle.

Mr. GRASSLEY. Mr. President, recently, officials from the State of Iowa and the cities of Waterloo and Cedar Falls submitted an application to the Federal Highway Administration to withdraw a segment of I–380 in Black Hawk County from the Interstate System and to substitute a new highway plan that could more effectively meet the transportation needs of the area.

I feel that this new plan is by far better than that originally approved under the Interstate System and that it should be approved by FHWA. The problem that we face with this application is that it also replaces the source of funding. Instead of receiving funds from the Highway Trust Fund, these funds now come from yearly appropriations from general revenue funds.

I believe that if a new plan can more effectively handle traffic at the same or lower cost, we should encourage, not discourage, the innovative efforts of our State and city officials to develop better transportation plans. Removal of access to the Highway Trust Fund serves as a disincentive. I think that we should keep these highway segments funded by the Trust Fund and that the segments should continue to count toward the computation of Interstate apportionment factors. It is my hope that the Department of Transportation could study this approach and that the Subcommittee on Transportation hold hearings on this approach.

Mr. JEPSEN. Mr. President, I have been working on this matter with my colleague from Iowa and I concur with his remarks and hope that a DOT study and a subcommittee hearing can be conducted to study this approach.

Mr. SYMMS. Mr. President, my distinguished colleagues from Iowa (Mr. GRASSLEY and Mr. JEPSEN) have raised a very important issue that needs to be addressed. I want to assure the Senators that their concern will be addressed by the Committee on Environment and Public Works during hearings on the Federal-aid highway program next year, 1982. I thank the Senators for bringing this to my attention.

ST. JONES RIVER BRIDGE

Mr. ROTH. Mr. President, the St. Jones River Bridge is located on U.S. Route 113 in Delaware serving the only major highway between the Wilmington and Philadelphia metropolitan areas and the Delaware-Maryland beaches. The Delaware Department of Transportation had been planning to dualize this last remaining 2-lane section of U.S. 113 over several years but several emergency closures of the bridge during peak travel times this past summer have made it evident that replacement cannot be delayed much longer.

The national bridge inventory list of November 1980 reflected a sufficiency rating of 6.0 which indicates an extremely deteriorated condition, bordering on closure. The closure of the bridge prior to completion of the replacement span would have severe effects. U.S. 113 at this location is a defense highway, being just several miles from Dover Air Force Base. There are no suitable alternative or detour routes, only secondary rural routes involving some small town residential streets. Thus a forced closing would have serious defense implications as well as impacts on Delaware tourist and agricultural industries.

Finally the cost of replacement is estimated to be between $10.8 and $13.3 million depending upon the choice of design alternatives. Delaware's fiscal year 1981 apportionment of bridge replacement and rehabilitation funds was only $2.3 million. Thus the cost of replacing the St. Jones River bridge is greater than $10 million and greater than twice the State's annual bridge apportionment.

It would appear that this project is one that not only requires immediate attention but one which precisely meets the criteria which Congress intended to be used as a basis for the Secretary of Transportation's allocation of moneys from the discretionary highway bridge replacement and rehabilitation fund.

I would like to ask the chairman of the Subcommittee on Transportation if my understanding of the intended use of this fund is correct and if so is it appropriate to assume that the Secretary of Transportation should give priority consideration to allocating moneys from the discretionary highway bridge replacement and rehabilitation fund for the replacement of the St. Jones River bridge.

Mr. STAFFORD. Mr. President, the Senator is correct in his understanding of the Congress intent. This project would be eligible for funding under the discretionary bridge replacement and rehabilitation program.

Mr. TSONGAS. Mr. President, I am very concerned about the intent of the full committee in some areas of this proposed legislation.

For some time now we have been working to find ways to give priority on highways to buses, and other high-occupancy vehicles such as car pools, so that they can play a major role in our strategy for public transportation.

I am concerned that the intent of the Senate might be unclear in this bill.

Since the midsixties, section 142 of title 23 has provided that separate bus lanes can be financed through the Interstate and other Federal aid programs. I note with some concern that some so-called HOV, high-occupancy vehicle, lanes are now to be funded out of Interstate 4–R and that the Interstate 4–R program will be funded at a 75–25 level rather than the 90–10 level.

I am concerned that we are taking a step backward here that would tend to

discourage investment in programs to make our highways more efficient. I oppose any effort to fund these Interstate improvements at a lower funding ratio than other Interstate improvements.

If, however, the 4–R program is to be funded at 75–25, in place of 90–10, I think that it is important that we clarify now that it is not the intent of the Senate to downgrade or deemphasize the so-called transportation systems management strategies that seek to make better utilization of existing transportation facilities, including the construction of separate lanes, ramps, and intersections for buses and other high-occupancy vehicles.

Mr. STAFFORD. I want to thank the distinguished Senator from Massachusetts for bringing up this important issue.

I wish to state for the record that the Committee on Environment and Public Works places the highest possible priority on the implementation of measures to increase the capacity and efficiency of our existing highways by, for example. constructing separate high-occupancy vehicle lanes within existing rights-of-way.

I fully agree with the Senator from Massachusetts that these transportation systems management strategies, such as the construction of separate bus lanes, ramps, and priority mechanisms will be critical as an attempt to carry more and more people over existing roadway corridors.

There is nothing in this bill which implies any lessening of our support for transportation systems management approaches. To the contrary, S. 1024 contains several provisions which are intended to encourage States and localities to use TSM strategies. The Federal match is increased to 100 percent for bicycle and carpool/vanpool facilities and traffic signalization work done with interstate transfer funds. The definition of these types of projects eligible for Federal-aid funds is also broadened. In my home State of Vermont, the Church Street Mall project, with a very small amount of transportation funds, has improved efficiency for bus, pedestrians and cars alike and helped to revitalize the downtown Burlington area. I understand that the same thing has occurred in Boston's Downtown Crossing project, and in many other projects around the country. Let me assure my colleagues that it was the intent of the committee to encourage these types of transportation systems management projects, which seek to attain greater levels of efficiency from the existing transportation systems.

BRIDGE REPAIR PROGRAM

Mr. SASSER. Mr. President, I appreciate the cooperation of Senator SYMMS, chairman of the Environment and Public Works Subcommittee on Transportation, in agreeing to hold hearings before his subcommittee on the matter of the implementation of the national bridge inspection and highway bridge replacement and rehabilitation program. I look forward to these oversight hearings on a program that must cope with the over 200,000 deficient bridges in this Nation.

My concern for the implementation of this inspection and maintenance program was highlighted in March of 1980 when the Perkins Street Bridge in Memphis collapsed, killing one motorist. This bridge was considered to be in adequate condition at the time of the collapse, according to the relatively high sufficiency rating it received at a recent inspection. It was, therefore, the adequacy of the inspection work being done that most concerned me.

At that time in 1980, I requested that a report on the implementation of this report be prepared by the General Accounting Office. That report revealed that substantial attention to bridge inspections and the targeting of bridge repair and replacement funds was necessary. In the words of the report—

> The program is not as effective as it could be because of its broad criteria for funding eligibility . . . and (because) States and local governments are not fully complying with the national bridge inspection standards.

I believe that the hearings which Senator SYMMS will hold will uncover the problems that this report describes, and find out which problems have been solved, and which require further legislative attention.

I understand the importance of avoiding pervasive Federal involvement through extensive categorical grants. Indeed, I believe that one of the topics that deserves substantial consideration is the need for Federal agencies that own bridges to comply with the same inventory and inspection duties we now require of the States. This would be fair and responsible public policy.

One of the problems noted by the GAO report was that the information available on what bridges are most in need of repair is not adequate. According to the report, the implementation of the bridge inspection standards is not always performed in a timely manner, by qualified inspectors, or in a consistent manner. This is one topic that should be addressed in the upcoming oversight hearings.

Regarding the targeting of funds for bridge repair and replacement it was emphasized in the report that, at current funding the program cannot be effective if it is directed at all of the Nation's 200,000 bridges. Therefore, there is an argument to be made for strengthening the technical guidelines for targeting repair and replacement funds. Not only is the State grant program worth considering in this regard, so is the discretionary program administered by the Secretary of Transportation.

It was noted in the GAO report that a formal selection process for this particular program might be beneficial, and that this process might account for such issues as sufficiency ratings, costs, bridge capacity and use, and risk of collapse.

Another topic that deserves consideration in upcoming hearings is the need for greater State and local government authority to inspect, post, close, and repair bridges maintained by railroads, toll roads, and local governments. The GAO report noted that substantial controversy existed in this area. For instance, some States do not have the ability to close a local bridge that a State inspector has found to be dangerously deficient.

Committee staff have noted that the allocation formula contained in S. 1024 may need attention as well. The idea that funds allocated to the States be distributed according to the cost of repair of the square footage of bridge surface within a State was briefly considered and, I am told, requires further investigation.

For any program to allocate funds in a responsible manner, however, it is necessary that there be adequate and up-to-date information available. The GAO report recommended that the Department of Transportation use the latest available needs data, including inspection data from off-system bridges, in apportioning funds among the States. This appears to be an option worth consideration in the course of future hearings.

I would, therefore, like to state my agreement with the observation made by the Committee on Environment and Public Works in its report on S. 1024. The committee observed that many of the bridges we now use in this country were built 40 or 50 years ago and are in major need of replacement or repair. In light of the limited funding available for operation and maintenance in the field of transportation, I believe that it is important that we make the most of what funds are to be authorized. Although I am aware of the need for budgetary restraint in these times, I would have preferred that the committee had not cut the recommended authorization for bridge repair by 22 percent. I hope that in future hearings that the adequacy of $700 million for this program is a topic of thorough discussion.

The importance of this matter should be clear to all our colleagues. With this in mind, I will ask to have printed in the RECORD at the end of my remarks tables indicating the number of deficient on and off system bridges in each State.

In conclusion, I would like to thank Senator SYMMS and Senator STAFFORD for their consideration and enthusiasm in this important area. I would also like to thank my colleagues, Senators RANDOLPH, HART, ROBERT C. BYRD, STENNIS, COCHRAN, HEINZ, METZENBAUM, and SPECTER for cosponsoring my bill, S. 1649, which emerged out of the GAO report that I have referred to so often today. I would like to thank these Senators for their interest in this matter, and I would like to pledge to Senator SYMMS, chairman of the Transportation Subcommittee, my support and cooperation in the months ahead as his subcommittee considers the matters I have mentioned today.

May I ask the distinguished manager of the bill for his views on this important program?

Mr. SYMMS. Mr. President, the distinguished Senator from Tennessee (Mr. SASSER) has raised many important questions. The bridge replacement and rehabilitation program has been greatly expanded in the last few years and has aided the States in addressing their bridge problems. I believe the concerns he raises should be addressed by the Committee on Environment and Public Works as part of their review of this

program and I will be happy to work with the Senator on this issue through the hearing process.

Mr. BENTSEN. Mr. President, I, too, would like to commend the distinguished Senator from Tennessee (Mr. SASSER) for having shared with the Senate his concerns about the bridge replacement and rehabilitation program. The subject matter that he has raised is certainly deserving of a hearing and I additionally commend my distinguished colleague, the Senator from Idaho (Mr. SYMMS), for his willingness to address these issues in committee.

Mr. SASSER. I thank my distinguished colleagues from Idaho and Texas. Again, I must express my appreciation for the Senators' interest and cooperation in this matter. It is my hope that the hearings which are now being proposed will occur as soon as possible, perhaps before the end of January. I believe that our quick consideration of the implementation of the bridge repair program will serve to improve its ongoing operation as well as its long-term future. Again, I thank the distinguished chairman and the ranking member of the Subcommittee on Transportation.

Mr. President, I ask unanimous consent to have the tables I referred to printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

MARCH 1981: LIST OF DEFICIENT BRIDGES BY STATE ON FEDERAL-AID SYSTEM

	Number of bridges in inventory	Structurally deficient	Functionally obsolete	Number of deficient bridges
Alabama	7,008	671	830	1,501
Alaska	524	49	10	59
Arizona	4,187	51	92	143
Arkansas	5,438	312	772	1,084
California	13,665	555	1,434	1,989
Colorado	3,244	193	204	397

COMPLETION OF FRANCONIA NOTCH INTERSTATE GAP SECTION IN NEW HAMPSHIRE

Mr. RUDMAN. I would appreciate your clarifying a point for me. The highway authorization bill, S. 1024, as reported, excluded from eligibility for Federal funding certain types of projects on interstate gap sections including landscaping and pedestrian and bikeway facilities. The committee amendment you have offered alters the committee reported bill with respect to this. My question has to do with a particular project in New Hampshire: The extension of Interstate 93 through Franconia Notch. This Franconia Notch segment in New Hampshire is located in an environmentally sensitive area, and has had a long history of litigation and problems with securing environmental permits. Should the Federal Government change its policy with regard to this project and refuse to fund the walkways, bikeways, and landscaping provided for in the current design for the Franconia Notch Highway, the entire controversy will be reopened.

Am I correct in assuming that the bill S. 1024, as amended, will indeed continue to authorize the use of Federal funds for the completion of the Franconia Notch I–93 segment, as currently designed?

Mr. SYMMS. The Senator from New Hampshire is correct.

Mr. ARMSTRONG. Mr. President, I would like to make a couple of inquiries of the floor manager regarding the Glenwood Canyon segment of Interstate 70 in Colorado.

When Congress enacted the Federal

Aid Highway Act of 1976, it included a provision expressly granting variances from highway design standards for Glenwood Canyon. The intent of Congress at that time was that the scenic beauty of the canyon could be preserved best by allowing the construction of a highway somewhat narrower than is normally allowed for the Interstate System. In so doing, this canyon was legislatively granted the recognition that it deserved special consideration. I wonder if the chairman's recollection of that intent is the same as my own?

Mr. SYMMS. The Senator is correct in pointing out that Congress has recognized Glenwood Canyon as deserving of special consideration. That is why the committee report on the current bill contains the exemption for this project from section 102(b).

Mr. ARMSTRONG. Then I want to make sure that it is clearly understood that this exemption from the requirements of section 102(b) is the intent of the Congress in passing this act. Am I correct in asserting that if the Senate passes this bill, it will be saying that all environmental amenities required in the design of the Glenwood Canyon project will continue to be eligible for Interstate construction funds, and that Congress intends the segment to be constructed according to the current design report, and in compliance with the final environmental impact statement, and that it intends for funds to be available for this purpose, recognizing that funding of particular projects is a State and local decision?

Mr. SYMMS. The Senator is correct.

Mr. ARMSTRONG. I thank the chairman.

Mr. BAUCUS. Mr. President, I found myself reluctantly compelled to vote against the highway authorization bill during full committee markup. I say reluctantly because I believe a multiyear highway authorization is important. I further believe that S. 1024 provides some badly needed flexibility for State authorities administering Federal highway programs.

I remain concerned about the funding levels contained in the measure. I appreciate the fact that a compromise has been worked out to restore some of the funding. That is a step in the right direction.

I was also very concerned about the allocation formula for interstate 4R moneys. The formula in the bill is based 60 percent on lane miles and 40 percent on vehicle miles traveled. The old formula was 75 to 25. Obviously, this change adversely affects the rural States with considerable highway mileage. States with severe frost-thaw problems are especially hard hit.

I understand that there may be some interest on the House side in reducing this formula even further to 50 to 50. I would like to inquire of the chairman of the Environment and Public Works Committee and the chairman of its Subcommittee on Transportation whether they consider the 60 to 40 formula to be the absolute minimum acceptable when and if the authorization measure goes to conference.

Mr. STAFFORD. I appreciate the concern raised by the Senator. I am happy to indicate to the Senator that I consider the 60 to 40 formula to be the minimum acceptable. We have moved from 75 to 25. That should be sufficient adjustment for the urban areas.

Mr. SYMMS. I concur with the remarks of the Senator from Vermont. The 60 to 40 formula is a significant adjustment. I see no reason to alter it further. The only flexibility in my mind is in the upward direction.

Mr. BAUCUS. Mr. President, I appreciate very much these assurances. They are very helpful. I would like to inquire additionally concerning the one-half of 1-percent minimum allocated for 4R programs in S. 1024. I believe this provision is essential to insure that the rural States are able to maintain their contributions to the Nation's highway system. Is it the intention of the committee chairman and the subcommittee chairman to hold firm on the inclusion of this minimum allocation provision?

Mr. STAFFORD. Yes it is. The provision is included in the House bill and I believe it is essential to retain it.

Mr. SYMMS. I concur.

Mr. BAUCUS. I thank my distinguished colleagues for their assurances on these important points. I wish you good luck when we proceed to conference on the bill.

Mr. DURENBERGER. Mr. President, we have a unique situation in Minnesota. An interstate project in Minneapolis, I–394, has had additional design features added in order to provide necessary environmental mitigation. One of these features, fringe parking facilities, was not approved as part of the design in time to be included in the State's submittal for the 1981 interstate cost estimate.

Am I correct in stating that these parking facilities because of their role in the environmental mitigation plan would be deemed included in the 1981 interstate cost estimate?

Mr. SYMMS. The distinguished Senator from Minnesota (Mr. DURENBERGER) is correct.

Mr. DURENBERGER. Mr. President, a further inquiry with regard to the new completion definition in S. 1024, it is my understanding that in certain unique situations, on a case-by-case basis certain facilities such as fringe parking lots will continue to be eligible for interstate construction funds if these facilities are part of a required environmental mitigation plan. The parking facilities on I–394 which I have referred to are such facilities and I believe would continue to be eligible under this legislation. Would the distinguished chairman of the subcommittee please comment.

Mr. SYMMS. My distinguished colleague is correct in his interpretation of this legislation with regard to the specific facilities he has described.

The PRESIDING OFFICER. Are there further amendments? If there are no further amendments, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and to be read a third time.

The bill was read the third time.

Mr. STAFFORD. Mr. President, I ask unanimous consent to call up Calendar No. 286, H.R. 3210.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3210) to amend the Surface Transportation Assistant Act of 1978 to establish obligation limitations for fiscal year 1982, and for related purposes.

Mr. STAFFORD. Mr. President, I move to strike out all after the enacting clause and insert in lieu thereof the text of Calendar No. 295, S. 1024, as amended.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 3210) was read the third time, and passed, as follows:

(The text of the bill, H.R. 3210, will appear at the end of today's proceedings.)

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. RANDOLPH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STAFFORD. Mr. President, I move the postponement indefinitely of Calendar No. 295, S. 1024, and Calendar No. 142, S. 1208.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I wish to express my appreciation to the distinguished chairman of the Environment and Public Works Committee, Senator STAFFORD, and the equally distinguished ranking minority member, Senator RANDOLPH. for bringing this complex and sometimes highly controversial measure to the floor and dispatching it with great prominence. It is this sort of effort and legislative management that sheds credit on the ability of the Senate to perform difficult tasks in an orderly way.

I wish to announce there will be no further rollcall votes tonight.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 6:30 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

LANE KIRKLAND: MASTERFUL SPOKESMAN FOR WORKERS

Mr. MOYNIHAN. Mr. President, earlier today I had occasion to welcome nearly 1,000 delegates and observers to the 14th Constitutional Convention of the AFL–CIO as they opened their deliberations in New York City, the 100th anniversary convention of the labor movement.

What struck me most about the occasion, beyond a remarkably thoughtful and cogent opening address from the Federation's president, Lane Kirkland, was the profound sense of history which the delegates attach to their work.

What the labor movement reminds us all is that we have faced perilous times before; times that we have found the strength to endure and the policies to overcome. And that we will endure this recession is not something we should doubt.

Mr. President, Lane Kirkland has an extraordinary ability to put these questions in an historical perspective. It is not improper symbolism to say that the AFL–CIO is wise to have him at the helm—indeed, a former merchant marine captain knows full well what it means to steer a true course.

But Lane Kirkland has more than a vision of where we should be headed. He is a scholar. His insight comes from a sense of history as well as a vision of the future. And that is, I suppose, the mark of a gifted leader.

Mr. President, Lane Kirkland's address at the 14th Constitutional Convention of the AFL–CIO is a memorable statement. It should be studied by us here in the Senate. For it is not an insignificant commentary on the deliberations we, too, must face as Members of this body.

I ask unanimous consent that the text of President Kirkland's remarks be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

KEYNOTE ADDRESS OF PRESIDENT KIRKLAND

Reverend clergy, distinguished guests, members of the Executive Council, delegates, brothers and sisters:

Two Years ago, George Meany left us this charge: ". . . the labor movement cannot be content with defending the status quo, or reliving past glories. We must constantly look to the future, develop new leadership, adapt policies to changing conditions and new technologies, but—always, always—with unswerving loyalty to the mission of the trade union movements as the instrument for improving and enhancing the working and living conditions of those who work for wages."

Yesterday, November 15, 1981, we made the crossing into our second century as a confederated trade union movement. We are here, at the conclusion of our first hundred years, not just to honor the past, but to prepare ourselves to serve the future.

There is an old church anthem which instructs us as follows:

"New occasions teach new duties. Time makes ancient good uncouth."

That is not a call to pursue novelty for its own sake, nor to bend and trim to the shifting winds. It is a message, rather, of the need to acknowledge essential change and to respond to its requirements.

We are here in strength and vigor because those who went before us and built this great instrument of progress did indeed adapt its role and structure to the needs and demands of their times.

The makeup of this body bears little resemblance to the Horse Collar Workers, the Architectural Cornice Makers, the Box Sawyers and Nailers and the Umbrella and Walking Stick Makers who gathered into the Federation a hundred years ago. This body will bear as little resemblance to those who assemble under our banner a hundred years hence.

Throughout its history, labor has reflected all the trends and events—sometimes harmful, sometimes enriching—of its times, at home and abroad. Like our nation, we have been enriched by refugees from strife and tyranny in other lands. Like our nation, we have been compelled to grapple with the consequences of vast technological, social and economic changes that have taxed our wits and capacities.

At times we have lagged behind the past of the curve of change; at times we have surged ahead. Too often to recount, we have been written off and left for dead by the fashion-mongers of the day, only to see them come and go while we remained steadfast on the field of action. Through it all, we have never abdicated our role of leadership in the struggle for human freedom and human progress and we shall not do so now.

Conversely, we are often taken to task because we do not confine our role to the most narrow interests of the dues-paying members, but assume responsibility for the broadest range of human concerns.

Seafarers understand their duty, not only to their immediate shipmates, but to all castaways and drifting souls at sea.

Last summer, the SS President McKinley was steaming through a stormy night in the China Sea. She came upon a small boat in distress and rescued ten persons fleeing from tyranny on the mainland. When the captain was asked why he felt obliged to risk his ship to rescue these forlorn refugees, he responded:

"Shall we ship's masters just leave refugees or seamen or others to drift hopelessly at sea until their ultimate death because they have no passports or seaman's papers?"

Our answer, like his, must be "no".

We are honored to have as our guests most of the leaders of the trade union centers of the free world and we welcome them as comrades-in-arms. We share their problems and concerns. I pledge to them, in your name, our cooperation and commitment in our common universal struggle for the rights of working men and women, for bread and freedom, everywhere. To that end, with the support of this convention, we shall apply for re-affiliation, effective January 1, 1982, with the International Confederation of Free Trade Unions.

You have before you, the comprehensive Report of the Executive Council which details the work of the Federation since our last convention. It will tell you all that you might want to know about that work and probably more.

Without trying to retrace all of that ground, let me note some of the ways in which we have sought to address the challenge of the times in keeping with our historic mandate.

We have a permanent mandate to seek and preserve unity within the family of labor, and we rejoice in the re-affiliation of a great union, the United Automobile Workers. We warmly welcome its delegates here, as we welcomed its President, Brother Doug Fraser, to the Executive Council last August. We welcome, above all, the addition of our ranks of the force and vigor of the UAW's role and voice in the fight for social and economic justice.

This old church will remain wide open at all hours. Our mission will not be completed until all of labor's flock is brought within the fold, to work and move together in solidarity.

We have an enduring mandate to bring all working people the message of trade unionism and we have pursued that instruction. The officers and members of the Executive Council of this Federation are deeply committed to the proposition that there is no matter of more constant urgency than to organize the unorganized.

The past two years have witnessed important break-throughs against major strongholds of resistance by the Steelworkers, the Amalgamated Clothing and Textile Workers, the Food and Commercial Workers, the Teachers, AFSCME, CWA and other affiliates, in testimony to the quality of their leadership and dedication. We have initiated an ambitious campaign in the Southwest, with the Houston Cooperative Organizing Program, and we intend to see it through to a solid result.

The strides we have made have been masked in part by offsetting historical factors. A deep recession; the decay of the nation's industrial base, infrastructure and urban services; the export of jobs; and profound occupational, geographic and demographic shifts in the work force, have taken their toll.

In the face of these trends, the fact that the labor movement at large has more than held its own and continued to grow is a remarkable achievement. It is evidence, not of weakness, but of inherent strength and vigor. It is a tribute to the capacity of modern labor to respond, to adapt and to move with the times into new areas of service and growth.

I assure you now that the AFL–CIO stands ready to explore any method of approach and to offer any service that you, the affiliates, desire or will allow in pursuit of our common mandate to organize the unorganized.

We have an age-old mandate to educate and agitate and we have over these past months, sought to do it justice.

Democratic trade union education is a two-way street, and we ignore that at our peril. All channels of information-communication and participation must be open and active throughout and at both ends or they fail altogether.

We can survive adverse public opinion because—being so often the agents of controversy in the pursuit of our duty—we always have.

Samuel Gompers summed it up, in 1913, when he wrote:

"Until all elements exert proportional influence in determining public opinion, until all individuals that make up the public become genuinely and unselfishly desirous of continuously striving for justice to all mankind, public opinion will not become an infallible dispenser of justice."

But we cannot long survive the erosion of support for programs and policies on the part of the membership. Without cultivation and conservation, erosion must surely follow.

Last spring, through a series of regional conferences extending over several weeks, the officers and department heads of the Federation met with state and local trade union leaders for face-to-face discussions on any and all issues, no holds bared. We committed ourselves to bring the ideas and opinions that emerged from those two-way conversations to the attention of the Executive Council, and we have fulfilled that commitment.

Some of the steps we have since taken, as well as some that will be proposed to this convention, are the product of those meetings. We found them of such value that we shall repeat them next year and in the future. I strongly commend such a practice to every constituent organization.

From those sessions emerged the concept of Solidarity Day and the conviction that the spirit required for its success was there, waiting for an opportunity of expression.

On that day, there gathered in Washington the greatest protest demonstration in our history. Over 400,000 members of the main stream of the trade union movement and their allies spoke with one great voice against the course of their government and for the human values we represent.

My only regret is that many thousands more who wished to come had to be turned away because all available means of transport were exhausted. I am convinced that every member who assembled in Washing-

ton on Solidarity Day went home a better trade unionist more ready, willing and able to speak and work for the cause.

What can we fairly say now of those engaging, amiable and persuasive men of power in Washington, whose measures drew our forces there in protest?

The President, we are told, is the Great Communicator; but so were many other heads of state in history whose policies left suffering and distress in their wake. Herbert Hoover was known as the Great Engineer, but wreckage was his legacy.

Communication is scarcely enough, particularly for a President of the United States. Though he "speaks with the tongues of men and of angels, and has not charity", he is "but a sounding brass of a tinkling cymbal".

He has shown a cold heart and a hard fist, but, where, indeed, is the rest of him?

It is one thing to use the full force of government to break a small union of hard-pressed public employees. That, I suppose, does express the harshest construction of the law and is, perhaps, popular. But is it then just and fitting to go out upon the field and shoot its wounded?

As for his brilliant and tireless team, drawn from the service of avarice, they promised us a boom and brought us a bust.

They have drained the public purse of lavish welfare on the greedy rich, in the name of "incentive".

They have stripped the poor and jobless of welfare, food stamps and unemployment insurance, also in the name of "incentive".

That is known as the carrot-and-stick policy: for the rich, the carrot; for the poor, the stick.

What is the net result so far of their genius and masterful command of the Congress?

Eight and one-half million workers are now unemployed, the largest number since 1939.

Unemployment among blacks and other minorities has reached fifteen and one-half percent; eleven percent of all blue collar workers are unemployed. Unemployment has increased by one million in the last three months alone.

The real earnings of workers are down 4.4 percent in the last year. Bankruptcies are up forty percent. The housing, automobile and related industries are being strangled by sky-high interest rates.

Mr. Paul Volcker, high priest of monetarism at the Federal Reserve Board, is a very kind and engaging man—until he goes to work in the morning. Then something happens.

For the past few weeks, in public and private discourse, he has been blaming the terrible harm that his policies have already done the nation's economy on next year's wage bargains. To grapple for such a flimsy alibi is a sure sign of the final bankruptcy of monetary doctrine.

It calls to mind an old, old ditty:

"It's the same the whole world over,
It's the poor that gets the blame,
It's the rich that gets the gravy.
Ain't it a bleeding shame?"

What can we who opposed the domestic policies of this Administration from the beginning now say that is one-half as devastating as the recorded fleeting spasms of honesty of its leading hatchet-man, Mr. David Stockman?

What provoked his candor one can only guess. But you don't have to be an old sailor to know what it means when the smartest rat on board heads for the hawse pipe.

Lest you feel a twinge of human sympathy for his public embarrassment, let me remind you that this is the man who once coldly declared that no one is entitled to anything from one's government. He even now boasts, as his proudest achievement, of the destruction of public service employment and trade adjustment assistance.

He was the original interior decorator of this economic house of ill repute. Now that the sirens are sounding and the bust is due, he has his story ready. He was only the piano player in the parlor. He never knew what was going on upstairs.

The aftermath also tells us a lot about this Administration. Was he chastised by the President for cooking the books, rigging the computer, overfeeding the tax hogs, conning the Congress and duping the public? No—he was taken to the White House woodshed for, at long last, telling the truth. So far have we come from young George Washington and the cherry tree.

Now, after his scolding, he tells us that it was all a foolish mistake, that he was only guilty of being the south end of a north bound Trojan horse.

It is hard to decide which is worse about the social and economic policies of this Administration—The array or the disarray.

If this is the direction of the New Beginning that President Reagan promised, God save us from the End.

When we turn to consider the course of our foreign and defense affairs we find the same pattern repeated.

We were promised a more vigorous and consistent role of American leadership and a more coherent and sustained approach to the revival of our forces in freedom's defense. We welcomed that prospect, for labor has always believed that our values are worthy of a strong defense in the face of external danger.

But what is the objective record, stripped of the fog of rhetoric?

We have, in the past year, witnessed the following:

The growing dismay and division of our allies;

The feeding of our deadliest adversaries on easy credit, making lighter their growing burden of lethal arms;

The appeasement of the Saudi-financial-industrial complex with gifts of costly and exotic weapons, paid for in higher oil prices, by the American consumer;

The destruction of domestic support for necessary defense expenditures through the exemption of the rich and the drafting of the poor in the service of its cost.

On that record, as regards this Administration's team of foreign and defense policy-makers, one need say no more than did the Duke of Wellington when he observed his own troops in a state of disarray:

"I don't know if they frighten the enemy—
But Gad, sir, they frighten me!"

We shall endure and survive all these afflictions, as we have so many others during the ebb and flow of the changing tides and the entrances and exists of great communicators, great engineers and other flickering lights and shooting stars. Our fortunes depend, not on the stars, but upon ourselves.

As we approach a new election year, we must prepare now for the next battle in our long campaign.

Tools and tactics may change, people may come and go, but one element remains essential to our prospects. That is, as always, true and lasting solidarity.

Solidarity yields to the common wealth, to build the store of strength that each of our parts will surely need to draw upon, late or soon.

Solidarity requires, not blind submission to command, but the free and timely exchange of views in search of consensus. Once that is gotten, it the requires of all the character and forbearance to defer one's own pride or preference to the general good.

The officers of this Federation will seek the advice, consult the wisdom, and promote the expression of the views of all quarters of this movement, so that its great and rich variety may be fairly and fully summoned to our common struggle.

When we gain a goal together, there will be enough honor and recognition to go around to each organization that makes up this body. None will be slighted or deprived of its due.

As we go forth into our second century, solidarity remains the indispensable key to the future.

And now to work.

THE PLIGHT OF SOVIET JEWS

Mr. CRANSTON. Mr. President, recent figures provided to me by concerned citizen organizations confirm the ominous trend against the granting of emigration rights by Soviet authorities to Jewish citizens.

Last October's figures mark the lowest point since comprehensive statistics were first kept more than one decade ago. In October 1981, only 368 Soviet Jews were permitted to leave the Soviet Union. This averages out to a yearly total of less than 4,500, as compared to 21,471 last year and 51,320 in 1979.

The terrible truth is that Jewish citizens of the Soviet Union who are seeking to exercise the emigration rights guaranteed by the 1975 Helsinski accords are being used by Soviet authorities as pawns in a geopolitical game.

Since United States-Soviet relations have worsened, mistreatment of Jews in the U.S.S.R. has become more harsh.

But many Americans find it difficult to support steps to improve United States-Soviet relations, so long as such grave human rights abuses continue.

Thus Soviet Jews are caught in a cruel catch-22.

When I was in the Soviet Union last September on a factfinding mission with Senator CHARLES MATHIAS, I met with leaders of the Jewish community in Moscow including "Refuseniks," Jews whose right to emigrate has repeatedly been denied by Soviet authorities. This was a deeply moving and troubling experience and a heart-rending reminder of the difficulties these people face. Many have been denied their Helsinki emigration rights for nearly a decade. Others—such as Anatoly Shcharansky's mother and brother—were deeply concerned about the safety of family members imprisoned by the Soviets. In fact, at that time, Mrs. Shcharansky did not even know if her son was alive or dead, since all family contact with him had been barred for months. She has since received a letter from Anatoly.

I told Soviet authorities that such Soviet human rights violations cast a pall over attempts to improve relations between our countries and are a matter of deep concern to millions of Americans. I also raised specific emigration cases with Soviet authorities at the highest levels.

As relations between the United States and the Soviet Union have deteriorated in recent years, clearly the fate of Jews seeking to leave the Soviet Union has darkened. And added to the tragic decline in emigration figures is a stepped-up Soviet campaign of harassment against Jewish scholars and Hebrew teachers. Many young Jews in the Soviet Union are caught in a cycle of misery where they are harassed by Soviet authorities and denied entrance to universities. Young men who refuse

mandatory military service face 2 years imprisonment; those who do must wait at least 5 years to apply to emigrate.

Mr. President, even as I work to do what I can to reduce tensions between the United States and the Soviet Union and to make possible the improvement of relations between our two countries, I will continue to fight for the rights of Soviet Jews and others. I shall remember their plight and shall do all that I can to advance their cause until compassion and common decency prevail.

I am submitting for the RECORD a chart which demonstrates the spiral downward in the number of Soviet Jews granted their emigration rights:

1971	13,022
1972	31,681
1973	34,733
1974	20,628
1975	13,221
1976	14,261
1977	16,736
1978	28,864

	1979	1980	1981
January	3,722	2,803	850
February	3,837	3,023	1,407
March	4,418	3,049	1,249
April	4,296	2,469	1,155
May	4,163	1,976	1,141
June	4,358	1,767	866
July	4,068	1,205	779
August	4,711	770	430
September	4,663	1,307	405
October	4,746	1,424	368
November	4,193	789	
December	4,145	889	
Total	51,320	21,471

THE OBSERVANCE OF THE VICTORY AT YORKTOWN

Mr. WARNER. Mr. President, the people of America and all the world were witness in mid-October to a stirring bicentennial commemoration of one of the most historic chapters in our Nation's struggle for independence: The American victory at the Battle of Yorktown in Virginia.

Those of us who were privileged to participate in the Yorktown bicentennial, like the millions who saw, heard or read of the commemoration, are not likely to forget the surge of patriotic emotion evoked by the occasion.

From the reenactment of battles on sea and land, to the re-creation of colonial life and customs, through the formal ceremonies and exchange of toasts between the leaders of nations—the proud spirit of victorious, reawakened liberty touched and ennobled each of us.

Truly it was a glorious moment to savor, to share, and to cherish all our lives.

Hundreds of volunteers from Yorktown, from Virginia, and from all America deserve special tribute for the superb and dignified nature of this observance.

Adding to the significance of the commemorative ceremonies was the presence of two heads of state—the leaders of the two nations who together won the victory 200 years ago: President Francois Mitterrand of France and President Ronald Reagan of the United States.

Also participating with a special grace and eloquence, on behalf of the nation whose forces did not carry the day at Yorktown two centuries ago, was the British Lord Chancellor, Lord Hailsham.

Mr. President, so that all our colleagues and other interested Americans may have the opportunity to share more fully in those observances, and as a contribution to the archives of future historians, I ask unanimous consent that there be inserted in the RECORD the text of remarks by the distinguished participants in the special climax of the week-long celebration and the names of the many key volunteers who made the Yorktown bicentennial in October 1981 possible.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS BY THE HONORABLE JOHN O. MARSH, JR.

Mr. President, President Mitterrand, Lord Chancellor Hailsham, Governor Dalton, Distinguished Guests, Ladies and Gentlemen:

Nearly a year ago, at the direction of General Meyer, the Chief of Staff, the United States Army established the Cohort Program. This program gives a soldier the opportunity to join a unit as a group, to be trained together, and then assigned together in a single command.

This program seeks to build loyalty between both individuals and their units.

Today, we swear into the United States Army two Cohort Groups who have enlisted in the combat arms of infantry and artillery. They are 214 volunteers from each of the 50 states and all the territories. Both groups will become members of the great 1st Infantry Division at Fort Riley, Kansas. The artillerymen will be assigned to the battery once commanded by Lt. Colonel Alexander Hamilton who led the successful night assault on Redoubt 10 which was made with fixed bayonets and unloaded muskets.

I would like to present for the purpose of administering the oath of enlistment, Lt. Colonel Robert Foley who was awarded the Medal of Honor for heroism in South Vietnam.

SECNAV REMARKS AT YORKTOWN CEREMONY

Yorktown has a long standing tie to America's naval heritage. Prior to the battle which we commemorate today General Washington's victory was secured in part by the operations of the French Fleet, under the command of Admiral de Grasse, off the mouth of the Chesapeake. In recognition of this relationship, four United States Ships have borne the name *Yorktown*, each with great distinction. Perhaps the most famous is the fighting lady USS *Yorktown* (CV-5) which fought so valiantly at the Battle of Midway in June 1942. The name *Yorktown* will again put to sea on a new class of Guided Missile Cruisers being built at Ingalls Shipbuilding in Pascagoula, MS. The ship will carry the AEGIS Combat System—the world's most effective air defense system. The sponsor for this new *Yorktown* will be a very gracious and well known Virginia Lady, Mrs. Mary Mathews.

Earlier this morning, I was advised that the keel of the new *Yorktown* has been "truly and fairly laid" in the name of the United States. The spirit of *Yorktown* will continue in this new ship.

To commemorate this event a plaque will be placed in the ship noting the events of this day and will bear the authenticating initials of the President and Mrs. Mathews. Mr. President, Mrs. Mathews will you join me and initial the plaque.

REMARKS BY SENATOR HARRY F. BYRD, JR., DURING THE YORKTOWN BICENTENNIAL OBSERVANCE

President Reagan, President Mitterand, The Lord High Chancellor of Great Britain, ladies and gentlemen:

It is a privilege to present to this splendid audience today the Lord Chancellor of Great Britain.

The Right Honorable Lord Hailsham is an old friend. He first came to this area 24 years ago with Queen Elizabeth for the 350th anniversary of the landing at Jamestown.

In the British Government, Lord Hailsham is the speaker of the House of Lords Cabinet and, in addition, is the equivalent of our Chief Justice of the Supreme Court.

Indeed, our own Chief Justice—Warren Burger—told me last night at the dinner given by President Reagan that Lord Hailsham has much in common with Winston Churchill.

He is England's best orator and secondly, like Churchill, his mother was an American

I know first hand that he also has an excellent sense of humor.

Two hundred years ago today the Americans, with the vital support of the French, were a bit more fortunate than the British.

Today, in saying to our distinguished guest that this former British colony now has nearly a trillion dollar debt, may I inquire of him: would he perhaps be interested in taking it back?

Two hundred years ago, the British band played "The World Turned Upside Down." It seems to me that the spirit of friendship in which we three nations met today suggests a world turned right-side up again.

Here on American soil today—in a state named for an English queen—to celebrate one of the most historic of all American events, are representatives of our two best and most consistent friends and allies, France and Great Britain.

So it is an honor to present to you now Lord Hailsham, the Lord High Chancellor of Great Britain.

SPEECH BY LORD HAILSHAM, THE BRITISH LORD CHANCELLOR, AT THE BATTLEFIELD CEREMONIES, YORKTOWN

In the unavoidable absence of the late Lord Cornwallis or his successor in title today, I suppose that I am as suitable a person as any to represent Her Britannic Majesty on this rather moving occasion. I suppose that I am in a minority in that I have an identifiable male ancestor who, as I have been led to believe by my family tradition, was actually present on the occasion of the original surrender of Yorktown, the bicentenary of which we celebrate today.

Unlike Lord Cornwallis, my own ancestor, a certain Captain Lytle, was a Junior Officer on the winning side, since when the name Lytle has been a recurrent given name in the various branches of my mother's family on this side of the Atlantic and, at any rate until recently, we have retained in England the actual pair of silver buckles said in the family tradition to have been worn by Captain Lytle when he was in the party which received the British surrender. These personal circumstances enable me to reflect in a somewhat philosophic mood upon the event which took place on this grassy spot two hundred years ago.

There is always something poignant about a battle field of the past. We regard the peacefulness of the scene, the grassy sward. We contrast our pleasant surroundings with the noise and bitterness of battle, the sounds and wreckage and heartbreaks of war. We humbly recall that we too, like those who took part in the original conflict two hundred years ago, have had our own responsibilities for day to day events, no wiser and no better men than they who fought here then, each prepared to die for what each

regarded as his duty. We too are ignorant as they were then of the enormous consequences which were to flow from matters which, to the world at large, would have seemed of little consequence.

The 7,000 troops then surrendering on the orders of their English commander, a mere handful beside the vast arrays contemporaneously engaged on the continent of Europe, the tiny squadron commanded by de Grasse exhibiting the enormous influence of sea power on the fortunes of land warfare, the tatterdemallion Continental army wearing strange hats and inconspicuous uniforms and firing those new fangled guns with rifle barrels, the French land presence under that subject of Louis XVI the Marquis de La Fayette, who lived on into the reign of Louis Philippe and who at 19 years of age was surely the youngest Major General ever to be employed in the American Army, all must have believed, I suppose, nay must have known, that they were living on the fringe of world events as the world was then considered to be constituted.

None knew, at least I suppose not, that they were laying the foundations of a new world power for centuries to come. None foresaw the vast immigration from the Old World, the ultimate destruction of Chattel Slavery in the war between the states, the great advance of the railways across the prairies, the industrial revolution. None foresaw the terrible convulsions of the French and Russian revolutions, the hideous enserfment of suffering millions in the early days of industrialisation, and their ultimate triumph, the dramatic intervention in two World Wars of the New World to save the Old. Nor are we in our own generation permitted to behold the strange and doubtless terrible events for which we in our turn will be held responsible in centuries to come.

Here then is the raw material of history, the shaping of destiny out of relatively small beginnings and perhaps, who knows, here also is the hand of Providence, wiser and more farseeing than human wisdom, that can create out of a manger and a stable force more potent than that of thirty legions of the Roman Army led by a semi-divine figure clad in a purple robe and an imperial diadem. There is nothing quite so humbling for those with responsibility for the present as the contemplation of the past.

Yet, my friends and allies, we three nations, two hundred years ago at enmity with one another, have come here together again, as allies and comrades, to reflect for a moment on the lessons of history and, for this must be the most important part of this episode, our own ultimate responsibility to posterity. When Abraham Lincoln, under a century later than the surrender of Yorktown, made his immortal utterance on the field of Gettysburg, though he remembered the past at his beginning, yet did not end his speech until he had brought the future within his range of vision. He was right to choose this perspective. We three nations, here reunited after two centuries, must ponder the future too.

In 1781, the fringe of the then known world, even, Mr. President, your own predecessor George Washington was more concerned, I believe, to be rid of the incubus of the European connection than to found a world power which cannot continue to exist in happiness, except on condition that all nations enjoy the peace and prosperity to which all men equally aspire. Neither Cornwallis, nor Washington, nor de Grasse, nor La Fayette nor that young Captain Lytle or his equivalents on the French or British sides foresaw the future in that October day in 1781.

The great empires have fallen. Europe is united in a fraternal community. But the enormous enigma of the future still confronts us all with dangers and responsibilities magnified and rendered more awful by the development of military technology of which the range of nuclear weapons is not the only nor necessarily the more lethal example. But we three meet here together again today to celebrate the birth of your new nation, Mr. President, conceived in liberty, and dedicated to the proposition that all men are created equal. That is a proposition which over the last two hundred years has gained its adherents and still reigns supreme over the hearts and hopes of civilised man.

You, Mr. le President, and Mr. President Reagan, are the Heads of States of two great historic nations. I have the honour, though in my much humbler capacity of the subject and servant of my own sovereign, to represent a third and not the least worthy of honour. United together in friendship and alliance, and with our other friends and allies throughout the world, we command a power for good, physical and moral, far beyond the dreams of those whose lives and deaths we celebrate in Yorktown today.

Let us rejoice that, thanks to those who in the last two hundred years, many of them in our own lifetime, have given in the cause of freedom and for our several countries that last full measure of devotion of which your great predecessor spoke, let us rejoice that thanks to them, Government of the people by the people has not perished from the earth. Nor, if we and our friends and allies are worthy of our heritage and equal in our courage and determination to those whose lives we recall upon this peaceful spot today, need the next two hundred years be less worthy of celebration than the last. God bless America. Que le bon Dieu benisse la France et tous les Francais. May God bless my own country, and all those throughout humanity prepared to dedicate their lives anew to the undying tradition of the West, the cause of freedom under law. Let tyranny tremble. Freedom is the law of life and under God's good Providence will triumph in the end.

REMARKS OF SENATOR JOHN W. WARNER, BICENTENNIAL COMMEMORATION CEREMONY, YORKTOWN, VIRGINIA, OCTOBER 19, 1981

President and Mrs. Reagan, President and Mrs. Mitterrand, Lord Chancellor Hailsham, Governor and Mrs. Dalton, Your Excellencies, Members of the Congress, Ladies and Gentlemen:

The American Republic was proclaimed to the world on July 4, 1776 in the stirring words of the Declaration of Independence. It was one thing, however, to declare the creation of a new republic, but another to make the declaration good. American independence had to be won on the battlefield and only with the aid of France was there victory.

As a tribute to our British friends who have courageously joined today, I quote from the diary of a staff officer to General Washington. Of the battle of Yorktown he said: "The measure of our victory today is no greater than the gallantry of our foe."

Since that battle, France and America have often differed on many issues, but whenever human freedom was at stake, we have found ourselves on the same side of the ramparts—arm in arm.

This is the fourth major commemoration of the battle of Yorktown and not since Lafayette's visit in 1824 have we had such a distinguished visitor. Representing France today is a true fighter, who never gave up or despaired in the cause of freedom.

To welcome him I recall the battle cry of the Americans as they landed in France in 1917 and 1944, "Lafayette, we are here!" President Mitterrand—you are here. Vive la France.

THE PRESIDENT OF THE FRENCH REPUBLIC FRANCOIS MITTERRAND—BICENTENNIAL COMMEMORATION, YORKTOWN, VIRGINIA, OCTOBER, 1981

Mr. President, Mr. Governor, Dear American and French friends:

In blood, effort and courage, something enormous was begun here; this first chapter of modern history was written together by our forefathers. We are here again today, meeting in commemoration, but also with our two peoples facing a future confronted by the opposite images of hope and anxiety; hope, which like two hundred years ago, is illuminated by the same love of liberty, anxiety which in our time is all too often aroused by violations of human rights and dignity.

The victory at Yorktown would be only a date among others, were we not to remember the lesson it teaches us.

Who does not recall the vicissitudes of that war which seemed without end: the fatigue and the suffering of the soldiers, the wavering of the leaders, the difficulties in arriving at a unified command of the American and French forces under Washington's command? Up there in the North, Rochambeau was getting impatient at the relative inaction imposed on his expeditionary force, while the war was stagnating around New York, where the soldiers of valiant England stood fast.

One of the best fleets ever put to sea by the French monarchy remained apparently useless at anchorage, off Cap Francois (now Cap Haitian in Haiti).

As so often happens when fighting bogs down, judgments come into question, money runs short, and weariness takes over. But an upsurge in clarity of vision and willpower is enough to bring a change in luck and a mastery of destiny. A succession of advances and retreats transformed your rebellious provinces into a gigantic chessboard. Lafayette, who served in your army, thanks to Washington's fatherly welcome, gradually drew Cornwallis' ten thousand men into the heart of Virginia, first in order to defend it, then to stop and immobilize the adversary.

Familiarity with the terrain and a grasp of action show that everything was at stake at Yorktown, if the Chesapeake were made into a trap. Lafayette alerted Washington and Rochambeau, who understood that there was no need to hold out outside of New York, and who came down with their troops for that famous march of over two hundred leagues from the north to south, which we have relived here today.

Everything was coming to a point in October 1781. And everything was about to topple. Lafayette had made the proper moves, Washington and Rochambeau the right decisions. But the English fleet, still in control of the Chesapeake, could yet dispatch Cornwallis and beat the combined allied forces.

It was then that our Admiral de Grasse entered the picture, going beyond the too narrow orders, by way of these daring strikes which punctuate the history of great military victories: Louis XVI had instructed the Admiral to keep his fleet away from the fighting, but Washington called for help. Without waiting for new instructions from the King, de Grasse set sail and the French fleet arrives before the English ships at a crucial point. In the battle of Chesapeake Bay, the enemy fleet of Graves and Hood was dispersed.

It remained for Cornwallis' army now to be reduced in a siege whose vestiges we still see thanks to your admirable reconstruction of the area. A single gesture was to reveal the full significance of the victory, and this gesture took place right here, almost at the same time of day. General O'Hara, delegated by the ailing Cornwallis, galloped towards Rochambeau to hand him the English com-

mander's sword. But General Mathieu Dumas, by pointing to Washington, the real commander-in-chief, made everyone realize what had been happening in America during the last five years: it was not just another episode in the old Franco-English quarrel, but indeed the first free act of the New World. The young American nation had come of age in the eyes of history.

We, French men and women, know that Montesquieu and our philosophers of the 18th century, had their first disciples in the New World; that you, before we, gave substance to the ideas which were to develop all through the following century to our day into a great universal movement:

Independence for a nation;

Constitution for the state; and

Liberty for the people.

And when in 1789 France became ignited with the embers of your Revolution, Lafayette cast our declaration of human rights from a mold fashioned by Jefferson and Franklin.

My dear Mr. President, recently in Philadelphia you reiterated this concept of liberty. It is our common point of reference. For its sake we came together each time that what was most important was at stake. Twice you returned Lafayette's courtesy with interest. Pershing and Eisenhower preceded us in our encounters in 1917 and 1944.

Our two nations can be proud for not having ever faced each other in armed conflict. Such nations are not numerous in the community of great nations, those that have never been involved in a war against each other. The Covenant of Friendship sealed at Yorktown has been always respected, we have to take care of it as a precious patrimony, without forgetting that it extended itself to the enemy of those days, today a faithful companion in good and bad times: England, who in 1940 kept the fate of the free world in courageous hands of her unconquerable people.

Without any doubt it had happened and will happen to us at some point in history not to make the same choices. Each of us had our national interests to defend. There could be contradictions, there have been and there will be. Each of us has our own convictions about the organization of social-economic relations, and nobody can ask the other to forego what he believes just and good for his own country. But these differences cannot and should not infringe on the profound reasons for a necessary alliance which finds its source here and whose meaning and continuity we feel this day more than at any other time. These differences cannot and should not hamper our common measures for peace, security and reduction of tensions in the world.

The battle of Yorktown—and what followed from it—has heavily weighed on the fate of the world. The lesson remains. The fighting for freedom and justice of the "insurgents" of the war of independence continues under other forms in other places of the present world.

Indeed, where injustice prevails freedom is only a lure, where freedom is flouted thought suffocates but where justice rules freedom lives and thought radiates.

The teachings of Washington and of the founding fathers of American democracy are inscribed in the collective memory reunited with the ideals of our French Revolutions of 1789 and 1868.

Let us listen together to the voices that emerge from all the continents, everywhere expressing the rejection of all forms of domination, whatever their political, economic or cultural nature; the will for independence, the same need for dignity, the aspirations of the present day nations are as legitimate as those of our ancestors. They are faithful to their example. Let us understand them. We who are in charge of the policy of our countries in this difficult period and act in such a way that their message be heard when there is still time.

Mr. President, I thank you for allowing the President of the French Republic to meet with you in the first capital of Human Rights and I express my wish that in the struggles of our days, and in order to guarantee peace, justice and liberty that we meet as in Yorktown, side by side, American friends around us. I came here to say this to you.

REMARKS BY GOVERNOR JOHN N. DALTON—INTRODUCTION OF PRESIDENT REAGAN, VICTORY DAY CEREMONIES—YORKTOWN

Among the traditions we celebrate at Yorktown is one that our nation's chief executive join in this remembrance that the office he holds was also assured here two centuries ago.

Two centuries ago, the men and women of thirteen colonies welcomed a Virginian, George Washington, as the Father of their Country, the man who as Commander-in-Chief had led the forces of freedom from foreign domination.

Today we welcome a President from Illinois by way of California, who has also been a leader of the forces of freedom, this time a freedom from the barnacles of excessive taxation and regulation that have attached themselves to the Ship of State in more recent years.

And we all have reason to celebrate his recent victories in the Congress of the United States.

We are all familiar with his record from the campaign last November, but in the spirit of this occasion, he has won high honors in other fields of endeavor.

Among them are the National Humanitarian Award from the National Conference of Christians and Jews, the Torch of Life Award for Humanitarian Services, the Horatio Alger Award, the American Newspaper Guild Award, the Freedom Foundation Award, membership in the American Patriots Hall of Fame, and the Medal of Valor from the State of Israel.

They confirm for us what all of us sensed—that he is a man in tune with his times, sensitive to the needs of our own country and to the role that the nations of the world look to America's Chief Executive to play.

In just a few months, he has demonstrated to his supporters and critics alike that this will be his greatest performance.

Ladies and Gentlemen, without further embellishment, will you welcome the President of the United States.

REMARKS OF THE PRESIDENT AT THE BICENTENNIAL OBSERVANCE OF THE BATTLE OF YORKTOWN

The PRESIDENT: Mr. President, Mrs. Mitterrand, Lord Chancellor, Governor John Dalton, and I thank you very much for that most gracious introduction, Members of the Congress, Members of the Cabinet, distinguished guests and my fellow citizens, I open with something of an announcement before my remarks. Since today is a day to celebrate freedom, I feel it only appropriate that I exercise one of the more pleasant powers of the Presidency. After consultation with Governor Dalton and with his approval, by the power vested in me as President of the United States, I hereby grant amnesty to the corps of cadets of the Virginia Military Institute under the terms and conditions to be specified by the superintendent. (Applause and laughter.)

And now, this field, this ceremony and this day hold a special meaning for people the world over, whether free in their lives or only in their dreams. Not long after the battle of Yorktown, Lafayette wrote home to France. Here, he said, "Humanity has won its battle, Liberty now has a country."

It was an extraordinary moment in history. The Continental army, as you've been told, had marched more than 400 miles from the Hudson River in New York to the tidewaters of Virginia. They surprised and stranded Lord Cornwallis on the tip of this peninsula. When Admiral de Grasse and his Franch fleet blockaded the Chesapeake, the trap was sprung: There could be no rescue by land or by sea.

Nearly eight thousand British soldiers had swept from Charleston to Richmond to this spot between the York and the James Rivers, with far more victories than defeats. But, as they were encircled and besieged by the Continentals, as they withstood day after day of grueling bombardment, they must have known in their hearts they were fighting for a cause that could not win.

Their enemies were a band of colonists, with bandaged feet and muskets that couldn't be counted on to fire, but the British were thousands of miles from home, and the Americans were fighting where they lived. Those rebels may not have had fancy uniforms, or even adequate resources, but that had a passion for liberty burning in their hearts.

In a masterly execution of a textbook siege, General Washington and his grab-bag army defeated the finest troops King George could field. The morning of the surrender must have been very much like this one today: the first real chill of autumn was in the air. The trees were turning brilliant with hues of red and gold and brown and the sky was bright and clear. Quiet had finally returned to this lovely countryside. How strange the silence must have seemed after the thundering violence of war.

And then the silence was broken by a muffled beat of British drums, covered with black handkerchiefs, as the Redcoats marched to surrender. The pageantry was spectacular. The French in their spotless white uniforms lined one side of the road. The ragged Continentals were brown and dreary on the other side. But the journals of those who were present mention that the Americans stood every bit as straight and equally as proud as any army could. They had, on that day, a military bearing that was not to be outdone by their comrades in white and blue nor by King George's men in their brilliant red.

As the British marched between the allied armies to the field of surrender, tears streamed down many of their faces. Their musicians played a tune popular in England at the time: Yes, "The World Turned Upside Down." And that's just what the colonists had done.

But those Americans were not professional soldiers at all. They had fought for freedom from Quebec to Saratoga, from Camden and Cowpens to Germantown, Valley Forge and Monmouth—towns and countrysides once so anonymous that King George complained that he could neither pronounce them nor find them on the map.

By Yorktown, they were veterans but they were still not soldiers. They were farmers, backwoodsmen, tradesmen, clerks and laborers—common men from all walks of life, anxious to return to their families and the building of a nation. On that day in 1781 a philosophy found a people and the world would never be the same.

We who have traveled here today—and I am told we number more than 60,000—did not come just to admire the strategies, battlements and trenches of a siege. We did not come to idealize human suffering.

The wounds of this battle have long since healed. Our nations have matured and bonds of friendship now exist between one time enemies. The same has been true of other wars since which makes you wonder if, after all the hatred, all the pain and all the sacrifice, we find ourselves to be friends and allies, why couldn't we find ourselves able to be friends without first going to war?

We have come to this field to celebrate the triumph of an idea—that freedom will

eventually triumph over tyranny. It is and always will be a warning to those who would usurp the rights of others: time will find them beaten. The beacon of freedom shines here for all who will see, inspiring free men and captives alike, and no wall, no curtain nor totalitarian state can shut it out.

The commemoration of this battle marks the end of the revolution and the beginning of a new world era. The promise made on July 4th was kept on October 19th. The dream described in that Pennsylvania hall was fulfilled on this Virginia field. Through courage, the support of our allies and by the gracious hand of God, a revolution was won, a people were set free and the world witnessed the most exciting adventure in the history of nations: the beginning of the United States of America.

But we didn't win this battle or this war by ourselves. From your country, Mr. President, came men and ships and goods. Generals Rochambeau and Lafayette and Admirals de Grasse and de Barras were among those without whose help this battle and this war could never have been won. France was first to our side, first to recognize our independence, and steadfast in friendship ever since. We are bonded in spirit and in fact by freedom. "Fnure vous, entre nous, a la vie, a la mort," Pochambeau said—between you, between us, through life, or death.

And others came to our aid—Poles, Spaniards, Scots, Canadians, Swedes, Germans, Dutch, Irish and still more.

Our Revolution was won by and for all who cherish the timeless and universal rights of man. This battle was a vindication of ideas that had been forming for centuries in the Western mind.

From the Mediterranean had come the philosophies of Greece and the laws of Rome. England contributed representative government and the French and the Poles shared their dreams of equality and liberty. On our own frontier we learned dependence on family and neighbors, and in our Revolution free men were taught reliance on other free men.

We of the West have lived the central truths—the values—around which we now must rally: human dignity, individual rights and representative democracy. Our nations share the foundation of common law, separation of powers and limited government. We must unite behind our own common cause of freedom.

There are those in the world today, as there always have been, who recognize human rights as only selective favors to be doled out by the state. They preach revolution against tyranny, but they intend to replace it with the tyranny of totalitarianism.

Once again, today, thousands of free men and women have gathered on this battlefield in testimony to their beliefs. Let the struggle that took place here remind us all: the freedom we enjoy today has not always existed, and carries no guarantees. In our search for an everlasting peace, let all of us resolve to remain so sure of our strength that the victory for mankind we won here is never threatened.

Will we meet the challenge Joseph Warren put forth to Americans 200 years ago? Will we act worthy of ourselves?

Each generation before us has struggled and sacrificed for freedom. Can we do any less?

The men and boys who fought on this field somehow understood that government must be close to people and responsive to them. That if all men are free to prosper, all will benefit.

Today in our country those concepts are threatened by government's bloated size and the distortion of its true functions. Our people are struggling under a punishing tax burden many times heavier than that which ignited our first rebellion.

Regulations that inhibit our growth and prosperity would be incomprehensible to the colonists who revolted because of the Stamp Act.

Our founding fathers devised a system of government unique in all the world—a federation of sovereign states with as much law and decision-making authority as possible kept at the local level. This concept of Federalism has been the secret of America's success, and will be a priority again as we restore the balance between the federal, state and local levels that was intended in the Constitution. (Applause.)

But of equal concern to me is the uncertainty some seem to have about the need for a strong American defense. Now, that is a proper task for the national government. Military inferiority does not avoid a conflict, it only invites one, and then insures defeat. We have been trusted with freedom. We have been trusted with freedom and must ensure it for our children and for their children. We're rebuilding our defenses so that our sons and daughters never need to be sent to war.

Where are the voices of courage and vision that inspired us in the past? Are we ever to hear those voices again? Yes. Thomas Paine, a voice of patriotism, said, "those who expect to reap the blessings of freedom must undergo the fatigue of supporting it."

We always have and we always will. That's just part of being an American. Our Declaration of Independence has been copied by emerging nations around the globe—its themes adopted in places many of us never heard of.

Here in this land, for the first, time, it was decided that man is born with certain God-given rights. We the people declared the government is created by the people for their own convenience. Government has no powers except those voluntarily granted to it by we the people.

There have been revolutions before and since ours, revolutions that simply exchanged one set of rulers for another. Ours was a philosophical revolution that changed the very concept of government.

John Adams wrote home from Philadelphia shortly before signing the Declaration of Independence, and he said, "I am well aware of the Toil and Blood and Treasure, that it will cost Us to maintain this Declaration, and support and defend these States. Yet through all the Gloom, I can see the Rays of ravishing Light and Glory. I can see that the End is more than worth all the Means—and that Posterity will triumph—"

It is that vision we recall today. We have economic problems at home and we live in a troubled and violent world. But there is a moral fibre running through our people that makes us more than strong enough to face the tests ahead. We can look at our past with pride, and our future can be whatever we make it. We can remember that saying Thomas Paine said, "We have it within our power to begin the world over again." We only have to act worthy of ourselves.

And as it's been said already today, God bless America.

Dillon Ripley; Mr. Wilbur Ross; Mr. B. Francis Saul, II; and Mr. John R. Stevenson.

Special acknowledgments

Commonwealth of Virginia:

Special appreciation is extended to the employees of the Yorktown Victory Center for their efforts and in particular to James R. Rollings, III, Daniel M. Hawks, Richard K. Hurley, Jacqueline F. Redmond, LaVelle M. Foley, Deborah L. Sowers, Anne G. Tompkins, Joy N. Larson, Stacy W. VanLeliveld, Louise S. Hoh, Greg Willis, Bonnie Mann and Patti Procopi.

Special recognition is given to Allen W. Libby, John B. Nicholson, III and Caroline G. Frechette who were reassigned from the Jamestown-Yorktown Foundation to assist with the celebration.

Sincerest appreciation is extended to the following staff who were reassigned from various agencies in Richmond to assist the Yorktown Bicentennial Committee with central planning and preparations for the celebration:

Daniel C. Bartges, Jr., Elizabeth S. Biehn, Albert W. Coates, Jr., Pauline L. Edmonds, Stanley S. Kidwell, Jr., Albert N. Neale, Trudy E. Norfleet, Michael D. Rogers, and William B. Rowland, Jr.

Colonial National Historical Park, National Park Service:

Sincere appreciation is extended to all the staff of Colonial National Historical Park who devoted their time and energy in preparing for the celebration and, in particular, the staff listed below:

Mary Frances Bailey, Public Affairs Specialist;

James N. Haskett, Chief, Interpretation and Visitor Services.

Ralph D. Maxwell, Chief, Resource Management and Visitor Protection.

Robert D. Robertson, Administrative Officer.

Jack G. Stout, Chief of Maintenance.

Erma L. Wehrenberg, Staff Assistant to Bicentennial Coordinator.

Local Governments:

Special thanks to the local governmental jurisdictions and especially to the officials and employees of the Counties of York and Gloucester, and the Trustees of the Town of York and Gloucester County for their financial support and untiring efforts in planning the event.

Armed Forces

Deep appreciation is extended to the men and women of the United States Army, Air Force, Navy, Marines and Coast Guard. Special recognition goes to the Secretary of the Army, John O. Marsh, Jr., and the Commanding Officer, U.S. Army Transportation Center and Fort Eustis, Major General Harold I. Small, the members of the Yorktown Bicentennial Task Force under the direction of Colonel James Waldeck and Colonel William Smith, and Colonel Lloyd Socky and Major Robert Aylor of Ft. Monroe.

Special acknowledgment

Sincere appreciation of the Commonwealth of Virginia and the Committees involved in the 200th Anniversary of the Battle of Yorktown is extended to the following individuals who gave unselfishly to this celebration:

John P. Abbett, assistant superintendent, Colonial National Historical Park; Jack S. Hodge, resident engineer of the Suffolk District, Virginia Department of Highways and Transportation; and William B. Rowland, Jr., division director, Virginia Department of Planning and Budget, who served as Director of the Yorktown Bicentennial Committee.

Special gratitude to James R. Sullivan, former Superintendent of the Colonial National Historical Park, and Randall W. Young, former Director, Yorktown Bicentenntial Committee, for their untiring service in planning this Yorktown Bicentennial. And recognition should be given to Jennifer Joy Manson, Torrey Shuford and Stuart Connock, representing the Office of the Governor for their invaluable services.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PAY ADJUSTMENTS FOR FEDERAL STATUTORY PAY SYSTEMS—MESSAGE FROM THE PRESIDENT—PM 92

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

In accordance with the provisions of section 5305 of Title 5 of the United States Code, I hereby report on the pay adjustments I ordered for the Federal statutory pay systems in October 1981.

The Secretary of Labor, the Director of the Office of Management and Budget, and the Director of the Office of Personnel Management, who serve jointly as my Pay Agent, found that an overall increase of about 15.1 percent in General Schedule rates of pay would be required to achieve comparability with private sector pay as that concept and process are defined in the Pay Comparability Act of 1970. The Advisory Committee on Federal Pay agreed with that finding.

While I fully support the comparability principle as the best basis for determining Federal pay, I believe that significant changes are required in the way that principle is currently defined and implemented. Therefore, last March, the Administration transmitted to the Congress proposed legislation to revise and strengthen the comparability process. At that time, it was estimated that the revised process would result in an overall increase in Federal pay of about 4.8 percent in October 1981.

The reform proposal has not yet been acted upon in Congress, but in accordance with our economic recovery program, the Congress included in the Omnibus Budget Reconciliation Act of 1981 (Public Law 97–35) provisions that limited this October's Federal civilian pay adjustments to the same 4.8 percent. Accordingly, on August 31, 1981, I sent to the Congress an alternative plan which called for an increase of 4.8 percent at each grade. Neither House of Congress disapproved this alternative plan, so on October 15, 1981, I signed Executive Order No. 12330 implementing it.

Under that Executive Order:

—The scheduled rates of pay under the statutory pay systems (the General Schedule, the Foreign Service Schedule, and the schedules for the Department of Medicine and Surgery of the Veterans' Administration) were increased by 4.8 percent in accordance with the alternative plan.

—The scheduled rates of pay for the Vice President and the Executive Schedule and Congressional and Judicial salaries were increased, under the provisions of Public Law 94–82, by the overall 4.8 percent in rates of pay under the General Schedule.

—The scheduled rates of pay for the Senior Executive Service were increased under the provisions of section 5382 of Title 5 of the United States Code based on the new rate of pay for GS–16, step 1, of the General Schedule and the new rate of pay for level IV of the Executive Schedule.

—The scheduled rates of pay and allowances for members of the Uniformed Services were increased by amounts ranging from 10 percent to 17 percent depending on pay grade in accordance with the provisions of sections 101 and 102 of the Uniformed Services Pay Act of 1981 (Public Law 97–60) approved October 14, 1981.

The Order also reflects the effect of section 101(c) of Public Law 97–51 (the continuing resolution approved October 1, 1981), which contains limitations on payable salaries for certain top level Government positions.

I am transmitting herewith copies of the reports of my Pay Agent and the Advisory Committee on Federal Pay, the alternative plan, and the Executive Order I promulgated to put these pay adjustments into effect.

RONALD REAGAN.

THE WHITE HOUSE, *November 16, 1981.*

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 3:38 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its clerks, announced that the Speaker has signed the following enrolled bill:

S. 1672. An act to expand the membership of the U.S. Holocaust Memorial Council from 60 to 65 and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 5:41 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 357. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

HOUSE JOINT RESOLUTION REFERRED

The following joint resolution was read twice by unanimous consent, and referred as indicated:

H.J. Res. 357. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes; to the Committee on Appropriations.

ENROLLED BILL PRESENTED

The Secretary reported that on today, November 16, 1981, he had presented to the President of the United States the following enrolled bill:

S. 1672. An act to expand the membership of the U.S. Holocaust Memorial Council from 60 to 65 and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment;

S.J. Res. 115. Joint resolution to approve the President's recommendation for a waiver of law pursuant to the Alaska Natural Gas Transportation Act of 1976 (with additional and minority views) (Rept. No. 97-272).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GORTON (for himself, Mr. DOMENICI, Mr. DURENBERGER, Mr. KASTEN, Mr. NICKLES, Mr. QUAYLE and Mr. MURKOWSKI):

S. 1848. A bill to amend the Congressional Budget Act of 1974 to impose limits on the amount of total budget outlays contained in concurrent resolutions on the budget, and for other purposes; pursuant to the order of August 4, 1977, referred jointly to the Committee on the Budget, and the Committee on Governmental Affairs.

By Mr. SYMMS:

S. 1849. A bill to authorize the issuance of a special series of bonds which may be redeemed for gold, and for other purposes; to the Committee on Finance.

By Mr. SARBANES (for himself and Mr. MATHIAS):

S. 1850. A bill to designate the "Gladys Noon Spellman Parkway"; to the Committee on Energy and Natural Resources.

By Mr. MATHIAS:

S. 1851. A bill to amend the Federal Election Campaign Act of 1971; to the Committee on Rules and Administration.

By Mr. JEPSEN:

S. 1852. A bill to amend the Export-Import Bank Act of 1945 to provide for the extension of credit for agricultural commodities; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. PERCY (by request):

S. 1853. A bill to authorize support to Radio Broadcasting to Cuba, Incorporated; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GORTON (for himself, Mr. DOMENICI, Mr. DURENBERGER, Mr. KASTEN, Mr. NICKLES, Mr. QUAYLE, and Mr. MURKOWSKI):

S. 1848. A bill to amend the Congressional Budget Act of 1974 to impose limits on the amount of total budget outlays contained in concurrent resolutions on the budget, and for other purposes; pursuant to the order of August 4, 1977, referred jointly to the Committee on the Budget and the Committee on Governmental Affairs.

LIMITING FEDERAL SPENDING

Mr. GORTON. Mr. President, I am introducing legislation today which will effectively limit the rate at which Federal Government expenditures can increase in the future. This bill, by amending the 1974 Congressional Budget Act, will, after a 5-year transition period, limit the spending of the Federal Government to no more than 20 percent of the gross national product. I am pleased to have my colleagues, Mr. DOMENICI, Mr. DURENBERGER, Mr. KASTEN, Mr. NICKLES, Mr. QUAYLE, and Mr. MURKOWSKI, join me in introducing this bill.

It is a fact that Federal spending is out of control. This hardly needs documenting; everyone in the country knows it. But at the risk of belaboring the obvious, I would like to present a few facts which illustrate the dimensions of the problem we face. It required 173 years for Federal spending to reach the $100 billion mark, but only 10 more years to reach the $200 billion mark. Then only 5 more years had to pass before Government expenditures exceeded the $300 billion mark in 1975. Since that time, expenditures have regularly risen at over $100 billion a year, to the point that a trillion dollar budget is now a real possibility.

On the other hand, a trillion-dollar national debt has become a reality. While it required three decades for the national debt to double after World War II, less than 6 years passed before it doubled again, surpassing the trillion dollar level this year.

Even more revealing has been the increase in Government expenditures as a proportion of the gross national product. The proportion of gross national product absorbed by the Federal Government is a better measure of the size of Government because it is not influenced by inflation. During the 1950's, the expenditures of the Federal Government absorbed on average less than 17 percent of gross national product. This percentage rose to over 19 percent during the 1960's, and to more than 21 percent in the 1970's. In 1980, during that single year, it was over 23 percent.

What everyone knows is true, is indeed true. Government spending has been simply out of control.

During my campaign, I promised the citizens of the State of Washington that, if elected, I would search for an effective, lasting solution to the problem of runaway Government spending, and would work diligently to see it enacted. Since joining the Senate, I have consulted at length with Senator DOMENICI, the distinguished and hard-working chairman of the Budget Committee, and with the Budget Committee staff. This legislation is the product of that consultation.

I will first briefly describe this bill and then explain why I think it preferable to other proposals which are also designed to limit the growth of Government.

This bill limits Federal expenditures to no more than 20 percent of adjusted gross national product. This percentage equals the average share of gross national product absorbed by the Federal Government over the last two decades. Because Federal spending is currently significantly above this 20-percent level, a transition period is included that will allow the administration and the Congress the time required to reduce the relative size of the budget. This 5-year transition period will begin in fiscal year 1983. The budget proposals of the Reagan administration, if followed, fit comfortably below the spending limitation imposed during each of the transition years. Following this period, the allowable amount of spending during succeeding fiscal years will be the previous year's gross national product multiplied by the average rate of growth of GNP over the preceding 5 years.

Should total expenditures exceed 20 percent of this adjusted gross national product, then the offending concurrent resolution, amendment, or conference report will be subject to a point of order. If raised by a Member and sustained by the Presiding Officer, the ruling may only be overturned by a three-fifths majority of the House in question. This allows the Congress some flexibility to deal with a true emergency.

Any problem as serious as the uncontrollability of Federal spending does not lack proposed solutions. Currently, the most widely discussed proposed solution is a constitutional amendment to require the Federal Government annually to balance its budget. There is for every problem, a solution that is simple, direct, popular, and wrong. I believe that to amend the Constitution to require a balanced budget, while admittedly simple, direct, and popular, is the wrong solution for two reasons. First, there is nothing about a balanced budget that precludes the continued growth of Government. Second, I believe that amending the Constitution should be undertaken only as a last resort.

The basic contention made by supporters of a balanced budget amendment is that it is a sure-fire way to limit Federal spending. It is nothing of the kind. There is nothing in the proposed amendment which would limit spending. The amendment would only require that expenditures be covered by revenues. As rapidly as Federal Government expenditures have risen, State and local expenditures have risen even faster. This has occurred despite the fact that State and local governments are required to balance their budgets annually.

In California, the rapid growth of State spending led, in 1978, to proposition 13, which reduced current property taxes and limited future increases. The success of proposition 13 led California voters overwhelmingly to approve proposition 4 the following year. Proposition 4 limited State and local spending to the level of 1978–79, adjusted for inflation and population growth. The citizens of California found that requiring a balanced State budget did not succeed in limiting the growth of State government. A spending limit was required to accomplish that end. Similar proposals have also been passed by the State of Washington.

I believe that what has proven true at the State level will also prove true at the Federal level. When President Carter announced what turned out to be a futile attempt to balance the Federal budget by this year, he did so by proposing increased taxes. Federal expenditures in the Carter budget were projected to increase by 16 percent between 1980 and 1981.

This abortive attempt to balance the budget was never intended to, and did not, result in any budget restraint. It took the Reagan administration, a Republican Senate, and reconciliation to do this. The effective way to limit the growth of Government is to impose direct spending limitations. The spending limitation bill that I am introducing today does this. A constitutional amendment to require an annually balanced budget does not.

My bill limits Federal spending by legislation, not by a constitutional amendment. I believe, for several reasons, that this is by far the preferable route. The Constitution of the United States is comprised of a set of basic guiding principles. It is not composed of specific regulations. In fact, I believe that amending the Constitution to place explicit limits on the level of Federal expenditures is inconsistent with the purpose and history of the Constitution.

In any event, it is patently unwise to enshrine in the Constitution any new and untested mechanism. While I have every confidence that placing limits on Federal spending is the proper way to limit the growth of Government, it is possible that, in the light of experience, it may need to be modified. History has shown that it is very difficult to amend the Constitution. Experimental proposals are simply inappropriate for constitutional amendments.

Furthermore, amending the Constitution should occur only as a last resort, when all other measures have failed. Clearly, this is not the case so far. The Congress has never imposed on itself the sort of budgetary constraint I propose today. I suggest that until we in the Congress have attempted and failed to place and maintain limits on the growth of Federal spending, it is premature to attempt a constitutional amendment.

I urge my fellow Senators to join me in solving the problem of runaway Federal expenditures by enacting this legislation.

Mr. President, I ask unanimous consent that the bill and a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 1848

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, (a) title III of the Congressional Budget Act of 1974 is amended by inserting after section 301 the following new section:

"LIMITATIONS ON TOTAL BUDGET OUTLAYS

"SEC. 301A. (a) IN GENERAL.—Notwithstanding any other provision of law, it shall not be in order in the Senate or the House of Representatives to vote on the question of agreeing to any concurrent resolution on the budget of any amendment thereto or any conference report thereon for the fiscal year ending on September 30, 1983, or for any subsequent fiscal year if—

"(1) the adoption of such concurrent resolution;

"(2) the adoption of such amendment; or

"(3) the adoption of such concurrent resolution in the form recommended in such conference report;

would cause the total amount of budget outlays set forth in such concurrent resolution to exceed the amount specified for such fiscal year by subsection (b).

"(b) SPECIFICATION OF LIMITS.—For purposes of subsection (a), total budget outlays shall not exceed—

"(1) for the fiscal year ending on September 30, 1983, an amount equal to 22 percent of the adjusted gross national product;

"(2) for the fiscal year ending on September 30, 1984, an amount equal to 21.5 percent of the adjusted gross national product;

"(3) for the fiscal year ending on September 30, 1985, an amount equal to 21 percent of the adjusted gross national product;

"(4) for the fiscal year ending on September 30, 1986, an amount equal to 20.5 percent of the adjusted gross national product; and

"(5) for each fiscal year beginning on or after October 1, 1986, an amount equal to 20 percent of the adjusted gross national product.

"(c) MARGIN OF ERROR.—Notwithstanding subsections (a) and (b), it shall be in order to consider a concurrent resolution on the budget for any fiscal year to which subsections (a) and (b) apply or any conference report thereon if—

"(1) the adoption of such concurrent resolution; or

"(2) the adoption of such concurrent resolution in the form recommended in such conference report;

would cause the total amount of budget outlays set forth in such concurrent resolution to exceed the amount specified for such fiscal year by subsections (a) and (b) by an amount which is equal to not more than two-tenths of 1 percent of the adjusted gross national product.

"(d) POINT OF ORDER.—A point of order raised pursuant to subsections (a) and (b) may only be raised at the conclusion of debate and before a vote is taken on a concurrent resolution on the budget, an amendment thereto, or a conference report thereon. If any such point of order is sustained by the presiding officer of the House in which it is raised, an affirmative vote of three-fifths of the Members of such House duly chosen and sworn shall be required to sustain an appeal of such ruling. Debate on an appeal of such point of order shall be limited to two hours, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees. An appeal on such a point of order is not subject to a motion to table.

"(e) WAIVER PROHIBITED.—The provisions of this section may not be waived pursuant to section 904(b).

"(f) DEFINITIONS.—For purposes of this section—

"(1) The term 'adjusted gross national product' means an amount equal to the number obtained by multiplying the gross national product for a fiscal year by (1 + the floating national product trendline for such fiscal year), and by (1 + the floating gross national product trendline for such fiscal year).

"(2) The term 'gross national product' means the gross national product as computed by the Department of Commerce for the most recently completed fiscal year preceding the fiscal year for which a concurrent resolution on the budget is being considered.

"(3) The term 'floating gross national product trendline' means the average annual rate of change of the gross national product during the five most recent full fiscal years preceding the fiscal year for which a concurrent resolution on the budget is being considered.".

(b) Section 301(d) of such Act (31 U.S.C. 1322(d)) is amended—

(1) by redesignating paragraphs (3) through (8) as paragraphs (4) through (9), respectively; and

(2) by inserting after paragraph (2) the following new paragraph:

"(3) specific recommendations concerning whether the total amount of budget outlays for such fiscal year should exceed the amount specified for such fiscal year under subsections (a) and (b) of section 301A;".

(c) Section 310(a) of such Act (31 U.S.C. 1331(a)) is amended by adding at the end thereof the following: "The report accompanying any such concurrent resolution on the budget shall contain specific recommendations concerning whether total budget outlays for such fiscal year should exceed the amount specified for such fiscal year by subsections (a) and (b) of section 301A.".

(d) Section 904 of such Act (31 U.S.C. 1301) is amended by—

(1) striking out "titles I, III, and IV" in subsection (a) and inserting in lieu thereof "title I, title III (except section 312(a)), and title IV"; and

(2) striking out "or IV" in subsection (b) and inserting in lieu thereof "(except section 301A) or title IV".

(e) Title III of such Act is further amended by inserting at the end thereof the following new section:

"NOTIFICATION BY THE PRESIDENT OF EXCESS SPENDING

"SEC. 312. (a) NOTIFICATION.—The President shall transmit a notice to the Committees on the Budget of the Senate and the House of Representatives at any time he determines that the amount of total budget outlays for a fiscal year will exceed the amount of total budget outlays for such fiscal year set forth in the second required concurrent resolution adopted pursuant to section 310 for such fiscal year or in any concurrent resolution on the budget for such fiscal year adopted after such second required concurrent resolution for such fiscal year. The notice shall include recommendations for legislation, rescissions, deferrals, and other actions that will reduce actual outlays to the amount specified in such concurrent resolution.

"(b) REVISED CONCURRENT RESOLUTION ON THE BUDGET AND RECONCILIATION INSTRUCTIONS.—Within forty-five days after receipt

of the notice required by subsection (a) for any fiscal year, the Committees on the Budget of the Senate and the House of Representatives shall each report to their respective Houses a concurrent resolution on the budget which contains appropriate revisions of the most recently agreed to concurrent resolution on the budget for such fiscal year. Such revised concurrent resolution may contain specifications and directions for one or more committees to determine and recommend changes in bills, laws, and resolutions in accordance with this title and to report or submit such determinations and recommendations pursuant to the procedures established by section 310(c).".

(f) The table of contents in section 1(b) of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(1) by inserting after the item relating to section 301 the following new item:

"Sec. 301A. Limitations on total budget outlays,"; and

(2) by inserting after the item relating to section 311 the following new item:

"Sec. 312. Notification by the President of excess spending.".

SEC. 2. Section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11) is amended—

(1) by striking out "and" at the end of subparagraph (B) of paragraph (12) of subsection (a);

(2) by striking out the period at the end of paragraph (13) of subsection (a) and inserting in lieu thereof "; and";

(3) by adding at the end of subsection (a) the following new paragraph:

"(14) recommendations for insuring that total budget outlays for the ensuing fiscal year do not exceed the amount specified for such fiscal year by subsections (a) and (b) of section 301A of the Congressional Budget Act of 1974, or a detailed statement specifying the reasons why total outlays for such fiscal year should exceed such amount and recommendations for methods to reduce as soon as possible total outlays to the amount specified for such fiscal year by section 301A."; and

(4) by inserting after the third sentence in subsection (g) the following: "The statement transmitted on or before July 15 of any year shall include a report on the progress made since the transmittal of the message required by subsection (a) toward insuring that total budget outlays for the fiscal year in progress do not exceed the amount specified for such fiscal year by section 301A of the Congressional Budget Act of 1974.".

SECTION-BY-SECTION ANALYSIS

SECTION 1(a)

The General Rule.—Section 1(a) provides that it shall not be in order in either House of Congress to vote on a concurrent resolution on the budget, an amendment thereto, or a conference report thereon, if an affirmative vote would cause the total amount of budget outlays set forth in such concurrent resolution to exceed the following levels of adjusted gross national product (a term having a defined meaning for the purposes of the bill):

Fiscal year:	*Percent*
1983	22.0
1984	21.5
1985	21.0
1986	20.5
1987 and beyond	20.0

The provision is enforced by a member raising a point of order against proceeding to a vote on the concurrent resolution, amendment or conference report. The point of order may only be raised at the conclusion of any debate and before the vote is taken on the measure against which the point of order is raised.

If raised and sustained by the presiding officer, the ruling may only be overturned by a three-fifths vote of the members of the House in question.

Debate on the point of order is limited to two hours equally divided. In addition, the point of order is not subject to a motion to table or waiver under section 904(b) of the Congressional Budget Act of 1974.

Margin of Error.—Section 1(a) also provides that no point of order will lie against a concurrent resolution or conference report thereon if the amount of budget outlays in excess of the limit is not more than two-tenths of one percent of adjusted gross national product.

Adjusted Gross National Product—Adjusted gross national product is defined to mean the result obtained by multiplying gross national product by (1 + the floating gross national product trendline), and by (1 + the floating gross national product trendline), where gross national product is the gross national product as computed by the Department of Commerce for the most recently completed fiscal year preceding the fiscal year for which a concurrent resolution on the budget is being considered, and where the floating gross national product trendline is the average annual rate of change of the gross national product during the five most recent full fiscal years preceding the fiscal year for which a concurrent resolution on the budget is being considered.

SECTIONS 1 (b) AND (c)

Sections 1(b) and 1(c) provide that the Committee on the Budget of each House shall include in its report accompanying the first and the second and any subsequent concurrent budget resolutions specific recommendations concerning whether the total amount of budget outlays for such fiscal year should exceed the spending limitation.

SECTION 1(d)

Section 1(d) makes technical changes in section 904 of the Congressional Budget Act of 1974 to set out specifically that the spending limitation is not subject to waiver by majority vote.

SECTION 1(e)

Section 1(e) has two parts.

The first part requires the President to notify Congress at any time he/she determines that the amount of total budget outlays for a fiscal year will exceed the amount of total budget outlays for such fiscal year as set forth in the second required concurrent resolution or any subsequent concurrent resolution adopted for such fiscal year. The notice from the President must include recommendations for legislation, rescissions, deferrals and other actions that will reduce actual outlays to the amount specified in such concurrent resolution.

The second part requires the Committee on the Budget of each House to report to its House, within 45 days of receiving the notice from the President, a concurrent resolution on the budget which contains appropriate revisions of the most recently agreed to concurrent resolution for such fiscal year. Such revised concurrent resolution may contain specifications and directions for one or more committees to determine and recommend changes in bills, laws and resolutions, and to report such determinations and recommendations pursuant to the procedures established for reconciliation.

SECTION 1(f)

Section 1(f) makes technical changes in the table of contents of the Congressional Budget and Impoundment Control Act of 1974 to which these new provisions are added.

SECTION 2

Section 2 amends the Budget and Accounting Act, 1921 to set out specifically the President's duty to include in his/her January budget submission to the Congress recommendations for insuring that total budget outlays for the ensuing fiscal year do not exceed the specific outlay limitation, or a detailed statement specifying the reasons why total outlays for such fiscal year should exceed the limitation and recommendations for methods to reduce as soon as possible total outlays to the level of the limitation. Additionally, the President is required to include in his/her mid-session budget review a statement of the progress made toward insuring that total budget outlays for the fiscal year in progress do not exceed the outlay limitation for such fiscal year.

By Mr. SYMMS:

S. 1849. A bill to authorize the issuance of a special series of bonds which may be redeemed for gold, and for other purposes; to the Committee on Finance.

GOLD BOND ACT

● Mr. SYMMS. Mr. President, today I am introducing the Gold Bond Act because of my deep concern for the survival of our long-term capital markets. The long-term capital markets are the most important markets in a capitalist society, because only through them can a free market economy plan for the future. These are the markets that permit businessmen to plan for the future; that bring savers and investors together; and permit investors to manage the amount of risk and uncertainty they can afford.

Today, the long-term capital markets are being systematically destroyed by unstable monetary policy, high interest rates, and general confusion among investors about the future stability of our monetary and banking system.

In today's money market, the half-life of $1 is about 3 years. At 20-percent interest rates, a sum of money will double in 3 years. This is what the mathematics of compound interest indicates. If the interest rate is 10 percent, the money would double in 7 years. The consequence of this short half-life of money is that people who have money to lend or to invest expect inflation to destroy so much of their purchasing power that they are refusing to lend it in these unstable markets unless their investments can remain equal in terms of real purchasing power. In today's capital markets, the lenders require that the number of dollars will have to double in 3 years—so therefore, the half-life of the dollar is 3 years.

The Gold Bond Act will authorize the Secretary of the Treasury to sell 50-year bonds, with a coupon rate of 2 percent. The United States would promise to pay the bondholder in terms of gold bullion. Therefore, if the Federal Reserve System destroys the dollar with its monopoly money, at least the U.S. Government bonds will still be good investments, because they will be secured by the gold reserves of Fort Knox. These will be promises to pay out bars of gold, not depreciated dollars, upon maturity.

The issuance of gold bonds will insure pension funds, university endowments, financial institutions, and individuals that their long-term savings for the future will remain secure from the predatory destruction of inflation.●

By Mr. SARBANES (for himself and Mr. MATHIAS):

S. 1850. A bill to designate the "Gladys Noon Spellman Parkway"; to the Committee on Energy and Natural Resources.

GLADYS NOON SPELLMAN PARKWAY

● Mr. SARBANES. Mr. President, I am introducing legislation today with my colleague from Maryland, Senator CHARLES MCC. MATHIAS, JR., to provide a fitting tribute to one of Maryland's most distinguished citizens who spent a lifetime dedicated to public service and whose years in the House of Representatives are remembered for her record of achievement and her great respect for the democratic process. Gladys Noon Spellman touched many lives, and this legislation would recognize her achievements by renaming the Baltimore-Washington Parkway the Gladys Noon Spellman Parkway.

Designation of the parkway would be an appropriate monument to a great legislator. Gladys Spellman was first elected to the U.S. House of Representatives in 1974, and with the spirit of boundless enthusiasm which characterized all of her activities, she set about the process of upgrading the Baltimore-Washington Parkway, which was then in a state of disrepair and ran through the center of Maryland's Fifth District. She guided legislation through the House Appropriations Committee which provided funds for repairing and resurfacing the parkway. Knowing the importance of this regional transportation asset to visitors to the Nation's Capital as well as her own constituents, she held a series of meetings to expedite planning and construction. The repaving was completed in 1976.

These efforts to improve the parkway were just a small part of her activities on behalf of regional transportation programs. She was an early and strong supporter of the regional Metrorail system, both as a member of the Prince Georges County Council and later as a Member of Congress. Gladys Spellman believed in government and knew how to make government at all levels work in a spirit of cooperation and mutual concern.

The fine parkway between Baltimore and Washington, the gateway to both cities and a vital transportation link, is already a monument to the unique abilities of a great legislator and the dedication and work of Gladys Spellman. Designation of the parkway as the Gladys Noon Spellman Parkway would make this tribute a permanent reality.●

● Mr. MATHIAS. Mr. President, I am pleased to join with my colleague from Maryland (Mr. SARBANES), in sponsoring legislation to rename the Baltimore/Washington Parkway the Gladys Noon Spellman Parkway.

As you know, Mrs. Spellman suffered a cardiac arrest toward the end of her vigorous campaign for reelection for Maryland's Fifth District. Since then, she has been hospitalized.

Those of us who worked closely with Mrs. Spellman during the drive to find ways to finance the resurfacing of the Baltimore/Washington Parkway can attest to her perseverance. The way she tackled this task truly reflected the high caliber of work she was accustomed to do throughout her congressional career. She was a leader in solving regional transportation problems and the Baltimore/Washington Parkway project was but one of her many successes. Her record clearly shows that she was a friend of the Maryland commuter during her entire tenure in office—a true trailblazer for multimodal transportation projects.

Just a decade ago the Baltimore/Washington Parkway was dangerously inadequate, causing a high fatality rate. That, together with the need to accommodate the growth of the Washington metropolis, prompted Gladys Spellman and the Maryland congressional delegation to seek funds to resurface the highway. As with everything Gladys Spellman undertook, success was not long in coming.

We can all take pride in the state of the parkway today. It has an esthetic quality matched by few other arteries in the United States today. Traveling on the Baltimore/Washington Parkway is truly a pleasant experience. You can enjoy nature and feel the change in seasons on the parkway in a way that most other roads do not permit.

It has been my pleasure to share many public occasions with Gladys Spellman and each time I saw her with her friends and constituents was struck by her ability to convey a sense of personal warmth and constituents I was struck by her abilcould address a vast audience and give each of them the feeling that she was in intimate private conversation.

This was more than a political trick; it was the important ability to make citizens feel close to government, to personalize the relation of the citizen to the State, and to engage the loyalty of the people to the political process. Without neglecting the many material achievements of Representative Spellman, it seems to me that the gift of making policies work and bringing government into a human dimension was her real genius.

Designation of the Baltimore/Washington Parkway as the Gladys Noon Spellman Parkway is a fitting tribute to a model legislator and friend of the people of Maryland.●

By Mr. MATHIAS:

S. 1851. A bill to amend the Federal Election Campaign Act of 1971; to the Committee on Rules and Administration.

FEDERAL ELECTION CAMPAIGN AMENDMENTS ACT OF 1982

● Mr. MATHIAS. Mr. President, anyone involved in a campaign for Federal office in the last few years is aware of the ways in which conduct of campaigns have come to be shaped by requirements of the Federal Election Campaign Act.

The basic goals of the law as it applies to congressional races are fairly simple: To disclose the sources of money in campaigns, and to limit the amount of money that can come from any one individual or group.

I think many in political campaigns would agree that actually complying with the law and the regulations is often not an easy task.

Some charge that at a minimum the democratic spontaneity of the political campaign has been hurt in part by the fear of violating one of the laws' many requirements.

Others charge that the unintended consequences of the campaign finance laws have come to outweigh the benefits.

I have supported and I continue to support the basic goals of the Federal Election Campaign Act. And I continue to believe that the laws should be administered by an independent agency such as the Federal Election Commission.

Yet in view of the importance of the electoral process, I believe that Congress and specifically the Committee on Rules and Administration have an obligation to review how the laws have affected political campaigns and participation in the electoral process.

I am introducing today a bill entitled the "Federal Election Campaign Act Amendments of 1982" and ask that it be referred to the Committee on Rules and Administration. I offer this bill as a starting point for consideration of legislative changes which should be made in the Federal Election Campaign Act.

Except for those laws which are unique to Presidential campaigns, this bill would modify in some phase three major elements of the statute: Disclosure, contribution limitations, and enforcement.

DISCLOSURE

This bill takes a twofold approach to expanding and upgrading information reported about Federal campaign finances.

First, it enhances the value of campaign finance information by concentrating on the most important ideas.

Second, the bill calls for disclosure of funds used in the Federal election process not previously subjected to reporting requirements.

Currently campaign committees are required to provide identification of all individual contributions of $200 or more in a calendar year. Similarly, committees must identify those to whom expenditures or disbursements are made in amounts over $200. The bill proposes to increase the threshold for identification of contributions and expenditures to $500. Recordkeeping provisions for contributors over $50 and expenditures over $200 would be retained.

The bill would also increase the threshold of financial activity at which candidates are required to register and report under the act. Currently an individual who has received contributions or made expenditures in excess of $5,000 is subject to the reporting requirements of the act. The bill would raise this figure to $10,000.

Funds spent by corporations, labor organizations, and national banks in establishing, administering and soliciting contributions for their separate segregated funds are not now reported. The bill provides for placing these costs on the public record.

Additionally, the currently unreported costs associated with registration and get-out-the-vote activities of corporations and labor organizations directed to their personnel and members would be disclosed under this legislation.

Finally, corporate and labor organization expenses for communications advocating to their personnel and members the election or defeat of candidates

would be fully reported under the terms of this legislation.

CONTRIBUTION LIMITATIONS

Contribution limits are the second element of the FECA addressed in this legislation. The bill proposes to work a change from a separate election basis to a campaign basis for application of contribution limits.

Currently the $1,000 limit to a candidate's authorized committee is applied separately for a primary and a general election.

Contribution limitations under this bill to authorized candidate committees would be subject to limitations on a campaign or an election cycle basis rather than under the current law's provisions for separate limits for a primary and a general election.

This bill also proposes an increase in the dollar limitation for individual contributions. A $4,000 limit would be one applied to a campaign engaged only in a primary election or in both a primary and a general election.

The annual contribution limitation of individuals also would rise from $25,000 to $40,000. Draft committees would be specifically limited to $2,000. Amounts given to a draft committee would count against limits, if the individual becomes a candidate.

By reason of the change to an election cycle basis for determining limitations, multicandidate committees would be authorized to contribute a total of $10,000 to a principal campaign committee, rather than the current $5,000 separate limitation for the primary election and the general election.

An increase from $15,000 to $20,000 in the amount of a contribution by a multicandidate committee to a national political party committee would place multicandidate committees on the same national party contribution level as now exists for individuals.

The bill also contains a provision which would suspend the contribution limitations with respect to contributions made to a candidate's campaign by one member of his or her family. The family member may be the spouse, parent, grandparent, sister, brother, daughter or son.

ENFORCEMENT

Finally, the enforcement and administration provisions of the act are modified in two ways: The legislation cuts short the complaint and enforcement procedures of the Act when violations appearing on the face of a report are promptly corrected.

Another provision addresses the timeliness of reviews made of committee reports. The bill would require the Commission to review reports expeditiously so that any notices of errors, deficiencies or violations apparent on the face of a report would be sent before the next reporting date.

MISCELLANEOUS

The provisions on solicitation of contributions by trade associations and membership organizations are modified in two respects: An amendment to section 41b(b)(4)(C) of title 2, United States Code, makes clear that a membership organization, cooperative, or corporation without capital stock or their political committees may solicit members as well as families of members.

The bill includes at least 12 legislative changes recommended by the FEC in its 1980 report.

Among them are:

First, the annual approval required for solicitation of contributions by corporate members of trade associations would be amended to permit the corporate approval to stand until revoked;

Second, providing the FEC with general waiver authority;

Third, reduction in reporting by nonactive Presidential candidates;

Fourth, eliminating the en banc proceedings in the court of appeals and harmonizing judicial review standards in title 2 and title 26;

Fifth, authorizing a revolving fund for Commission publications.

I ask unanimous consent that there be printed in the RECORD, the bill and a section-by-section summary. I also ask that the Federal Election Commission's 1980 legislative recommendation be included in the RECORD following the section-by-section summary. Notations indicate which recommendations of the FEC have been included in the legislation introduced today.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1851

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Election Campaign Amendments Act of 1982".

SEC. 2. Section 301 of the Federal Election Campaign Act of 1971 is amended—

(1) in paragraph (2) by striking out "$5,000" each place it appears and inserting in lieu thereof "$10,000"; and

(2) by amending paragraph (9) (B) (iii) to read as follows:

"(iii) any communication by any membership organization or corporation to its members, stockholders, or executive or administrative personnel, if such membership organization or corporation is not organized primarily for the purpose of influencing the nomination for election, or election, of any individual to Federal office;".

SEC. 3. Section 302 (e) of the Federal Election Campaign Act of 1971 is amended—

(1) by striking out paragraph (5) and inserting in lieu thereof the following:

"(5) The name of any political committee having a connected organization, including any separate segregated fund established pursuant to section 316 (b), shall include the name of its connected organization."; and

(2) by adding at the end thereof the following new paragraphs:

"(6) The name of any political committee established to draft or to encourage an individual to become a candidate shall include 'draft' or a similar descriptive term, and the name of the individual.

"(7) The name of any political committee established to support the selection of delegates or the delegates to a national nominating convention shall, if qualified under the provisions of this Act as a political committee, include the word 'delegate' and the name, if any, of the Presidential candidate or candidates it supports.

"(8) The national committee of a political party and affiliated, subordinate or auxiliary committees of a national committee of a political party, the State committee of a political party and affiliated, subordinate or auxiliary committees shall use the name of the political party in the name under which it registers.

"(9) Each designation, statement, and report required to be filed shall include the full name of the political committee.".

SEC. 4. Section 303(b) of the Federal Election Campaign Act of 1971 is amended—

(1) by striking out "and" at the end of paragraph (5);

(2) by striking out the period in paragraph (6) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(7) the name and address of any political consultant or management firm or direct mail, or polling firm engaged by the reporting political committee when a committee principal or principals operate or have an interest in such firm.".

SEC. 5. Section 304(a)(3)(A) of the Federal Election Campaign Act of 1971 is amended—

(1) by striking out "and" at the end of clause (ii); and

(2) by adding the following new clause at the end thereof:

"(iv) on receipt of a written notice that a Presidential candidate is no longer seeking nomination or election to that office, the Commission may waive the requirements for pre- and post-general election reports and may permit principal campaign committees of such Presidential candidates currently filing on a monthly basis to revert to quarterly filing.".

SEC. 6. Section 304(a) of the Federal Election Campaign Act of 1971 is amended—

(1) in paragraph (4)—

(A) by amending subparagraph (B) to read as follows:

"(B) bimonthly reports in all calendar years which shall be filed no later than the 20th day after the last day of the two-month period and shall be complete as of the last day of the two-month period, except that, in lieu of filing the reports otherwise due in November and December of any year in which a regularly scheduled general election is held, a pre-general election report shall be filed in accordance with paragraph (2)(A)(i), a post-general election report shall be filed in accordance with paragraph (2)(A)(ii), and a year-end report shall be filed no later than January 31 of the following calendar year."; and

(B) by striking out subparagraph (A)(ii) and inserting in lieu thereof the following:

"(ii) a pre-election report or notice to the Federal Election Commission that such report is not required, no later than the 12th day before (or posted by registered or certified mail no later than the 15th day before) any election in which the committee makes a contribution to or expenditure on behalf of a candidate in such election (which the reporting committee has not previously reported) and such report shall be complete as of the 20th day before the election."; and

(2) by striking out paragraph (6) and inserting in lieu thereof the following:

"(6)(A) In addition to all other reporting requirements under this Act, eight days before an election the principal campaign committee of the candidate shall, in one submission, report to the Clerk, the Secretary, or the Commission, as appropriate, contributions of $1,000 or more, received after the close of books on the 20th day before the election through the tenth day before the election.

"(B) Written notifications of contributions of $1,000 or more received after the tenth day before the election and more than forty-eight hours before the election shall be made within forty-eight hours after receipt.

"(C) The notification required under this paragraph shall include the name of the candidate and the office sought by the candi-

date, the identification of the contributor, the date of receipt and the amount of the contribution.".

SEC. 7. Section 304(b) of the Federal Election Campaign Act of 1971 is amended—

(1) in paragraph (3)(A) by striking out "$200" and inserting in lieu thereof "$500";

(2) in paragraph (3)(F) by striking out "$200" and inserting in lieu thereof "$500";

(3) in paragraph (3)(G) by striking out "$200" and inserting in lieu thereof "$500";

(4) in paragraph (5)(A) by striking out "$200" and inserting in lieu thereof "$500";

(5) in paragraph (6)(A) by striking out "$200" and inserting in lieu thereof "$500"; and

(6) in paragraph (6)(B) by striking out "$200" each place it appears and inserting in lieu thereof "$500".

SEC. 8. Section 304(c) of the Federal Election Campaign Act of 1971 is amended by adding at the end thereof the following:

"(4) Notwithstanding the provisions of section 315(a)(2) (A), (B), and (C), a corporation, a labor organization, or a national bank establishing a separate segregated fund shall disclose either through reports of their separate segregated funds or directly to the Federal Election Commission, the costs incurred with respect to each of the following:

"(A) the establishment, administration, and solicitation of contributions of its separate segregated fund, which shall be reported in accordance with section 304(a)(4)(A)(i) and (iv);

"(B) nonpartisan registration and get out the vote campaigns by a corporation directed at its shareholders and executive or administrative personnel and their families, and by a labor organization aimed at its member and their families, which shall be reported in accordance with section 304(a)(4)(A)(i) and (iv); and

"(C) those costs which are directly attributable to communications of a corporation to its members, stockholders, and administrative and executive personnel and communications of a membership organization, including a labor organization, to its members, expressly advocating the election or defeat of a clearly identified candidate or candidates, which shall be reported in accordance with section 304(a)(4)(A)(i) and with respect to any general election shall be reported in accordance with section 304(a)(4)(A)(ii).".

SEC. 9. Section 304(c) of the Federal Election Campaign Act of 1971 is amended—

(1) in paragraph (1) by striking out "$250" and inserting in lieu thereof "$500"; and

(2) in paragraph (2)(C) by striking out "$200" and inserting in lieu thereof "$500".

SEC. 10. The Federal Election Campaign Act of 1971 is amended by adding after section 304 the following:

"WAIVER OF REPORTING REQUIREMENT

"SEC. 304A. In accordance with the provisions of section 311(d) of this Act the Commission may exercise authority to waive in part or in whole those reporting, record-keeping, organizational, or other requirements of the Act which may be excessive or unnecessary with respect to the particular categories of persons to which the waiver will apply.".

SEC. 11. Section 308(d) of the Federal Election Campaign Act of 1971 is amended by inserting after "for an advisory opinion" the following: "except the period for public comment shall be 5 days when the request is one which is required by this Act to be answered within 20 days".

SEC. 12. Section 309(a)(1) of the Federal Election Campaign Act of 1971 is amended by inserting after "complaint." the following: "When a correction of a violation disclosed on the face of a report is made by the reporting entity either prior to the next reporting date or within fifteen days after receipt by the committee of notification based on a complaint filed with the Commission or based on the Commission's review, the Commission shall take no further action on the corrected violation and shall dismiss a complaint or that part of a complaint in regard to such corrected violation.".

SEC. 13. The Federal Election Campaign Act of 1971 is amended by striking out the text of section 310 and inserting in lieu thereof the following:

"(a)(1) The Federal Election Commission, the national committee of a political party, or any individual eligible to vote in any election for the office of President is authorized to institute such actions as may be appropriate to implement or construe any provisions of the Federal Election Campaign Act, or chapter 95 or chapter 96 of the Internal Revenue Code of 1954, known as the Presidential Election Campaign Fund Act, and the Presidential Primary Matching Payment Account Act, including actions for declaratory judgment or injunctive relief in the appropriate district court of the United States, without regard to the amount in controversy. Actions authorized as separate actions under this section otherwise authorized for the respondent shall not be based on facts and legal issues arising under enforcement proceedings for which notice has been given pursuant to section 437g of this Act.

"(2) The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this subsection when an action is filed challenging the constitutionality of The Federal Election Campaign Act, or of chapter 95 or chapter 96 of this Act. Such proceedings shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal shall lie to the Supreme Court. It shall be the duty of the judges designated to hear the case, to assign the case for hearing at the earliest practicable date, to participate in the hearing and determination thereof, and to cause the case to be in every way expedited.

"(b) Any certification, determination, or other action by th Commission made or taken pursuant to the provisions of chapter 95 or chapter 96 of this Act, shall be subject to review by the United States Court of Appeals for the District of Columbia upon petition filed in such court by any interested person. Any petition filed pursuant to this section shall be filed within thirty days after the certification, determination, or other action by the Commission for which review is sought.

"(c) It shall be the duty of the court of appeals and of the Supreme Court of the United States to advance on the docket and expedite to the greatest extent possible the disposition of any questions regarding the constitutionality of this Act.".

SEC. 14. The Federal Election Campaign Act of 1971 is amended by adding after section 310 the following new section:

"PARTICIPATION BY COMMISSION IN JUDICIAL PROCEEDINGS

"SEC. 310A. (a) The Commission is authorized to appear in and defend against any action filed under section 310 of this Act either by attorneys employed in its office or by counsel whom it may appoint without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and whose compensation it may fix without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title.

"(b) The Commission is authorized through attorneys and counsel described in subsection (a) to appear in the district courts of the United States to seek recovery of any amounts determined to be payable to the Secretary of the Treasury as a result of examination and audit made pursuant to section 9007 and section 9008 of the Internal Revenue Code of 1954.

"(c) The Commission is authorized through attorneys and counsel described in subsection (a) to petition the courts of the United States for declaratory or injunctive relief concerning any civil matter covered by the provisions of chapter 95 or 96 of the Internal Revenue Code of 1954 or of section 6096 of such Code. Upon application of the Commission an action brought pursuant to this subsection shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal shall lie to the Supreme Court. It shall be the duty of the judges designated to hear the case to assign the case for hearing at the earliest practicable date, to participate in the hearing and determination thereof, and to cause the case to be in every way expedited.

"(d) The Commission is authorized on behalf of the United States to appeal from, and to petition the Supreme Court for certiorari to review, judgments or decrees entered with respect to actions in which it appears pursuant to the authority provided in this section.".

SEC. 15. Section 311(b) of the Federal Election Campaign Act of 1971 is amended by—

(1) inserting "(1)" after the subsection designation "(b)"; and

(2) adding at the end thereof the following:

"(2) Any review of reports made by the Commission in the course of carrying out its supervisory responsibilities shall be carried out expeditiously. Any notices of errors, deficiencies, or violations apparent on the face of a report shall be sent as soon as possible but not later than the next reporting date unless the error, deficiency, or violation is either a continuing one which carries over to a subsequent report or becomes apparent only after receipt of a subsequent report. Neither the 12-day preelection report nor the 30-day post general election report shall be considered the next reporting date for the purposes of this paragraph. The timing of notices required by this paragraph shall not apply to the political committees reporting under the provisions of section 304(a)(3) of this Act.".

SEC. 16. Section 311 of the Federal Election Campaign Act of 1971 is amended by adding at the end thereof the following:

"(g)(1) The Federal Election Commission shall transmit to the Congress proposed rules and regulations necessary for the purpose of implementing the provisions of this Act, and the amendments made by this Act prior to two months after the date of enactment of this Act.

"(2) The provisions of subsection (d) of this section allowing disapproval of rules and regulations by either House of Congress within 30 legislative days after receipt shall, with respect to rules and regulations required to be proposed under paragraph (1) of subsection (a), be deemed to allow such disapproval within 15 legislative days after receipt.

"(h) The Commission may establish a revolving fund account for the purpose of making expenditures to pay for the cost of printing of publications, the purchase of photocopy materials and other types of reproduction supplies in an amount that may be recovered by the sale of documents and publications for which there are requests. In establishing a fee schedule, the Commission shall take into account that the public interest is served in making available requested documents and publications about the Act. No less than the actual cost of printing, materials, or supplies shall be recovered.".

SEC. 17. Section 313 of the Federal Election Campaign Act of 1971 is amended by striking

out ", with respect to any individual who is not a Senator or Representative in, or Delegate or Resident Commissioner to, the Congress on January 8, 1980,".

SEC. 18. Section 315(a)(1) of the Federal Election Campaign Act of 1971 is amended—

(1) by striking cut subparagraph (A) and inserting in lieu thereof the following:

"(A) to any candidate and his authorized political committees for an election or elections for a Federal office in a particular year which, in the aggregate exceed $4,000';"; and

(2) in subparagraph (C) by inserting before the period the following: ", or $2,000 for a political committee established to draft or to encourage an individual to become a candidate".

SEC. 19. Section 315(a)(2) of the Federal Election Campaign Act of 1971 is amended—

(1) by striking out subparagraph (A) and inserting in lieu thereof the following:

"(A) to any candidate and his authorized political committees for an election or elections for Federal office in a particular year which, in the aggregate, exceed '$10,000';";

(2) in subparagraph (B) by striking out "$15,000" and inserting in lieu thereof "$20,000"; and

(3) in subparagraph (C) by inserting before the period, the following: ", or $2,000 when the political committee is receiving funds or making expenditures to draft an individual or to encourage an individual to become a candidate".

SEC. 20. Section 315(a)(3) of the Federal Election Campaign Act of 1971 is amended by striking out "$25,000" and inserting in lieu thereof "$40,000".

SEC. 21. Section 315(a)(4) of the Federal Election Campaign Act of 1971 is amended by striking out "contributions to" and inserting in lieu thereof "contributions of $250 to each of".

SEC. 22. Section 315(a) of the Federal Election Campaign Act of 1971 is amended by striking cut paragraph (6) and inserting in lieu thereof the following:

"(6) For purposes of the limitations on a candidate imposed by paragraphs (1) and (2) of this subsection, all elections held in any calendar year shall be considered to be one election. Contributions made by any person to a draft committee shall, if the individual becomes a candidate, be counted against applicable candidate contribution limitations.".

SEC. 23. Section 315(a)(8) of the Federal Election Campaign Act of 1971 is amended by inserting after "candidate" each place it appears "or political committee".

SEC. 24. Section 315 of the Federal Election Campaign Act of 1971 is amended by adding at the end thereof the following:

"(1) Except as it applies to publicly funded Presidential candidates, section 315(a)(1)(A) shall be suspended with respect to contributions by one individual family member of a candidate to the candidate and his authorized political committees when notification is provided to the Federal Election Commission by the candidate and the individual family member jointly. The individual family member may be any one of the following: spouse, parent, grandparent, sister, brother, daughter, or son. Contributions made by such family member under the provisions of this paragraph shall not constitute contributions for the purpose of the $40,000 annual limit set forth in section 315(a)(3).".

SEC. 25. Section 318(a) of the Federal Election Campaign Act of 1971 is amended by—

(1) striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon; and

(2) by adding at the end thereof the following:

"(4) if paid for and authorized by a political committee which uses a variation of the name but is not a political party committee described in section 302(e)(8)(A), shall clearly state that the communication is not authorized by any affiliated, subordinate or auxiliary committee of the named political party.".

SEC. 26. Section 323 of the Federal Election Campaign Act of 1971 is amended by adding at the end thereof the following:

"(e) The office of Government Ethics shall have exclusive authority to interpret, administer, and enforce these provisions as applied to Federal officers and employees in the executive and judicial branches of Government. The Senate Select Committee on Ethics and the House Ethics Committee shall have exclusive authority to interpret, administer, and enforce these provisions as applied respectively to the members and employees of the United States Senate and to the members and employees of the United States House of Representatives.".

SEC. 27. Section 316(b)(4)(D) of the Federal Election Campaign Act of 1971 is amended—

(1) by striking out "in any calendar year"; and

(2) by adding at the end thereof the following: "An approval given under this paragraph continues until revoked.".

SEC. 28. Section 316(b)(4)(C) of the Federal Election Campaign Act of 1971 is amended by inserting "and families of members" after "members".

SEC. 29. Section 9009(c) of the Internal Revenue Code of 1954 (26 U.S.C. 9009(c)), is amended by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) For purposes of this subsection, the term 'legislative day' means, with respect to statements transmitted to the Senate, any calendar day in which the Senate is in session, and with respect to statements transmitted to the House of Representatives, any calendar day in which the House of Representatives is in session.".

SEC. 30. Chapter 95 of the Internal Revenue Code of 1954 (26 U.S.C. 9001), the Presidential Election Campaign Fund Act, is amended by striking out the text of section 9011 and inserting in lieu thereof the following:

"(a)(1) The Federal Election Commission, the national committee of a political party, or any individual eligible to vote in any election for the office of President is authorized to institute such actions as may be appropriate to implement or construe any provisions of the Federal Election Campaign Act of 1971, or chapter 95 or chapter 96 of this Act, including actions for declaratory judgment or injunctive relief in the appropriate district court of the United States, without regard to the amount in controversy. Actions authorized as separate actions under this section otherwise available to the respondent shall not be based on facts and legal issues arising under enforcement proceedings for which notice has been given pursuant to section 309 of this Act.

"(2) The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this subsection when an action is filed challenging the constitutionality of the Federal Election Campaign Act, or of chapter 95 or chapter 96 of this Act. Such proceedings shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal shall lie to the Supreme Court. It shall be the duty of the judges designated to hear the case, to assign the case for hearing at the earliest practicable date, to participate in the hearing and determination thereof, and to cause the case to be in every way expedited.

"(b) Any certification, determination, or other action by the Commission made or taken pursuant to the provisions of such chapter 95 or chapter 96 shall be subject to review by the United States Court of Appeals for the District of Columbia upon petition filed in such court by any interested person. Any petition filed pursuant to this section shall be filed within thirty days after the certification, determination, or other action by the Commission for which review is sought.

"(c) It shall be the duty of the court of appeals and of the Supreme Court of the United States to advance on the docket and expedite to the greatest extent possible the disposition of any action filed pursuant to this section.".

SEC. 31. Chapter 96 of the Internal Revenue Code of 1954 (26 U.S.C. 9031), the Presidential Primary Matching Payment Account Act, is amended by striking out the text of section 9041 and inserting in lieu thereof the following:

"(a)(1) The Federal Election Commission, the national committee of a political party, or any individual eligible to vote in any election for the office of President is authorized to institute such actions as may be appropriate to implement or construe any provisions of the Federal Election Campaign Act, or of chapter 95 or chapter 96 of this Act, including actions for declaratory judgment or injunctive relief in the appropriate district court of the United States, without regard to the amount in controversy. Actions authorized as separate actions under this section otherwise authorized for the respondent shall not be based on facts and legal issues arising under enforcement proceedings for which notice has been given pursuant to section 437g of this Act.

"(2) The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this subsection when an action is filed challenging the constitutionality of the Federal Election Campaign Act, or of chapter 95 or chapter 96 of this Act. Such proceedings shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal shall lie to the Supreme Court. It shall be the duty of the judges designated to hear the case, to assign the case for hearing at the earliest practicable date, to participate in the hearing and determination thereof, and to cause the case to be in every way expedited.

"(b) Any certification, determination, or other action by the Commission made or taken pursuant to the provisions of chapter 95 or chapter 96 of this Act, shall be subject to review by the United States Court of Appeals for the District of Columbia upon petition filed in such court by any interested person. Any petition filed pursuant to this section shall be filed within thirty days after the certification, determination, or other action by the Commission for which review is sought.

"(c) It shall be the duty of the court of appeals and of the Supreme Court of the United States to advance on the docket and expedite to the greatest extent possible the disposition of any action filed pursuant to this section.".

SEC. 32. For purposes of section 552a(c) of title 5, United States Code, the Federal Election Commission shall not be considered an agency within the meaning of section 551 of title 5, United States Code.

SEC. 33. Section 527(f)(3) of the Internal Revenue Code of 1951 (26 U.S.C. 527(f)(3)) is amended by striking out "section 610 of title 18" and inserting in lieu thereof "section 316 of the Federal Election Campaign Act of 1971".

SEC. 34. For purposes of chapter 6 of title 5, United States Code, the Federal Election Commission shall not be considered to be an agency as defined in section 601(1) of such title.

SECTION-BY-SECTION ANALYSIS

(The cited statutory sections refer to Title 2 of the United States Code unless otherwise noted.)

Sec. 1. The title is the Federal Election Campaign Act Amendments of 1982.

Sec. 2. Under paragraph 1 of this section an individual would become a candidate by receiving contributions in excess of $10,000 or by making expenditures in excess of $10,000 or authorizing others to receive contributions and make expenditures in those amounts. Contributions or expenditures in excess of $5,000 is the current dollar threshold for candidacy contained in 2 U.S.C. 431(2).

Paragraph 2 of this section deletes the provision for reporting costs of communications in excess of $2,000 by labor organizations and corporations expressly advocating election or defeat of candidates now contained in § 431(9)(B)(iii). The bill in section 8 provides for full reporting of such communication and other federal campaign costs of corporations and labor organizations.

Sec. 3. This section extends to other committees the requirement in § 432(e)(4)(5) for candidate committees and corporate and labor organization political committees to identify respectively the candidate or the connected organization in the political committee name.

Paragraph 1 requires political committees other than separate segregated funds to include in their name, the name of any connected organization.

Paragraph 2 provides for a committee seeking to encourage an individual to become a candidate to include in their name a descriptive term such as "draft" and the individual's name.

National convention delegate committees which qualify as political committees under the Act are also required to include the word "delegate" in the committee name.

A new paragraph requires the filing of reports under the full name of the political committee.

Paragraph 4 would recognize the use of a political party name by the national committee of a political party and its affiliated, subordinate or auxiliary committees and by state committees of a political party and their affiliated subordinate or auxiliary committees.

Sec. 4. This new provision would require a political committee to identify in its statement of organization any direct mail or political management or consulting firm engaged by the committee if a committee principal operates or holds an interest in the firm.

Sec. 5. This section authorizes the waiver of pre-election and post-election reports by principal campaign committees of presidential candidates no longer seeking nomination or election to that office. Upon notice to the Commission, such non-active presidential campaign committees may file quarterly reports in an election year.

Sec. 6. Paragraph 1 would eliminate the requirement for pre-election reports by committees which in previous reports have identified all contributions and expenditures made to candidates in that election. Notice will be provided to the F.E.C.

Paragraph 2 would provide an option of a bimonthly rather than a monthly reporting option now available under § 434(a)(4) to all political committees other than candidate committees.

Paragraph 3 modifies § 434(a)(6) with respect to the 48 hour reporting of $1,000 contributors by candidate committees in the following manner: An authorized candidate committee would file in one submission the identification of all $1,000 contributors received in the ten to twenty day period before the election. In the period from ten days to 48 hours before the election, committees would report any additional contributors of $1,000 within 48 hours of receiving a contribution.

Sec. 7. This section would increase from $200 to $500 the dollar level requiring identification of contributors and receivers of expenditures and disbursements.

Sec. 8. Three categories of funds spent by corporations and labor organizations and national banks do not constitute prohibited contributions or expenditures in connection with an election. Only one category is subject to reporting requirements as provided in § 431(9)(A)(iii).

Section 8 of the bill would require these organizations to disclose all three categories of funds: (1) costs of establishing, administering and soliciting contributions for separate segregated funds and (2) costs associated with registration and get-out-the-vote campaigns aimed at corporate shareholders and executive personnel and directed by labor organizations towards their members and families would be reported on a quarterly basis in an election year and twice a year in an off-election year. (3) Costs for corporate and labor organizations communications expressly advocating the election or defeat of a candidate would be reported quarterly in an election year. A pre-general election report would also be required.

Sec. 9. The dollar level for reporting independent expenditures made by persons other than a political committee is increased from $250 to $500.

Sec. 10. This section would provide the Commission with general authority to provide by regulation for the waiver in part or in whole of the reporting and recordkeeping provisions of the Act which are unnecessary with respect to particular categories of persons otherwise subject to reporting requirements.

Sec. 11. 437f(d) requires a ten-day period for public comment on advisory opinion requests. Section 10 of the bill would reduce this ten-day public comment period to five days for expedited candidate advisory opinion requests which must be answered within 20 days.

Sec. 12. This new provision would modify the complaint and enforcement mechanisms of the statute when committees correct violations which appear on the face of their reports. A committee-initiated correction of a facial violation before the next reporting date for that committee removes that violation from possible enforcement procedures.

Similarly with the correction of a facial violation appearing on a committee's report within 15 days of notice of a complaint or a Commission review covering that violation, the Commission would be required to dismiss the complaint and take no further action.

Sec. 13. This section consolidates and harmonizes the judicial review sections of § 437h of Title 2 and § 9011 and § 9041 of Title 26 governing judicial review of publicly funded presidential campaigns.

This section retains the provisions authorizing court actions to construe the constitutionality of any provision of the Act but requires such cases to be heard by a three-judge court under § 2284 of Title 28 rather than by a United States Court of Appeals sitting en banc.

This section also clarifies that separate court actions to construe the constitutionality of the Federal Election Campaign Fund Act and the Presidential Election Campaign Fund Act and the Presidential Primary Matching Payment Account are not available to respondents during the course of Commission enforcement proceedings under 437g.

Sec. 14. Authorization for the Commission to participate in judicial proceedings which now appear in 20 USC § 9010 are repeated in this section and cover proceedings under the Federal Election Campaign Act as well as the Presidential Election Campaign Fund Act and the Presidential Primary Matching Payment Account Act in Title 26.

Sec. 15. Any review of committee reports made by the Commission under this new provision would be required to be made expeditiously.

With exceptions for the 12-day pre-election reports and 30-day post general election reports, the Commission is required to send notices of deficiencies, errors or violations in a committee report no later than the next reporting date.

This requirement would not apply to principal campaign committees of presidential candidates.

Sec. 16. This section would require the Commission to transmit any proposed rules and regulations necessary to implement these 1982 amendments to the Congress within two months after enactment.

This section would also shorten the number of legislative days during which the Senate and the House may act to disapprove such proposed rules and regulations from 30 to 15 days only for the 1982 regulations.

The administrative provisions of § 438 also would be amended by this section to provide new authority for the sale of Commission documents and publications and for purchase of printing materials, photocopy materials and other types of reproduction supplies.

Under current provisions payments from the sale of Commission documents and publications are returned to the U.S. Treasury.

Sec. 17. The prohibition contained in § 439a against use of excess campaign funds for personal purposes does not apply to Senators or Representatives who were in Congress on January 8, 1980. Sec. 13 of the bill removes this exception and thereby makes the prohibition against use of funds for personal purposes applicable to all members of the Senate and the House of Representatives.

Sec. 18. The limitation on the amount of contributions provided to a candidate committee is increased to $4,000 and the limitation applies to an entire campaign whether the campaign consists of only a primary election or only a general election or both.

A new provision is added specifically limiting to $2,000 the amount of a contribution made to a political committee seeking to draft an individual to become a candidate.

If the individual becomes a candidate the previous contribution to a draft committee counts against the donor's $4,000 limit for that candidate.

Sec. 19. The contribution by a multi-candidate committee is changed from $5,000 per election to $10,000 for a candidate's entire campaign whether it consists of a primary election or a general election or both.

Paragraph 2 increases from $15,000 to $20,000 the contribution limit of a multi-candidate committee contribution to a national political party committee.

Paragraph 3 places a $2,000 limit on a contribution by a multi-candidate committee to a political committee seeking to draft or encourage an individual to become a candidate. Should the individual become a candidate, the amount given to a draft committee would be counted against the $10,000 limit.

Sec. 20. The aggregated annual contribution limit of individuals is increased from $25,000 to $40,000.

Sec. 21. The qualifications outlined for multi-candidate political committees in 441a(4) are modified to require contributions of $250 to each of four candidates before a committee achieves multi-candidate status and the higher contribution limits.

Sec. 22. This section amends 441a(a)(6) so as to clarify that the limitations on contributions apply on an election cycle basis. A primary election and a general election

in the same year are considered one election for purposes of the contribution limitations.

Sec. 23. The revision made by this section of 441a(a)(8) would require an earmarked contribution made to one committee through another committee to be attributed to the original donor. The current earmarking provision applies only to contributions to a candidate committee. This section would extend the earmarking rules to political committee contributors.

Sec. 24. This section would suspend the contribution limits of one individual family member of the candidate. The contributor and the candidate must jointly notify the Federal Election Commission in advance of the family member for whom the limits will be suspended for the candidate's campaign.

Sec. 25. This section amends 441d(a) with a new paragraph requiring any communications by a political committee using a variation of the name of a political party to state clearly that the communication is not authorized by any affiliated, subordinate or auxiliary committee of that political party.

Sec. 26. The Federal Election Campaign Act in § 4411 places a limitation on the amount received for honoraria by Federal Government officials. The Federal Election Commission has jurisdiction over these provisions which apply not alone to elected officials but to appointed officials as well.

Section 26 of the bill would move the authority to interpret, administer and enforce honoraria provisions from the Commission to the Office of Government Ethics in the case of Federal officers and employees in the executive and judicial branches of government. Authority over honoraria provisions applying to Senators and Representatives would be moved to the Senate Select Committee on Ethics and the House Committee on Standards of Official Conduct respectively.

Sec. 27. This section would eliminate the annual solicitation approval required for solicitation of corporate members of a trade association. The member corporation's approval would stand until revoked.

Sec. 28. This section would authorize solicitation of families of members of membership organizations, cooperatives or corporations without capital stock or their separate segregated funds.

Sec. 29. The meaning of "legislative day" for the congressional review period for proposed Commission regulations regarding the Presidential Election Campaign Fund Act is changed so as to provide the same meaning given in Title 2 provision: any calendar day in which the Senate or the House is in session.

Sec. 30–31. These two sections are identical judicial review sections which repeat the provisions in Sec. 12 of the bill as they apply respectively to the Presidential Election Campaign Fund Act and the Presidential Primary Matching Payment Account Act.

Sec. 32. This section would exempt the Federal Election Commission from the requirements of the Regulatory Flexibility Act, Public Law 96-354.

Sec. 33. This is a technical amendment to correct the cross reference in 26 U.S.C. § 527(f)(3) from "section 610 of Title 18" to "section 441b of Title 2."

Sec. 34. This section exempts the Commission from the duty to comply with the accounting requirements of 5 U.S.C. 552a(c) of the Privacy Act of 1974 to the extent that an accounting is required of all disclosures made on the public record.

FEDERAL ELECTION COMMISSION—1980 ANNUAL REPORT

CHAPTER 1: LEGISLATIVE RECOMMENDATIONS

The Federal Election Campaign Act requires the Commission to include in its annual report ". . . recommendations for any legislative or other action the Commission considers appropriate . . ." Section 433(a)(9).

The following recommendations reflect the Commission's experience in administering the 1979 Amendments to the election law and in administering the public financing program in two Presidential elections.

The Commission believes these suggestions will make the election law more workable and more acceptable by political committees and the public. Continuing to evaluate its administration of the election law, the Commission may offer additional recommendations later this year.

Reporting

General Waiver Authority (2 U.S.C. § 436)*

In the past, there have been instances when the Commission may have wished to suspend the reporting requirements of the law in cases where reports or requirements were excessive or unnecessary. In the 1979 Amendments to the Act, Congress repealed 2 U.S.C. § 436 which provided the Commission with a limited waiver authority.

That provision was unclear and of limited use; nonetheless, to reduce needlessly burdensome disclosure requirements, the Commission should have authority to grant general waivers or exemptions from the extensive reporting, recordkeeping and organizational requirements of the Act.

Each proposal for a general waiver would, of course, be submitted to Congress in the form of a regulation subject to legislative review. If Congress does not grant the Commission general waiver authority over the reporting requirements of the law, it should consider changing specific provisions that have proven burdensome.

The Commission suggests the following changes:

(1) A candidate's principal campaign committee existing solely to extinguish debts from a previous campaign should be permitted to file semiannual reports even in an election year, provided that, if the candidate is currently seeking election, he or she has authorized a new principal campaign committee, which is reporting for that election; and

(2) The principal compaign committee of a candidate for the office of President should not be required to file pre- and post-general election reports if the candidate is no longer seeking election.

Point of Entry (2 U.S.C. § 432(g))

The Commission recommends that it be the sole point of entry for all disclosure documents filed by Federal committees. A single point of entry would eliminate any confusion about where candidates and committees are to file their reports. It would assist committee treasurers by having one office with which to file, correspond and ask questions.

At present, conflicts may arise when more than one office sends out materials, makes requests for additional information and answers questions relating to the interpretation of the law.

A single point of entry should also reduce the cost to the Federal government of maintaining three different offices, especially in the area of personnel, equipment and data processing.

The Commission has authority to prepare and publish lists of nonfilers. It is extremely difficult to ascertain who has and who has not filed when reports may have been filed at or are in transit between two different offices. Separate points of entry also make it difficult for the Commission to track responses to compliance notices.

Many responses and/or amendments may not be received by the Commission in a timely manner, even though they were sent on time by the candidate or committee. The delay in transmittal between two offices sometimes leads the Commission to believe that candidates and committees are not in compliance. A single point of entry would eliminate this confusion.

If the Commission received all documents, it would transmit on a daily basis file copies to the Secretary of the Senate and the Clerk of the House, as appropriate.

The Commission notes that the report of the Institute of Politics of the John F. Kennedy School of Government at Harvard University, "An Analysis of the Impact of the Federal Election Campaign Act, 1972–78," prepared for the House Administration Committee, recommends that all reports be filed directly with the Commission (Committee Print, 96th Cong., 1st Sess., at 122 (1979)).

Authorized Presidential Committees (2 U.S.C. § 434(a)(3))**

To minimize reporting burdens, Congress may wish to permit authorized Presidential committees filing reports on a monthly basis to revert to quarterly filing, where the candidate is no longer seeking nomination or election to the office of President and has so notified the Commission in writing. In addition, Congress may wish to allow such committees to file semiannual reports in a non-election year.

48-Hour Reports (2 U.S.C. § 434(a)(6))**

Require recipient committee to report in one notification contributions of $1,000 or more received after the close of books on the 20th day before the election through the 10th day before the election. Contributions of $1,000 or more received after the 10th day would be reported within 48 hours.

Contribution and expenditure limitations

Election Period Limitations (2 U.S.C. § 441a)**

The contribution limitations are structured on a "per-election" basis, thus necessitating dual bookkeeping or the adoption of some other method to distinguish between primary and general election contributions. The Act could be simplified by changing the contribution limitations from a "per-election" basis to an "annual" or "election-cycle" basis. If an annual limitation is chosen, contributions made to a candidate in a year other than the calendar year in which the election is held should be considered to have been made during the election year. Thus, multicandidate committees could give up to $10,000 and all other persons could give up to $2,000 to an authorized committee at any point during the election cycle.

Contributions by Minors (2 U.S.C. § 441a)**

The Act does not stipulate at what age a minor child may make contributions. Presently, the Commission is forced to rely on subjective criteria such as whether "the decision to contribute is made knowingly or voluntarily by the minor child."

Congress should establish an age below which contributions by children would be considered to have been made by the parent and subject to the parent's $1,000 contribution limitation.

Contributions to Draft Committees (2 U.S.C. § 441a)**

Consideration should be given to the contribution limitations that apply to draft committees. Since the $1,000 limitation on contributions by persons other than multicandidate committees applies only to candidates, a person may give up to $5,000 per year—the limit applicable to "other political committees"—to a draft committee.

Precisely this situation was presented in Advisory Opinion 1979-40. Congress may wish to amend the statute to make the $1,000 limitation, rather than the $5,000 limitation, applicable to contributions to political committees whose purpose is to influence a clearly identified individual to become a candidate.

Although the limitation on contributions

**Included in Mathias bill.

by multicandidate committees to candidates or to draft committees is $5,000, multicandidate committees, as well as other persons, may make two contributions toward the nomination of an individual—one contribution to a draft movement and, if the individual later becomes a candidate, another contribution to the candidate's authorized committee.

Accordingly, Congress may wish to consider amending the Act to provide that a person who has contributed to a draft committee with the knowledge that his or her contribution will be expended to draft a clearly identified individual will, for the purposes of the contribution limitations, be considered to have made a contribution to a "candidate."

If that individual should become a candidate, the contributors to the draft movement would be eligible to give to the candidate's authorized committees only to the extent their earlier aggregate contributions did not exceed the "candidate" limits.

Earmarked Contributions (2 U.S.C. § 441a(a)(8))**

Section 441a(a)(8) states that contributions made on behalf of a candidate through an intermediary or conduit shall be considered contributions to the candidate by the original donor. The statute should be amended to make this provision applicable to contributions earmarked to political committees.

Foreign Nationals (2 U.S.C. § 441e)

Section 441e should be revised to state whether this section reaches U.S. corporations owned by foreign nationals, subsidiaries of foreign corporations and trade associations with members who are foreign nationals or foreign corporations.

Voluntary Services (2 U.S.C. § 431(8)(B))

The Act places no limit on the services that a professional may donate to a candidate. For example, a professional entertainer may participate in a concert for the benefit of a candidate without the proceeds of that concert counting toward the entertainer's contribution limitations.

Congress may wish to circumscribe the use of volunteer professional services when they are donated solely for fundraising rather than for actual campaigning. A similar question is raised when an artist donates artwork to a campaign to be used for fundraising or to be disposed of as an asset of the campaign.

Trade Association Solicitation Approval (2 U.S.C. § 441b(b)(4)(D))**

Trade association political action committees must obtain the separate and specific approval of each member corporation to solicit their executive and administrative personnel. Some trade associations have thousands of members, and it is a considerable administrative burden to obtain approval to solicit every year.

The one-year limitation should be removed and the trade association should be allowed to solicit until the corporation revokes its approval.

Commission Duties, Powers and Authorities

Number of Legislative Days for Regulation Review (2 U.S.C. § 438(d))

The 1979 Amendments contained a provision reducing the number of legislative days for Congressional review of Commission regulations from 30 days to 15. This reduction was only applicable, however, to the regulations written to implement the 1979 Amendments. Congress should shorten the period for review of all Commission regulations to 15 legislative days.

In addition, two different standards currently apply to Congressional review of Commission regulations because two different definitions of "legislative day" are provided under Title 2 and Title 26. In Title 2, legislative days are counted separately in each House of Congress.

In Title 26, legislative days are only counted when both Houses are in session. The Title 26 provision should be revised to match the Title 2 provision, thus avoiding unnecessary delay in regulation review.

Judicial Review (2 U.S.C. § 437h; 26 U.S.C. §§ 9010, 8011, 9040 and 9041)**

The Act contains different judicial review provisions which Congress should consider conforming to each other. As noted by the Court of Appeals for the District of Columbia Circuit, no apparent reason exists for the different review provisions in Title 2 and in Chapters 95 and 96 of Title 26.

This anomaly creates difficulties for the courts because cases brought under one Act often also involve questions relating to the other Acts. See *Republican National Committee* v. *Federal Election Commission* (case brought under both 2 U.S.C. § 437h and 26 U.S.C. § 9011(b)).

The requirement of § 437h that cases be heard by the courts of appeals sitting en banc has been noted by the Courts of Appeals for the District of Columbia Circuit, the Fifth Circuit and the Ninth Circuit as presenting great difficulties. The en banc requirement should be repealed and Congress should establish a single judicial review provision applicable to all three Acts.

Revolving Fund (2 U.S.C. § 438)**

Although the FEC charges fees for publications and photocopies of documents provided to the public upon request and pursuant to the Freedom of Information Act, none of the monies collected reimburse the FEC for resources used. Instead, the money is transferred to the U.S. Treasury.

For the fiscal year ended September 30, 1980, the FEC collected and transferred $37,342.73 to the Treasury (the miscellaneous receipts account). This amount represented fees derived from selling Commission publications and photocopies of documents to the public. In order for the FEC to receive reimbursements for the documents it provides, a "revolving fund account" must be authorized by law.

According to the "Treasury Fiscal Requirements Manual," Congress would have to authorize a revolving fund account to finance a continuing cycle of operations in which expenditures would generate receipts and the receipts would be available for new expenditures.

In addition, costs awarded to the Commission in litigation (e.g., printing, but not civil penalties), should be payable to the revolving fund.

Comment Period for Advisory Opinions (2 U.S.C. § 437f(d))**

The 1979 Amendments provide that advisory opinion requests submitted by candidates or their committees within 60 days of an election must be answered within 20 days.

However, the Act sets a 10-day public comment period for all requests. This comment period should be shortened to five days for requests under the 20-day requirement to give the Commission sufficient time to fully consider and incorporate comments received.

Registration

Names of Committees (2 U.S.C. § 432(e))**

Under Section 432(e)(4), authorized committees must include the candidate's name in the name of the committee. Separate segregated funds must include the name of their connected organization in their name under Section 432(e)(5).

The concept behind these requirements is to enable the public to know whom these committees represent. However, many political committees connected with the organization are not covered by these provisions, even though the public has the same need to know.

"Draft" committees, so called "dump" committees and "delegate" committees should also be required to include the name of the person or candidate they support or oppose in their name, with an appropriate reference to the nature of the committee, e.g., "draft," "delegate" or "dump."

In addition, other political committees which have connected organizations or sponsors but which are not segregated funds should be required to include the name of their parent organization in the committee's name.

No committee should be able to use the name of a political party in its name unless it is an official party committee. Similarly, no committee should be able to include the name of a Federal office in its name unless it is an authorized committee.

Other statutes

Regulatory Flexibility Act (Pub. L. 96-354)**

Congress should exempt the Federal Election Commission from the requirements of the Regulatory Flexibility Act.

None of the Commission's regulations could have a significant impact on a substantial number of small businesses due to the nature of the Commission's jurisdiction, which mainly extends to political committees.

The Commission is therefore required to comply with the Regulatory Flexibility Act in a negative fashion, spending time and resources repeatedly asserting that no effect on small businesses will result from Commission rulemaking.

A far simpler solution would be to exempt the Commission from these requirements.

Privacy Act of 1974 (Pub. L. 93-579)**

The Commission should be exempted from its duty to comply with the accounting requirements of 5 U.S.C. § 552a(c) to the extent that the section requires an accounting of all disclosures maintained on the public record.

The Commission has a reading room to which members of the general public may come and inspect microfilm copies of public reports. Placing such documents on the public record is a routine use of such materials.

An exemption from the accounting requirements would not contravene the principles of the Privacy Act since the individuals involved are those running for office or contributing to candidates for Federal office.

Technical amendments

26 U.S.C. § 527(f)(3)

The cross-reference in 26 U.S.C. § 527(f)(3) should be changed from "section 610 of Title 18" to "section 441b of Title 2."

Gender Specific Language

Gender specific language should be eliminated from the statute wherever it appears. Examples include §§ 439a, 441a(a)(7), 441b(b)(3)(C), 441f, 441h, 442, 9002(11)(a), 9012(b)(2), 9035, etc.

Definitions (2 U.S.C. § 431)

The 1979 Amendments changed the numeration of the definition subsections in 2 U.S.C. § 431 from letters to numbers. As a result of this change, citations to this section have numbers following numbers, e.g., 2 U.S.C. § 431(8). Such citations differ from traditional citation form and therefore appear incorrect and can be awkward to cite orally. The numeration should be changed to lower case letters.●

**Included in Mathias bill.

By Mr. JEPSEN:

S. 1852. A bill to amend the Export-Import Bank Act of 1945 to provide for the extension of credit against agricultural commodities; to the Committee on Banking, Housing, and Urban Affairs.

EXTENSION CREDIT FOR AGRICULTURAL COMMODITIES

● Mr. JEPSEN. Mr. President, today I am introducing a bill to amend the Export-Import Bank Act of 1945 to provide for the extension of credit for agricultural commodities.

The bill requires the Ex-Im Bank to make loans available to purchasers of American agricultural products in the same ratio that our agricultural exports bear to our total exports.

For example, if U.S. agricultural exports account for 20 percent of all U.S. exports, then 20 percent of Ex-Im Bank financing would be devoted to farm exports.

Exceptions to this requirement would be made when the Bank determines and reports to Congress that demand for such loans is or will be adequate without such credit or when the Secretary of Agriculture determines that the level of farm exports will be adequate without Ex-Im Bank financing.

The Ex-Im Bank has in the past provided attractive financing to purchasers of American farm products. But, during the past administration, the Ex-Im Bank was prohibited from making loans for agricultural sales. Loans, however, did and do continue for the sale of manufactured products.

U.S.-made aircraft and other industrial items have the benefit of export financing through the Eximbank at an interest rate of 10¾ percent, while U.S.-produced agricultural commodities have no export financing assistance except Commodity Credit Corporation guaranteed loans at an interest rate of around 20 percent.

The importance of agricultural exports to Iowa agriculture and the economy is demonstrated by the USDA estimate that Iowa exported $3.27 billion worth of farm products in 1980, up 17 percent from the previous year.

Iowa is the second leading State in farm exports, exceeded only by Illinois' $3.64 billion. Iowa's exports were equal to 8 percent of the Nation's total $40.5 billion.

It is well known that the United States exports a huge part of its agricultural product. In fact, estimates indicate 38 percent of our farm acreage is devoted to exporting, and that one in every two jobs in farming hinges on exports. Even when our agricultural imports are taken into account, we still recorded a $26 billion agricultural trade surplus last year.

Without these surpluses, our trade ledger would stand in the red by a very large amount. Agricultural exports are simply essential to our international balance-of-trade position.

And while the picture sounds rosy enough for 1980, 1981 may be an entirely different story. Bumper crops are predicted for several commodities and this has caused a devastating effect on prices. Something must be done to aid in this situation. Increasing our agricultural exports is the best solution, in my opinion.

Something must also be done to make our goods competitive with those of foreign countries. Competitors in the world market are able to offer much better credit than the United States at this time.

Mr. President, I feel confident that this bill will aid in both of these endeavors. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1852

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Section 2 of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(d) (1) Subject to paragraph (2), for each fiscal year beginning after September 30, 1980, the ratio that the amount of credit which the Bank extends and in which it participates to finance the export of agricultural commodities bears to the total amount of credit which the Bank extends or in which it participates shall not be less than the ratio that the dollar value of exports of agricultural commodities during the immediately preceding fiscal year bears to the dollar value of all exports during such preceding fiscal year, except that if a significant dollar amount of any agricultural or nonagricultural item was embargoed in any such year, the immediately preceding fiscal year in which no such embargo occurred shall be used for purposes of this paragraph.

"(2) Paragraph (1) does not apply to any fiscal year with respect to which—

"(A) the Bank determines and reports to the Congress that the demand for credit to finance exports of agricultural commodities is insufficient to equal or exceed the ratio which would be required; or

"(B) the Secretary of Agriculture determines that the level of exports of agricultural commodities is or will be adequate without credit which the Bank extends or in which it participates."●

By Mr. PERCY (by request):

S. 1853. A bill to authorize support to Radio Broadcasting to Cuba, Incorporated; to the Committee on Foreign Relations.

SUPPORT TO RADIO BROADCASTING TO CUBA, INCORPORATED

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to authorize support to Radio Broadcasting to Cuba, Incorporated.

This legislation has been requested by the Department of State and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a background and detailed analysis by section of the bill and the letter from the Deputy Assistant Secretary of State for Congressional Relations to the President of the Senate dated November 9, 1981.

There being no objection, the bill, analysis, and letter were ordered to be printed in the RECORD, as follows:

S. 1853

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. The Congress hereby finds and declares:

(a) that it is the policy of the United States to support the right of the people of Cuba "to seek, receive, and impart information and ideas through any media and regardless of frontiers," in accordance with Article 19 of the Universal Declaration of Human Rights;

(b) that, consonant with this policy, Radio Broadcasting to Cuba, Incorporated, in its planned broadcasting to Cuba, may be effective in furthering the open communication of information and ideas to the people of Cuba, and in particular accurate information about Cuba; and

(c) that such broadcasting by Radio Broadcasting to Cuba, Incorporated, operating in a manner not inconsistent with the broad foreign policy objectives of the United States and in accordance with high professional standards, would be in the national interest.

SEC. 2. There is hereby authorized to be appropriated to the President for the purpose of this Act $10,000,000 for fiscal year 1982, and for fiscal year 1983 such funds as may be necessary.

SEC. 3. Funds or other support authorized by the Act may be granted to Radio Broadcasting to Cuba, Incorporated, only upon the following conditions:

(a) that Radio Broadcasting to Cuba, Incorporated, is operating in a manner not inconsistent with the foreign policy objectives of the United States and in accordance with high professional standards and in the national interest; and

(b) that Radio Broadcasting to Cuba, Incorporated, keeps records which fully disclose the source and use of support provided pursuant to this Act, or from any other person or organization, which are available at all times to the Secretary of State and the Comptroller General for the purpose of audit or examination for any other purpose.

SEC. 4. Pending the statutory designation of an appropriate federal granting and oversight agency, the Secretary of State shall be responsible for making grants of funds and for approving other support authorized by this Act. The Secretary shall determine when the conditions of Section 3 have been met and shall have authority to establish such other terms and conditions as he deems appropriate.

SEC. 5. When Federal funds have been made available to Radio Broadcasting to Cuba, Incorporated, pursuant to this Act, any agency or instrumentality of the United States is authorized to sell, loan, lease, or grant property (including interests therein) to and to perform administrative and technical support and services for the operations of Radio Broadcasting to Cuba, Incorporated, and the Presidential Commission on Broadcasting to Cuba on a reimbursable basis or, at the direction of the President, without reimbursement. Any reimbursement shall be credited to the appropriation from which the support or services were derived.

SEC. 6. The Secretary of State is authorized to accept and use, on behalf of the Presidential Commission on Broadcasting to Cuba, donations of funds, property and services of any kind, which may be made available for the purposes of the Commission and of this Act.

LEGISLATIVE ANALYSIS: AUTHORIZATION FOR SUPPORT TO RADIO BROADCASTING TO CUBA, INCORPORATED

BACKGROUND

At the request of the President, and under the direction of the Secretary of State, an Interagency Group has studied the feasibility of radio broadcasting of information and ideas to the people of Cuba. On the recommendation of the Interagency Group, on September 22, 1981, the President issued Executive Order 12323 creating a Presidential Commission on Broadcasting to Cuba. The Interagency Group has also urged the creation of a non-profit corporation to establish and operate a radio station conducting broadcasting to Cuba. This has been done, with the incorporation of Radio Broadcasting to Cuba, Incorporated ("RBC") under the District of Columbia Nonprofit Corporation Act. The objectives and manner of operation of RBC will be similar to that of RFE/RL, Inc.

(popularly known as Radio Free Europe/Radio Liberty).

This interim legislation authorizes federal funds and other support for allocation by the Secretary of State to RBC.

DETAILED ANALYSIS BY SECTION

Section 1. Section 1 contains the congressional findings and policy statement with respect to radio broadcasting to Cuba. Paragraph (a) is similar to the finding in § 2(1) of the Board for International Broadcasting Act, 22 U.S.C. § 2871(1), and refers to the right of peoples to receive information and ideas across borders. Paragraphs (b) and (c) link the policy expressed in paragraph (a), and the national interest in general, to federal support for RBC.

Section 2.—Section 2 authorizes appropriations for the purposes of this Act. For fiscal year 1982, $10 million is authorized. For fiscal year 1983, this section authorizes such amount as may be necessary.

Section 3.—Section 3 establishes conditions for the granting of funds or other support under this Act. Paragraph (a), similar in language to §§ 2(4) and 4(5) of the Board for International Broadcasting Act, 22 U.S.C. §§ 2817(4), 2873(5), requires that RBC be operating in a manner not inconsistent with United States foreign policy and in accordance with high professional standards and the national interest. Paragraph (b), similar to § 5(a) and (b) of the Board for International Broadcasting Act, 22 U.S.C. § 2874 (a), (b), requires that the Secretary of State and Comptroller General be given access to records reflecting the sources and uses of support for RBC.

Section 4.—Pending the enactment of permanent legislation with respect to RBC, this subsection gives the Secretary of State review responsibility over the activities of RBC and the uses of support provided by this Act. Similar interim review responsibility was given to the Secretary of State in legislation authorizing federal funding for RFE/RL during the months prior to the creation of the Board for International Broadcasting. *See* P.L. 92-264, 86 Stat. 114; P.L. 92-394, 86 Stat. 577. As the 1972-73 "Eisenhower Commission" (Presidential Study Commission on International Radio Broadcasting) developed recommendations for the creation of a Board for International Broadcasting, the Presidential Commission on Broadcasting to Cuba is expected to consider and make recommendations on the proper federal instrumentality to serve as the granting and oversight agency for Radio Broadcasting to Cuba, Incorporated.

The language of Section 4 gives the Secretary of State interim responsibility for making the grants authorized by this section, for determining when the conditions of Section 3 have been met, and for exercising discretion to apply other appropriate terms and conditions in providing the grants. While thus general in nature, it is contemplated that the Secretary's review responsibility would encompass such matters as are enumerated in § 4(a) of the Board for International Broadcasting Act, 22 U.S.C. § 2873(a).

Subsection (e).—Under subsection (e), which is similar to § 9(a) of the Taiwan Relations Act, 22 U.S.C. § 3308(a), any U.S. Government Agency may sell, loan, lease, or grant property to and perform support services for RBC and the Presidential Commission. This will provide access for RBC to existing federal resources in order to reduce costs and increase the efficiency of operations. Such assitance from federal agencies will usually be provided on a reimbursable basis, but, at the direction of the President, need not be.

Subsection (f).—Subsection (f) authorizes the Secretary of State to accept donations for use by the Presidential Commission on Broadcasting to Cuba.

DEPARTMENT OF STATE,
Washington, D.C., November 9, 1981.

Hon. GEORGE BUSH,
President of the Senate.

DEAR MR. PRESIDENT: I have the honor to submit for the consideration of the Congress a bill that would authorize federal support to Radio Broadcasting to Cuba, Incorporated, a non-profit corporation established to broadcast information and ideas to the people of Cuba.

I urge that the Congress give this proposal its early and favorable consideration.

The Office of Management and Budget has advised that there is no objection to the presentation of this proposal to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

ALVIN PAUL DRISCHLER,
Deputy Assistant Secretary for Congressional Relations.●

ADDITIONAL COSPONSORS

S. 1498

At the request of Mrs. KASSEBAUM, the Senator from Rhode Island (Mr. PELL), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of S. 1498, a bill to establish an office in the National Institutes of Health to assist in the development of drugs for diseases and conditions of low incidence.

S. 1702

At the request of Mr. LUGAR, the Senator from Arizona (Mr. DECONCINI) was was added as a cosponsor of S. 1702, a bill to amend the National Housing Act to provide additional mortgage and loan insurance authority.

SENATE JOINT RESOLUTION 113

At the request of Mr. HATCH, the Senator from New Jersey (Mr. BRADLEY), the Senator from North Dakota, (Mr. BURDICK), the Senator from New York (Mr. D'AMATO), the Senator from Illinois (Mr. DIXON), the Senator from Kansas (Mr. DOLE), the Senator from Utah (Mr. GARN), the Senator from Ohio (Mr. GLENN), the Senator from Oregon (Mr. HATFIELD), the Senator from Florida (Mrs. HAWKINS), the Senator from Pennsylvania (Mr. HEINZ), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Wisconsin (Mr. KASTEN), the Senator from Vermont (Mr. LEAHY), the Senator from Georgia (Mr. MATTINGLY), the Senator from Montana (Mr. MELCHER), the Senator from Rhode Island (Mr. PELL), the Senator from Oregon (Mr. PACKWOOD), the Senator from Michigan (Mr. RIEGLE), the Senator from Tennessee (Mr. SASSER), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Mississippi (Mr. STENNIS), the Senator from Idaho (Mr. SYMMS), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Alabama (Mr. DENTON), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from South Dakota (Mr. ABDNOR), the Senator from New York (Mr. MOYNIHAN), the Senator from Georgia (Mr. NUNN), and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of Senate Joint Resolution 113, a joint resolution to designate the week beginning November 8, 1981, as "National Home Health Care Week".

SENATE RESOLUTION 232

At the request of Mr. CHAFEE, the Senator from Connecticut (Mr. WEICKER) was added as a cosponsor of Senate Resolution 232, a resolution expressing the sense of the Senate with respect to the need to continue the tax incentives for energy conservation and renewable energy sources.

SENATE RESOLUTION 239

At the request of Mr. CRANSTON, the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of Senate Resolution 239, a resolution disapproving the proposal to defer budget authority for Veterans' Administration health-care facility construction while the administration "considers alternative methods for providing readily available quality medical care for eligible veterans."

SENATE RESOLUTION 241

At the request of Mr. PRYOR, the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of Senate Resolution 241, a resolution disapproving the basing mode for the MX missile.

UP AMENDMENT NO. 609

At the request of Mr. FORD, his name was added as a cosponsor of UP amendment No. 609 proposed to H.R. 4169, a bill making appropriations for the Department of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

SENATE CONCURRENT RESOLUTION 49—EXPRESSION OF GRATITUDE TO FOUR MEMBERS OF THE COAST GUARD

Mr. MURKOWSKI (for himself and Mr. STEVENS) submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 49

Whereas the United States Coast Guard provides lifesaving and coastal protection in time of war and peace;

Whereas members of the Coast Guard are exposed to extremely hazardous conditions in the performance of their duties; and

Whereas, on the occasion of Veteran's Day, it is appropriate to recognize the contributions and sacrifices made by four members of the Coast Guard who gave their lives in the service of their country: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress expresses its gratitude to—

(1) Aviation Machinist Mate, first class, Scott F. Finfrock of Fresno, California;

(2) Aviation Electrician's Mate, third class, John H. Snyder of Bethlehem, Pennsylvania;

(3) Lieutenant Ernest P. Rivas of Alameda, California; and

(4) Lieutenant Joseph P. Spoja of Oceanside, California,

who gave their lives while rescuing a crewman from a disabled fishing vessel during a storm at Prince William Sound, Alaska, on August 7, 1981.

Mr. MURKOWSKI. Mr. President, today I am submitting a special concurrent resolution commemorating the lives of four Coast Guardsmen who gave their lives in the line of duty. As the Senate has recessed to pay respect to all American veterans, it is my hope that the U.S. Coast Guard is also recognized for their outstanding service to this country.

Mr. President, I do not believe I can emphasize enough the importance of the service that the Coast Guard provides to this country. I had the honor of serving with the Guard in my State of Alaska. During that service I became aware of Alaska's 38,000 miles of coastline and many of the major problems confronting the Coast Guard in carrying out its assignments. As Congress continues its consideration of next year's appropriation for the Coast Guard, I would like to remind the Senate of the difficult tasks facing the Guard today.

Some of the richest fishing grounds in this country are located in my State. These grounds and their resources are greatly sought after by both domestic and foreign fishermen. As a result, the Coast Guard in Alaska is put in the difficult position of providing search and rescue service for domestic fishermen and Federal law enforcement for foreign fishermen. Let me assure the Senate that neither responsibility is easy.

This is dramatized by the unfortunate tragedy that occurred in Alaska on August 7, 1981. A domestic fishing vessel became disabled and adrift off Cordova, Alaska, in the Prince William Sound. The vessel called the Coast Guard for assistance. The Coast Guard's rescue coordination center launched a HH3F helicopter from the Coast Guard Air Station at Kodiak, Alaska.

Despite 35-foot seas, 40-knot winds, a 300-foot ceiling and one-quarter mile visibility, Coast Guard helicopter 1471 made several attempts to hoist a crewman from the disabled vessel, Due to the harsh conditions, the helicopter crashed, killing all four members of the crew. These heroic Coast Guardsmen gave their lives serving our citizens. Mr. President, this is typical of the many Coast Guardsmen who have given their lives in times of war and peace in the service of our country.

Mr. President, it is my hope that the Senate will recognize the great service of the Coast Guard and the risks attached thereto making its appropriation decisions. The Guard, on whom so many Alaskan communities depend, has found itself in the difficult position of "having to do more with less." There is an old saying that goes, "If you have a job you really want to get done, find the busiest person around and give it to him." This is the situation facing the Coast Guard today.

Congress and the executive branch have greatly increased the responsibilities in recent years. The decade of the seventies produced major legislation that requires active participation by the Coast Guard. For example, the Federal Water Pollution Control Act of 1970; the Federal Boat Safety Act of 1971; the Ports and Waterways Safety Act of 1972; the Deep Water Ports Act of 1974; the Port and Tanker Safety Act of 1978, and the Outer Continental Shelf Lands Act of 1978. In 1976, Congress passed the Fisheries Conservation and Management Act which expanded the Federal Fishery Conservation Zone from 12 to 200 miles.

In my State alone, the amount of new area to be patrolled is staggering. The Coast Guard was given responsibility for this increase. For many years the Coast Guard has been involved in a war against the illegal importation of drugs into this country, and recently the Guard has been asked to turn back the overwhelming influx of foreign immigration taking place in the gulf coast.

Mr. President, I want to inform the Senate that the Coast Guard has far fewer aircraft in operation today than it did in 1970. Today the Coast Guard operates 158 various aircraft, in 1970 there were 173 aircraft in operation. Mr. President, the average age of a current Coast Guard vessel is approximately 27 years.

Mr. President, Congress must not be content with the bare essential level of funding for the Guard. We must not be complacent about the extraordinary job being done by the Guard under extreme circumstances. How much longer can we expect the Coast Guard to do more with less?

SENATE RESOLUTION 244—RESOLUTION INCREASING THE LIMITATION ON EXPENDITURES BY THE SPECIAL COMMITTEE ON AGING FOR THE PROCUREMENT OF CONSULTANTS

Mr. HEINZ submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 244

Resolved, That section 2 of Senate Resolution 45, Ninety-seventh Congress, agreed to March 3, 1981, is amended by striking out "$25,000" and inserting in lieu thereof "$35,000".

SENATE RESOLUTION 245—RESOLUTION AUTHORIZING THE PRINTING OF A REPORT

(Referred to the Committee on Rules and Administration.)

Mr. STAFFORD submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 245

Resolved, That the annual report of the Secretary of Transportation to the Congress of the United States in compliance with section 144, chapter I of title 23, United States Code entitled, "Highway Bridge Replacement and Rehabilitation Program," be printed as a Senate document.

SEC. 2. There shall be printed five hundred additional copies of such report for use of the Committee on Environment and Public Works.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON THE CONSTITUTION

Mr. WEICKER. Mr. President, I ask unanimous consent that the Subcommittee on the Constitution of the Committee on the Judiciary be authorized to meet during the session of the Senate Monday, November 16, at 1:30 p.m., to hold a hearing on Senate Joint Resolutions 17, 18, 19, and 110, resolutions all dealing with abortion.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, November 16, at 2:15 p.m., to hold a confirmation hearing on the nominations of Milan Bish to be Ambassador to Barbados and to serve concurrently as Ambassador to Dominica, Saint Lucia, to Saint Vincent, the Grenadines, Antigua, and Barbuda;

Edwin Carr to be Ambassador to Bolivia; and

Melvin Evans to be Ambassador to Trinidad and Tobago.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Oversight of Government, of the Governmental Affairs Committee, be authorized to meet during the session of the Senate at 9 a.m. on Tuesday, November 17, to discuss United States-Canadian Trade Policies: The Impact on Border State Industries.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SEPARATION OF POWERS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Separation of Powers of the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, November 17, at 1:30 p.m., to hold a hearing on S. 675, a bill dealing with the Federal Jurisdiction Review and Revision Commission; S. 1538, a bill dealing with the Civil Rights Commission; and S. 1647, a bill dealing with busing.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

MS. DIANE GORE PROMOTED TO LINE CAPTAIN IN U.S. NAVAL RESERVE

● Mr. MURKOWSKI. Mr. President, I would like to take this opportunity to congratulate Ms. Diane Gore of Ketchikan, Alaska, who has been promoted to the position of line captain in the U.S. Naval Reserve. She was the only woman among eight to be promoted to line captain this year. I personally am pleased with her success because she is my sister-in-law.

Diane works as a civilian for the U.S. Army in Vincenza, Italy, and, in this capacity, is responsible for all dependent youth activities in the Southern European Army. On behalf of all Alaskans, I wish to express my pride in her most recent achievement.●

UNITED STATES-JAPANESE BILATERAL AIR TRANSPORTATION AGREEMENT NEGOTIATIONS

● Mr. PACKWOOD. Mr. President, on November 16, the United States and Japan will resume negotiations in Honolulu toward a revision of our bilateral air transportation agreement. The U.S. delegation is going to these talks with hopes that a solution can be reached during the week. This, of course, depends to an important extent upon the positions taken by the Japanese side.

In past discussions concerning the revision of this agreement, the United States has offered Japan access to new points in the United States and improved

rights to fly beyond points in this country to points in third countries.

At the same time, the Japanese have insisted that U.S. carriers' rights to fly beyond Japan should be restricted, and that capacity operated between the two countries should be predetermined by the two Governments rather than by the force of the marketplace.

The Japanese must realize that they cannot have it both ways: They cannot insist on pursuing a restrictive aviation policy in order to protect their carrier, and, simultaneously, expect to have virtually free access to the U.S. trading market.

Our delegation to the Honolulu talks has provided the Japanese with a series of papers which outline in general terms the directions in which we might find solutions to some of the most important remaining problems. With flexibility and good will on both sides, it should be possible to find an agreement which will expand the opportunities of both sides in this market.●

SCHOOL BOARDS SAY YES TO DEPARTMENT OF EDUCATION

● Mr. STAFFORD. Mr. President, even though the President has not yet submitted his proposal to abolish the Department of Education, considerable attention has been paid to this issue on both sides of the question.

The motives and justifications of both the proponents and the opponents of the Department are varied, but one assertion made by the opponents is that those who favor local control of our schools are supportive of abolishing the Department in order to return control of education where it belongs.

Local control may have become a shibboleth to some, but in this case, it is inaccurately applied as a justification for opposing the Department's existence. I know of few more energetic and effective voices for local educational policy than the National School Boards Association. In the accompanying editorial, Mr. Thomas A. Shannon, executive director of NSBA, not only argues for the retention of the Department of Education as a separate Cabinet agency, but he carefully refutes each of the four options the President is considering for abolishing the Department.

In his concluding comments, Mr. Shannon says:

NSBA believes the Cabinet-level Department of Education deserves a chance to prove itself.

I share those sentiments exactly, and commend to my colleagues Mr. Shannon's statement of why the Department is good for education.

I ask that his statement be printed in the RECORD.

The statement follows:

WHAT VAUDEVILLE SAYS ABOUT EDUCATION DEPARTMENT OPTIONS

(By Thomas A. Shannon)

The old burlesque routine in which the straight man asks "How's your wife?" and the comedian rejoins "Compared to what?" applies to the debate over the U.S. Department of Education.

The celebrated "options paper" of Secretary T. H. Bell that President Reagan is mulling over is said to describe four alternatives to the present department. When one compares these alternatives to the status quo, the department looks good indeed.

Let's ask the vaudeville comedian's question in reviewing the four options:

1. SEPARATE SUBCABINET EDUCATIONAL AGENCY

This alternative deprives education of being represented in the highest councils of our nation and cuts off education's access to the Oval Office. Moreover, as an agency independent of any department, it loses the strict accountability to the President that the department now has. Its capacity to issue federal regulations would not be diminished, but its independence would work against the ability of local school boards to influence the formulation of those regulations. And it would undercut lay citizen control of education by effectively detaching it from government and transforming it into a conclave of professionals who answer only to themselves—because a separate agency would be less responsive than a visible and politically accountable secretary.

2. FOLDING EDUCATION BACK INTO HEALTH AND HUMAN SERVICE

This would bring back the bad old days of HEW when education was tag-end Charlie behind health and welfare and U.S. commissioners of education came and went like baseball team managers. Each of the dozen or so former commissioners reflected negatively on their tenure because of the impotence they felt in managing the federal role in education.

Resentment

Local school people particularly resented the fact that they could reach agreement with the commissioner only to find later that the agreement had been vetoed or otherwise undercut by some office in the labyrinth that was HEW. Civil rights enforcement in the schools also was amuck—being done by people who knew nothing about how schools are governed and administered and were unaccountable to anybody who did.

3. DISPERSAL OF EDUCATION FUNCTIONS THROUGHOUT THE FEDERAL BUREAUCRACY

This option, which calls for the outright abolition of the U.S. Department of Education, is the most onerous of all. It is also anomalous because it would end cabinet status for education as an entity but ensure cabinet status for the several segments of education, albeit isolated from each other and buried under layers of different bureaucratic mire. As a practical matter, this option would be a local school person's administrative nightmare and result in increased costs both in local school boards and the federal government. Instead of dealing with a single department, local school board members and administrators would be shuffled from pillar to post in dealing with the Department of Labor, Interior, Health and Human Services, Justice, Agriculture, Energy, Commerce, and so on depending on precisely where the responsibility for the hundreds of educational programs now administered in the Department of Education would be dispersed.

Moreover, this option with the duplicative services inherent in it is more costly than a single department. And as to federal regulations, the old Palace Theatre line "you ain't seen nothin' yet!" would describe the situation where a plethora of departments, all with regulation authority, were turned loose to regulate their part of the education turf.

Not a cure

Contrary to what advocates of the dispersal option claim, the flow of bureaucratic confusion endemic to it cannot be cured by designating a White House "education policy coordinator" because that person, however well intentioned, would not be responsible for the administration of the program. More often than not, it is the administration of a federal program that generates problems—not the policy that undergirds it.

4. EDUCATION AS INDEPENDENT SUBCABINET FOUNDATION

A foundation has the same defects as the independent agency option. In addition it has other flaws. It would be impotent to respond to judicial mandates for development of court-ordered regulation because of the non-governmental nature of a foundation.

While a superficial reaction would be that such impotency is a good thing for education, the real result will be that the regulation-making authority will be exercised by the courts. And anybody with any experience under court orders affecting education knows that the courts perceive their role in formulating regulations as much broader than the specific issues being litigated and that their lack of knowledge of how public elementary and secondary schools operate results in incompetent regulations sometimes bordering on the bizarre and ridiculous.

Ivory towers

Moreover, there is a possibility that education could be folded into an existing foundation only obliquely related to education, such as in areas of arts and humanities or the National Science Foundation. Because foundations are research-oriented ivory towers, one can anticipate that a federal education foundation would disgorge impractical ideas on what constitutes "good" education inconsistent with the realities of operating a school program—especially if the foundation director had little knowledge of school programs. This has the potential of being a back-door way to introduce national curricula and tests and, in the long run, will cause endless headaches for local school boards.

We understand from the ubiquitous fog of rumors surrounding the White House's consideration of the "options paper" that a combination of the third and fourth options—creation of a weak education foundation and dispersal of the administration of major programs throughout the other departments—seems to be the favorite. Compared to that, how does the Cabinet-level Department of Education look now?

NSBA says it looks great! This conclusion is based on more than a decade's support of the Department of Education by the primary policy-making entity of NSBA—its Delegate Assembly. That support looks at the department as elevating education to the national priority which it deserves in light of necessary link between education, improved productivity, reindustrialization and better national defense.

The Department of Education places education in a visible and influential position; it assures strict accountability in the discharge of the limited federal role in education that is clearly spelled out in the law establishing the department. It introduces economy into the administration of federal education programs through fewer employees servicing duplicative programs. And the Education Department makes relations between local school boards and the federal government manageable from a local administrative perspective.

NSBA believes the Cabinet-level Department of Education deserves a chance to prove itself—especially when compared to the other four options.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million.

Upon receipt of such notification, the Congress has 30 calendar days during

which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such a notification was received on November 13, 1981.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room 4229 Dirksen Building.

I ask to have the notification printed in the RECORD.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 12, 1981.

In reply refer to: I-03060/81ct.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to an American Republic tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
Director.●

ANNIVERSARY OF BLACKSTONE VALLEY CHAMBER OF COMMERCE

● Mr. CHAFEE. Mr. President, there is an anniversary occurring in Rhode Island this month which I believe is of significance.

The Blackstone Valley Chamber of Commerce will mark the 100th anniversary of its founding on November 23.

It was exactly 100 years ago on that date that a group of business people from the area gathered at the music hall in Pawtucket and formed the Pawtucket Business Men's Association under the leadership of Franklin Steere, a well known local businessman.

From that modest beginning the chamber has grown into an organization of more than 1,100 members from the communities of Cumberland, Lincoln, Smithfield, Pawtucket, and Central Falls with a staff of 10 headquartered at 42 Park Place in Pawtucket.

There have been eight name changes during this century of service, and the chamber has evolved into an organization concerned with very aspect of life in the Blackstone Valley which is where the textile industry in the United States was born at Pawtucket's Slater Mill.

After becoming the first chamber in Rhode Island to be accredited by the U.S. Chamber of Commerce, the group undertook a public opinion poll of residents of the Blackstone Valley. The results showed that people living there were unhappy with the quality of life, particularly the educational system.

The result was a five pronged "action plan" which includes area planning, community improvement, economic development, political action, and general image improvement.

A major undertaking of the chamber was fostering of vocational education. The group spearheaded a study of vocational education needs which was expanded to include the entire State and campaigned for establishment of vocational schools in the area.

The chamber was a moving force behind the establishment of the North Central Air Park, an industrial park centered around the North Central State Airport in Smithfield and Lincoln. This was the first industrial park in the Nation to be constructed around an airport.

Chamber members have been active in the downtown Pawtucket project, an endeavor to renew the downtown area, and they are involved in development of Narragansett Industrial Park, a new unit on the site of a former race track in Pawtucket and East Providence, R.I.

For these efforts the chamber has been honored with the "Corning Commnuity Action Award on Volunteer Leadership," and its accreditation has been renewed by the U.S. Chamber every 5 years.

The reasons for the success of the chamber may be found in an editorial comment by the Pawtuckett Times in 1921. "There has never been in the long history of the group any cliques or divisions. Blotting out the Pawtucket Business Men's Association would almost be like blotting out the entire history of the area," wrote the newspaper.

Under the leadership of its current president, Charles S. Grossman, president of Dytex Chemical Co. in Central Falls, the chamber is beginning its second century of service, not only to the people of the Blackstone Valley but to all of Rhode Island.

Mr. President, the Blackstone Valley Chamber of Commerce not only is one of the oldest in the United States, but it is one of the most active and forward looking. I doubt that any has had a more positive impact on the area it serves.

Its tremendous success has stemmed from the willingness of its staff and members to become involved with every aspect of life in not only the Blackstone Valley but the entire State of Rhode Island. This determination to make life more fulfilling for all, plus the spirit of volunteerism permeating all its activities, have built a strong and vibrant organization making a significant contribution to the progress being made in the area.

I join with my fellow citizens in paying tribute to these outstanding men and women and wish them the same high degree of success in the centuries ahead.●

REGULATION OF ELECTRIC UTILITIES

● Mr. EAST. Mr. President, I submit today for my colleagues' benefit the text of a speech delivered by William W. Berry to the Edison Electric Institute's recent fall financial conference. Mr. Berry, president of Virginia Electric Power Co., has carved a reputation as an innovative and imaginative business leader.

Mr. President, the electric utilities are in dire need of help. They are heavily regulated, and thus are unable to instill more efficient reforms. Investors have scant reason to purchase stock in utilities because they can make more money at less risk elsewhere. Furthermore, utilities shy away from spending money to improve their systems because the cost of borrowing exceeds the likely return.

But all that can change, according to Mr. Berry, by deregulating electric generation. In his speech, he calls for an end to the system of monopolies that generates the country's electricity. He is of the opinion that the status quo should be replaced by a free market system of generating companies competing for business on a price basis through regional energy exchanges.

Mr. Berry provides a dramatic and intriguing alternative to the status quo that could very well ameliorate the industry's problems while simultaneously decreasing consumers' rates. To fully understand his proposal, Mr. President, I ask that his complete speech be printed in the RECORD.

The speech follows:

REMARKS OF WILLIAM W. BERRY

My subject today is regulation and competition in the electric utility industry.

You all know only too well what's happened to this industry in the last decade or so.

Inflation accelerated and interest rates rose to unprecedented levels. Capital-intensive industries were hit especially hard.

Productivity growth in the electric industry slowed. The main source of these gains had been increases in plant size. By the end of the 60s, these economies of scale were just about exhausted.

The cost of meeting environmental and safety regulations soared.

Fuel prices rose dramatically. And the shift in relative fuel prices quickly made a lot of generating units uneconomic.

With the rise in electric prices, growth in demand dropped. That on one hand reduced the opportunities to bring more efficient capacity into service and on the other meant capacity built for faster growth was underutilized.

As a result of all these developments we experienced a huge rise in unit costs.

These adverse developments combined with a regulatory process that is slow; backward looking, and responsive to political pressures to keep electric rates down.

For utilities that was truly a devil's brew.

The number and size of the industry's requests for rate relief increased and the proportion of the requests granted declined.

That, in a nutshell, is how the industry got to its present financial plight. And unless conditions change and change soon our financial infirmities will destroy our ability to provide reliable electric service.

At the moment the industry has sufficient capacity. Customers are being cushioned by the capacity planned and committed when the industry's condition was better and growth of demand was high.

But nowadays new building programs are carried out reluctantly, in defiance of economics and common sense.

No unregulated business would invest in a project that will earn less than it costs.

No unregulated business would repeatedly punish its stockholders by issuing stock at a fraction of book value.

Electric utilities are doing so only in deference to their legal and moral obliga-

tion to serve and, even then, in amounts that will not meet future electricity demand.

Some observers believe that the underlying causes of this situation are transitory or correctable within the existing regulatory system.

Barring loss of production from Saudi Arabia, fuel prices won't rise as fast as they did in the 70s. In any event, many utilities have achieved fuel clauses that allow at least partial pass through of fuel costs.

Regulators can be given statutory limits that will speed up consideration of rate requests. They can be required to adopt forward-looking test years or allow cash returns on construction work in progress.

Inflation may be brought under control and interest rates may fall and remain at lower levels. President Reagan assures us they will.

Regulatory costs may stabilize. Maybe some of the excesses of environmental regulation will be eliminated. Maybe more cost-effective means will be used to protect the environment and public health.

Technology may provide us with a new round of productivity improvements.

And maybe, just maybe, regulators will achieve a better grasp of the economics of our industry. Maybe they will become more resistant to political pressure and more conscious of the long-term relation between price and supply.

As you may have surmised, I rate some of these possibilities as a good deal more likely than others.

To the extent that any of these developments occur, they will be helpful.

And, of course, some already have. Here and there, we have statutory time tables, forward test years, and other positive changes. The Virginia Corporation Commission has just allowed Vepco to begin phasing out the non-cash allowance for funds used during construction. That was very welcome.

But I remain skeptical that we will be able to achieve the full range of regulatory reforms that will provide an adequate solution to our financial problems, especially in the face of strong political pressures.

Furthermore, you can have a quick decision based on a forward test year and still end up with a totally inadequate rate of return. As a matter of fact, the regulatory lag in cases before state utilities commissions decreased considerably in 1980. But the return on equity scarcely increased and the gap between the earned and authorized levels actually widened.

And to say that regulation works splendidly when inflation is low, productivity gains are high and electric costs are falling is to say that it works only when it is scarcely needed.

That's like a ship's navigation system that works only in fair weather and calm seas.

You might say regulation worked well in the fifties and early sixties. Its main task was to distribute the benefits of declining electric prices.

Even if—and this is a very big "if"—the regulatory process could be rejiggered to restore the industry to financial health, that would still not be the best of all possible worlds.

The deficiencies of regulation go beyond its current effect on industry finances.

Under regulation, the industry does not operate with optimal efficiency.

Apart from integrated companies and the most highly integrated power pools, the industry is not using existing generating capacity to produce electricity at the lowest possible cost.

This is conspicuous among independent companies outside power pools. Even in pools, their goal of completely economic dispatch is often frustrated by transmission bottlenecks and other constraints.

The activities of pools are governed by elaborate legal structures that emerge from years of tedious negotiation. There are often difficulties in allocating the cost of transmission lines. And operating practices that are best for the pool as a whole may not be best for individual companies.

New capacity has not been built where and by whom it can be built most efficiently. It has often been built by each utility for its own needs within that utility's service area.

A recent study by the Electric Power Research Institute of the theoretical capital cost of new coal-fired plants in 13 locations around the country estimated a cost difference of 25 percent.

A survey in connection with the same study found actual capital costs per kilowatt that differed by a factor of more than three among plants completed or to be completed in the same year.

Regulation does not generally provide incentives for operating efficiency. Its effects on efficiency seldom rise above second-guessing management decisions.

Under regulation, utilities lack incentives to risk-taking and innovation. The regulatory system deprives utility managers of the opportunity to increase market shares and profits through cost saving innovations. But it holds over their heads the possibility that operating failures may be blamed on "management mistakes" and taken out of the hide of the stockholders.

Under such a system, managers have an incentive to avoid the risks of technological and service innovations.

The combination of regulation, vertical integration and government subsidies allows a huge variation among regions of the country in prices and costs of a homogeneous product. Electricity prices vary by more than 800 percent from one area to another. It's almost like charging 50 cents for a loaf of bread in Seattle, $2 in San Antonio and $4 in New York.

When I speak of efficiency I mean that it would be possible to produce more electricity with the same resources or to produce the same amount with a smaller claim on society's resources.

Utilities are certainly not mismanaged today. But managers must make choices within a regulatory system that does not offer the incentives of a competitive system.

In the current institutional environment, utility managers necessarily suboptimize. That represents good management but bad economics.

Considering all of the effects of the current regulatory system, the results are these.

The real cost of electricity is higher than it needs to be.

The price that consumers see is below the real cost—so that consumers use more electricity than they should and resources are misallocated.

And, the industry is failing to build sufficient new capacity to meet the needs of the 90s—even after allowing for vigorous promotion of conservation and load management.

One response to this favored by some of my brethren is to diversify into unregulated businesses.

I understand that some of the utilities which are highly regarded in financial circles have that status because they have diversified.

Of course, diversification isn't a complete protection. Some regulators simply took the profits of non-regulated subsidiaries into account in setting electric rates.

The benefits of diversification got expropriated to further subsidize rates.

So now we see diversified companies spinning off their regulated utilities. The utilities will suffer whatever fate befalls them in an unchanged regulatory setting while their erstwhile parents go on to bigger and better things.

Diversification may be the answer for a few companies.

It can't solve the problem of the whole industry.

It can't answer the question of how America will get the electricity it needs for growth and higher standards of living and get it efficiently and reliably.

I think that answer lies in competition.

Let's open electricity generation to competition—with free entry, no franchises and no obligation to serve.

Electric power generation is no longer a natural monopoly.

Advances in power transmission have made competition among independent generators possible.

The deficiencies of regulation make competition highly desirable.

I think it's time to get out from under a regulatory system that hasn't been working isn't likely to work and would not serve the public interest as well as competition if it did work.

On other occasions I've set forth a scenario for competition in electric power generation that I believe would be practical.

Generating companies, consisting of new entrants as well as companies formed from existing utilities, would be linked to regulated distribution companies through regional energy brokers.

The brokers would own the transmission systems. They would make long and short term markets in energy and power not only within but among the regions.

But the principle of competition is more important than the specifics of any particular arrangement.

The reasons competition is superior to regulation are implicit in my criticism of the present structure.

But let me spell them out in positive terms.

Generating companies will be free to charge whatever they can get in the competitive market. As a result, price will be able to play its traditional role of balancing supply and demand.

If the distribution companies collectively believe too little power will be provided at current prices, they will bid them up.

Generating companies will invest in new capacity only if they believe they can earn an attractive return. If the price is too low, investments will not be made. Distribution companies will have to decide whether to pay more or adopt measures to restrain demand.

Prices will provide the signal and the incentive for investment. Prices passed through to consumers, will tell them what electricity really costs and they will adjust their demand in accord with these costs and their own preferences.

In short, we will have a mechanism for building the capacity that consumers are willing to pay for.

That mechanism will work as well for electricity generation as it does for other unregulated industries with large capital requirements and long-lead times.

Competition will also give us important efficiency gains in five areas.

First, utilities will be able to build less capacity than we will need under regulation. In a market system, the risk of error in forecasting future demand will be shared. Some companies will forecast too high, others too low, as they do today. But because their year-to-year errors can be smoothed out by trading through the energy broker, reserve margins can be cut.

Second, the competitive market will assure that new capacity is built by those who can do it most efficiently.

Inefficient, high cost producers won't get any business.

Plant sites will be shifted away from high cost areas, theoretically up to the point that the cost savings equal additional transmission expenses.

The oft-repeated claims that new technologies and dispersed power generators are cheaper than central station nuclear and

coal units will be tested in the market. Anyone with windmills or fuel cells or cogenerated power or anything else can enter the market if he can produce at a competitive price. The folks touting exotic schemes to provide ample power at more favorable costs will have to put up or shut up.

Along with the new opportunities and incentives for use of the lowest cost technologies for power production, distribution companies may provide conservation and load management services if these measures can meet future demand at a lower cost than new generating capacity.

Third, with short-term regional markets in power and energy, there will be a mechanism for making the best use of existing capacity.

Distribtuion companies could trade power and energy to minimize their costs without the complex, hard-to-achieve legal structures of the power pools. Brokers would have a profit incentive to possess the transmission facilities that could make profitable deals possible and to operate the region at minimum costs.

If, as I propose, the brokers' profits are shared with the distribution companies from which they buy low cost power, we will have created a profit incentive for distribution companies to always seek the optimal generation mix. The better they choose in contracting with generating companies for power, the more they and, presumably, their customers will gain.

Fourth, the competitive system will be more efficient for consumers in the sense that the electricity that they use will be worth as much at the margin as other products that might be produced with the same resources. That means customers won't use electricity when they would prefer something else if they knew electricity's true cost. In technical terms, I mean that the competitive market I envision will tend toward pricing electricity at its long-run marginal cost.

Fifth, the competitive system will provide incentives for everyday operating efficiencies that are largely lacking under regulation. The market system encourages a constant search for new and better ways of doing business. That is its genius. And it will produce efficiencies and benefits that no one can fully foresee.

The advantages I can predict are these:

For consumers, competition in electricity generation will mean that electricity shortages will be averted and that in the longer-term rates will be lower than they would be under regulation.

It will also mean some narrowing of the rate disparities among the different parts of the country.

In the short run, prices will rise because stockholders will no longer be subsidizing the price of electricity.

For the generating industry and its stockholders, there will be the opportunity to earn whatever profit efficiency and good management will bring.

Risks will certainly be greater. But even under regulation, the electric utility industry is not the low risk business it once was. And, to put it mildly, electric utility stockholders are not prospering under current regulation.

For government, there is an opportunity to shed a difficult, thankless and now unnecessary task. There is an opportunity to step up the lagging growth of productivity in the economy and to assure the power supply needed for economic growth.

Establishing competition in power generation would be supply-side economics in the best sense of that term. Of course competition based on economic performance can occur only if there is a level playing field. That means government subsidies through tax exemptions and preferential financing must end. They are not necessary and are not good public policy. And I hear the Federal budget could use the resulting revenues.

This is an indispensable condition. Unless we get rid of subsidized financing, a competitive market is impossible.

I'm conscious that what I am proposing is a sharp departure, that it upsets traditional patterns of thought, that it involves risks, uncertainties and many unsettled issues.

But surely 200 years of economic analysis and practical experience tell us that competition, whenever it is possible, serves the interest of society far better than government control. I think this places the burden of proof not on those who advocate competition but rather on the proponents of continued regulation.

So, to those in our industry and in government who share the goal of increased efficiency, economy and reliability in the generation of electrical energy, I say, "why not competition."

I'd like to take the risks, think the new thoughts and go for the benefits of competition that are surely there.

Thank you.●

RESEARCH IN TECHNOLOGY

● Mr. TSONGAS. Mr. President, I am concerned that we are not maintaining this Nation's competitive advantage in technology. America is not educating enough engineers and scientists to meet future needs. Moreover, Federal spending on basic research, measured in real dollars, has been falling for many years. This has eroded our competitive edge over Japan, West Germany, and other nations, and it has allowed one or more of them to surpass us in a number of areas. Given the trends, America's long-term prospects are discouraging.

At a recent National Academy of Sciences conference, Prof. Herman Feshbach, chairman of the physics department at MIT, made a compelling statement on the problems that our basic research is facing. If we fail to heed his warning, if we continue to reduce basic R. & D. funding, it will weaken our economy severely for years to come. I therefore ask my colleagues to consider the long-term importance of basic research as these appropriations bills come to the floor.

Mr. President, I ask that Professor Feshbach's statement be printed in the RECORD.

The statement follows:

REMARKS BY HERMAN FESHBACH

The budget levels proposed by the administration for this and the following fiscal years present, in effect, a plan to reduce the level of governmental expenditure and in particular those which support basic research in the sciences and technology. It is of course difficult to establish what the best level is in order to most effectively impact on our industrial technology, on national security, on medicine and more generally upon the well-being of our fellow citizens and their standard of living. However, it is useful to have some measure of what the projected consequences of the proposed reductions of 12 percent per year for a number of years are. I have a very succinct, easy to remember, summary to present to you.

In the physical sciences, the funding, manpower and the annual rate of Ph.D. degrees granted will be at or near the pre-Sputnik levels if the projected reductions are implemented.

On should bear in mind that in the same period the GNP in 72 dollars went from $736 billion in 1962 to $1432 billion in 1979. And that the number of Americans of working age (between 25 and 70) went from 83 million in 1960 to roughly 110 million in 1980.

The analysis (due to Professor Lee Grodzins) which leads to the above startling conclusion is based on the correlation between manpower numbers and Ph.D. production with the level of Federal funding as seen in the past two decades during which there has been a sharp rise and fall in Federal funding. One learns, for example, that a drop in two successive years of 9 percent each year (1969–1971) in the funding of the physical sciences led to a drop in the working Ph. D.'s by 15 percent. From these empirical data one can estimate the effect of 12 percent cuts. It does involve an extrapolation since the 12 percent cut for even a single year is unprecedented.

There have been real contradictions in the physical sciences and mathematics since 1967, leaving these areas in a significantly weakened condition.

(a) The number of Ph.D.'s awarded in 1980 in Physics and Astronomy is 985, down from the peak of 1740 in 1971.

(b) Of this 985, the number of Ph.D.'s awarded to U.S. citizens is 717, the same as in 1963. Virtually identical remarks can be made with respect to Chemistry and Engineering.

(c) The physics sub-field which seems to have been most badly affected is nuclear. The number of Ph.D.'s in 1980 was only 73 (240 at the maximum) of which only 57 were U.S. citizens. This is the same number as in the 1950's.

(d) More than 80 percent of the physics faculties are tenured. In 1973 the most probable age was about 35 while today it is close to 40.

The proposed 12 percent reductions will severely damage the national effort in the physical sciences:

(a) The level of Ph.D. production in the late 1980's will be reduced to what it was in 1961, that is to the level in the pre-Sputnik, pre-Galliland report era. A smaller proportion will be U.S. citizens.

(b) More than 90 percent of the physics faculties will be tenured, leaving less than 10 percent for our younger colleagues. The average age will continue to grow to the 45–50 range.

(c) The total number of working physicists is now about at the level of 1969. It will go down by more than 12 percent per year. In 2 years, this number will reach the 1965 level, in three years the levels of the early 1960's.

(d) The budget in 72 dollars after these deductions will be close to the pre-Sputnik levels.

It is difficult to see how such a program can be in the national interest.

In my opinion Grodzins underestimates the effect of the reductions in part because of the manner in which they are to be implemented over an extra-ordinarily short time period.

The word "manner" refers to the inflexible and rigid way in which the reduction is to be effected in the DOE. Each element in the budget is to be cut by 12 percent; no transfers between construction and operations; no transfers between research and development and so on, thus leaving the research managers little latitude to exploit their perception of the high priority elements of their programs. In addition the abrupt and sudden applications of the reductions prevents the development of a timely and rational plan of accommodation which would minimize their impact. If cuts are necessary, and I emphasize that any cuts will have adverse long-term effects, a slower, less impulsive, more adiabatic approach to a new funding level is in any event essential. The time period during which the change is made must not be much shorter than the natural time constants of our educational-research system. Those constants include: (1) The time to conduct an experimental program with a view toward obtaining a significant body of findings—a period of several years. (2) The time for a graduate education, typically 4 to

7 years. (3) The time for the construction of large facilities—several years. (4) The period over which such a facility would be useful scientifically—more than a decade. (5) The time to develop a team (in areas where this is necessary and that includes most) which can work harmoniously and effectively together—and again several to many years. Changes which occur over a period which is short compared to these natural time constants are unavoidably destructive. They are clearly wasteful—facilities which are effective are shut down—experimental programs are discontinued—theses are not completed—and teams which have been laboriously built up over many years scatter, never to return. Of particular importance, the young—the student, the post-doc, the assistant professor—see their hopes for a productive career in science compromised. And of course the science institutions cannot, because of the short time period, react so as to preserve the capabilities they have developed and managed. Experimental evidence gives a 10 yr. recovery time for the cuts of the early '70s.

These are the short-range and obvious effects. The long-range ones are truly serious as well. Young people will not enter the field of research in science and technology. The predicted reduction in Ph.D. production is in my opinion optimistic. There is every likelihood that it will be far worse. Indeed, why go into a field in which scientists of international reputation have or are losing their positions or their facilities for productive research? I also expect many senior scientists to leave the U.S. and work abroad.

The impact on U.S. science and upon high technology industry, on national security, on medicine is clear. These reductions lead to a weaker U.S. and to a lower standard of living.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million.

Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point a notification which has been received.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., November 9, 1981.

In reply refer to: I-03867/81ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-02, concerning the Department of the Air Force's proposed Letter of Offer to Thailand for defense articles and services estimated to cost $30 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

WALTER B. LIGON,
Acting Director.

TRANSMITTAL No. 82-02

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Thailand.

(ii) Total Estimated Value:

	In millions
Major defense equipment *	$17
Other	13
Total	30

* As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: One C-130H-30 aircraft with two spare engines, initial spares, training, and support.

(iv) Military Department: Air Force (SHA).

(iv) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Included in report for quarter ending September 30, 1981.

(viii) Date Report Delivered to Congress: November 10, 1981.

POLICY JUSTIFICATION

THAILAND—C-130H-30 AIRCRAFT

The Government of Thailand has requested the purchase of one C-130H-30 aircraft with two spare engines, initial spares, training, and support at an estimated cost of $30 million.

This sale is consistent with the U.S. policy of assisting the government of a friendly country which is a major force for peace and stability in Southeast Asia to provide for its defense against potential aggression by neighboring communist countries.

This procurement by the Government of Thailand, in addition to the C-130H aircraft previously purchased, will continue to enhance its airlift capability for long range transportation and air drop operations in counterinsurgency activities. The sale of C-130H-30 aircraft to Thailand will not alter the military balance in the region.

The prime contractor will be the Lockheed Corporation of Marietta, Georgia.

Implementation of this sale will require the assignment of one Contractor Engineering Technical Service (CETS) representative for a period of up to one year.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

THE SITUATION IN EL SALVADOR

● Mr. KENNEDY. Mr. President. I wish to call the attention of Members of the Senate to an article entitled "U.S. Chances Missed in El Salvador," by former Ambassador Murat Williams. which appeared in the October 30 edition of the National Catholic Reporter. As a former U.S. Ambassador to El Salvador, 1961-64. Ambassador Williams writes forcefully about a longstanding U.S. policy that fails to understand and, therefore, respond to the real situation in that Central American country now plagued by civil strife and bloodshed.

Ambassador Williams points out that—

The root of the problem in El Salvador lay in the great disparity between rich and poor—between the luxurious ease of one and the pitiful misery of the other . . .

And so the rich ruled with the support of the army, the church, and the American legation. Forgotten, according to the Ambassador, were:

The will and the consent of the people—something that the fuedal society did not have and seemed to regard with contempt . . . In all our efforts, our government put its trust in the wrong elements. Today we seem to continue to support the army and we ignore the people and even the role of the church, which has slowly come to reflect the true aspirations of the Salvadoran people.

In conclusion, Ambassador Williams makes an eloquent plea for us to face the fact that U.S. policy to solve El Salvador's problems with guns, helicopters, Green Beret training, and more military aid is "bankrupt." He calls on the United States to recognize that "a social problem as old as El Salvador's cannot be solved by force." It is the will of the people that must be heeded and all of them must participate in finding a solution.

I ask that Ambassador Williams' article be printed in the RECORD.

The article follows:

U.S. CHANCES MISSED IN EL SALVADOR

(By Murat Williams)

I want first to contend that the pathetic tragedy of El Salvador was predictable and predicted long ago, that its roots are deep in history, that they go back to a time when Fidel Castro had not been born and to a time when current superpower rivalry had not been dreamed of. Being predictable, this tragedy should have been averted.

I contend also that some U.S. officials, including one president, saw the dangers long ago, and that many U.S. officials struggled in the most urgent way possible to help avert the catastrophe which today has caused so much suffering for the Salvadorean people and so much concern for the U.S. Government. I contend that in 1964 control of our Latin American policy passed to officials who were—unlike their immediate predecessors—unwilling to see the danger and unable to take the measures necessary to maintain a policy that could help the Salvadorean people instead of adding to their troubles.

Finally, I want to sketch the shifting of forces that has, on one hand, made the predictable catastrophe more brutal and, on the other hand, made this catastrophe more open to solution.

Let me say a word about the role of U.S. policy. I do not argue that we have the right or even the power to shape the society of another people. I reject as unpardonable arrogance the often quoted remark of the otherwise praiseworthy Woodrow Wilson to a visiting British diplomat (about 1914): "I shall teach the South (sic) Americans to elect good men."

But the United States is great and powerful. El Salvador is small and powerless. What we do inevitably influences El Salvador. We exert our influence in many, many channels. Often it is an influence hard to resist.

The saintly Archbishop Oscar Romero said shortly before his assassination to one of his assistants, who repeated it to me, "What a pity that the United States, so close to us, has never done anything for our good." We should examine that statement closely.

The roots of the problem of El Salvador obviously lay in the great disparity between the rich and poor—between the luxurious ease of one and the pitiful misery of the other—between such conditions as those which in France caused the great revolution of 1789. As years passed, the ease of the rich grew greater. The land and labor of the people produced more coffee, more cotton, more sugar and more money. The poverty of the poor grew more bitter because, as the number of mouths to feed grew greater, the land to provide their food was less and less. Land had

gone from food to cash crops—even marginally productive land was taken over by growers of cash crops. People were hungry.

The misery boiled in a great cauldron. Machetes and guns could not keep the lid on. An explosion was inevitable.

In 1961, our government's Latin American policy was personally directed by President John Kennedy with close advisers who understood this growing danger. I say Kennedy himself because I was the first ambassador sent abroad after his inauguration and, in saying farewell to me in the privacy of his oval office in January 1961, the president remarked with great feeling: "Ambassador, I am glad you are going to Latin America. It is our number one problem."

In seeing this danger Kennedy and his administration were prepared to act to help governments dealing with the deep social problems of El Salvador and like countries.

We did not attempt to make decisions for the Salvadorean government, but when the government showed its willingness to work for social progress, we were at hand, ready to help with resources and technical assistance.

We did not—in the Kennedy years—tell the Salvadoreans to carry out a program of land reform. Nor did we tell them how to do it. We did not tell them to nationalize the central bank or the coffee company. We certainly did not tell them to enact minimum wage laws. But when they undertook needed reforms, we stood by them. It was their country and they must make the decisions.

When a new law set a minimum wage at $1 per day, a stream of rich coffee growers flowed into my office to protest—as if I had written the law. I asked if they wanted me to repeat their complaint to Washington. To do so, I noted, would simply draw Washington's attention to the appallingly low wages the pathetic workers already received.

Our simple policy of support for the government's reforms drew great fire from the rich. Our school building program as well as our health and housing projects were targets.

Quickly the anger of the rich was transmitted to Capitol Hill and to American diplomats who had earlier served in El Salvador. One of them, Robert C. Hill, came to San Salvador, representing an American corporation, and quite rudely told me I should go to the Casa Presidencial to bang on the desk and tell the president to slow down the reforms. Although I had known the wealthy oligarchs many years before he had, he presumed to tell me that I must urgently cultivate their friendship.

Another of my predecessors, Thomas C. Mann, told me when I stopped in Mexico en route back from consultation, that I was making a big mistake: "Murat," he said, "you should work more closely with the big families. After all, they have the power."

Tomas Regalado, a Salvadorean feudal lord, whose wealth was estimated in 1961 at well over $60 million, told Dan Kurzmann of the Washington Post that the U.S. government was making a big mistake: "You should not be building schools to educate the Salvadorean people. Our economy cannot support schools." After saying that, the wealthy Regalado sent his own sons to expensive private schools in the U.S.

Our support for social programs caused consternation among the very rich. Alfonso Rochac, the great Salvadorean economist, came to me one day and said: "The Catorce (the 14 families who own most of El Salvador's wealth) are furious with you. They have always depended on three supports: the army, the church and the American legation. Since you came they have lost the legation."

Please note Rochac's list of the pillars of Salvadorean society: the army, the church and the U.S. legation.

There was another structural element which he did not mention: the will and consent of the people—something that the feudal society did not have and seemed to regard with contempt. But we know that no society can be really stable without public support.

The three supports Rochac did mention had generally served merely to thwart the will of the people. Even the U.S. embassy, by throwing its weight to the feudal side, had often thwarted the popular will. So had certain elements of the church up to that time.

After the assassination of President Kennedy and after I left the country, the feudal landlords gained again the support of the American embassy.

President Lyndon Johnson placed in charge of Latin American policy that same Thomas C. Mann, who had told me in Mexico a year or so earlier that I should work more closely with the "14 Families." Under his policy, the embassy seemed to lose its interest in the people of El Salvador and to strengthen its ties with those on top of the feudal structure. The American government pursued the illusion of stability and thought it had it—largely because of its military policy.

Our military aid and training missions were so large that I had protested and urged Washington to reduce them. Although I had the support of Secretary of State Dean Rusk, the word of the Pentagon prevailed. The American generals insisted on large military missions in El Salvador and in neighboring countries—until finally the absurdity of the policy came to light with the ridiculous but bloody "soccer war" between two armies (Honduran and Salvadorean), each equipped, trained and supported by U.S. Army missions.

In all our efforts, our government put its trust in the wrong elements. Today we seem to continue to support the army and we ignore the people and even the role of the church, which has slowly come to reflect the true aspirations of the Salvadorean people.

During my last year in El Salvador, the great force of the church began to show itself on the side of the people's desire for social change. Its history since then is well known. Alas, the U.S. government has often chosen to belittle it.

In early 1980, I had a telephone call from a senior National Security Council officer of the Carter White House, who knew I was testifying against arms aid and wanted to make some "suggestions." In a brief conversation I quoted Archbishop Romero's objections to arms, even "non-lethal" aid. The senior official, whose name was Mr. Pastor, then said to me: "Archbishop Romero is naive." There you have it. The American government thought the great Salvadorean martyr was naive.

Today the U.S. government still seems to underestimate the Salvadorean church and its martyrs. We put our trust in the sword of the armed forces.

We are supporting an army guilty of its country's blood—an army with its hands stained by the blood of martyrs, of American nuns and of my friend Enrique Alvarez, a noble Salvadorean leader who was kidnapped on church property, tortured and murdered.

Our secretary of state, who has little knowledge of El Salvador, faced with these ugly facts about the Salvadorean armed forces, once even placed the blame for the murder of the nuns on the nuns themselves (killed, he suggested, while trying to run a roadblock—an utter absurdity).

Now are are backing the armed forces as they try to put the fig leaf of respectability on their regime by preparing for elections that can only be a farce.

Some people know more than our bureaucrats about how to solve the problem of El Salvador. First among such people I place the Salvadoreans themselves. They have lived with their problems. They are the country's intellectuals: professors, churchmen, doctors, lawyers and teachers, a high proportion of whom make up the combined opposition, once headed by Alvarez, now headed by Guillermo Ungo.

Under the plan in which the U.S. government seems to play an important role, such men would be effectively excluded from the solution of the Salvadorean problem.

The Mexican and French governments may understand El Salvador's needs better than we do. Those governments urge that Ungo and colleagues be recognized as a party to the settlement.

We really seem to want to solve the problem of El Salvador with guns, helicopters, Green Beret training and more military aid. Ours is a bankrupt policy. Since we have been pursuing it under both Carter and Reagan administrations, about 20,000 Salvadoreans have died violently.

The time has come to stop letting a clique of Salvadorean feudal lords and their American propagandists lead us by the nose into a deeper quagmire. The time has come to listen to the voices of reason, to recognize my old friend, Jose Napoleon Duarte, as an unfortunately powerless puppet, to recognize that a social problem as old as El Salvador's cannot be solved by force. To recognize that forgotten element, the will of the Salvadorean people. And to reach out the hand of friendship to Ungo, Fabio Castillo, Ruben Zamora, Roman Mayorga and bring them into our discussions.

A little humility will help us, and a little honest recognition that the time has come to stop thwarting the will of the Salvadorean people, friends who have struggled so long to be our good neighbors. The time has come to cast aside that arrogance that makes us believe we know more about El Salvador's problems than the Salvadoreans.

What more than this could serve our true national interest? For our true national interest must be to win, not the mere friendship of the oligarchs or the friendship of the blood-stained armed forces, but the friendship of the whole Salvadorean people.●

ALCOHOL AND DRUG ABUSE

● Mr. WEICKER. Mr. President, this letter was forwarded to me by Mr. Donald J. McConnell of Connecticut, president of the National Association of State Alcohol and Drug Abuse Directors and Executive Director of the Connecticut Council on Alcohol and Drug Abuse.

Mr. McConnell's statement makes a strong case for continued Federal direction and support from the Federal Government in the prevention, treatment and research of problems related to alcohol and drug abuse. Mr. McConnell also cites the additional hardships that will be placed on these programs should the Congress reduce available funds by an additional 12 percent as requested by the President.

I felt that this information deserved the attention of my colleagues and ask that the letter from Mr. McConnell be printed in the RECORD.

The letter follows:

NATIONAL ASSOCIATION OF STATE
ALCOHOL AND DRUG ABUSE DIRECTORS,
October 14, 1981.

Senator LOWELL P. WEICKER, Jr.,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: The problems of alcohol and drug abuse are pervasive and continue to damage American families, business and our armed forces. Recognition by the Con-

gress and the Federal government of these all-encompassing problems which often result in an unnecessary and costly drain on our economy and human resources, has resulted in the development of a fragile, but comprehensive alcohol and drug abuse prevention and treatment system within each State. Recently, the Federal role in the provision of these services was modified via the Omnibus Reconciliation Act of 1981 which authorized the transfer of prevention and treatment services responsibility from the Department of Health and Human Services into an alcohol, drug abuse and mental health block grant to the States.

Since you are a member of both the Committee on Labor and Human Resources and the Subcommittee on Appropriations for Labor, HHS and Education you are aware that the authorized funding level for the ADM block grant represents a 25 percent reduction from the total amount appropriated for these programs in FY 80. The States have reluctantly accepted the 25 percent reduction in Federal funds, however we feel that we have accepted our share of the burden to balance the Federal budget, and that the further reductions in appropriations for the ADM block grant recommended by the Senate Subcommittee on Appropriations for Labor, HHS and Education will severely disrupt the provision of quality and comprehensive alcohol and drug abuse services. The alcohol, drug abuse and mental health block grant is intended to transfer administrative responsibility to the States, not to transfer complete fiscal responsibility.

At the same time, the White House has revised its March budget requests and asked Congress to make an additional 12 percent cut in domestic discretionary programs. For alcohol and drug abuse the additional cuts would reduce the Federal share in support of these services by 37 percent. As I mentioned, the amount authorized by Congress in the Omnibus Reconciliation Act for the ADM block grant, $491 million, already represents a 25 percent reduction in Federal funds. The Senate Subcommittee on Appropriations has recommended an appropriation of $450 million for the block and the White House is now requesting that only $432 million be appropriated for these programs.

The Senate Subcommittee has also made significant reductions in appropriations for the Federal institutes responsible for conducting alcohol and drug abuse research activities—the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse. These reduced amounts are approximately $9 million or 20 percent less than the amounts requested by the Administration for these important programs. However, the Subcommittee's urge to balance the budget did not follow its actions in recommending increases in the National Institutes of Health's budget above and beyond the Administration's request.

The Federal executive branch and Congress have invested over a decade of substantial resources in the development of the present national alcohol and drug abuse prevention and treatment services network. Why should it now jeopardize a decade of progress by withdrawing support so rapidly that it cannot reasonably be expected to be replaced? Must we regress to the former days when individuals and families with alcohol and/or drug abuse problems were severely neglected by the health care system, precipitating a crisis that calls for even greater financial aid?

Sincerely,

DONALD J. MCCONNELL,
President.●

TRIBUTE TO DR. ERNEST M. ALLEN

● Mr. NUNN. Mr. President, on November 1, Dr. Ernest M. Allen, who for most of the last decade has been Associate Director for Extramural Programs of the National Library of Medicine, retired after 40 years of Federal service. During that long tenure, Dr. Allen compiled a record of innovative contributions to public health, to science, and to public administration that deserve recognition and praise, for his career stands as a model for all public servants.

A native of Texas, Dr. Allen was graduated magna cum laude from Emory University with a bachelor of philosophy degree in 1926, and subsequently he earned a master's degree from that distinguished institution which is in my State of Georgia. His Federal service began with the National Youth Administration, but in 1943 he joined the U.S. Public Health Service where his service earned him an honorary doctorate of science by Emory in 1956 and an honorary doctor of laws degree by Clemson Universary in 1968.

The very length of time during which Dr. Allen has served us all is impressive enough. But what is more noteworthy are some of the policies and programs that Dr. Allen helped to pioneer. Among the most important of these is the research grants program of the National Institutes of Health. Working with the Director of NIH, Dr. C. J. VanSlyke, during and immediately after World War II, Dr. Allen designed the research grants program which, from that day to this, has been the principal vehicle through which Federal support for biomedical research have been carried out. As a consequence of the brilliant yet simple design of this program, under which the best ideas of outstanding older and younger scientists about research on disease problems and possible scientific answers to them are tested, the status of our country's overall scientific enterprise remains preeminent in the world, and the advances in controlling disease and reducing health problems have accelerated dramatically. His central role in the design and evolution of the NIH grants program was recognized by the Albert Lasker Foundation which in 1953 asked Dr. Allen to accept, for the Division of Research Grants, an award to that unit in recognition of "brilliant administrative achievement of immeasurable value to public health."

Dr. Allen's extensive experience in several divisions of public health service resulted in his being asked, in 1968, to join the Office of the Assistant Secretary for Health and Scientific Affairs of the Department of Health, Education, and Welfare. He remained there for 5 years, including 3 years as Deputy Assistant Secretary for Grants Administration Policy from 1970 to 1973, before he returned to the National Institutes of Health and the National Library of Medicine. Over the last 8 years, he has worked with Dr. Martin Cummings, Director of the National Library of Medicine, to extend the reach and service of the Library of Medicine throughout this country and abroad, so that it stands today as the model for the dissemination of critically important medical and scientific information to doctors and other deliverers of health service, to scientists and administrators, and to all who need to know.

Mr. President, Ernest Allen is a very modest man. The scores of scientists, physicians, and administrators for whom he has served as a model and as an inspiration over the last 40 years very much wanted to honor him with a ceremonial sendoff into retirement, but he declined that opportunity, so that the only opportunity for his colleagues and admirers publicly to say thanks and farewell occurred a few days ago in the course of the annual meeting of the Board of Regents of the National Library of Medicine.

So he has now retired from public service, although all of us who know him expect that he will continue to be available to help advance the cause of health and science and the common good for the rest of his life, just as he has for the past 40 years. I simply wanted to call this brilliant record of service to the attention of all my colleagues and to people across the country, because Ernest Allen, as a person and a public servant, is someone of whom all Americans should be proud.●

CARBON MONOXIDE AUTOMOBILE EMISSION STANDARD

● Mr. HART. Mr. President, when the Committee on Environment and Public Works meets tomorrow morning to begin actual markup of amendments to the Clean Air Act. An amendment may be offered to relax the carbon monoxide (CO) automobile emission standard from the current level of 3.4 grams per mile to 7.0 grams per mile.

I will oppose that amendment, even though a relaxation of the CO emission standard is among the recommendations made by the National Commission on Air Quality. Since I generally support the NCAQ recommendations, I want to explain to my colleagues and to the public why I will vote against the relaxation of the CO standard.

In short, Mr. President, the automobile CO standard cannot be considered by itself, but must be considered in the context of the other, related issues which will determine the total level of carbon monoxide emissions in the Nation. These other issues include:

The carbon monoxide emission standard for heavy-duty trucks;

The carbon monoxide emission standard for light-duty trucks;

The requirements for complying with the national emission standards at high altitude; and

The requirement for automobile inspection and maintenance.

After reviewing all these issues, the National Commission on Air Quality adopted a package of recommendations dealing with the mobile source issues of the Clean Air Act. The package includes:

Affirmation of the tough heavy-duty truck CO emission standards scheduled to go into effect in 1984;

Retention of the requirement that automobiles sold in high altitude areas comply with the national emission standards there;

Proposal of a new requirement that light duty trucks be required to meet the national emission standards in high altitude areas;

Retention of the requirement of automobile inspection and maintenance in

the areas with most severe auto-related pollution problems; and

Relaxation of the automobile CO emission standard from 3.4 to 7.0 grams per mile.

The Commission adopted this package of recommendations after studying the effects on ambient CO levels of different mixtures of control strategies. Our studies showed that—with the adoption of the other elements in the package proposed by the Commission—it would be possible to relax the automobile CO standard without undercutting our Nation's needs for continued reductions in ambient CO levels.

The area of the country with the greatest CO levels—Los Angeles—would be unaffected by the change in the automobile emission standard, since California has its own set of automobile emission standards.

My own hometown of Denver is the area with the second highest level of CO concentrations. The CO levels exceed the national health-based ambient air quality standard 1 day in 3, with levels as high as three times the standard. It therefore is crucial that the new clean air legislation be at least as effective as the current Clean Air Act in reducing CO levels in Denver. This would be the case with the NCAQ recommendations, since the new high altitude requirements for trucks would compensate for the relaxation of the automobile CO standard.

Of course, other cities besides Los Angeles and Denver have serious CO problems. However, Commission studies show that compliance with the national air quality standards would be possible in these cities by the current statutory deadline of 1987 under the formula proposed by the Commission.

I emphasize that the Commission considered its mobile source recommendations as a package. The Committee on Environment and Public Works, and later the full Senate, also should consider the mobile source issues as interrelated issues.

Since the Commission's recommendations are a package, any change in one element of the package inherently affects the other elements of the package. This is why I was so concerned last April—the month after the Commission filed its report with Congress—when the administration announced, as part of its automobile industry relief package, its intention to roll back the CO emission standards for heavy-duty trucks. The administration's stated intention is to roll back this standard to a level which will not require the use of catalytic converters. This means the 1984 CO standard for heavy-duty trucks would represent about 60 percent control, of uncontrolled pollution levels, instead of 90 percent control. This difference would be enormous. The administration has not finalized its specific action, so it is impossible to quantify precisely its effect. However, it is possible to get an idea of the order of magnitude involved by comparing the average of 183 grams of CO per mile emitted by heavy-duty trucks meeting the current standards, which represent approximately a 40-percent level of control, with the expected average of 37 grams per mile which would be emitted by heavy-duty trucks meeting the 90-percent reduction standard.

In Denver, according to recent computer projections by the Colorado Department of Health, the relaxation of the truck standard could mean that Denver would never attain the health-based air quality standards, even if the other parts of the act were left intact.

If the automobile CO emission standard were relaxed in addition to this relaxation of the CO heavy-duty truck standard, the effects on CO levels throughout the Nation would be unacceptable.

In other words, Mr. President, the package proposed by the National Commission on Air Quality has already been upset by administrative action before Congress has even begun action on the Clean Air Act.

I continue to support the overall package of the NCAQ recommendations. I will propose in committee to remove from the statute the administrative discretion to roll back the heavy-duty truck CO standards. If this proposal is accepted, and if the legislation also includes the inspection-maintenance and high altitude requirements proposed by the Commission, I will support relaxation of the automobile standard in the eventual Senate-House conference, when it is clear that the final version of the legislation contains the elements necessary to make the relaxation of the automobile standard acceptable.●

ORDERS FOR TUESDAY

ORDER FOR RECESS UNTIL 10:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR PROXMIRE

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order, the Senator from Wisconsin (Mr. PROXMIRE) be recognized under a special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DESIGNATING PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, after the expiration of time allocated on the special order, there be a brief period for the transaction of routine morning business to extend not longer than 20 minutes, in which Senators may speak for not more than 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, am I correct in saying that at the conclusion of the time now ordered for morning business, the State, Justice, Commerce appropriations bill will recur as the pending business before the Senate?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, earlier today there was a colloquy between the Senator from South Carolina (Mr. HOLLINGS) and the Senator from Ohio (Mr. METZENBAUM), entered into a little later by the Senator from Pennsylvania (Mr. SPECTER).

After consultation with the parties involved, it appears that there is a desire to have that colloquy deleted from the official record. I ask, Mr. President, unanimous consent that that colloquy just described be deleted from the record.

Mr. ROBERT C. BYRD. Mr. President, this request is agreeable on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Now, Mr. President, there is one item of business on today's Calendar of General Orders which is marked for passage by unanimous consent. I am referring to Calendar Order No. 374, Senate Joint Resolution 34, a joint resolution to provide for the designation annually of National Patriotism Week. Could I inquire of the minority leader, is he in a position to consider that item at this time?

Mr. ROBERT C. BYRD. Mr. President, the resolution has been cleared on this side.

Mr. BAKER. I thank the leader.

NATIONAL PATRIOTISM WEEK

The Senate proceeded to consider the joint resolution (S.J. Res. 34) to provide for the designation annually of "National Patriotism Week," which had been reported from the Committee on the Judiciary with amendments, as follows:

On page 2, line 3, strike "each year", and insert "1982";

On page 2, strike line 4, through and including line 5;

On page 2, line 6, strike "3.", and insert "2.";

On page 2, line 8, strike "of each year", and insert "1982".

So as to make the joint resolution read:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the joint resolution of October 10, 1980, Public Law 96-421, 94 Stat. 1798, is amended by striking "1981" and inserting "1982".

SEC. 2. The title of such joint resolution is amended to read as follows: "Joint resolution to designate the week commencing with the third Monday in February 1982 as 'National Patriotism Week'."

The amendments were agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read "Joint resolution to provide for the designation of the week commencing with the third Monday in February 1982 as 'National Patriotism Week'.".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution, as amended, was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I inquire of the minority leader if he would be in a position to consider nominations which are cleared on this side of the aisle beginning on page 3, under New Reports, Department of State, and continuing through the remainder of that page.

Mr. ROBERT C. BYRD. Mr. President, there is no objection to so proceeding.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Now, Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering certain agreements in connection with treaties and votes thereon and the nominations just identified.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—CERTAIN TREATIES ON THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I ask unanimous consent that the nine treaties on the Executive Calendar, treaties Nos. 11, 12, 13, 14, 15, 16, 17, 18, and 19 be advanced through their various parliamentary stages, up to and including the presentation of the resolutions of ratification, and that all committee understandings, reservations, and amendments be deemed agreed to, and that no other action occur on the resolutions with the exception of a vote on the resolutions of ratification.

The PRESIDING OFFICER. Without objetion, it is so ordered.

Mr. BAKER. Further, I ask unanimous consent that on Wednesday, Nov. 18, at 11:30 a.m., the Senate go into executive session to conduct one rollcall vote, which will count for nine rollcall votes on the following resolutions of ratification: Executive Calendar Nos. 11, 12, 13, 14, 15, 16, 17, 18, and 19.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Following the 11:30 a.m. rollcall vote, and a motion to table the motion to reconsider, I ask unanimous consent that the Senate resume legislative session and return to the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Finally, I ask unanimous consent that it may be in order now to order the yeas and nays on the nine resolutions of ratification identified above.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, may I inquire of the distinguished majority leader, will there be an explanation of the various treaties before the Senate prior to the vote?

Mr. BAKER. Yes, Mr. President. The minority leader is exactly right. I should have included that in the request.

Mr. President, I ask unanimous consent that an explanation of each treaty to be given by the distinguished chairman of the committee, Senator PERCY, may appear in the RECORD in connection with the consideration of each of the resolutions of ratification.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator asked for the yeas and nays?

Mr. BAKER. Yes, I ask for the yeas and nays now on the treaties.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Without objection, the treaties will be considered to have passed through the various parliamentary stages up to and including the presentation of the resolutions of ratification, which the clerk will state.

The legislative clerk read as follows:

RESOLUTIONS OF RATIFICATION

AGREEMENT EXTENDING FOR 8 MONTHS PROVISIONS OF THE TREATY OF FRIENDSHIP AND COOPERATION WITH SPAIN

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Agreement Extending for Eight Months Provisions of the Treaty of Friendship and Cooperation with Spain, effected by an exchange of notes at Madrid on September 4, 1981.

TAX CONVENTION WITH THE PEOPLE'S REPUBLIC OF BANGLADESH

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention with the People's Republic of Bangladesh for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, signed at Dacca on October 6, 1980 (Ex. Y, 96th Cong., 2d session), subject to the following:

1) understanding that if the Government of Bangladesh agrees in treaties or other agreements with other countries to reductions in tax at source on profits from the operation of ships in international traffic, the Government of Bangladesh agrees to reopen negotiations with the United States with a view to the conclusion of a protocol which would extend to residents of the United States deriving such profits the same treatment granted to residents of such other countries.

2) understanding that appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

TAX CONVENTION WITH THE ARAB REPUBLIC OF EGYPT

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention with the Arab Republic of Egypt for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, signed at Cairo on August 24, 1980 (Ex. U, 96th Cong., 2nd session), subject to the following:

1) understanding that appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

2) reservation that notwithstanding the provisions of paragraph (3) of Article 7 of the convention (which relates to the taxation of gains from the alienation of shares of a corporation or of an interest in a partnership, estate, or trust, the property of which consists, directly or indirectly, principally of real property situated in one of the countries), gain derived by a resident of a Contracting State, from the alienation or other disposition of an interest in a corporation, or an interest in a partnership, trust, or estate, which has an interest in real property located in the other Contracting State, or the assets of which are considered under the domestic law of that other Contracting State to consist, in whole or in part, of real property, or an interest therein, in that other State, may be taxed by that other State to the extent provided for by its domestic law. In addition, gain derived by a corporation which is a resident of a Contracting State upon the distribution (including a distribution in liquidation or otherwise) of an interest in real property (as determined under the domestic law of the other Contracting State) may be taxed by that other Contracting State to the extent provided for by its domestic law.

TAX CONVENTION WITH THE FEDERAL REPUBLIC OF GERMANY

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Tax Convention with the Federal Republic of Germany, signed at Bonn on December 3, 1980 (Treaty Document 97–1), subject to the understanding that appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities subject only to the limitations and procedures of the Internal Revenue Code.

TAX CONVENTION WITH THE STATE OF ISRAEL

PROTOCOL AMENDING THE 1975 TAX CONVENTION WITH ISRAEL

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention signed at Washington on November 20, 1975, between the Government of the United States of America and the Government of the State of Israel with Respect to Taxes on Income (Ex. C, 94th Cong., 2nd session), and the Protocol Amending the Income Tax Convention with Israel (Ex. M, 96th Cong., 2nd session), subject to the understanding that appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty and protocol where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

INCOME TAX TREATY WITH THE REPUBLIC OF MALTA

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty with the Republic of Malta with Respect to Taxes on Income, signed at Valletta on March 21, 1980, subject to the following:

(1) amendment to paragraph 5(c) of Article 10 of the Treaty, so as to read as follows:

"(c) the dividends are paid out of profits attributable to one or more permanent establishments of such company in that State, provided that the gross income of the company attributable to such permanent establishment constituted at least 50 percent of the company's gross income from all sources."

(2) understanding that appropriate Congressional committees and the General Ac-

counting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

TAX CONVENTION WITH THE KINGDOM OF MOROCCO

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Tax Convention with the Kingdom of Morocco, signed at Rabat on August 1, 1977, together with a related exchange of notes (Ex. H, 95th Cong., 2nd session), subject to the following:

(1) reservation that foreign tax credits shall not be allowed after January 1, 1988, for loans which U.S. taxpayers are required to make to the Government of the Kingdom of Morocco.

(2) understanding that appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

PROTOCOL AMENDING THE 1971 TAX CONVENTION WITH THE KINGDOM OF NORWAY

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Protocol Amending the Tax Convention with the Kingdom of Norway (signed at Oslo on December 3, 1971), which Protocol was signed at Olso on September 19, 1980 (Ex. Z, 96th Cong., 2nd session), subject to the understanding that appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

DEPARTMENT OF STATE

(NEW REPORTS)

Mr. BAKER. Mr. President, I ask that the Chair now lay before the Senate the nominations under New Reports on page 3, and I ask unanimous consent that the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF STATE

Kenneth L. Adelman, of Virginia, to be Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

John Sherman Cooper, of Kentucky, to be Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

Benjamin A. Gilman, U.S. Representative from the State of New York, to be Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

Andy Ireland, U.S. Representative from the State of Florida, to be Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

Jeane J. Kirkpatrick, of Maryland, to be a Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

Bruce F. Caputo, of New York, to be an Alternate Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

George Christopher, of California, to be an alternate Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

Charles M. Lichenstein, of the District of Columbia, to be an Alternate Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

William Courtney Sherman, of Virginia, to be an Alternate Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

Jose S. Corzano, of Virginia, to be an Alternate Representative of the United States of America to the 36th session of the General Assembly of the United Nations.

Mr. BAKER. Now, Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, on tomorrow, the Senate will meet at 10:30 a.m. After recognition of the two leaders under the standing order, the distinguished Senator from Wisconsin (Mr. PROXMIRE) will be recognized under a special order for 15 minutes. After the expiration of the time allocated to the Senator from Wisconsin on special order, there will be a period of not to exceed 20 minutes in length for the transaction of routine morning business, in which Senators may speak for not more than 3 minutes each.

At the expiration of the time for the transaction of routine morning business, the Senate will resume consideration of the State-Justice-Commerce appropriations bill. It is hoped and expected that other matters can and will be brought before the Senate tomorrow.

Tomorrow will be a full day, Mr. President. I hope the Senate will not be asked to remain late. However, I reiterate the notice given on this past Friday that, for the balance of this session, the leadership cannot attempt to maintain Thursday as the only late evening in the course of a regular week.

RECESS UNTIL 10:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I see no Senator seeking recognition. I assume there is no further business that can be transacted by the Senate this evening. I therefore move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10:30 a.m. tomorrow.

The motion was agreed to and, at 6:31 p.m., the Senate recessed until Tuesday, November 17, 1981, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate November 16, 1981:

DEPARTMENT OF THE TREASURY

C. T. Conover, of California, to be Comptroller of the Currency for a term of 5 years, vice John Gaines Heimann, resigned.

VETERANS' ADMINISTRATION

Charles Timothy Hagel, of the District of Columbia, to be Deputy Administrator of Veterans' Affairs, new position.

THE JUDICIARY

Jules G. Körner III, of Maryland, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office; new position—Public Law 96-439 of October 13, 1980.

Perry Shields, of Tennessee, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office; new position—Public Law 96-439 of October 13, 1980.

Meade Whitaker, of Michigan, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office; new position—Public Law 96-439 of October 13, 1980.

Edward R. Becker, of Pennsylvania, to be U.S. circuit judge for the third circuit vice Max Rosenn, retired.

DEPARTMENT OF JUSTICE

Christopher K. Barnes, of Ohio, to be U.S. attorney for the southern district of Ohio for the term of 4 years, vice James C. Cissell.

Richard C. Turner, of Iowa, to be U.S. attorney for the southern district of Iowa for the term of 4 years, vice Roxanne Barton Conlin, resigned.

James P. Jonker, of Iowa, to be U.S. Marshal for the northern district of Iowa for the term of 4 years, vice John A. Roe, resigned.

Wallace L. McLendon, of Florida, to be U.S. Marshal for the northern district of Florida for the term of 4 years, vice Emmett E. Shelby, term expired.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 16, 1981:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

C. Everett Koop, of Pennsylvania, to be Medical Director in the Regular Corps of the Public Health Service, subject to qualifications therefor as provided by law and regulations, and to be Surgeon General of the Public Health Service, for a term of 4 years.

UNITED NATIONS

The following-named persons to be Representatives and Alternate Representatives of the United States of America to the 36th session of the General Assembly of the United Nations; to which offices they were appointed during the last recess of the Senate:

Representatives:

Kenneth L. Adelman, of Virginia.

John Sherman Cooper, of Kentucky.

Benjamin A. Gilman, U.S. Representative from the State of New York.

Andy Ireland, U.S. Representative from the State of Florida

Jeane J. Kirkpatrick, of Maryland.

Alternate Representatives:

Bruce F. Caputo, of New York.

George Christopher, of California.

Charles M. Lichenstein, of the District of Columbia.

William Courtney Sherman, of Virginia.

Jose S. Corzano, of Virginia.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

H.R. 3210

The text of the bill (H.R. 3210) as passed, is as follows:

H.R. 3210

Resolved, That the bill from the House of Representatives (H.R. 3210) entitled "An Act to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes", do pass with the following amendment: Strike out all after the enacting clause, and insert:

Sec. 101. This Act may be cited as the "Federal-Aid Highway Improvement Act of 1981".

revision of authorization for appropriations for the interstate system

Sec. 102. (a) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,200,000,000 for the fiscal year ending September 30, 1983", and all that follows through the period at the end of the sentence and by inserting in lieu thereof the following: "the additional sum of $3,100,000,000 for the fiscal year ending September 30, 1983, the additional sum of $3,500,000,000 for the fiscal year ending September 30, 1984, the additional sum of $3,400,000,000 for the fiscal year ending September 30, 1985, the additional sum of $3,400,000,000 for the fiscal year ending September 30, 1986, the additional sum of $3,500,000,000 for the fiscal year ending September 30, 1987, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1988, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1989, and the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1990.".

(b) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding at the end thereof the following: Section 103 of title 23, United States Code, is amended by adding the following new subsection:

"(g) The obligation of funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, after the date of enactment of this subsection, except for advance construction interstate projects approved prior to enactment of this subsection, shall be limited to essential construction necessary to complete routes and portions on the Interstate System. Essential construction consists of (1) full access control; (2) a pavement design to accommodate the types and volumes of traffic anticipated for the twenty-year period from date of authorization of the initial basic construction contract; (3) essential environmental requirements; and (4) a design of not more than six lanes in rural areas and all urbanized areas under four hundred thousand population, and up to eight lanes in urbanized areas of four hundred thousand population or more as shown in the 1980 Federal census. The obligation of funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956 shall be further limited to the design concepts, locations, geometrics, and other construction features included in the 1981 Interstate Cost Estimate.".

(c) Section 104(b)(5)(A) of title 23, United States Code, is amended by adding at the end thereof the following new sentence:

"Notwithstanding any other provisions of this subparagraph, the Secretary in making the revised estimate of the cost of completing the then designated Interstate System for the purpose of transmitting it to the Senate and House of Representatives within ten days subsequent to January 2, 1983, or thereafter, shall include only those costs eligible for funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, and as further amended by section 102(b) of the Federal-Aid Highway Improvement Act of 1981.".

authorization of use of cost estimates for apportionment of interstate funds

Sec. 103. The Secretary of Transportation shall apportion for the fiscal years ending September 30, 1983, and September 30, 1984, the sums authorized to be appropriated for such periods by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in table of Committee Print of the Committee on Public Works and Transportation of the House of Representatives.

HIGHWAY AUTHORIZATIONS

Sec. 104. (a) Each of the authorizations for the fiscal year ending September 30, 1982, contained in section 104 of the Federal-Aid Highway Act of 1978 is hereby repealed. For the purpose of carrying out the following provisions of title 23, United States Code, the following sums are authorized to be appropriated out of the Highway Trust Fund:

(1) For the Federal-aid primary program, $1,500,000,000 for the fiscal year ending September 30, 1982, $1,500,000,000 for the fiscal year ending September 30, 1983, $1,600,000,000 for the fiscal year ending September 30, 1984, $1,600,000,000 for the fiscal year ending September 30, 1985, and $1,600,000,000 for the fiscal year ending September 30, 1986.

(2) For the Federal-aid rural program, $525,000,000 for the fiscal year ending September 30, 1982, $500,000,000 for the fiscal year ending September 30, 1983, $500,000,000 for the fiscal year ending September 30, 1984, $500,000,000 for the fiscal year ending September 30, 1985, and $400,000,000 for the fiscal year ending September 30, 1986.

(3) For the Federal-aid urban program, $725,000,000 for the fiscal year ending September 30, 1982, $700,000,000 for the fiscal year ending September 30, 1983, $700,000,000 for the fiscal year ending September 30, 1984, $700,000,000 for the fiscal year ending September 30, 1985, and $600,000,000 for the fiscal year ending September 30, 1986.

(4) For forest highways, $34,000,000 for the fiscal year ending September 30, 1982, $34,000,000 for the fiscal year ending September 30, 1983, $34,000,000 for the fiscal year ending September 30, 1984, $34,000,000 for the fiscal year ending September 30, 1985, and $34,000,000 for the fiscal year ending September 30, 1986.

(5) For public lands highways, $16,000,000 for the fiscal year ending September 30, 1982, $16,000,000 for the fiscal year ending September 30, 1983, $16,000,000 for the fiscal year ending September 30, 1984, $16,000,000 for the fiscal year ending September 30, 1985, and $16,000,000 for the fiscal year ending September 30, 1986.

(6) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, $775,000,000 for the fiscal year ending September 30, 1982, $1,100,000,000 for the fiscal year ending September 30, 1983, $1,300,000,000 for the fiscal year ending September 30, 1984, $1,300,000,000 for the fiscal year ending September 30, 1985, and $1,300,000,000 for the fiscal year ending September 30, 1986.

(7) For the highway safety improvement program, $100,000,000 for the fiscal year ending September 30, 1982, $100,000,000 for the fiscal year ending September 30, 1983, $50,000,000 for the fiscal year ending September 30, 1984, $50,000,000 for the fiscal year ending September 30, 1985, and $50,000,000 for the fiscal year ending September 30, 1986.

(8) For carrying out section 215(a) of title 23, United States Code—

(A) for the Virgin Islands, not to exceed $5,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(B) for Guam, not to exceed $5,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(C) for American Samoa, not to exceed $1,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(9) For the Commonwealth of the Northern Mariana Islands, not to exceed $1,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986. Sums authorized by this paragraph shall be expended in the same manner as sums authorized to carry out section 215 of title 23, United States Code. Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(b)(1) For each of the fiscal years 1983, 1984, 1985, 1986, and 1987, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(2) Subsection (g) of section 144 of title 23, United States Code, is amended as follows:

"(g) Of the amount authorized per fiscal year, for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, all but $200,000,000 for fiscal years 1982, 1983, 1984, 1985, and 1986 shall be apportioned as provided in subsection (e) of this section; $200,000,000 for fiscal years 1982, 1983, 1984, 1985, and 1986 of the amount authorized shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such sums shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement and rehabilitation cost of each of which is more than $10,000,000 and for any project for a highway bridge replacement or rehabilitation cost of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Not less than 15 per centum of the amount apportioned to each State in a fiscal year shall be expended for projects to replace or rehabilitate bridges located on public roads other than those on public roads

functionally classified as arterials or major collectors. The Secretary after consultation with State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on public roads functionally classified as arterials or major collectors when he determines that such State has inadequate needs to justify such expenditure.".

(3) Paragraph (3) of section 202 of the Highway Safety Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982." and inserting in lieu thereof the following: "and September 30, 1981.".

(4) Paragraph (6) of section 202 of the Highway Safety Act of 1978 is amended by striking out "$1,300,000,000 for the fiscal year ending September 30, 1981, and $900,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof the following: "and $1,300,000,000 for the fiscal year ending September 30, 1981.".

(5) Paragraph (8) of section 202 of the Highway Safety Act of 1978 is amended by striking out "$150,000,000 for the fiscal year ending September 30, 1981, and $200,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof the following: "and $150,000,000 for the fiscal year ending September 30, 1982.".

(c) The unobligated balance of contract authority established in paragraph (15) of section 104(a) of the Federal-Aid Highway Act of 1978 shall lapse September 30, 1981.

(d) Section 203(b) of the Highway Safety Act of 1973, as amended by section 203(a) of the Highway Safety Act of 1978, is amended by striking out "September 30, 1981, and September 30, 1982." and inserting in lieu thereof "and September 30, 1981.".

(e) Section 163 of the Federal-Aid Highway Act of 1973, as amended by section 134(c) of the Federal-Aid Highway Act of 1978, is further amended by striking out "$100,000,000 for the fiscal year ending September 30, 1981, and $100,000,000 for the fiscal year ending September 30, 1982, except that" and inserting in lieu thereof "and $100,000,000 for the fiscal year ending September 30, 1981, except that".

(f) Section 141(i) of the Federal-Aid Highway Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982," and inserting in lieu thereof "and September 30, 1981,".

interstate system resurfacing apportionment

Sec. 105. Section 104(b)(5)(B) of title 23, United States Code, is amended to read as follows:

"(B) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

"60 per centum in the ratio that lane miles on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such lane miles in all States; and 40 per centum in the ratio that vehicle miles traveled on lanes on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such vehicle miles in all States. Notwithstanding the preceding sentence, no State excluding any State that has no interstate lane miles shall receive less than one-half of 1 per centum of the total apportionment made by this subparagraph for any fiscal year.".

interstate system resurfacing authorization

Sec. 106. Section 105 of the Federal-Aid Highway Act of 1978 is amended to read as follows: "In addition to any funds authorized to be appropriated, there is authorized to be appropriated out of the Highway Trust Fund, not to exceed $175,000,000 per fiscal year for each of the fiscal years ending September 30, 1980, and September 30, 1981, not to exceed $275,000,000 for the fiscal year ending September 30, 1982, not to exceed $875,000,000 for the fiscal year ending September 30, 1983, not to exceed $1,300,000,000 for the fiscal year ending September 30, 1984, not to exceed $1,700,000,000 for the fiscal year ending September 30, 1985, not to exceed $1,700,000,000 for the fiscal year ending September 30, 1986, and not to exceed $2,200,000,000 for the fiscal year ending September 30, 1987. Such sums shall be obligated for projects for resurfacing, restoring, rehabilitating, and reconstructing routes of the Interstate System designated under sections 103 and 139(c) of title 23, United States Code (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978), except that where a State certifies to the Secretary that any part of such sums are in excess of the needs of such State for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System and the Secretary accepts such certification, such State may transfer sums apportioned to it under section 104(b)(5)(B) to its apportionment under section 104(b)(1) of title 23, United States Code. Such sums may also be obligated for projects for resurfacing, restoring, rehabilitating and reconstructing a toll road which has been designated as a part of the Interstate System if an agreement satisfactory to the Secretary of Transportation has been reached with the State highway department and any public authority with jurisdiction over such toll road prior to the approval of such project that the toll road will become free to the public upon the collection of tolls sufficient to liquidate the cost of the toll road or any bonds outstanding at the time constituting a valid lien against it, and the cost of maintenance and operation and debt service during the period of toll collections. The agreement referred to in the preceding sentence shall contain a provision requiring that if, for any reason, a toll road receiving Federal assistance under this section does not become free to the public upon collection of sufficient tolls, as specified in the preceding sentence, Federal funds used for projects on such toll road pursuant to this section shall be repaid to the Federal Treasury.".

INTERSTATE SYSTEM RESURFACING

Sec. 107. (a) Section 119(a) of title 23, United States Code, is amended by striking out the words "and rehabilitating" and by inserting in lieu thereof the words "rehabilitating, and reconstructing" and by striking out the words "those lanes in use for more than five years on the Interstate System" and inserting in lieu thereof the words "routes of the Interstate System designated under sections 103 and 139(c) of this title.".

(b) Section 119 of title 23, United States Code, is further amended by adding the following new subsection:

"(b) Reconstructing as authorized in subsection (a) of this section may include, but is not limited to, the addition of travel lanes and the reconstruction of interchanges and overcrossings along existing completed interstate routes, including the acquisition of right-of-way where necessary.".

HOLD HARMLESS—INTERSTATE RESURFACING

Sec. 108. (a) The amount a State, excluding any State that has no interstate mileage, receives by apportionment on October 1, 1981, under section 104(b)(5)(B) of title 23, United States Code, shall be sufficient to assure that its total apportionments under section 104(b)(5) of title 23, United States Code, are not less than that which would have been made on October 1, 1981, to such State under section 104(b)(5) of title 23, United States Code, prior to the enactment of this Act.

(b) There is hereby authorized to be appropriated out of the Highway Trust Fund, $100,000,000 for the fiscal year ending September 30, 1983, to carry out this section. Funds authorized to be appropriated by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code.

INTERSTATE SUBSTITUTION AUTHORIZATION

Sec. 109. (a) In addition to any funds authorized to be appropriated out of the general fund, there is authorized to be appropriated, out of the Highway Trust Fund, for substitute highway projects under section 103(e)(4) of title 23, United States Code, $225,000,000 for the fiscal year ending September 30, 1983, $250,000,000 for the fiscal year ending September 30, 1984, $250,000,000 for the fiscal year ending September 30, 1985, and $300,000,000 for the fiscal year ending September 30, 1986. Funds authorized to carry out this section shall be available for obligation in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(b)(1) The first sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which is within an urbanized area or which passes through and connects urbanized areas within a State and".

(2) The second sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which will serve the urbanized area and the connecting nonurbanized area corridor from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or area to be served, and which are submitted by the Governor of the State in which the withdrawn route was located." and inserting in lieu thereof, "which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or areas to be served if the withdrawn interstate route or portion thereof was within an urbanized area or passed through and connected urbanized areas, which are selected by the Governors of the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Governors of the States in which the withdrawn route was located.".

(c) Section 103(e)(4) of title 23, United States Code, is amended by adding at the end of such subsection the following: "Any route or segment thereof added to the Interstate System after March 7, 1978, pursuant to specific legislation will not be eligible for withdrawal and substitution under this subsection.".

(d) The first sentence of section 120(d) of title 23, United States Code, is amended by inserting after the words "traffic control signalization," the following: "including traffic control signalization projects under section 103(e)(4) of this title, notwithstanding the provisions of the fifth sentence of section 103(e)(4),".

PRIMARY PROGRAM

Sec. 110. (a) The first sentence of subsection (b)(1) of section 104 of title 23, United States Code, is amended by striking out "and priority primary routes".

(b) The first sentence of subsection (c) of section 104 of the Federal-Aid Highway Act

of 1978 is amended by striking out "September 30, 1981 and September 30, 1982," and inserting in lieu thereof the following: "and September 30, 1981,".

(c) Section 147 of title 23, United States Code, is repealed.

(d) The analysis of chapter 1 of title 23 is amended by deleting

"147. Priority Primary Routes."

and inserting in lieu thereof

"147. Repealed.".

FEDERAL-AID URBAN PROGRAM

Sec. 111. Section 103 of title 23, United States Code, is amended by deleting subsection (d) and inserting in lieu thereof the following:

"(d) The Secretary may approve Federal-aid urban programs in urban areas which programs shall be selected by the appropriate local officials so as to serve the goals and objectives of the community, with the concurrence of the State highway department, as provided in section 105 of this title. The programs shall facilitate transportation in the urban area and include projects to: reduce congestion and improve the flow of traffic on arterial and collector routes, aid integration of different transportation modes to and from airports and other terminals and business districts, support clean air and energy conservation objectives, make highway capital improvements, improve highway safety, eliminate safety hazards and roadside obstacles, implement transportation systems management activities and serve other national goals and objectives. All public roads in urban areas are eligible except those on the primary system and the Interstate System. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to urban programs, except those provisions determined by the Secretary to be inconsistent with this subsection. The Secretary shall not waive the applicability of the planning requirements of section 134 of this title.".

FEDERAL-AID RURAL PROGRAM

Sec. 112. Section 103 of title 23, United States Code, is amended by deleting subsection (c) and inserting in lieu thereof:

"(c) The Federal-aid rural program shall be selected by the State highway agencies and the appropriate local road officials in cooperation with each other, subject to approval by the Secretary as provided in subsection (f) of this section and section 105 of this title. In making such selections, the needs of agriculture roads, rural mail routes, public school bus routes, local rural roads, airport and water port access roads, and goods movement shall be considered. All public roads, except those on the primary system, the Interstate System, and those in urban areas are eligible. Projects to improve highway safety and nonurbanized public transportation projects, including facilities and technical assistance, are also eligible for assistance under this section. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to rural programs, except those provisions determined by the Secretary to be inconsistent with this subsection.".

TRANSFERABILITY

Sec. 113. Paragraphs (1) and (2) of subsection (d) of section 104 of title 23, United States Code, are amended by striking out "50" each place it appears and inserting in lieu thereof at each such place "100".

highway safety improvement program

Sec. 114. (a) Section 151 of title 23, United States Code, is amended to read as follows:

"§ 151. Highway safety improvement program

"(a) The Secretary shall establish a highway safety improvement program for projects on any public road or street in rural or urban areas. Assistance shall be available under this program for highway safety improvement projects, as defined in subsection (a) of section 101 of this title; for railway-highway crossing projects as provided for in section 130 of this title; for the implementation of highway-related safety requirements and guidelines issued by the Secretary under section 402 of this title; and for the development, implementation, and evaluation of the highway safety improvement program required under subsection (b) of this section.

"(b) Each State shall develop and implement on a continuing basis a highway safety improvement program including procedures for the planning, implementation, and evaluation of highway safety improvement projects on all highways, with the specific objective of reducing the number and severity of highway traffic accidents. Each State shall have a process for collecting, maintaining, and analyzing accident, traffic, and highway data; for conducting engineering studies of hazardous locations, sections and elements, for assigning priorities to the various types of hazards identified; for implementing safety improvement projects in accordance with the priorities developed; and for the evaluation of the safety benefits obtained.

"(c) Of the funds authorized to carry out this section each State shall expend 35 per centum of the sums apportioned for projects under section 203 of the Highway Safety Act of 1973 unless the State requests the Secretary to waive this minimum and the Secretary finds other safety projects are of a higher priority.

"(d)(1) Funds authorized to carry out this section shall be available for expenditure for projects on any public road (other than the Interstate System).

"(2) The Federal share payable on any project under this section shall not exceed 90 per centum of the cost thereof except that the Federal share of safety improvement projects for the elimination of hazards of rail-highway crossings shall not exceed that as provided in section 120(d) of this title.

"(3) The unobligated balance of contract authority established prior to enactment of this section for carrying out section 402 by the Federal Highway Administration shall remain available for obligation as provided prior to enactment of this section and shall lapse not later than September 30, 1984.

"(e) Funds authorized to be appropriated to carry out this section shall be apportioned to the States as follows: 60 per centum in the ratio which the population of each State bears to the total population of all States, and 40 per centum in the ratio which the public road mileage in each State bears to the total public road mileage in all States. The annual apportionment for each State shall not be less than one-half of 1 per centum of the total apportionment. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under section 104(b)(1), except that the Secretary is authorized to waive such provisions of this title that he deems inconsistent with the purposes of this section.

"(f) In any State wherein the State is without legal authority to construct or maintain a project under this section, such State shall enter into a formal agreement for such construction or maintenance with the appropriate local officials of the county or municipality in which such project is located.

"(g) One-half of 1 per centum of funds authorized for carrying out this section shall be made available to the Secretary of the Interior, who shall exercise the responsibilities assigned to States under subsection (b) of this section in carrying out this section on Indian reservations. Such funds shall be subject to a deduction of not to exceed 5 per centum for the necessary costs of administering the provisions of this section.

"(h) Each State shall report to the Secretary of Transportation not later than December 30 of each year, on the progress being made to implement the highway safety improvement program and the effectiveness of safety improvements in reducing the number and severity of accidents. The Secretary of Transportation shall submit a report to the Congress not later than April 1 of each year on the progress being made by the States in implementing the highway safety improvement program.".

(b) Section 152 of title 23, United States Code, is repealed.

(c) The analysis of chapter 1 of title 23, United States Code, is amended by deleting

"151. Pavement marking demonstration program.", and

"152. Hazard elimination program.",

and inserting in lieu thereof

"151. Highway safety improvement program.", and

"152. Repealed.".

(d) Section 203(e) of the Highway Safety Act of 1973 (Public Law 93-87), as amended by the Congressional Reports Elimination Act of 1980 (Public Law 96-470), is repealed.

highway bridge replacement and rehabilitation program apportioned funds

Sec. 115. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the following formula: All deficient bridges will be divided into four categories: (1) Federal-aid system bridges, and bridges on public roads functionally classified as major collectors, eligible for replacement, (2) Federal-aid system bridges, and bridges on public roads functionally classified as major collectors, eligible for rehabilitation, (3) off-system bridges eligible for replacement, and (4) off-system bridges eligible for rehabilitation. The square footage of deficient Federal-aid system bridges, or bridges on public roads functionally classified as major collectors, both those eligible for replacement and those eligible for rehabilitation, shall be multiplied by a factor of two. The square footage of deficient bridges in each category shall be multiplied by the average national unit cost, on a State-by-State basis, as determined by the Secretary; and the total cost of each State divided by the total cost of the Nation's deficient bridges shall yield the apportionment factors. No State shall receive more than 9 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds authorized to carry out this section which are apportioned under this section shall be available for expenditure for three years after the close of the fiscal year for which they are authorized.".

(b) Notwithstanding any other provision of law or Federal regulation, any new bridge which is to be constructed pursuant to section 144 of title 23, United States Code, in tandem with any existing major structure built after June 28, 1969, with no more than 2.7 miles of highway between them need not carry a roadway width in excess of 69 feet.

FEDERAL LANDS HIGHWAYS

Sec. 116. Section 101 of title 23, United States Code, is amended by adding the following subsection:

"(f) It is the sense of Congress that Federal roads which are public roads receive the same uniform policies as roads which are on the Federal-aid systems or under the Federal-aid programs. The Congress therefore finds that in order to accomplish this objective there shall be a coordinated Federal lands highway program which shall consist of the forest highways, park roads, parkways, Indian reservation roads, and public lands highways. Appropriations for the construction and improvement of such Federal roads shall be administered by the Secretary in conformity with regulations jointly approved by him and the Secretaries of the appropriate Federal land managing agencies.".

CARPOOL AND VANPOOL PROJECTS

Sec. 117. (a) Section 120(d) of title 23, United States Code, is amended by inserting before the words "may amount to 100 per centum" the words "or commuter carpooling or vanpooling".

(b) Section 142 of title 23, United States Code, is amended as follows:

(1) In subsection (a)(1) delete in the first sentence the words "bus lanes" and inserting in lieu thereof the following: "high occupancy vehicle lanes" and by deleting the words "bus and other" and inserting in lieu thereof the following: "high occupancy vehicle and".

(2) In subsection (b) delete the word "bus" and in lieu thereof insert "high occupancy vehicle".

(3) In subsection (f) delete the words "public mass transportation systems" and in lieu thereof insert "high occupancy vehicles".

(c) The Secretary of Transportation is authorized and directed to expend such sums as are necessary out of the administrative funds authorized by subsection (a), section 104, title 23, United States Code to carry out the provisions of subsection (d), section 126 of the Federal-Aid Highway Act of 1978.

(d) Section 146 of title 23, United States Code, is amended by redesignating existing subsection (b) as subsection (c) and by inserting the following new subsection (b):

"(b)(1) The Secretary may approve for Federal financial assistance from funds apportioned under section 104(b)(5)(B) of this title, projects for designating existing facilities, or for acquisition of rights of way or construction of new facilities, for use as preferential parking for carpools, provided that such facilities (1) are located outside of a central business district and within an interstate highway corridor, and (2) have as their primary purpose the reduction of vehicular traffic on the interstate highway.

"(2) Nothing in this subsection, or in any rule or regulation issued under this subsection, or in any agreement required by this subsection, shall prohibit (1) any State, political subdivision, or agency or instrumentality thereof, from contracting with any person to operate any parking facility designated or constructed under this subsection, or (2) any such person from so operating such facility. Any fees charged for the use of any such facility in connection with the purpose of this subsection shall not be in excess of the amount required for operation and maintenance, including compensation to any person for operating the facility.

"(3) For the purposes of this subsection, the terms "facilities" and "parking facilities" are synonymous and shall have the same meaning given "parking facilities" in section 137 of this title.".

EMERGENCY RELIEF

Sec. 118. (a)(1) The first sentence of subsection (a) of section 125 of title 23, United States Code, is amended by striking the first sentence thereof and inserting in lieu thereof the following: "An emergency fund is authorized for expenditure by the Secretary, subject to the provisions of this section and section 119 of this title, for the repair or reconstruction of highways, roads, and trails which the Secretary shall find have suffered serious damage as the result of (1) natural disaster over a wide area such as by floods, hurricanes, tidal waves, earthquakes, severe storms, or landslides, or (2) catastrophic failures from any external cause, in any part of the United States. In no event shall funds be used pursuant to this section for the repair or reconstruction of bridges which have been permanently closed to all vehicular traffic by the State because of imminent danger of collapse due to structural deficiencies or physical deterioration.".

(2) Subsection (a) of section 125 of title 23, United States Code, is further amended by inserting in the second sentence, as that sentence read prior to the amendments made by paragraph (1) of this subsection, after the word "appropriated" the words "from the Highway Trust Fund"; by striking the colon in the second sentence and inserting in lieu thereof a period; by deleting "(1)" after the colon in the second sentence; by inserting a period after the words "in such years" and by striking the remainder of the sentence following "in such years".

(b) Notwithstanding any other provision of law, all expenditures made under section 125 of title 23, United States Code, prior to the fiscal year ending September 30, 1978, are authorized to be appropriated from the Highway Trust Fund.

(c) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the words "after September 30, 1976," the words "and not more than $150,000,000 is authorized to be expended in any one fiscal year commencing after September 30, 1980.".

(d) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following: "Provided, That obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (c) of this section, resulting from a single natural disaster or a single catastrophic failure shall not exceed $30,000,000 in any State.".

(e) The amendments made by subsection (d) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the date of enactment of this section.

(f) Subsection (f) of section 120 of title 23, United States Code, is amended to read as follows:

"(f) The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title shall not exceed 75 per centum of the cost thereof: Provided, That the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 per centum of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, "a comparable facility" shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.".

(g) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

(h)(1) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the words "the Federal-aid highway systems, including the Interstate System" and by inserting in lieu thereof the words "the Interstate System, the Primary System, and on any routes functionally classified as arterials or major collectors," in the two places the stricken words appear.

(2) Subsection (c) of section 125 of title 23, United States Code, is amended by striking the words "on any of the Federal-aid highway systems" and inserting in lieu thereof the words "routes functionally classified as arterials or major collectors".

ACCESS TO LAKES

Sec. 119. (a) Section 155 of title 23, United States Code, is amended by deleting subsection (e) and inserting in lieu thereof:

"(e) Sums apportioned in accordance with paragraph (2) of section 104(b) of this title shall be available for projects under this section.".

(b) Sums authorized under section 155 of title 23, United States Code, prior to enactment of the section shall continue to be available for the fiscal year authorized and for the three succeeding fiscal years.

(c) Section 104(a)(18) of the Surface Transportation Assistance Act of 1978 is amended by deleting "September 30, 1981, and September 30, 1982" and inserting in lieu thereof "and September 30, 1981".

BICYCLE TRANSPORTATION PROGRAM

Sec. 120. Section 217 of title 23, United States Code is amended—

(1) by striking in the first sentence of subsection (a), the words "and the multiple use of highway rights-of-way" and "on or in conjunction with highway rights-of-way";

(2) by inserting after the first sentence in subsection (a) the following: "Federal-aid highway projects may include nonconstruction programs or projects which can reasonably be expected to enhance the safety and use of bicycles.";

(3) by striking out in subsection (b) the words "that provided in section 120 of this title" and inserting in lieu thereof "100 per centum"; and

(4) by striking out subsection (e).

HIGHLAND SCENIC HIGHWAY

Sec. 121. Section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, is further amended to read as follows:

"(f) The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed. Commercial use by trucks may be limited and controlled by permit.".

ALLOCATION OF URBAN FUNDS

Sec. 122. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon approval of the appropriate local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

certification demonstration

Sec. 123. The Secretary of Transportation is directed to conduct a demonstration program in not more than four States of geographic and population diversity to study the impacts of expanding the availability of the procedures under the Certification Acceptance and Secondary Road Plan programs to other Federal-aid systems or programs as now provided by section 117 of title 23, United States Code. The demonstration program should study the impacts of allowing the Secretary of Transportation to discharge his responsibilities under any Federal law relative to a Federal-aid highway project provided certification is made by the States pursuant to section 117 of title 23, United States Code, and other requirements of Federal law.

DEFENSE ACCESS ROAD

Sec. 124. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)", and inserting in lieu thereof "Funds appropriated for defense maneuvers and exercises".

MAINTENANCE

Sec. 125. (a) Subsection (a) of section 116 of title 23, United States Code, is amended by striking the second sentence.

(b) Subsection (b) of section 116 of title 23, United States Code, is amended by striking "constructed on the Federal-aid secondary system or within a municipality,".

(c) The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State, in which such project shall be located, as he deems most appropriate until such project shall have been put in proper condition of maintenance.".

(d) Section 109 of title 23, United States Code, is amended by striking subsection (m) and by relettering subsection (n) as (m).

(e) Section 116 of title 23, United States Code, is amended by adding subsection (f) as follows:

"(f) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to insure that the condition of these routes is maintained at the level required by the purposes for which they were designed. The initial guidelines shall be issued no later than July 1, 1982.".

(f) Section 119 of title 23, United States Code, is amended by striking subsection (b).

(g) Section 116 of title 23, United States Code; is amended by adding subsection (g) as follows:

"(g) Not later than one year after the date of issuance of initial guidelines under subsection (f) of this section each State shall have a program for the Interstate System in accordance with such guidelines. Each State shall certify on January 1 of each year that it has such a program and the Interstate System is maintained in accordance with the program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate System in accordance with such program, the next apportionment of funds to such State for the Interstate System shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If, within one year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate System in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. If the Secretary does not make such a determination within such one year period, the amount withheld shall be reapportioned to all other eligible States.".

CONSTRUCTION

Sec. 126. (a) Subsection (a) of section 114 of title 23, United States Code is amended to read as follows:

"(a) The construction of any highways or portions of highways located on a Federal-aid system or under a Federal-aid program shall be undertaken by the respective State highway departments or under their direct supervision. The construction work and labor in each State shall be in accordance with the laws of that State and applicable Federal laws. Except as provided in section 117 of this title, the Secretary shall establish procedures for the inspection and approval of such construction. Construction may begin as soon as funds are available pursuant to subsection (a) of section 118 of this title. The State highway department shall not erect any informational signs other than official traffic control devices conforming with standards developed by the Secretary on any project where actual construction is in progress and visible to highway users.".

(b) Subsection (c) of section 121 of title 23, United States Code is amended by striking the words "following inspections".

RESEARCH AND PLANNING

Sec. 127. (a) Subsection (c) of section 307, title 23, United States Code, is amended by adding paragraph (5) as follows:

"(5) The sums provided pursuant to paragraph (2) of this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under section 104(b)(1) of this title.".

(b) Section 120 of title 23, United States Code, is amended by adding a subsection (i) as follows:

(i) The Federal share payable on account of any project financed under section 307(c) of this title shall be 85 per centum, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 95 per centum of the total cost of any such project.".

BRIDGE RECONSTRUCTION

Sec. 128. (a) The Secretary of Transportation may approve any project for the reconstruction, resurfacing, restoration, or rehabilitation of any bridge on the Interstate System which is both owned by the United States Government and located in two States and the District of Columbia, whenever both such States and the District shall submit to the Secretary for approval appropriate plans, specifications, and estimates for any such project.

(b) The Secretary of Transportation shall prior to approval of such project enter into an agreement with such States and the District for future maintenance and rehabilitation of the bridge.

(c) There is hereby authorized to be appropriated $60,000,000, out of the Highway Trust Fund, to be available until expended, to carry out the provisions of this section. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned for the Interstate System under chapter 1 of title 23, United States Code. The Federal share of the project cost shall be 100 per centum.

(d) In making any revised estimate of the cost completing the Interstate System, which estimate is required by section 104(b)(5)(A) of title 23, United States Code, to be transmitted to the Congress after the date of enactment of this Act, the Secretary of Transportation shall not include any costs for any bridge eligible for approval under subsection (a). The Secretary shall reduce apportionments made under section 104(b)(5) of title 23, United States Code, to such States or District by an amount, if any, equal to amounts apportioned under such section to any such State or District with respect to any such bridge for any fiscal year ending before October 1, 1981. The reduction, if any, made by the preceding sentence for each State or the District shall be made out of apportionments under such section to such State or the District, beginning with the apportionment for the fiscal year ending September 30, 1983, and shall be made, in equal shares, over the number of fiscal years in which apportionments described in the preceding sentence were made.

NONDISCRIMINATION

Sec. 129. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking the words "or national origin" and inserting in lieu thereof the words "national origin or sex".

(b) Section 140 of title 23, United States Code, is amended by adding new subsection (c) as follows:

"(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete, on an equal basis, for contracts and subcontracts. Whenever apportionments are made under subsection 104(b) of this title, the Secretary shall deduct such sums as he may deem necessary, not to exceed $10,000,000 per fiscal year, for the administration of this subsection. The provisions of section 3709 of the Revised Statute, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of 41 U.S.C. 252(e).".

(c) The title of section 140 of title 23, United States Code, is amended to read:

"§ 140. Nondiscrimination"

and the analysis of chapter 1 of title 23, United States Code, is amended by striking out

"140. Equal employment opportunity."

and inserting in lieu thereof

"140. Nondiscrimination.".

INTERAGENCY AGREEMENTS

Sec. 130. (a) Chapter 1 of title 23, United States Code, is amended by adding after section 156 the following new section:

"§ 157. Interagency agreements

"Not later than one hundred and eighty days after the date of enactment of this section, the Secretary shall enter into agreements with the Secretaries of the Departments of Interior and Defense, the Administrator of the Environmental Protection Agency, and the heads of such other Federal

departments, agencies, and instrumentalities as the Secretary determines, to minimize, to the greatest extent possible, duplication, paperwork, and delays in the development and approval of projects under this title and any other provision of law relating to the Federal highway programs. Notwithstanding any other provision of law, such agreements shall provide that actions on applications or requests for permits, licenses, findings, and other approvals and determinations required for such projects will be fully coordinated by the Department of Transportation with the review process established under the National Environmental Policy Act of 1969, as amended, and, to the greatest extent practicable, that a decision with respect to each such application or request will be made contemporaneously with approval of the environmental impact statement, finding of no significant impact, or categorical exclusion required for such project, but in no event later than ninety days after the date of approval of such environmental review document.".

(b) The analysis of chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Interagency agreements.".

FEDERAL SHARE—FEDERAL-AID RURAL AND URBAN PROGRAMS

Sec. 131. Section 120(a) of title 23, United States Code, is amended (1) by adding after "75 per centum of the cost of construction" wherever it occurs the following: "for projects on the Federal-aid primary system and for projects to resurface, restore, rehabilitate, and reconstruct the Federal-aid Interstate System and 50 per centum of the cost of construction for projects under the Federal-aid rural program and the Federal-aid urban program," and (2) by adding the following new sentence at the end thereof: "The Federal share payable on account of any project under the Federal-aid rural program or the Federal-aid urban program which the Secretary has approved prior to enactment of the Federal-Aid Highway Improvement Act of 1981 shall not exceed 75 per centum of the cost of construction subject to the conditions set forth in this subsection or at the option of the State the Federal share may be revised to 50 per centum of such cost, but the Federal share payable for any such project which the Secretary approves after enactment of such Act shall not exceed 50 per centum of the cost of construction subject to the conditions set forth in this subsection.".

OBLIGATION LIMITATION AND ALLOCATION FORMULA

Sec. 132. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1982 shall not exceed $7,700,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 320 of title 23, United States Code, section 147 of the Surface Transportation Assistance Act of 1978, sections 109 and 129 of the Federal-Aid Highway Improvement Act of 1981, and the third sentence of subsection 218(a) of title 23, United States Code, as added by this Act. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For the fiscal year 1982, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the periods October 1 through December 31, 1981, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1982, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

NATIONAL MAXIMUM SPEED LIMIT

Sec. 133. Section 154(f) of title 23, United States Code, is amended to read as follows:

"(f) If the data submitted by a State pursuant to subsection (e) of this section show that the percentage of motor vehicles exceeding fifty-five miles per hour is greater than 50 per centum, the Secretary shall reduce the State's apportionment of Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 5 per centum of the amount to be apportioned for the following fiscal year.".

MARYLAND TRANSPORTATION AUTHORITY

Sec. 134. (a) The Act entitled "An Act authorizing the State of Maryland, by and through its State Roads Commission of the successors of said Commission, to construct, maintain, and operate certain bridges across streams, rivers, and navigable waters which are wholly or partly within the State", approved April 7, 1938, and the Act of June 16, 1948 (62 Stat. 463, Public Law 654, 80th Congress), as amended by the Act of November 17, 1967 (81 Stat. 466, Public Law 144, 90th Congress), are hereby repealed.

(b) The State of Maryland, by and through the Maryland Transporatation Authority or the successors of such Authority, is authorized, subject to all applicable Federal laws, (1) to continue to collect tolls after the date of enactment of this Act from its existing transportation facilities projects, as defined on the date of enactment of this Act in the laws of the State of Maryland, and (2) to use the revenues from such tolls for transportation projects of the type which the State or the Maryland Transportation Authority is authorized to construct, operate, or maintain under the laws of the State of Maryland as such laws exist on the date of enactment of this Act.

INTERSTATE SYSTEM ADDITIONS

Sec. 135. Section 139 of title 23, United States Code, is amended by adding a new subsection (c) as follows:

"(c) The Secretary shall designate those portions of highway segments on the Federal-aid primary system in States which have no Interstate System that are logical components to a system serving the State's principal cities, national defense needs and military installations, and traffic generated by rail, water, and air transportation modes. The designated segments shall have been constructed to the geometric and construction standards adequate for current and probable future traffic demands and the needs of the locality of the segment. The mileage of any highway designated as part of the Interstate System under this subsection shall not be charged against the limitation established by the first sentence of section 103(e)(1) of this title. The designation of a highway under this subsection shall create no Federal financial responsibility with respect to such highway, except that the State involved may use Federal-aid highway funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title, for the resurfacing, rehabilitation, restoration, and reconstruction of a highway designated as a route on the Interstate System under this subsection.".

ALASKA HIGHWAY

Sec. 136. (a) Subsection (a) of section 218 of title 23, United States Code, is amended by adding after the second sentence the following: "In addition to such funds, the State of Alaska is authorized to expend on such highway any Federal-aid highway funds apportioned to the State of Alaska under this title as its Federal share. Notwithstanding any other provision of law any obligation limitation enacted for fiscal year 1982 or for any fiscal year thereafter shall not apply to projects authorized by the previous sentence.".

(b) This amendment shall be effective upon the date of the enactment of this Act.

THE MAINE TURNPIKE

Sec. 137. Section 145 of the Federal-Aid Highway Act of 1978 is amended to read as follows:

"Sec. 145. (a) Upon satisfaction by the State of Maine or the Maine Turnpike Authority of the following conditions, the State of Maine and the Maine Turnpike Authority shall be free of all restrictions with respect to the imposition and collection of tolls or other charges on the Maine Turnpike or for the use thereof contained in title 23, United States Code, or in any regulation or agreement thereunder:

"(1) repayment by the State of Maine or the Maine Turnpike Authority to the Treasurer of the United States of the sum of $8,577,900 which is the amount of Federal-aid highway funds received for construction of interchanges or connections with the Maine Turnpike at West Gardiner, Kennebec County, Maine, at York, York County, Maine, and at Scarborough-South Portland, Cumberland County, Maine. The amount to be repaid shall be deposited to the credit of the appropriation for 'Federal-Aid Highway (Trust Fund)'. Such repayment shall be credited to the unprogramed balance of the Federal-aid highway funds of the classes determined by the Secretary to and in cooperation with the State of Maine. The amount so credited shall be in addition to all other funds then apportioned to such State and shall be available for expenditure in accordance with the provisions of title 23, United States Code.

"(b) The State of Maine and the Maine Turnpike Authority are deemed to be in compliance with section 129(c) of title 23, United States Code: Provided, That the conditions of subsection (a) are satisfied.".

REDWOOD BYPASS HIGHWAY

Sec. 138. Section 152 of the Federal-Aid Highway Act of 1978 is amended by adding after "fiscal year 1981" the following "and $55,000,000 for fiscal year 1983".

VENDING MACHINE DEMONSTRATION PROJECT EXTENSION

Sec. 139. The vending machine demonstration project authorized by section 153 of the Surface Transportation Assistance Act of 1978 shall be extended for a period not later than two years after the date of enactment of this section.

REIMBURSEMENT

Sec. 140. In any case in which the city of Santa Rosa, California, has incurred costs on behalf of the State of California for the acquisition, between the date of enactment of Public Law 94-154 and the date of enactment of the Federal-Aid Highway Act of 1976 (Public Law 94-280), of land which was utilized in a Federal-aid urban system project at an intersection with a segment of the Federal-aid primary system, the Secretary of Transportation is authorized, notwithstanding any other provision of law, to reimburse the State of California from funds apportioned to the State of California under section 104(b)(6) of title 23, United States Code, 75 per centum of such costs.

INTERSTATE WITHDRAWAL STUDY

Sec. 141. The Secretary of Transportation is directed to study problems relating to sections of the Interstate System which do not provide connectivity and could be withdrawn for a substitute highway project. Such study shall include alternative funding methods available if such section is withdrawn under section 103(e)(4) of title 23, United States Code. The study together with recommendations shall be transmitted to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives not later than March 31, 1981.

TECHNICAL AMENDMENTS

Sec. 142. (a) Section 101(a) is amended as follows:

(1) In the tenth sentence, by inserting the words "or under one of the Federal-aid programs" immediately after the words "Federal-aid systems";

(2) In the nineteenth sentence, by striking the period at the end thereof and adding the words "or under the Federal-aid programs.";

(3) In the thirtieth sentence, by deleting the words "secondary system" and inserting in lieu thereof the words "rural program", and by deleting the word "system" and inserting in lieu thereof the word "program";

(4) In the thirty-first sentence, by deleting the word "system" each time it appears and inserting in lieu thereof the word "program"; and

(5) By adding after the twenty-eighth sentence the following sentence: "The term 'Federal-aid program' means any one of the Federal-aid highway programs described in section 103 of this title.".

(b)(1) Section 103 is amended by adding to the title the words "and programs" after the words "Federal-aid systems";

(2) Section 103(a) is amended to read as follows: "For the purpose of this title, the Federal-aid systems, which consist of the primary system and the Interstate System, along with the Federal-aid programs, which consist of the Federal-aid rural program and the Federal-aid urban program, are established and continued pursuant to the provisions of this section.";

(3) Section 103(f) is amended to read as follows: "The Secretary shall have authority to approve in whole or in part the Federal-aid primary system, the Federal-aid rural program, the Federal-aid urban program, and the Interstate System, as and when such systems and programs or portions thereof are designated, or to require modifications or revisions thereof. No Federal-aid system or program or portion thereof shall be eligible for projects in which Federal funds participate until approved by the Secretary.";

(4) Subsection (g) and (h) of section 103 are repealed; and

(5) The analysis of chapter 1 of title 23 is amended by deleting

"103. Federal-aid systems."

and inserting in lieu thereof

"103. Federal-aid systems and programs.".

(c) Section 104 is amended as follows:

(1) In subsection (a) and (b)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems" each time they appear;

(2) In paragraph (2) of section 104(b), by deleting the words "secondary system" and inserting in lieu thereof the words "rural program";

(3) By deleting paragraph (4) of section 104(b);

(4) By redesignating paragraph "(5)" as paragraph "(4)", and by deleting therein the first full sentence and the fifth sentence through the twenty-first sentence;

(5) By redesignating paragraph "(6)" as paragraph "(5)", and by deleting the word "system" and inserting in lieu thereof the word "program";

(6) In subsection (c)(1), by deleting the phrase ", commencing with the apportionment of funds authorized to be appropriated under subsection (a) of section 102 of the Federal-aid Highway Act of 1956 (70 Stat. 374),"; and

(7) In subsection (f)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems".

(d) Section 105 is amended as follows:

(1) In the first sentence of subsection (a) by inserting the words "and programs" after the words "Federal-aid systems", and by deleting in the third sentence the comma and all that follows and inserting a period after the word "part"; and

(2) In subsection (d) by deleting the words "programs for", and by deleting the words "on the Federal-aid urban system" and inserting in lieu thereof the words "under the Federal-aid urban program".

(e) Section 106(d) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(f)(1) Section 108(a) is amended by inserting the words "or under any of the Federal-aid highway programs," immediately after the words "Interstate System," the first time they appear, and by inserting the words "and programs" immediately after the words "Federal-aid highway systems" the second time they appear;

(2) Section 108(c)(2) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system"; and

(3) The last sentence of section 108(c)(3) is amended by inserting the words "or under the Federal-aid program" immediately after the words "Federal-aid system".

(g)(1) Section 109(a) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(2) Section 109(c) is amended by deleting the words "Projects on the Federal-aid secondary system" and inserting in lieu thereof the words "Federal-aid rural program projects";

(3) Section 109(e) is amended by deleting the phrase "No funds shall be approved for expenditure on any Federal-aid highway," and inserting in lieu thereof the following phrase: "No funds shall be approved for expenditure on any highway on the Federal-aid highway system or under the Federal-aid highway program,";

(4) Section 109(h) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(5) Section 109(i) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system" each time they appear in the first and second sentences, by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system" in the third sentence, by inserting the words "or program" immediately after the words "Federal-aid system" in the fifth sentence, and by inserting the words "or under" immediately after the word "on" in such sentence; and

(6) Section 109(l)(1) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(h)(1) Section 113(a) is amended by deleting the words "the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems," and inserting in lieu thereof the words "the primary as well as its extensions in urban areas, and the Interstate System, or under the Federal-aid programs, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems and programs,"; and

(2) Section 113(b) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(i) Section 115(a) is amended to read as follows: "(a) When a State has obligated all funds for the primary system or for any of the Federal-aid programs apportioned to it under section 104 of this title, and proceeds to construct any projects without the aid of Federal funds, including one or more parts of any project, on the primary system or under any of the Federal-aid programs in such State, as that system may be designated or any of those programs may be comprised at that time, in accordance with all procedures and all requirements applicable to projects on the primary system or under any such program, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under section 104 of this title if—

(1) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects on the primary system or under the Federal-aid program involved, and

(2) the project conforms to the applicable standards adopted under section 109 of this title.

The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State and that no application may be approved which will exceed the State's expected apportionment of such authorization.".

(j) Section 118(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(k)(1) Section 120(a) is amended by deleting in the first sentence all of the words between "(a)" and "(A)" and inserting in lieu thereof the words "Subject to the provisions

of subsection (d) of this section, the Federal share payable on account of any project, financed with primary, rural, or urban funds, on the Federal-aid primary system, under the Federal-aid rural program, and under the Federal-aid urban program shall either"; and

(2) Section 120(g) is amended by deleting the words "Federal-aid highways" and inserting in lieu thereof the words "Federal-aid projects".

(l) Section 121(c) is amended by inserting the words "or under a Federal-aid Program" immediately after the words "Federal-aid system".

(m) Section 123(a) is amended by deleting the words "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting in lieu thereof the words "a Federal-aid system or under a Federal-aid program,".

(n) Section 124(a) is amended by inserting the words "or under any of the Federal-aid programs," immediately after the phrase "including the Interstate System,".

(o) Section 129 is amended as follows:

(1) In subsection (c), by inserting the words "and programs" immediately after the words "Federal-aid highway systems";

(2) In subsections (f) and (g)(2), by inserting the words "or programs" immediately after the words "Federal-aid systems" each time they appear; and

(3) In subsection (i), by deleting the words "Federal-aid system, other than the Interstate System," and inserting in lieu thereof the words "Federal-aid project other than one of the Interstate System,".

(p) Section 135(b) is amended by placing a period after the word "flow" and deleting the remainder of the sentence.

(q) Section 137(a) is amended by deleting the words "project on the Federal-aid urban system" and inserting in lieu thereof the words "project under the Federal-aid urban program".

(r) Section 140(a) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(s) Section 141(b) of title 23, United States Code, is amended to read as follows:

"(b) Each State shall certify to the Secretary before January 1 of each year that it is enforcing in accordance with section 127 of this title all State laws respecting maximum vehicle size and weights permitted on all roads receiving funds under the Federal-aid program, including the primary system, the Interstate System, and is a route functionally classified as an arterial or major collector.".

(t) Section 142 is amended as follows:

(1) In subsection (a)(1) by inserting the words "and highways under the Federal-aid programs" immediately after the words "Federal-aid systems", and by deleting the words "as a project on any Federal-aid system";

(2) In subsection (a)(2) by deleting the words "project on the Federal-aid urban system" each place it appears and inserting in lieu thereof "project under the Federal-aid urban program", ; and

(3) In subsection (e)(2) by deleting the words "projects on the Federal-aid urban system" and inserting in lieu thereof "projects under the urban program".

(u) Section 143 is amended as follows:

(1) In subsection (a), (b), and (c) by inserting the words "or under a Federal-aid program" immediately after the words "a Federal-aid system (other than the Interstate System)" each place they appear, and

(2) In subsection (d) and (e) by deleting the words "Federal-aid system on" each time they appear and inserting in lieu thereof the words "Federal-aid system or program on or under".

(v) Section 149 is amended as follows—

(1) by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(2) by amending the analysis of chapter 1 of title 23, United States Code, by deleting:

"150. Allocation of urban system funds.".

and inserting in lieu thereof:

"150. Allocation of urban program funds.".

(w) Section 150 is amended by deleting the word "system" in the title and inserting the word "program" in lieu thereof.

(x) Section 302(b) is amended by deleting the words "on the Federal-aid secondary system," and inserting in lieu thereof the words "under the Federal-aid rural program", and by deleting the words "secondary funds," and inserting in lieu thereof the words "rural funds,".

(y) Section 304 is amended by inserting the words "and highways under the Federal-aid programs" between the word "systems" and the comma.

(z) Section 317(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(aa) Section 320(a) is amended by inserting the words "or programs" immediately after the words "highway systems" in the second sentence.

(bb) Section 322 is amended as follows:

(1) In subsection (c)(1) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is a route functionally classified as an arterial or major collector,"; and

(2) In subsection (c)(2) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is not a route functionally classified as an arterial or major collector,".

(cc) Section 402(d) is amended by inserting the words "and programs" immediately after the words "Federal-aid systems".

(dd) Section 117 is amended as follows:

(1) By inserting in subsection (a) the words "or under any Federal-aid programs" immediately after the words "Federal-aid systems".

(2) By deleting in subsection (f)(1) the words "secondary system" where they appear and inserting in lieu thereof the words "rural program".

HOUSE OF REPRESENTATIVES—*Monday, November 16, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, continue to inspire Your people to seek truth in all the avenues of life. May we not be satisfied with the cliches that too easily are spoken, but strive to affirm with honest and sensitivity the reality of our world and the integrity of our actions. Even as we prove candor in thought and word, may we ever respect others who share in our pursuit of knowledge, that together we may discover more of the truth of Your creation and thus serve the common good. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER, Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 303, nays 8, answered "present" 1, not voting 121, as follows:

□ 1215

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

A MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1672. An act to expand the membership of the U.S. Holocaust Memorial Council from 60 to 65 and for other purposes.

The message also announced that the Senate had passed with an amendment in which the concurrence of the

House is requested, a bill of the House of the following title:

H.R. 3567. An act to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1193) entitled "An act to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PERCY, Mr. HELMS, Mr. HAYAKAWA, Mr. LUGAR, Mr. PELL, Mr. BIDEN, Mr. GLENN, and Mr. MATHIAS as an additional conferee solely for the consideration of section 120 (a) through (e) of the House amendment, and Mr. CRANSTON (in lieu of Mr. BIDEN) as an additional conferee solely for the consideration of title VI of the bill as passed by the Senate be the conferees on the part of the Senate.

MAKING IN ORDER ON TOMORROW OR ANY DAY THEREAFTER CONSIDERATION OF CONCURRENT RESOLUTION REAFFIRMING CONGRESSIONAL BUDGET

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent that it may be in order on Tuesday, November 17, 1981, or any day thereafter, to consider the House concurrent resolution, reaffirming the congressional budget for the U.S. Government as set forth in the first concurrent resolution on the budget for the fiscal year 1982 (H. Con. Res. 115, 97th Congress).

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, will the chairman of the Budget Committee explain why this is necessary?

Mr. JONES of Oklahoma. Mr. Speaker, if the gentleman will yield, basically this gives us the opportunity to take up the second budget resolution any day from tomorrow on without having the mandatory 10-day waiting period. I have discussed this with the minority leader, the gentleman from Illinois (Mr. MICHEL), and the ranking Republican Member, the gentleman from Ohio (Mr. LATTA), and both of them agree to the unanimous consent request.

Mr. ROUSSELOT. Further reserving the right to object, Mr. Speaker, I can appreciate the statement, but can the gentleman explain to the House why we need to waive the 10-day rule?

Mr. JONES of Oklahoma. Basically, in an effort to try to complete the second budget resolution as soon as possible, we wanted to have the flexibility to be able to bring this up tomorrow, if necessary or if possible.

Mr. ROUSSELOT. Further reserving the right to object, Mr. Speaker, I probably will not object, but I know that the 10-day rule was put in the budget law for a specific purpose to allow Members adequate time to prepare in the original legislation during budget consideration, and I think it is unfortunate that we have delayed this process so long and not allowed adequate study of the second concurrent resolution. I realize all the problems that are inherent in this budget process.

Mr. JONES of Oklahoma. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. I am glad to yield to the committee chairman.

Mr. JONES of Oklahoma. There have been a number of problems, and I think it has been unfortunate in many respects that the budget has been handled in this way this year, but what we have tried to do in connection with letting the President's program have a chance is to adhere to the wishes of the President and the minority leadership with regard to the second budget resolution. This will make that possible.

Mr. ROUSSELOT. Further reserving the right to object, Mr. Speaker, does the continuing resolution that we are going to consider today on the appropriations really negate much of what we have done in the budget process by just continuing beyond the deadline here?

Mr. JONES of Oklahoma. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. Yes, I yield to the chairman of the committee.

Mr. JONES of Oklahoma. Far from the continuing appropriations negating the first budget resolution, the continuing appropriations bill not only comes under the first budget resolution but it comes under the President's September request.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I think there is disagreement on that point and there is a misunderstanding as to whether it really comes under that budget or not. I do not believe it is under. But I will be glad to hear the gentleman's explanation when we get to the continuing resolution as to how far under or over the budget it really is.

Mr. JONES OF Oklahoma. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. I am glad to yield to the gentleman.

Mr. JONES of Oklahoma. Once again, we are dealing with two sets of calculations. One set of calculations, which has been classified in a recent magazine article as the "hook or crook" method of calculations, which was done by the Office of Management and Budget, would indicate that perhaps the continuing appropriations is over the President's September request. However, the more consistently honest and realistic set of calculations done by the Congressional Budget Office would indicate that the continuing appropriations is clearly under the President's September request.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I know how accurate the Congressional Budget Office has been in the past, so we will just see who is right and who is wrong. My guess is that the continuing resolution today will take us way over the budget.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERMISSION FOR COMMITTEE ON THE BUDGET TO FILE REPORT ACCOMPANYING SECOND CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 1982

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent that the Committee on the Budget may have until midnight tonight to file the report accompanying the second concurrent resolution on the budget for fiscal year 1982.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, may I ask the gentleman, how soon will the report that the Budget Committee will file be available?

Mr. JONES of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I am glad to yield to the committee chairman.

Mr. JONES of Oklahoma. Mr. Speaker, all views are to be prepared and submitted by noon today, and we are asking for permission to file by midnight tonight, so we would hope that report would be available tomorrow.

Mr. ROUSSELOT. The report will be available tomorrow; that is the gentleman's statement?

Mr. JONES of Oklahoma. That is right. However, I am not, of course, a professional printer.

Mr. ROUSSELOT. We certainly know the gentleman is not, and we appreciate all the gentleman is doing to speed up the process.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON BILL MAKING APPROPRIATIONS FOR DEPARTMENT OF DEFENSE, 1982

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on the bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

Mr. EDWARDS of Alabama reserved all points of order on the bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

CONSENT CALENDAR

The SPEAKER. This is the day for the call of the Consent Calendar.

The Clerk will call the eligible bill on the Consent Calendar.

AUTHORIZING USE OF THE FRANK BY LAW REVISION COUNSEL

The Clerk called the bill (H.R. 1710) to authorize the use of the frank for official mail sent by the Law Revision Counsel of the House of Representatives.

There being no objection, the Clerk read the bill as follows:

H.R. 1710

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 39, United States Code, is amended—

(1) by inserting "the Law Revision Counsel of the House of Representatives," immediately before "and the Senate Legal Counsel" in section 3210(b)(1);

(2) by inserting "the Law Revision Counsel of the House of Representatives," immediately before "or the Senate Legal Counsel" in section 3210(b)(2);

(3) by inserting "the Law Revision Counsel of the House of Representatives," immediately before "and the Senate Legal Counsel" in section 3216(a)(1)(A); and

(4) by inserting "the Law Revision Counsel of the House of Representatives," immediately before "or the Senate Legal Counsel" in section 3219.

● Mr. DERWINSKI. Mr. Speaker, this is a noncontroversial bill which authorizes the use of the frank for official mail sent by the Law Revision Counsel of the House of Representatives.

Under existing statute, the Office of the Law Revision Counsel has as its principal purpose to develop and keep current an official and positive codification of the laws of the United States. This bill would give the Office of the Law Revision Counsel franking authority similar to that already given the legislative counsels of the House and Senate and the Senate Legal Counsel. The Office of the Law Revision Counsel presently uses the frank of the Speaker, and sends approximately 4,000 pieces of mail each year.

H.R. 1710 will not result in additional cost to the Government nor the taxpayers.●

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the eligible bills on the Consent Calendar.

WILLIAM H. HARSHA U.S. POST OFFICE BUILDING

Mr. FARY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 841) to name the U.S. post office building in Portsmouth, Ohio, the "William H. Harsha U.S. Post Office Building."

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the bill, as follows:

H.R. 841

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States Post Office Building located at the intersection of Sixth and Gay Streets, Portsmouth, Ohio, shall hereafter be named and designated as the "William H. Harsha United States Post Office Building". Any reference in a law, map, regulation, document, record, or other paper of the United States to such building shall be held to be a reference to the "William H. Harsha United States Post Office Building".

SEC. 2. This Act shall take effect on January 3, 1982.

Mr. FARY. Mr. Speaker, It gives me great pleasure to assist my colleagues in honoring this great gentleman, Bill Harsha. He is known to all of us here as a hard worker and a team player in the legislative process. We are also aware of his years of dedicated service to the people of Ohio's Sixth District. I am honored to bring this bill to the floor today.

Mr. Harsha's long term of service is set out in the report that accompanies this bill but some thing which is not easily communicated is Mr. Harsha's special role in the Public Works Committee. I come from Chicago where there is really only a Democratic Party. The Republican Party is there but is not usually a strong force. When I came to the Public Works Committee I was therefore, surprised to see how important a man like Mr. Harsha could be in a Democratic Congress. He did it through hard work and sheer force of intellect. Those two qualities earned him my deep respect and gave his opinions a special status with all his colleagues.

Mr. CLAUSEN. Mr. Speaker, I, too, wish to express my strong support for this legislation to designate the U.S. post office in Portsmouth, Ohio, the "William H. Harsha U.S. Post Office Building." During his 20 years of public service, I had the opportunity of working closely with Bill, particularly on matters involving the jurisdiction of the Public Works and Transportation Committee. His achievements in areas such as water resources development legislation, flood protection, pollution control, highway construction and safety issues, and aviation and surface transportation matters are unparalleled, earning him an impressive reputation among his colleagues.

This measure now under consideration is one way that we can honor Bill for these many achievements, his leadership while in Congress and the service he has given to his country. I strongly urge my colleagues to approve H.R. 841.

● Mr. HOWARD. Mr. Speaker, it gives me great pleasure to bring to the floor of the House a bill to name the post office building in Portsmouth, Ohio, after my distinguished former colleague from the House Public Works Committee, Bill Harsha. The Committee on Public Works and Transportation is well aware of the great contribution this man made as a member and then as ranking minority member of the full committee. To point this out for the people of Portsmouth the committee has reported H.R. 841 and recommends its passage.

Mr. Harsha began his career of public service during World War II when he served in the U.S. Marine Corps. He was the assistant city solicitor for Portsmouth from 1947 to 1951, and Scioto County prosecutor from 1951 to 1955. He was elected to the 87th Congress in 1960 and was reelected to each succeeding Congress. Mr. Harsha retired after 20 years in 1980 and has returned to the practice of law.

Because of the long years of valuable service to his constituents and the Public Works Committee, his colleagues have chosen to name this building so that future generations may know of the achievement of Congressman William Harsha.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I would like to add my wholehearted support for this legislation to rename the Portsmouth, Ohio, post office in honor of our distinguished former colleague, Bill Harsha. During his many years of public service in Congress, Bill proved to be a highly competent legislator who worked tirelessly for his constituents and the people of America. His accomplishments in the areas under the jurisdic-

tion of the Public Works and Transportation Committee are too lengthy to list here but are well known by both Democrats and Republicans alike.

As a tribute to Bill Harsha for the role he played in the economic and industrial development of not only Ohio's Sixth Congressional District but also the rest of the country, I would ask my colleagues to approve this measure.●

● Mr. McEWEN. I would like to express my strong support of H.R. 841 to name the U.S. post office building in Portsmouth, Ohio, the William H. Harsha U.S. Post Office Building.

I can think of no one more deserving of receiving an honor such as this. For 20 years Bill Harsha served the people of the Sixth Congressional District of Ohio with honor and distinction, and he is highly respected and revered throughout southern Ohio.

In view of the fact that Congressman Harsha served on the House Public Works and Transportation Committee during his entire term of office and was ranking minority member for 10 years, I realize that it is not necessary for me to tell the Members of this body of his ability, hard work, and exceptional expertise in all areas of legislation that come within the jurisdiction of this committee.

However, as a longtime friend and admirer, I do want to express my personal views. I can speak without fear of contradiction in paying tribute to Congressman Harsha for the outstanding job he performed in representing the residents of the Sixth District in the House and of his successful efforts in obtaining much needed projects for the southern Ohio area. He gave unstintingly of his time and efforts to serve his area, and southern Ohio has benefited substantially as a result of his congressional service.

Congressman Harsha's retirement left a very real vacuum in the House. His outstanding performance has made it virtually impossible for any Member of Congress to fulfill the level of expectation that the people of the Sixth District have become accustomed.

Naming the post office building in Portsmouth—Congressman Harsha's hometown—the William H. Harsha U.S. Post Office Building is a most fitting tribute, and H.R. 841 has my strongest possible support.●

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOHN ARCHIBALD CAMPBELL U.S. COURTHOUSE

Mr. FARY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 2494) to designate the John Archibald Campbell Federal Building-U.S. Courthouse.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2494

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the building located at 113 Saint Joseph Street in Mobile, Alabama (commonly known as the Old Federal Building-Federal Courthouse), shall hereafter be known as the John Archibald Campbell Federal Building-United States Courthouse. Any reference in a law, map, regulation, document, record, or other paper of the United States to such building shall be held to be a reference to the John Archibald Campbell Federal Building-United States Courthouse.

With the following committee amendments:

Page 2, line 2, strike out "Federal Building—".

Page 2, line 6, strike out "Federal Building—".

The committee amendments were agreed to.

Mr. FARY. Mr. Speaker, the Committee on Public Works and Transportation has reported the bill H.R. 2494 which would name the U.S. courthouse in Mobile, Ala., the "John Archibald Campbell U.S. Courthouse." The bill was reported with an amendment because the original bill called for the name to be Federal building-U.S. courthouse but Mr. EDWARDS of Alabama, the sponsor of the bill, asked us to strike the Federal building portion of the title. It appears that there are two buildings close together and Mr. EDWARDS would like to name just the one for Judge Campbell.

John Archibald Campbell was a distinguished young attorney in Mobile, and argued several cases before the U.S. Supreme Court during its 1851-52 term. In 1853, at the young age of 41, President Franklin Pierce appointed him to the Supreme Court. He served until 1861 when Alabama seceded from the Union. Although he opposed secession, his loyalty to Alabama forced him to return home. This naming bill would honor him as the only citizen of Mobile to ever serve in the U.S. Supreme Court.

Mr. CLAUSEN. Mr. Speaker, on behalf of the minority members of the Public Works and Transportation Committee, I rise to offer my full support for this legislation to name the Mobile, Ala., Federal building in honor of John Archibald Campbell. As has been previously pointed out, Mr. Campbell's reputation as an attorney, and later a judge, as well as a prominent State legislator, earned him an appointment to the U.S. Supreme Court. For his important contributions to Alabama and the country, I would ask that we approve this bill.

● Mr. HOWARD. Mr. Speaker, it gives me great pleasure to bring to the floor of the House this bill, H.R. 2494, to name the courthouse in Mobile in memory of the distinguished Supreme Court Justice, John Archibald Campbell. The Committee on Public Works felt that this American's outstanding achievement and dedication to his State of Alabama marked him as someone worthy of commemoration.

From the passage of this bill into law, countless generations of Mobilians will be able to look at the name on the courthouse and know that a place has been set aside in history for their hometown.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I rise to fully concur with my distinguished colleagues on the Public Works and Transportation Committee regarding H.R. 2494. As has been pointed out, this measure is not controversial but merely honors a great Alabamian and a great American, Judge John Archibald Campbell. I would like to associate myself with their remarks and urge passage of this bill.●

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to designate the John Archibald Campbell U.S. Courthouse."

A motion to reconsider was laid on the table.

MELVIN PRICE LOCK AND DAM

Mr. FARY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 4506) to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Ill., as "Melvin Price Lock and Dam."

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4506

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the lock and dam, authorized by section 102 of Public Law 95-502, to replace locks and dam 26, Mississippi River, Alton, Illinois, shall hereafter be known as Melvin Price Lock and Dam. Any law, regulation, map, document, or record of the United States in which such lock and dam is referred to shall be held and considered to refer to such lock and dam as "Melvin Price Lock and Dam".

AMENDMENT OFFERED BY MR. FARY

Mr. FARY. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FARY: On page 2, after line 5, add the following new section:

"2. This Act shall become effective upon the date of termination of service in the United States Congress of Melvin Price."

The amendment was agreed to.

Mr. FARY. Mr. Speaker, I rise in strong support of H.R. 4506, a bill to

name the lock and dam authorized to replace locks and dam 26 as the "Melvin Price Lock and Dam." We are all aware of the great benefit to commercial navigation that will follow the completion of this new facility; and I for one, as a close friend of Congressman PRICE and as a fellow Representative from the great State of Illinois, can personally vouch for the long and tireless hours of service he has put into realizing this much-needed improvement of Locks and Dam 26. I urge my colleagues to pass this bill, which would name the replacement structure in his honor.

It seems like a long time ago that my friend from the American Waterway Operators, John Connolly, suggested that we honor MEL PRICE, but I am glad that we are finally here doing so.

Mr. Speaker, this resolution honors Congressman MEL PRICE of Illinois, the chairman of the Armed Services Committee, by naming Lock and Dam 26 on the Mississippi River as the "Melvin Price Lock and Dam."

Mr. PRICE has been serving Illinois and this Nation for 36 years as a Member of the House of Representatives. A former sportswriter and newspaper correspondent, he entered public life as a member of the St. Clair County Board of Supervisors in 1929. He came to Washington in 1933 and served for 10 years as secretary of the late Congressman Edwin Schaefer. He joined the Army and served as an enlisted man in 1943 and 1944. He was in fact on KP duty when he got the phone call telling him he had been elected to Congress.

As a Member of Congress, he served on the old House Military Affairs Committee. In 1967, the House elected him as the first chairman of the House Committee on Standards of Official Conduct. In 1975 he became chairman of the Armed Services Committee.

In addition to all he has done for America, Mr. Speaker, he has done a great deal for me as a friend. When I came to Congress, MEL PRICE had already been a Congressman for over a quarter of a century. He and FRANK ANNUNZIO honored me by teaching me the mysterious ways of the Congress. We have been close friends ever since. I have always been pleased to have such a great American as mentor, and I thank the committee for, I hope, joining with me to honor him in this way.

I sincerely thank the chairman of the Water Resources Subcommittee, BOB ROE, for allowing this resolution to move so quickly to the full committee.

Mr. CLAUSEN. Mr. Speaker, I rise in support of H.R. 4506, as amended, and urge our colleagues here this afternoon to do likewise. This bill names one of the Nation's major locks and dams after our most distinguished friend and colleague from the State of Illinois, MELVIN PRICE. In light of the major legislative accomplishments that have for so long been the hallmark of the gentleman from Illinois, I think it is only fitting and proper that we honor him and his accomplishments as we propose to do in H.R. 4506.

● Mr. HOWARD. Mr. Speaker, I rise in strong support of H.R. 4506, a bill to name the lock and dam authorized to replace Locks and Dam 26 on the Mississippi River at Alton, Ill., as the "Melvin Price Lock and Dam." I know that our colleague, Congressman PRICE, has devoted a great deal of his long career in public service to seeing the replacement of Locks and Dam 26 come to fruition. It is most fitting that this new facility bear his name.●

● Mr. ROE. Mr. Speaker, the purpose of H.R. 4506 is to name the lock and dam authorized to replace Locks and Dam 26 on the Mississippi River as the "Melvin Price Lock and Dam."

Public Law 95-502 authorized the construction of a new dam and a new 1,200-foot lock to replace the existing Locks and Dam 26 on the Mississippi River near Alton, Ill. That new project is now under construction and is currently scheduled for completion early in 1989. When it is open to traffic it will relieve one of the worst bottlenecks for navigation on the entire U.S. inland waterway system.

Congressman MELVIN PRICE has represented the 23d District of Illinois with honor and distinction for 19 terms. During that time he has worked long and effectively to secure the authorization of the replacement of Locks and Dam 26. Naming this new structure after Congressman PRICE, who has been so instrumental in its realization, is an appropriate recognition of his tireless efforts in support of the project, as well as his commitment to water resources development.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in support of H.R. 4506 with the committee amendment. This bill honors the distinguished Member from Illinois by renaming a vitally important link in the Mississippi River Navigation System. In order to maintain the precedent that the committee has set in regard to such legislation, the committee has agreed to make the new name effective after the gentleman has completed his service as a Member of Congress.

I am very pleased to support this legislation, as amended, and urge my colleagues to support it as well.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in support of H.R. 4506, a bill I cosponsored to name the lock and dam authorized to replace locks and dam 26, on the Mississippi River at Alton, Ill., as the "Melvin Price Lock and Dam."

This is a fitting tribute to the Honorable MELVIN PRICE, my good friend and colleague who was elected to the 79th Congress in 1944, making him the second-ranking Congressman in seniority in the current 97th Congress, and the senior member of our Illinois congressional delegation. He is a dedicated and devoted American, and a Congressman of outstanding ability, deep compassion, and courage.

As chairman of the House Armed Services Committee, MEL PRICE has given superlative service to his constituents of the 23d District of Illinois, and to individual servicemen throughout the Nation. His diligent efforts to reform the military code of justice, provide legal defense services overseas, expand health care, and educational benefits, particularly for widows of servicemen killed in the line of duty, have been both fruitful and beneficial to the citizens of our country.

I urge, therefore, that my colleagues support H.R. 4506 which will extend this much-deserved recognition to the legislative accomplishments and dedicated service of a truly great American—MELVIN PRICE.●

Mr. FINDLEY. Mr. Speaker, I rise in strong support of H.R. 4506, the bill to name the lock and dam, authorized by section 102 of Public Law 95-502, after MELVIN PRICE.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WILLIAM R. COTTER FEDERAL BUILDING

Mr. FARY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 4569) to designate the U.S. Post Office Building in Hartford, Conn., as the "William R. Cotter Federal Building."

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4569

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the building at 135 High Street, Hartford, Connecticut (commonly known as the High Street Post Office), shall hereafter be known, called, and designated as the "William R. Cotter Federal Building". Any reference in any law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to be a reference to the William R. Cotter Federal Building.

Mr. FARY. Mr. Speaker, I rise in support of the bill H.R. 4569, which would designate the U.S. post office building in Hartford, Conn., the "William R. Cotter Federal Building."

Before his death a short time ago, Bill Cotter represented the First District of Connecticut. He was elected to the House in 1970 after a long and dis-

tinguished involvement in State government. He was at various times an aide to the Governor, a member of the Hartford Court of Common Council, and the State insurance commissioner. After coming to the Congress, he continued to serve the people of the First District through his position on the Ways and Means Committee.

Mr. Speaker, besides being a great servant of his constituents, he was a great person. He was a personal friend of mine and of all the members of the Connecticut congressional delegation who have sponsored this bill. Naming this building for Bill Cotter will be a lasting tribute to an excellent Congressman and a wonderful man.

Mr. CLAUSEN. Mr. Speaker, the legislation which we now have under consideration, naming the Hartford Post Office after William R. Cotter, will pay tribute to him for his many outstanding contributions to the State of Connecticut and the Nation during his 10 years of service in Congress. Since Mr. Cotter was born and raised in Hartford, this is a particularly appropriate way for us to commemorate him and will be a lasting reminder to Mr. Cotter's constituents, friends, and relatives of his valuable service. I would urge my colleagues to approve this measure.

● Mr. HOWARD. The Committee on Public Works and Transportation has reported and recommended passage of H.R. 4569, a bill to designate the U.S. post office building in Hartford, Conn., as the "William R. Cotter Federal Building," having considered the same, report favorably thereon without amendment and recommend that the bill do pass.

Congressman William R. Cotter was born in Hartford, Conn., on July 18, 1926. He attended the Hartford public schools and Trinity College, where, in 1949, he was awarded a B.A. in history and economics.

In 1953, he became a member of Hartford's Court of Common Council. He served as an aide to Gov. Abraham Ribicoff, 1955-57. He was the deputy insurance commissioner for the State of Connecticut, 1957-64; and the insurance commissioner 1964-70. He was elected to the 92d Congress on November 3, 1970, and was reelected to each succeeding Congress, where he served as a member of the Committee on Ways and Means until his death. He was chairman of the Subcommittee on Select Revenue Measures.

Mr. Cotter was for 10 years a valuable and hard-working Member of the House of Representatives. His service to his constituents and the city of Hartford is well known; his devotion to them was total. His colleagues from the State of Connecticut will greatly miss his warm personality and his efforts on behalf of the State they all serve.

As a tribute to a fine man and in commemoration of his service in the Congress of the United States, it is fitting that a building in his native city, among the people he loved, be named the "William R. Cotter Federal Building."●

● Mr. HAMMERSCHMIDT. Mr. Speaker, in honor of his outstanding service in Congress, I join my colleagues in supporting H.R. 4569 to designate the Hartford Post Office as the "William R. Cotter Federal Building." I would urge its passage.●

The bill was ordered to be engrossed and read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

ROBERT V. DENNEY FEDERAL BUILDING AND COURTHOUSE

Mr. FARY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 4845) to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebr., as the "Robert V. Denney Federal Building and Courthouse".

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4845

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the building located at 100 Centennial Mall, Lincoln, Nebraska, known as the Lincoln Federal Building and Courthouse, shall hereafter be known and designated as the "Robert V. Denney Federal Building and Courthouse". Any reference in a law, map, regulation, document, record, or other paper of the United States to that building shall be deemed to be a reference to the "Robert V. Denney Federal Building and Courthouse".

Mr. FARY. Mr. Speaker, H.R. 4845 is a bill to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebr., as the Robert V. Denney Federal Building and Courthouse.

The late Mr. Denney served as a Member of Congress from Nebraska from 1966 to 1970. He served as a U.S. district court judge for 10 years after that. He was, I am told, very active in getting this building built. The committee felt that this naming would be a fitting tribute to Mr. Denney.

Mr. CLAUSEN. Mr. Speaker, being a cosponsor of this bill and one who has had the opportunity of working with Bob Denney on the Public Works and Transportation Committee, I wish to urge all Members to support this bill honoring him.

During his career in public life, Bob had the unique opportunity of serving in all three branches of government. As Representative from Nebraska's First Congressional District, as well as a U.S. district court judge for 10 years, Bob Denney's hard work and effective leadership won praise and admiration from his colleagues.

While in Congress, he was a constructive and dedicated member of the Public Works and Transportation Committee. In this capacity, he was instrumental in insuring the construction of the Lincoln, Nebr. Federal Building and Courthouse which this legislation would name in his honor.

Bob Denney was a good politician and a great legislative craftsman. He was a true gentleman in the finest sense of the word and I was privileged to claim him as a close personal friend.

But, above all, Bob Denney was one of the most objective and constructive Members of Congress that I've served with in my nearly 20 years.

He had instincts and concerns that brought many matters to the attention of our committee and the Congress that were ultimately incorporated into law.

One such example was his amendment to the interstate highway program which made sure that Nebraska got at least one half of 1 percent of the annual interstate apportionment.

The real purpose of our existence is not only to make a living but to make a life—a meaningful, purposeful, and well-rounded life.

Bob Denney had that kind of a life. Through his efforts thousands of Nebraskans have enjoyed the fulfillment of many of their dreams and aspirations because of Bob Denney's service to his country.

● Mr. HOWARD. Mr. Speaker, the Committee on Public Works and Transportation has reported and recommended passage of H.R. 4845, a bill which would designate the Federal building and courthouse in Lincoln, Nebr., as the Robert V. Denney Federal Building and Courthouse.

Mr. Denney was elected to the Congress 2 years after I came here and served until he became a Federal judge in 1970. Through his hard work as a member of the House Public Works Committee, the Lincoln Federal Building and Courthouse became a reality. As a judge in the U.S. District Court, he further took an active interest in the court facilities.

Mr. Speaker, in commemoration of his long and faithful service to the people of Lincoln, Nebr., and the United States, it is fitting that we name this building after him.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I urge all Members to approve this measure to name the Lincoln, Nebr., Federal Building and Courthouse after our former colleague, Bob Denney. This would truly be a deserving tribute to a man who served his country so capably in all three branches of government. Furthermore, as the driving force behind

the construction of this particular building, I can see no better way to honor this outstanding public servant for his many achievements.●

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FARY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the several bills just passed.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

□ 1230

ASSISTANT SECRETARY OF DEFENSE FOR STRATEGIC AND HOMELAND DEFENSE

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, as I have worked in the area of civil defense in recent years, I have been struck by the fact that there is little overall coordination of this vital program. As an example, at the present time, at least three Government agencies, and possibly more, are working on comprehensive civil defense plans for our Nation. More recently, I have also become aware that there is little coordination between civil defense and the other elements of strategic defense—air defense and ballistic missile defense.

Today, I am introducing legislation which will help give some direction and focus to this area. My bill would create a new Assistant Secretary of Defense for Strategic and Homeland Defense whose duties would include the supervision of all DOD affairs which relate to civil defense, air defense, and ballistic missile defense.

Mr. Speaker, improvement of our strategic defenses is an element in the administration's 5-part strategic program. The components of strategic defense—civil defense, air defense, and ballistic missile defense—should receive equal priority with the more glamorous elements of the proposed program, such as the MX missile, the B-1 bomber, and the Trident submarine. Adoption of my bill will concentrate responsibility for Department of Defense strategic defense programs, now widely diffused throughout the Pentagon, into one office and give these programs the increased status they have lacked in the past. I hope all of my colleagues will join me in support of this legislation.

CONFERENCE REPORT ON H.R. 3454, INTELLIGENCE AUTHORIZATION ACT, FISCAL YEAR 1982

Mr. BOLAND submitted the following conference report and statement on the bill (H.R. 3454) to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the intelligence community staff, and for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 97-332)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3454) to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the Intelligence Community Staff, and for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

The the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Intelligence Authorization Act for Fiscal Year 1982".

TITLE I—INTELLIGENCE ACTIVITIES

AUTHORIZATION OF APPROPRIATIONS

SEC. 101. Funds are hereby authorized to be appropriated for fiscal year 1982 for the conduct of the intelligence and intelligence-related activities of the following agencies of the United States Government:

(1) The Central Intelligence Agency.
(2) The Department of Defense.
(3) The Defense Intelligence Agency.
(4) The National Security Agency.
(5) The Department of the Army, the Department of the Navy, and the Department of the Air Force.
(6) The Department of State.
(7) The Department of the Treasury.
(8) The Department of Energy.
(9) The Federal Bureau of Investigation.
(10) The Drug Enforcement Administration.

CLASSIFIED SCHEDULE OF AUTHORIZATIONS

SEC. 102. The amounts authorized to be appropriated under section 101, and the authorized personnel ceilings as of September 30, 1982, for the conduct of the intelligence and intelligence-related activities of the agencies listed in such section, are those specified in the classified Schedule of Authorizations prepared by the committee of conference to accompany H.R. 3454 of the Ninety-seventh Congress. That Schedule of Authorizations shall be made available to the Committees on Appropriations of the Senate and House of Representatives and to the President. The President shall provide for suitable distribution of the Schedule, or of appropriate portions of the Schedule, within the executive branch.

CONGRESSIONAL NOTIFICATION OF EXPENDITURES IN EXCESS OF PROGRAM AUTHORIZATIONS

SEC. 103. During fiscal year 1982, funds may not be made available for any activity for which funds are authorized to be appropriated by this Act unless such funds have been specifically authorized for such activity or, in the case of funds appropriated for a different activity, unless the Director of Central Intelligence or the Secretary of Defense has notified the appropriate committees of Congress of the intent to make such funds available for such activity.

AUTHORIZATION OF APPROPRIATIONS FOR COUNTER-TERRORISM ACTIVITIES OF THE FEDERAL BUREAU OF INVESTIGATION

SEC. 104. In addition to the amounts authorized to be appropriated under section 101(9), there is authorized to be appropriated for fiscal year 1982 the sum of $11,900,000 for the conduct of the activities of the Federal Bureau of Investigation to counter terrorism in the United States.

TITLE II—INTELLIGENCE COMMUNITY STAFF

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. There is authorized to be appropriated for the Intelligence Community Staff for fiscal year 1982 the sum of $13,600,000.

AUTHORIZATION OF PERSONNEL END-STRENGTH

SEC. 202. (a) The Intelligence Community Staff is authorized two hundred and twenty full-time personnel as of September 30, 1982. Such personnel may be permanent employees of the Intelligence Community Staff or personnel detailed from other elements of the United States Government.

(b) During fiscal year 1982, personnel of the Intelligence Community Staff shall be selected so as to provide appropriate representation from elements of the United States Government engaged in intelligence and intelligence-related activities.

(c) During fiscal year 1982, any officer or employee of the United States or member of the Armed Forces who is detailed to the Intelligence Community Staff from another element of the United States Government shall be detailed on a reimbursable basis, except that any such officer, employee, or member may be detailed on a nonreimbursable basis for a period of less than one year for the performance of temporary functions as required by the Director of Central Intelligence.

INTELLIGENCE COMMUNITY STAFF ADMINISTERED IN SAME MANNER AS CENTRAL INTELLIGENCE AGENCY

SEC. 203. During fiscal year 1982, activities and personnel of the Intelligence Community Staff shall be subject to the provisions of the National Security Act of 1947 (50 U.S.C. 401 et seq.) and the Central Intelligence Agency Act of 1949 (50 U.S.C. 403a-4031) in the same manner as activities and personnel of the Central Intelligence Agency.

TITLE III—CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM

AUTHORIZATION OF APPROPRIATIONS

SEC. 301. There is authorized to be appropriated for the Central Intelligence Agency Retirement and Disability Fund for fiscal year 1982 the sum of $84,600,000.

TITLE IV—SUPPLEMENTAL AUTHORIZATION FOR FISCAL YEAR 1981

AUTHORIZATION OF APPROPRIATIONS

SEC. 401. In addition to the funds authorized to be appropriated under title I of the Intelligence Authorization Act for Fiscal Year 1981 (Public Law 96-450; 94 Stat. 1975), funds are hereby authorized to be appropriated for fiscal year 1981 for the conduct of the intelligence and intelligence-related activities of the United States Government. The amounts authorized to be appropriated under the preceding sentence are those specified for that purpose in the classified Schedule of Authorizations described in section 102.

TITLE V—GENERAL PROVISIONS RELATING TO THE CENTRAL INTELLIGENCE AGENCY

ALLOWANCES AND BENEFITS FOR CENTRAL INTELLIGENCE AGENCY PERSONNEL

SEC. 501. Section 4 of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403e) is amended—

(1) by inserting "(a)" before "Under such regulations"; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) The Director may pay to officers and employees of the Agency, and to persons detailed or assigned to the Agency from other agencies of the Government or from the Armed Forces, allowances and benefits comparable to the allowances and benefits authorized to be paid to members of the Foreign Service under chapter 9 of title I of the Foreign Service Act of 1980 (22 U.S.C. 4081 et seq.) or any other provision of law.

"(2) The Director may pay allowances and benefits related to officially authorized travel, personnel and physical security activities, operational activities, and cover-related activities (whether or not such allowances and benefits are otherwise authorized under this section or any other provision of law) when payment of such allowances and benefits is necessary to meet the special requirements of work related to such activities. Payment of allowances and benefits under this paragraph shall be in accordance with regulations prescribed by the Director. Rates for allowances and benefits under this paragraph may not be set at rates in excess of those authorized by section 5724 and 5724a of title 5, United States Code, when reimbursement is provided for relocation attributable, in whole or in part, to relocation within the United States.

"(3) Notwithstanding any other provision of this section or any other provision of law relating to the officially authorized travel of Government employees, the Director, in order to reflect Agency requirements not taken into account in the formulation of Government-wide travel procedures, may by regulation—

"(A) authorize the travel of officers and employees of the Agency, and of persons detailed or assigned to the Agency from other agencies of the Government or from the Armed Forces who are engaged in the performance of intelligence functions, and

"(B) provide for payment for such travel, in classes of cases, as determined by the Director, in which such travel is important to the performance of intelligence functions.

"(4) Members of the Armed Forces may not receive benefits under both this section and title 37, United States Code, for the same purpose. The Director and Secretary of Defense shall prescribe joint regulations to carry out the preceding sentence.

"(5) Regulations issued pursuant to this subsection shall be submitted to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate before such regulations take effect.".

AUTHORITY TO CARRY FIREARMS

SEC. 502. Subsection (d) of section 5 of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403f(d)) is amended to read as follows:

"(d) Authorize personnel designated by the Director to carry firearms to the extent necessary for the performance of the Agency's authorized functions, except that, within the United States, such authority shall be limited to the purposes of protection of classified materials and information, the training of Agency personnel and other authorized persons in the use of firearms, the protection of Agency installations and property, and the protection of Agency personnel and of defectors, their families, and other persons in the United States under Agency auspices; and".

UNAUTHORIZED USE OF CENTRAL INTELLIGENCE AGENCY NAME, INITIALS, OR SEAL

SEC. 503. The Central Intelligence Agency Act of 1949 (50 U.S.C. 403a et seq.) is amended by adding at the end thereof the following new section:

"MISUSE OF AGENCY NAME, INITIALS, OR SEAL

"SEC. 13. (a) No person may, except with the written permission of the Director, knowingly use the words 'Central Intelligence Agency', the initials 'CIA', the seal of the Central Intelligence Agency, or any colorable imitation of such words, initials, or seal in connection with any merchandise, impersonation, solicitation, or commercial activity in a manner reasonably calculated to convey the impression that such use is approved, endorsed, or authorized by the Central Intelligence Agency.

"(b) Whenever it appears to the Attorney General that any person is engaged or is about to engage in an act or practice which constitutes or will constitute conduct prohibited by subsection (a), the Attorney General may initiate a civil proceeding in a district court of the United States to enjoin such act or practice. Such court shall proceed as soon as practicable to the hearing and determination of such action and may, at any time before final determination, enter such restraining orders or prohibitions, or take such other action as it warranted, to prevent injury to the United States or to any person or class of persons for whose protection the action is brought.".

INTELLIGENCE ADVISORY COMMITTEES

SEC. 504. (a) Subsection (a) of section 303 of the National Security Act of 1947 (50 U.S.C. 405) is amended by striking out "at a rate not to exceed $50 for each day of service" in the last sentence and inserting in lieu thereof the following: "at a daily rate not to exceed the daily equivalent of the rate of pay in effect for grade GS-18 of the General Schedule established by section 5332 of title 5, United States Code".

(b) Subsection (b) of such section is amended by striking out "section 281, 283, or 284 of Title 18" and inserting in lieu thereof "section 203, 205, or 207 of title 18".

TITLE VI—GENERAL PROVISIONS RELATED TO THE NATIONAL SECURITY AGENCY

ALLOWANCES AND BENEFITS FOR NATIONAL SECURITY AGENCY PERSONNEL

SEC. 601. (a) Subsection (b)(1) of section 9 of the National Security Agency Act of 1959 (50 U.S.C. 402 note) is amended to read as follows:

"(1) allowances and benefits—

"(A) comparable to those provided by the Secretary of State to members of the Foreign Service under chapter 9 of title I of the Foreign Service Act of 1980 (22 U.S.C. 4081 et seq.) or any other provision of law; and

"(B) in the case of selected personnel serving in circumstances similar to those in which personnel of the Central Intelligence Agency serve, comparable to those provided by the Director of Central Intelligence to personnel of the Central Intelligence Agency; and".

(b) Such section is further amended by adding at the end thereof the following new subsections:

"(d) Members of the Armed Forces may not receive benefits under both subsection (b)(1) and title 37, United States Code, for the same purpose. The Secretary of Defense shall prescribe such regulations as may be necessary to carry out this subsection.

"(e) Regulations issued pursuant to subsection (b)(1) shall be submitted to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate before such regulations take effect.".

LANGUAGE TRAINING AND CRYPTOLOGIC LINGUIST RESERVE PROGRAMS

SEC. 602. The National Security Agency Act of 1959 is amended—

(1) by inserting after section 9 the following:

"SEC. 10. (a) The Director of the National Security Agency shall arrange for, and shall prescribe regulations concerning, language and language-related training programs for military and civilian cryptologic personnel. In establishing programs under this section for language and language-related training, the Director—

"(1) may provide for the training and instruction to be furnished, including functional and geographic area specializations;

"(2) may arrange for training and instruction through other Government agencies and, in any case in which appropriate training or instruction is unavailable through Government facilities, through nongovernmental facilities that furnish training and instruction useful in the fields of language and foreign affairs;

"(3) may support programs that furnish necessary language and language-related skills, including, in any case in which appropriate programs are unavailable at Government facilities, support through contracts, grants, or cooperation with nongovernmental educational institutions; and

"(4) may obtain by appointment or contract the services of individuals to serve as language instructors, linguists, or special language project personnel.

"(b)(1) In order to maintain necessary capability in foreign language skills and related abilities needed by the National Security Agency, the Director, without regard to subchapter IV of chapter 55 of title 5, United States Code, may provide special monetary or other incentives to encourage civilian cryptologic personnel of the Agency to acquire or retain proficiency in foreign languages or special related abilities needed by the Agency.

"(2) In order to provide linguistic training and support for cryptologic personnel, the Director—

"(A) may pay all or part of the tuition and other expenses related to the training of personnel who are assigned or detailed for

language and language-related training, orientation, or instruction; and

"(B) may pay benefits and allowances to civilian personnel in accordance with chapters 57 and 59 of title 5, United States Code, and to military personnel in accordance with chapter 7 of title 37, United States Code, and applicable provisions of title 10, United States Code, when such personnel are assigned to training at sites away from their designated duty station.

"(c)(1) To the extent not inconsistent, in the opinion of the Secretary of Defense, with the operation of military cryptologic reserve units and in order to maintain necessary capability in foreign language skills and related abilities needed by the National Security Agency, the Director may establish a cryptologic linguist reserve. The cryptologic linguist reserve may consist of former or retired civilian or military cryptologic personnel of the National Security Agency and of other qualified individuals, as determined by the Director of the Agency. Each member of the cryptologic linguist reserve shall agree that, during any period of emergency (as determined by the Director), the member shall return to active civilian status with the National Security Agency and shall perform such linguistic or linguistic-related duties as the Director may assign.

"(2) In order to attract individuals to become members of the cryptologic linguist reserve, the Director, without regard to subchapter IV of chapter 55 of title 5, United States Code, may provide special monetary incentives to individuals eligible to become members of the reserve who agree to become members of the cryptologic linguist reserve and to acquire or retain proficiency in foreign languages or special related abilities.

"(3) In order to provide training and support for members of the cryptologic linguist reserve, the Director—

"(A) may pay all or part of the tuition and other expenses related to the training of individuals in the cryptologic linguist reserve who are assigned or detailed for language and language-related training, orientation, or instruction; and

"(B) may pay benefits and allowances in accordance with chapters 57 and 59 of title 5, United States Code, to individuals in the cryptologic linguist reserve who are assigned to training at sites away from their homes or regular places of business.

"(d)(1) The Director, before providing training under this section to any individual, may obtain an agreement with that individual that—

"(A) in the case of current employees, pertains to continuation of service of the employee, and repayment of the expenses of such training for failure to fulfill the agreement, consistent with the provisions of section 4108 of title 5, United States Code; and

"(B) in the case of individuals accepted for membership in the cryptologic linguist reserve, pertains to return to service when requested, and repayment of the expenses of such training for failure to fulfill the agreement, consistent with the provisions of section 4108 of title 5, United States Code.

"(2) The Director, under regulations prescribed under this section, may waive, in whole or in part, a right of recovery under an agreement made under this subsection if it is shown that the recovery would be against equity and good conscience or against the public interest.

"(e)(1) Subject to paragraph (2), the Director may provide to family members of military and civilian cryptologic personnel assigned to representational duties outside the United States, in anticipation of the assignment of such personnel outside the United States or while outside the United States, appropriate orientation and language training that is directly related to the assignment aboard.

"(2) Language training under paragraph (1) may not be provided to any individual through payment of the expenses of tuition or other cost of instruction at a non-Government educational institution unless appropriate instruction is not available at a Government facility.

"(f) The Director may waive the applicability of any provision of chapter 41 of title 5, United States Code, to any provision of this section if he finds that such waiver is important to the performance of cryptologic functions.

"(g) The authority of the Director to enter into contracts or to make grants under this section is effective for any fiscal year only to the extent that appropriated funds are available for such purpose.

"(h) Regulations issued pursuant to this section shall be submitted to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate before such regulations take effect."; and

(2) by striking out "SEC. 10." before "The "Director" and inserting in lieu thereof "(i)".

SENIOR CRYPTOLOGIC EXECUTIVE SERVICE; CRYPTOLOGIC RESEARCH GRANTS; CRYPTOLOGIC PROCUREMENT; MISUSE OF AGENCY NAME

"SEC. 603. The National Security Agency Act of 1959 is amended by adding at the end thereof the following new sections:

"SEC. 12. (a)(1) The Secretary of Defense (or his designee) may by regulation establish a personnel system for senior civilian cryptologic personnel in the National Security Agency to be known as the Senior Cryptologic Executive Service. The regulations establishing the Senior Cryptologic Executive Service shall—

"(A) meet the requirements set forth in section 3131 of title 5, United States Code, for the Senior Executive Service:

"(B) provide that positions in the Senior Cryptologic Executive Service meet requirements that are consistent with the provisions of section 3132(a)(2) of such title;

"(C) provide, without regard to section 2, rates of pay for the Senior Cryptologic Executive Service that are not in excess of the maximum rate or less than the minimum rate of basic pay established for the Senior Executive Service under section 5382 of such title, and that are adjusted at the same time and to the same extent as rates of basic pay for the Senior Executive Service are adjusted;

"(D) provide a performance appraisal system for the Senior Cryptologic Executive Service that conforms to the provisions of subchapter II of chapter 43 of such title;

"(E) provide for removal consistent with section 3592 of such title, and removal or suspension consistent with subsections (a), (b), and (c) of section 7543 of such title (except that any hearing or appeal to which a member of the Senior Cryptologic Executive Service is entitled shall be held or decided pursuant to procedures established by regulations of the Secretary of Defense or his designee);

"(F) permit the payment of performance awards to members of the Senior Cryptologic Executive Service consistent with the provisions applicable to performance awards under section 5384 of such title; and

"(G) provide that members of the Senior Cryptologic Executive Service may be granted sabbatical leaves consistent with the provisions of section 3396(c) of such title.

"(2) Except as otherwise provided in subsection (a), the Secretary of Defense (or his designee) may—

"(A) make applicable to the Senior Cryptologic Executive Service any of the provisions of title 5, United States Code, applicable to applicants for or members of the Senior Executive Service; and

"(B) appoint, promote, and assign individuals to positions established within the Senior Cryptologic Executive Service without regard to the provisions of title 5, United States Code, governing appointments and other personnel actions in the competitive service.

"(3) The President, based on the recommendations of the Secretary of Defense, may award ranks to members of the Senior Cryptologic Executive Service in a manner consistent with the provisions of section 4507 of title 5, United States Code.

"(4) Notwithstanding any other provision of this section, the Director of the National Security Agency may detail or assign any member of the Senior Cryptologic Executive Service to serve in a position outside the National Security Agency in which the member's expertise and experience may be of benefit to the National Security Agency or another Government agency. Any such member shall not by reason of such detail or assignment lose any entitlement or status associated with membership in the Senior Cryptologic Executive Service.

"(5) The Director of the National Security Agency shall each year submit to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate, at the time the Budget is submitted by the President to the Congress for the next fiscal year, a report on executive personnel in the National Security Agency. The report shall include—

"(A) the total number of positions added to or deleted from the Senior Cryptologic Executive Service during the preceding fiscal year;

"(B) the number of executive personnel (including all members of the Senior Cryptologic Executive Service) being paid at each grade level and pay rate in effect at the end of the preceding fiscal year;

"(C) the number, distribution, and amount of awards paid to members of the Senior Cryptologic Executive Service during the preceding fiscal year; and

"(D) the number of individuals removed from the Senior Cryptologic Executive Service during the preceding fiscal year for less than fully successful performance.

"(b) The Secretary of Defense (or his designee) may by regulation establish a merit pay system for such employees of the National Security Agency as the Secretary of Defense (or his designee) considers appropriate. The merit pay system shall be designed to carry out purposes consistent with those set forth in section 5401(a) of title 5, United States Code.

"(c) Nothing in this section shall be construed to allow the aggregate amount payable to a member of the Senior Cryptologic Executive Service under this section during any fiscal year to exceed the annual rate payable for positions at level I of the Executive Schedule in effect at the end of such year.

"SEC. 13. (a) The Director of the National Security Agency may make grants to private

individuals and institutions for the conduct of cryptologic research. An application for a grant under this section may not be approved unless the Director determines that the award of the grant would be clearly consistent with the national security.

"(b) The grant program established by subsection (a) shall be conducted in accordance with the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.) to the extent that such Act is consistent with and in accordance with section 6 of this Act.

"(c) The authority of the Director to make grants under this section is effective for any fiscal year only to the extent that appropriated funds are available for such purpose.

"SEC. 14. Funds appropriated to an entity of the Federal Government other than an element of the Department of Defense that have been specifically appropriated for the purchase of cryptologic equipment, materials, or services with respect to which the National Security Agency has been designated as the central source of procurement for the Government shall remain available for a period of three fiscal years.

"SEC. 15. (a) No person may, except with the written permission of the Director of the National Security Agency, knowingly use the words 'National Security Agency', the initials 'NSA', the seal of the National Security Agency, or any colorable imitation of such words, initials, or seal in connection with any merchandise, impersonation, solicitation, or commercial activity in a manner reasonably calculated to convey the impression that such use is approved, endorsed, or authorized by the National Security Agency.

"(b) Whenever it appears to the Attorney General that any person is engaged or is about to engage in an act or practice which constitutes or will constitute conduct prohibited by subsection (a), the Attorney General may initiate a civil proceeding in a district court of the United States to enjoin such act or practice. Such court shall proceed as soon as practicable to the hearing and determination of such action and may, at any time before final determination, enter such restraining orders or prohibitions, or take such other action as it warranted, to prevent injury to the United States or to any person or class of persons for whose protection the action is brought.".

TITLE VII—DEFENSE INTELLIGENCE AGENCY PERSONNEL PROVISIONS

DEFENSE INTELLIGENCE SENIOR EXECUTIVE SERVICE; MERIT PAY SYSTEM

SEC. 701. (a)(1) Part II subtitle A of title 10, United States Code, is amended by adding at the end thereof the following new chapter:

"Chapter 83—DEFENSE INTELLIGENCE AGENCY CIVILIAN PERSONNEL

"Sec.
"1601. Defense Intelligence Senior Executive Service.
"1602. Defense Intelligence Agency merit pay system.
"1603. Limit on pay.

"§ 1601. Defense Intelligence Senior Executive Service

"(a) The Secretary of Defense may by regulation establish a personnel system for senior civilian personnel within the Defense Intelligence Agency to be known as the Defense Intelligence Senior Executive Service. The regulations establishing the Defense Intelligence Senior Executive Service shall—

"(1) meet the requirements set forth in section 3131 of title 5 for the Senior Executive Service;

"(2) provide that positions in the Defense Intelligence Senior Executive Service meet requirements that are consistent with the provisions of section 3132(a)(2) of title 5;

"(3) provide rates of pay for the Defense Intelligence Senior Executive Service that are not in excess of the maximum rate or less than the minimum rate of basic pay established for the Senior Executive Service under section 5382 of title 5, and that are adjusted at the same time and to the same extent as rates of basic pay for the Senior Executive Service are adjusted;

"(4) provide a performance appraisal system for the Defense Intelligence Senior Executive Service that conforms to the provisions of subchapter II of chapter 43 of title 5;

"(5) provides for removal consistent with section 3592 of such title, and removal or suspension consistent with subsections (a), (b), and (c) of section 7543 of title 5 (except that any hearing or appeal to which a member of the Defense Intelligence Senior Executive Service is entitled shall be held or decided pursuant to procedures established by regulations of the Secretary of Defense);

"(6) permit the payment of performance awards to members of the Defense Intelligence Senior Executive Service consistent with the provisions applicable to performance awards under section 5384 of title 5; and

"(7) provide that members of the Defense Intelligence Senior Executive Service may be granted sabbatical leaves consistent with the provisions of section 3396(c) of title 5.

"(b) Except as otherwise provided in subsection (a), the Secretary of Defense may—

"(1) make applicable to the Defense Intelligence Senior Executive Service any of the provisions of title 5 applicable to applicants for or members of the Senior Executive Service; and

"(2) appoint, promote, and assign individuals to positions established within the Defense Intelligence Senior Executive Service without regard to the provisions of title 5 governing appointments and other personnel actions in the competitive service.

"(c) The President, based on the recommendations of the Secretary of Defense, may award ranks to members of the Defense Intelligence Senior Executive Service in a manner consistent with the provisions of section 4507 of title 5.

"(d) Notwithstanding any other provision of this section, the Secretary of Defense may detail or assign any member of the Defense Intelligence Senior Executive Service to serve in a position outside the Defense Intelligence Agency in which the member's expertise and experience may be of benefit to the Defense Intelligence Agency or another Government agency. Any such member shall not by reason of such detail or assignment lose any entitlement or status associated with membership in the Defense Intelligence Senior Executive Service.

"(e) The Secretary of Defense shall each year submit to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate, at the time the Budget is submitted by the President to the Congress for the next fiscal year, a report on the executive personnel in the Defense Intelligence Agency. The report shall include—

"(1) the total number of positions added to or deleted from the Defense Intelligence Senior Executive Service during the preceding fiscal year;

"(2) the number of executive personnel (including all members of the Defense Intelligence Senior Executive Service) being paid at each grade level and pay rate in effect at the end of the preceding fiscal year;

"(3) the number, distribution, and amount of awards paid to members of the Defense Intelligence Senior Executive Service during the preceding fiscal year; and

"(4) the number of individuals removed from the Defense Intelligence Senior Executive Service during the preceding fiscal year for less than fully successful performance.

"§1602. Defense Intelligence Agency merit pay system

"The Secretary of Defense may by regulation establish a merit pay system for such employees of the Defense Intelligence Agency as the Secretary considers appropriate. The merit pay system shall be designed to carry out purposes consistent with those set forth in section 5401(a) of title 5.

"§1603. Limit on pay

"Nothing in this chapter shall be construed to allow the aggregate amount payable to a member of the Defense Intelligence Senior Executive Service under this chapter during any fiscal year to exceed the annual rate payable for positions at level I of the Executive Schedule in effect at the end of such year.".

(2) The table of chapters at the beginning of subtitle A of title 10, United States Code, and the table of chapters at the beginning of part II of such subtitle, are amended by adding after the item relating to chapter 81 the following new item:

"83. Defense Intelligence Agency Civilian Personnel..... 1601".

(b) The authority of the Secretary of Defense under chapter 83 of title 10, United States Code, as added by subsection (a), may be delegated in accordance with section 133(d) of title 10, United States Code.

TITLE VIII—PROVISIONS APPLICABLE TO MORE THAN ONE AGENCY AND EFFECTIVE DATE

EXCLUSION FROM VETERANS PREFERENCE PROVISIONS

SEC. 801. Section 2108(3) of title 5, United States Code, is amended by striking out "or the General Accounting Office" and inserting in lieu thereof ", the Defense Intelligence Senior Executive Service, the Senior Cryptologic Executive Service, or the General Accounting Office".

ACCUMULATION OF ANNUAL LEAVE NOT SUBJECT TO LIMITATION

SEC. 802. Section 6304 of title 5, United States Code, is amended by striking out subsections (f) and (g) and inserting in lieu thereof the following:

"(f) Annual leave accrued shall not be subject to the limitation on accumulation otherwise imposed by this section if such leave is accrued by an individual while serving in a position in—

"(1) the Senior Executive Service;

"(2) the Senior Foreign Service;

"(3) the Defense Intelligence Senior Executive Service; or

"(4) the Senior Cryptologic Executive Service.".

EARLY RETIREMENT

SEC. 803. Section 8336 of title 5, United States Code, is amended by inserting "(1)" after "(h)" and by adding at the end thereof the following new paragraph:

"(2) A member of the Defense Intelligence Senior Executive Service or the Senior Cryptologic Executive Service who is removed from such service for less than fully successful executive performance after completing 25 years of service or after becoming 50 years of age and completing 20 years of service is entitled to an annuity.".

INCREASES IN EMPLOYEE BENEFITS AUTHORIZED BY LAW

SEC. 804. Appropriations authorized by this Act for salary, pay, retirement, and other benefits for Federal employees may be increased by such additional or supplemental amounts as may be necessary for increases in such benefits authorized by law.

RESTRICTION ON CONDUCT OF INTELLIGENCE ACTIVITIES

SEC. 805. The authorization of appropriations by this Act shall not be deemed to constitute authority for the conduct of any intelligence activity which is not otherwise authorized by the Constitution or laws of the United States.

EFFECTIVE DATE

SEC. 806. The amendments made by titles V, VI, and VII and by this title shall take effect as of October 1, 1981.

And the Senate agree to the same.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3454) to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the United States Government, for the Intelligence Community Staff, and for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the United States Government, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

TITLE I—INTELLIGENCE ACTIVITIES

Due to the classified nature of intelligence and intelligence-related activities, a classified annex to this joint explanatory statement serves as a guide to the classified Schedule of Authorizations by providing a detailed description of program and budget authority contained therein as reported by the Committee of Conference.

The actions of the conferees on all matters at difference between the two Houses (stated in the classified annex, supplement and appendix that accompanied the House bill and the Senate amendment) are shown below or in the classified annex to this joint statement.

A special conference group resolved differences between the House and Senate regarding DoD Intelligence Related Activities, referred to as Tactical Intelligence and Related Activities (TIARA). This special conference group was necessitated by the differing committee jurisdictions between the two Houses and consisted of members of the House and Senate Committees on Armed Services and the House Permanent Select Committee on Intelligence.

The amounts listed for TIARA programs represent the funding levels jointly agreed to by the TIARA conferees and the House and Senate conferees for the Department of Defense Authorization Act, 1982, for those programs subject to annual authorization and contained in the Department of Defense Authorization bill. In addition, the TIARA conferees have agreed on the authorization level, as listed in the classified Schedule of Authorizations, the joint statement, and its classified annex, for TIARA programs which fall into the appropriation categories of Military Pay, Other Procurement, and Military Construction.

The Senate amendment contained a provision (Sec. 510) which would make it a federal crime to kill, or attempt to kill, CIA personnel while acting in the line of duty, intelligence defectors, or foreign visitors who are present in the United States under the auspices of the Director of Central Intelligence. The conferees agreed that such a proposal deserved consideration but recognized that the House Judiciary Committee had not had an opportunity to adequately consider the matter. The conferees therefore agreed to defer this proposal without prejudice. It was further agreed that separate legislation on this proposal would be introduced.

SECTION 103

Section 103 of the House bill provided that each individual ceiling established specifically in the Schedule of Authorizations would be a limitation on obligation and expenditure except by notification of the appropriate committees of Congress fifteen days prior to the intended obligation or expenditure. The Senate amenendment contained no similar provision.

The conferees agreed to revised language requiring that no funds may be appropriated or otherwise made available through transfer, reprogramming, etc., unless specifically authorized or unless by notification. The conferees intend that specifically authorized intelligence activities be considered as those activities described in annual budget justification material as modified by the Congress. In addition, the conferees agreed that the notification requirement is not intended to apply to reprogrammings below agreed-to dollar thresholds, releases from authorized contingency funds, or to Economy Act transactions for specific activities otherwise authorized by law. Further, the conferees agreed that while notification required under this provision should be made at least fifteen days prior to completion of the funding transaction, circumstances may occasionally require later notification.

The Administration has argued that circumstances could arise in which prior notice of an activity would be required by Section 103 but would not be required by the Intelligence Oversight Act. Whether or not such circumstances could exist, the conferees agree that should questions arise on the issue in the future, resolution should be guided by the principles of comity and mutual understanding as set forth in the statement of managers accompanying the conference report on the Intelligence Oversight Act (H. Rept. 96-1350). Under all circumstances, however, the notification of the Intelligence Committees required by this Section, must be provided.

SECTION 104

Section 105 of the House bill authorized appropriations of $11,900,000 for activities of the Federal Bureau of Investigation undertaken to counter domestic terrorism. The Senate amendment contained no such specific provision. The funding level recommended by the Senate and reflected in Section 101 of the Senate amendment, was the same as the House bill.

The conferees agreed to the House provision.

TITLE II—INTELLIGENCE COMMUNITY STAFF

CONFERENCE ACTIONS, FISCAL YEAR 1982 (SEC. 201)

[In millions of dollars]

Project	Fiscal year 1982 request	House action	Senate action	Conference authorization
External research contracts	3.1	−0.8		2.3
Personnel compensation	9.9	−1.0		8.9
Remaining ICS funding	2.4			2.4
Total ICS funding	15.4	−1.8		13.6
Total ICS manpower	(245)	(−25)		(220)

The conferees agreed to a reduction of $1.8 million for the Intelligence Community Staff. This reduction also results in the deletion of 25 previously authorized positions on the Staff.

The conferees recognize that the Director of Central Intelligence plans to transfer certain existing personnel and functions into the Intelligence Community Staff from other components. The provisions of Title II

allow for transfer of personnel for up to one year on a nonreimbursable basis. If the Director wishes to make the transfer permanent, he may recommend increased personnel ceilings next year with corresponding reduction in ceiling in the losing component.

TITLE III—CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM

There were no differences at conference to be resolved on CIARDS. Both the House and the Senate authorized $84,600,000, the amount requested.

TITLE IV—SUPPLEMENTAL AUTHORIZATION, FISCAL YEAR 1981

The actions of the conferees on all matters at difference between the two Houses (stated in the classified annex and supplement that accompanied the House bill and the Senate amendment) are shown in the classified annex to this joint statement.

TITLE V—GENERAL PROVISIONS RELATING TO THE CIA

SECTION 501

The House bill contained a provision (Section 502(a)) which would permit the Director of Central Intelligence to: pay CIA officers, employees, detailees and assignees benefits and allowances comparable to those paid to members of the Foreign Service under chapter 9 of title I of the Foreign Service Act of 1980; pay other allowances and benefits to CIA personnel in connection with certain specified aspects of authorized intelligence activities; and establish travel regulations for CIA personnel inconsistent with government-wide travel procedures where important to the performance of intelligence functions. The Senate amendment (Section 505) provided similar, but more broadly drafted, grants of authority.

The conferees agreed to the House language with minor drafting changes.

The conferees note that although the language agreed to speaks in terms of benefits and allowances provided to officers, employees, detailees and assignees of the CIA, benefits and allowances may be provided under the authority of these provisions to such CIA personnel for their dependents just as under the Senate language. Thus visits by children to parents with whom they do not regularly reside would be included among the benefits that could be extended consistent with the new authority.

In agreeing to the House-recommended limitation on reimbursement for portions of travel attributable to travel within the United States, agreed to for reasons of basic fairness, the conferees discovered a disturbing aspect in their examination of these same government-wide rates of reimbursement for officially related personnel transfers. These rates are inadequate to compensate government officials for the real cost of moving from assignment to assignment. Intelligence personnel have been particularly affected because career development often requires frequent moves between major metropolitan centers at the price of considerable personal loss. The conferees believe that government-wide rates ought to be reexamined in light of this dilemma, which promises to discourage the morale and efficiency of significant numbers of intelligence personnel. The conferees believe this reassessment should come both from the executive branch, which presently limits reimbursements at levels below that permitted by law, and from the Congress, which should consider prompt revision of the present statutory authorities relating to transfer expenses.

The conferees also wish to note that the regulations under which the authorities provided to the Director of Central Intelligence may be implemented should deal with those categories and classes of cases where, under appropriate authorities, allowances or benefits may be extended. The committees wish to be provided with these regulations in advance of their implementation because of the hitherto unparalleled grant to authority which the benefits and allowances provisions confer on the Director. This requirement also applies—for the same reasons—to any subsequent modification of such regulations which involve a change of substance. The conferees wish to emphasize, however, that this review of regulations is intended only to examine the broader categories and classes of cases in which certain benefits or allowances will be extended. This review is not intended to be a case-by-case review of decisions taken pursuant to the regulations, but of the policy which guides them.

With particular reference to those authorities provided to the Director which may depart from government-wide travel procedures, it should be noted that the original House language was amended by the conferees to make clear that the decisions which the Director makes under this authority are to be made in regulations dealing with classes of cases. These classes of cases must be dealt with in the regulations, but decisions on individual cases may be delegated by the regulations to appropriate officials.

SECTION 502

The Senate amendment contained a provision (Section 503) authorizing CIA personnel to carry firearms to perform authorized CIA functions. The House bill contained no such provision.

The conferees agreed to the Senate provision, but specifically limited CIA firearms authority within the United States to protection of classified materials and information, the training of CIA personnel in the use of firearms; maintenance of the security of CIA installations and property; and protection of CIA personnel, defectors and their families, and other persons in the United States under CIA auspices.

SECTION 503

The Senate amendment contained a provision (Section 504) proscribing the unauthorized use of the CIA's name, initials or seal in a manner reasonably calculated to convey the impression that such use was authorized and authorizing the Attorney General to seek to enjoin such unauthorized use. The House bill contained no such provision.

The conferees agreed to the Senate provision, with the deletion of redundant matter.

The conferees recognize that some organizations may presently use the initials CIA as an abbreviation or logo for their business name which is other than "Central Intelligence Agency." Section 503 would not prevent legitimate use of these initials by such organizations as an abbreviation or logo for their name so long as there is no false representation of Agency endorsement. It is not the intent of this section to bar members of the public from selling or using T-shirts and souvenirs which bear the Agency's name or initials, provided that the seller or user does not falsely represent that he is acting with the approval or on behalf of the Agency. In other words, the placement of the Agency's name, initials or seal on an item of merchandise, without other facts indicating that the item is being used in a manner reasonably calculated to convey the false impression that such use is approved, endorsed or authorized by the Agency, would not be a sufficient basis for an injunction under this section.

TITLE VI—GENERAL PROVISIONS RELATED TO THE NATIONAL SECURITY AGENCY

SECTION 601

Section 502(b) of the House bill would permit the Director of the National Security Agency to provide, to a selected group of civilian and military cryptographic personnel serving in circumstances similar to those in which CIA personnel serve, benefits and allowances identical to those which could be provided to CIA employees under Section 502(a) of the House bill. The Senate amendment (Section 506) provided authority to the Director of NSA to provide benefits and allowances to NSA personnel parallel to those provided for CIA employees by Section 505 of the Senate amendment.

The conferees agreed to the House provision, including reporting requirements identical to those required by Section 501.

SECTION 602

The House bill contained a provision (Section 503) which authorizes the Director of the National Security Agency: to pay for and otherwise support language and language-related training for NSA employees, and to do so in non-governmental institutions when suitable training courses or instruction is unavailable through government language training centers; to support non-government programs furnishing such instruction when necessary programs are not available at government language training centers; to hire or contract for necessary instructors or other language experts as needed; to offer incentives to civilian NSA employees to maintain language skills not required for their present assignment or to acquire new languages; to offer similar incentives, as well as appropriate training and related benefits and allowances, to retired NSA employees or to other qualified individuals in order to establish a cryptologic linguist reserve; and to provide language training to family members of a certain class of NSA employees who perform representational duties overseas. The Senate amendment contained a provision (Section 508) providing similar authorities. The Senate provision also would extend Civil Service retirement benefits to contract employees of NSA.

The conferees agreed to the House provision with certain minor or technical changes including reporting requirements identical to those in Sections 501 and 601. The conferees also agreed that, while appropriations for language training and the operation of the cryptologic linguist reserve under the authority of Section 602 need not be a line item in applicable appropriation acts, requests for such appropriations should be clearly identified in the budget justification materials submitted to appropriate congressional committees.

SECTION 603

The Senate amendment contained provisions (Section 611-614) permitting the creation at NSA of a Senior Cryptologic Executive Service and a merit pay system similar to the Senior Executive Service and the merit pay system established by the Civil Service Reform Act of 1978. The House bill contained no such provision.

The conferees agreed to a revised version of the Senate language. This new language

closely parallels that of the Government Accounting Office's Senior Executive Service (31 U.S.C. 52-4), but achieves all the purposes of the Senate amendment.

Authority for creation of the Senior Cryptologic Executive Service and the establishment of its parameters through regulation is to lie with the "Secretary of Defense (or his designee)." This phrase was employed by the conferees because the NSA, as a Defense Agency, must remain responsive to direction from the Secretary. Ordinarily, as is the case today under other provisions of the National Security Agency Act, the Secretary delegates his responsibilities to the Director of NSA. Where appropriate, however, as where equities exist which go beyond the interest of NSA, the Secretary will be able to exercise policy guidance in the establishment of the SCES.

The conferees note that the annual report on the SCES required to be provided to the intelligence committees by the Director of NSA may be classified since it requires, in some cases, listing numbers of SCES members in certain categories.

The conferees also note that the new authorities created by this provision are in addition to and not intended to diminish any authority provided to NSA by Section 2 of the National Security Agency Act of 1959. Further, neither the Senior Cryptologic Executive Service nor the Defense Intelligence Senior Executive Service should be considered included within the definition of the "excepted service," as defined by Section 2103(a) of title 5, United States Code.

The House bill contained a provision (Section 504) which would permit the Director of the NSA to make grants for cryptologic research. Funds for this purpose were required to be shown as a line item in the applicable appropriations act. The Senate amendment contained no such provision.

The conferees agreed to accept the House language, except that funds for the cryptologic grant program need only be clearly identified in the annual NSA budget justification materials submitted to the appropriate congressional committees.

The House bill contained a provision (Section 505) providing that funds specifically appropriated to non-Defense Agencies for the purchase of cryptologic equipment, materials or services which will be purchased by NSA, acting as the central source of all such government procurements, shall remain available for three fiscal years. The Senate amendment contained no such provision.

The conferees agreed to the House provision.

The Senate amendment contained a provision (Section 507) proscribing the unauthorized use of the NSA's name, initials or seal in a manner reasonably calculated to convey the impression that such use was authorized and authorizing the Attorney General to seek to enjoin such unauthorized use. The House bill contained no such provision.

The conferees agreed to the Senate provision with the deletion of one superfluous sentence and a redrafting to make the provision identical to that pertaining to the unauthorized use of the CIA's name, initials or seal (Section 503 of the conference report). The conferees intend that this provision be interpreted just as Section 503 of the conference report.

SECTION 701

The Senate amendment contained provisions (Sections 601-605) permitting creation within the Defense Intelligence Agency of a Senior Defense Intelligence Executive Service comparable to the Senior Executive Service, providing DIA a general exemption from the classification system, extending authority to the Secretary of Defense to terminate the employment of any DIA employee when he determined such action would be in the interests of the United States, and providing that organizational, functional and personnel related information concerning DIA need not be made public. The House bill contained no similar provisions.

The conferees agreed to revised language creating a Defense Intelligence Senior Executive Service and a merit pay system at DIA. The conferees agreed not to include the other portions of the Senate amendment but agreed that these proposals deserved the scrutiny of regular hearings and consultation among all committees of appropriate jurisdiction. The authorities provided under Section 701 of the conference report are identical to those provided, in the case of the Senior Cryptologic Executive Service, by Section 603.

SECTIONS 801, 802, 803

The Senate amendment contained appropriate technical amendments (Sections 603-605, 613) applicable to both the Senior Cryptologic Executive Service and the Senior Defense Intelligence Executive Service. The House bill contained no such provision.

The conferees agreed to incorporate these provisions in similar language.

SECTION 805

The Senate amendment provided that the authorization of appropriations by this Act shall not be deemed to constitute authority for the conduct of any intelligence activity which is not otherwise authorized by the Constitution or laws of the United States. The House bill contained similar language applying to the entire Act.

The conferees agreed to the Senate provision.

SECTION 806

The House bill provided for an effective date of October 1, 1981 for all non-budgetary provisions. The Senate amendment provided for different effective dates for its various provisions.

The conferees agreed to the House provision.

MAKING IN ORDER ON TUESDAY, NOVEMBER 17, 1981, OR ANY DAY THEREAFTER, CONSIDERATION OF CONFERENCE REPORT ON H.R. 3454, INTELLIGENCE AUTHORIZATION ACT, FISCAL YEAR 1982

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that it be in order on tomorrow, Tuesday, November 17, 1981, or any day thereafter, to consider the conference report on the bill (H.R. 3454) to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the intelligence community staff, and for the Central Intelligence Agency retirement and disability system, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ANNOUNCEMENT BY CHAIRMAN OF PERMANENT SELECT COMMITTEE ON INTELLIGENCE

Mr. BOLAND. Mr. Speaker, I wish to announce that the classified annex to the statement of managers accompanying the conference report is available for inspection by any Member in the offices of the Permanent Select Committee on Intelligence from 8:30 a.m. to 5 p.m. Monday through Friday.

THE HOME CARE ALTERNATIVE

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, in his press conference last week, President Reagan made a convincing pitch for home health care that I hope he will begin to incorporate in his administration's programs for the aged and infirm.

Until now, the administration has shown little sensitivity to the sound arguments for home care. But the President's remarks about the young child from Cedar Rapids whose severe illness could be better and less expensively treated in her own home signal an important change in approach.

Now let us see what the President plans to do to make home health care a feasible, affordable alternative to institutionalization.

Will the administration now reverse its "institutional bias" that led it to reimpose arbitary medicare rules on the number of covered visits to at-home patients by health personnel?

Will it rethink its block-grant consolidation, and steep cuts in healthcare programs that, in the State of Connecticut alone, will reduce by up to 30 percent the key nutrition, transportation, day care, and other services that allow many of our chronically ill elderly to lead safe, independent lives in their own homes?

Mr. Speaker, will this administration finally recognize that there is simply no more humane and economical way to care for many of the chronically ill than to care for them at home? That is a recognition, and a commitment, millions of Americans eagerly await.

REVENUE-SHARING REDUCTIONS

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, last Friday morning, I was the guest speaker at the Seventh Annual Kentucky Association of Counties' Meeting at the Kentucky Dam Village Convention Center in Gilbertsville, Ky. I spoke about the need for revenue sharing and about my opposition to substantial cutbacks in this program.

Several of the officials there asked that I give the same message to my colleagues here in the House. It is difficult to understand how Congress can continue to find billions of dollars for foreign aid to many countries, some of which are unfriendly to the United States, and yet tell our State and local officials that there is going to be less and less money for revenue sharing, hurting State and local governments even more than they are hurting already.

State and local finances are already being squeezed, and squeezed tight. We all know that revenue sharing is used more for operating expenses than for anything else. I feel that revenue sharing is important for a number of reasons. It allows local officials wide discretion to respond to the many demands of their constituents. The low administrative cost of revenue sharing makes it one of the least inflationary aid programs for local governments.

The current cutbacks will cost Kentucky $400 million this fiscal year alone. Our State government in Kentucky has already made two huge budget cuts and has gouged $285 million from State welfare, health and education programs.

The budget cuts that have already taken effect and those being contemplated make the options tougher for local governments. The question is, Where are they going to get the funds to maintain county roads, jails, garbage collection systems, emergency medical, and ambulance services? Where are they going to trim?

The President is continuing his research for more than $100 billion in unidentified budget cuts, including in the revenue-sharing fund, or tax increases to balance the Federal budget. I strongly feel that the Federal budget could come closer to being balanced with revenue-sharing programs kept intact, if foreign aid were cut to countries nonsupportive of the United States. I am opposed to substantial reductions in the revenue-sharing funds.

HAIL "COLUMBIA"

(Mr. FUQUA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FUQUA. Mr. Speaker, the second flight of the Space Shuttle *Columbia* which ended Saturday with a magnificent landing at Edwards Air Force Base in California places the United States firmly in the lead in a new age of transportation which will revolutionize our world much the same as the internal combustion engine, the automobile, and the airplane.

The achievement of actually reusing a vehicle which has previously flown in space makes a milestone in world history.

The accomplishment is a marvel of design, construction, and administration which has never before been seen by mankind and I feel inadequate to properly express the pride I feel not only in the event itself, but in all those who have been so dedicated to its completion.

While we all applaud our astronauts Joe Engle and Richard Truly as aviation heroes, they would be the first to recognize the achievements of others who make their voyages possible—the thousands of workers in our aerospace industry, the mission support personnel, and the unstinting support of the American people.

To a certain degree the successes of our space program are beginning to reap negative rewards and this causes me great concern.

I have noticed during this recent voyage that there has been an increasing tendency in the press to use such phrases as "trouble-plagued Shuttle" to describe the second *Columbia* mission, when actually the mission marks only a halfway point in a series of four test flights.

We must not forget that the Shuttle is not an operational system.

It is doing now precisely what it is intended to do; demonstrate which of its component systems require additional design modifications so that it will work even more efficiently during its operational phase.

As long as we have been building automobiles and airplanes, we still experience mechanical problems with them.

The Shuttle, by comparison, is a brand new and highly complicated machine which could not be fully tested until it was in space.

I would ask our countrymen to keep that thought in mind when considering that more than 90 percent of assigned goals were accomplished in its abbreviated mission, that the decision to shorten the mission was based on sensible preflight contingency plans made during calm days when neither the spacecraft nor its crew were in any danger, and that the system was designed with sufficient reserves of power so that the mission probably could have been completed as originally scheduled.

The Shuttle team operated with the cool professionalism which we have learned to expect of them. Few can say it better than the prophetic poet Joseph Hopkinson:

"Hail Columbia! Happy land!
Hail, ye heroes! Heaven-born band!
Let independence be our boast,
Ever mindful what it cost;
Ever grateful for the prize,
Let its altar reach the skies."

PRESIDENT REAGAN SHOULD APPOINT SPECIAL PROSECUTOR TO INVESTIGATE WRONGDOING IN THE WHITE HOUSE

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, last April, President Reagan became the first President in history to endorse the concept of protecting from reprisal Federal employees who blow the whistle on illegality, waste, fraud, abuse, mismanagement, or dangers to public health and safety. I promptly wrote the President to congratulate him on his courageous stand, but told him unless Federal employees felt something was likely to be done about their allegations of wrongdoing, most Federal employees who are aware of impropriety will remain silent.

Last week, the President demonstrated his approach to whistleblower protection. OMB Director David Stockman went public, albeit perhaps accidentally, with serious charges of misrepresentations to Congress, unseemly political deals, fraudulent accounting, and public deception. Rather than firing David Stockman, as others, uncommitted to whistleblower protection, suggested, Presi-

dent Reagan kept Stockman in his job. Although it is reported that Mr. Stockman will lose responsibilities as a result of his disclosure, I am pleased that the President abided by his own injunction against firing whistleblowers.

Still, nothing is being done by the President to investigate the substance of Mr. Stockman's charges. Is supply-side economics nothing but Herbert Hoover style trickle down theory? Was the tax bill just a Trojan Horse to lower the top rate? Is it true that the Reagan administration would prefer to win on an unjustified proposal than lose on a responsible one? Was the promise of a balanced budget in 1984 a fraud from the start? Did the administration have a spy in meetings of the Democratic Caucus of the Budget Committee? These and other questions must be investigated and resolved. President Reagan should demonstrate his commitment to whistleblower protection by appointing a special inspector general to investigate wrongdoing in the White House.

NATION NEEDS TO RESTRAIN FEDERAL SPENDING IN MEETING NATIONAL OBLIGATIONS

(Mr. DAUB asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAUB. Mr. Speaker, we in this Congress have been faced with a great many changing circumstances since we began this session last January. There is one circumstance that has not changed and in fact has become only more and more clear: The need to restrain Federal spending to avoid an even larger deficit.

We have an opportunity today to demonstrate to those who do not believe this Congress is capable of fiscal responsibility that we do in fact have the strength and the wisdom to hold spending down.

If we so desired, we could always find a reason to spend billions more. There will always be worthy causes, noble aims, or just people who could use a little more help. There is no end to the services we could provide or the individuals we might assist. There is only a limit to the resources we can employ and as we anticipate a Federal deficit that threatens to crowd out needed lending funds that create growth, jobs, and opportunity for our people, it is quite clear that we have reached that limit.

The imperative that faces us today is that of demonstrating the will of this Nation to meet its obligations. Those obligations include assisting the needy and providing for the aged and infirm but they also include political courage to draw the line when it comes to spending we cannot afford.

TRIBUTE TO SPACESHIP "COLUMBIA"

(Mr. WINN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WINN. Mr. Speaker, I, too, want to join my colleague from Florida, Mr. FUQUA, in paying tribute to all of those involved in the successful flight of Shuttle II, *Columbia.* I want to pay tribute to the NASA employees, to the support contractors, to the backup crews, and to all of those involved in making this another successful flight for *Columbia.*

I want to pay tribute to the crew, Joe Engle and Dick Truly, and their wives who have given these men all of the support possible to make this a great and successful flight, Mary Engle and Cody Truly.

I want to pay tribute to the Members of Congress that have supported this program as long as they have, allowing NASA to continue funding this research and development program for our future flight and science endeavors.

DEMOCRATIC DEMAGOGUES

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, I thought I had seen unmitigated gall, but now I have seen the limit.

It was here, in this very Chamber, not more than 4 months ago that the Democrats bitterly attacked the President's tax cuts. I remember the demagoguery very clearly: "It is welfare for the rich," Democrats said.

Well, that is all well and good. They did not like it, they did not vote for it. Except, look at this:

This is a newsletter from one of our Democratic colleagues, an example of many similar mailings during the past few months.

The letter outlines in some detail the provisions of the tax cut bill. There is a cute little piggy bank here representing savings benefits. And here is a clock to catch the eye of the retirees and let us not forget this big pile of money to draw attention to the estate tax provisions.

Considering what the Democrats said during the debate on the tax cuts, you would think this newsletter would have been sent only to people earning more than $50,000 a year. Right? Wrong.

This newsletter was mailed postal patron, to every taxpayer in my colleague's district, demonstrating that for all the demagoguing we heard last summer, even the Democrats know that the President's tax cuts will help all taxpayers.

One other thing, Mr. Speaker, the Member who mailed this newsletter voted against the tax cuts. For some reason I do not happen to see that little item mentioned anywhere. But then, you Democrats have never been shy about trying to grab the credit for a popular idea, or running away from the blame when your big spending programs failed.

ALASKA NATURAL GAS WAIVERS DEBATE

(Mr. CORCORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN. Mr. Speaker, in 1968 natural gas was discovered in great abundance at Prudhoe Bay on the North Slope of Alaska. We found some 26 trillion cubic feet of gas. Since that time the President of the United States and the Congress have been involved in developing a regulatory procedure so we would get that gas down to the lower 48 States. However, since the initial discovery and since some 4 or 5 years ago when we constructed the original legislation, market conditions and related national policies have changed.

Now it looks as though the sponsors of the pipeline project will not be able to market that gas at the same price as was originally intended. As a result, they have requested Presidential waivers and concurrence by the Congress in legislation to, in effect, make gas consumers serve as collateral to finance the project.

In the next several days I will bring to my colleagues in the House information on these proposed waivers, because under the expedited procedure involved we will have only 1 hour of debate. I know there are many factors to consider, but I would hope that in reviewing this matter on the merits the House would reject the waivers.

CONTINUING RESOLUTION

(Mr. DREIER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER. Mr. Speaker, today we face another crucial test of our resolve. Once again, we must ask ourselves whether we are committed to taking meaningful action to reduce Federal spending.

This Congress has shown the American people that it is dedicated to restoring fiscal responsibility to the Federal Government. The people have come to expect us to continue this commitment.

Passage of the continuing appropriations bill would prove to the citizens of this country that their confidence in us was misplaced. The President has demonstrated to the Nation that Federal spending must be cut further. We

cannot, then, vote in favor of a continuing appropriations bill which would authorize excessive spending.

Instead, we must send a clear message to the people. We must show them that we do not intend to waiver from our course of lowering spending by the Federal Government. I strongly urge my colleagues to vote for recommittal of the continuing appropriations bill with instructions that spending levels for domestic programs be reduced by 5 percent. Only by such action can we continue to merit the confidence of the citizens of this Nation.

EXCEPTIONS BECOMING THE RULE IN LEGISLATIVE PROCESS

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, having only been here 3 years in this House, I guess I am still learning about the process. I recall the first year I was here when I was instructed very carefully by veterans in the House as to how we enact the people's business in a very particular way. We do that with respect to funding by a very specific process of appropriation bills.

Then, of course, last year I learned for the first time we were going to have a continuing resolution that was an omnibus continuing resolution covering the entire Federal Government. At that time it was said, well, this is an exception; it has never been done before, and we should not allow it to happen again.

□ 1245

So what happens this year, in my third year?

We have the expiration of one continuing resolution up against which we will find ourselves on Friday. And what is the solution? Is the solution to go back and pare down and really work hard on those appropriations bills? No. We have another omnibus continuing resolution; but this time it is one which will take us to the end of the year.

So now the exception is becoming the rule.

Mr. Speaker, in my previous duties I practiced law and often had to explain to people that medical and legal malpractice were not the result of evil actions, but the result of misjudgments. In view of the continuing resolution it seems to me that we are very much guilty of legislative malpractice in this House.

LET'S KEEP THE PROMISE WE MADE TO THE AMERICAN PEOPLE

(Mr. MORRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON. Mr. Speaker, later this afternoon we will consider a bill which will make continuing appropriations for the fiscal year of 1982. It is unfortunate that we could not pass our appropriations measures in a more timely fashion. However, the continuing appropriations provides us an opportunity to make the necessary reductions which will allow us to stay on the road to economic recovery.

When we are asked to vote on the continuing resolution this afternoon there will be a motion to recommit with instructions to reduce discretionary domestic spending by 5 percent across the board. This motion will reduce the budget authority for fiscal year 1982 by $6.4 billion and reduce outlays by $3.7 billion.

This motion will not supersede the appropriations process, but will provide the incentive for the timely completion of the appropriations bills which still must be considered.

As we consider this motion, let us think in simple terms of what it will accomplish. It will reduce our deficit. It will reduce Federal borrowing. And, it is a step toward lower interest rates.

Many of us have pledged to trim the fat from the Defense budget. Approval of Mr. MICHEL's motion will accomplish this. Defense appropriations will be cut twice that of domestic programs.

The 5-percent, across-the-board reduction in domestic programs will achieve about half of the reductions requested by the President in September. It is a reasonable and needed reduction.

We all know this continuing resolution is in excess of what the Nation can afford and to pass it as reported would be a great disservice to those who are counting on us to keep our commitment to fiscal responsibility.

When we are judged as representatives it will be on the basis of our commitment to the goals we have set for ourselves. I urge my colleagues to vote yes on the motion to recommit and keep the promise we made to the American people.

REPORT ON PAY ADJUSTMENTS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-111)

The SPEAKER pro tempore (Mr. RATCHFORD) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Post Office and Civil Service and ordered to be printed:

To the Congress of the United States:

In accordance with the provisions of section 5305 of title 5 of the United States Code, I hereby report on the pay adjustments I ordered for the Federal statutory pay systems in October 1981.

The Secretary of Labor, the Director of the Office of Management and Budget, and the Director of the Office of Personnel Management, who serve jointly as my pay agent, found that an overall increase of about 15.1 percent in general schedule rates of pay would be required to achieve comparability with private sector pay as that concept and process are defined in the Pay Comparability Act of 1970. The Advisory Committee on Federal Pay agreed with that finding.

While I fully support the comparability principle as the best basis for determining Federal pay, I believe that significant changes are required in the way that principle is currently defined and implemented. Therefore, last March, the administration transmitted to the Congress proposed legislation to revise and strengthen the comparability process. At that time, it was estimated that the revised process would result in an overall increase in Federal pay of about 4.8 percent in October 1981.

The reform proposal has not yet been acted upon in Congress, but in accordance with our economic recovery program, the Congress included in the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) provisions that limited this October's Federal civilian pay adjustments to the same 4.8 percent. Accordingly, on August 31, 1981, I sent to the Congress an alternative plan which called for an increase of 4.8 percent at each grade. Neither House of Congress disapproved this alternative plan, so on October 15, 1981, I signed Executive Order No. 12330 implementing it.

Under that Executive order:

The scheduled rates of pay under the statutory pay systems (the general schedule, the Foreign Service schedule, and the schedules for the Department of Medicine and Surgery of the Veterans' Administration) were increased by 4.8 percent in accordance with the alternative plan.

The scheduled rates of pay for the Vice President and the executive schedule and congressional and judicial salaries were increased, under the provisions of Public Law 94-82, by the overall 4.8 percent in rates of pay under the general schedule.

The scheduled rates of pay for the Senior Executive Service were increased under the provisions of section 5382 of title 5 of the United States Code based on the new rate of pay for GS-16, step 1, of the general schedule and the new rate of pay for level IV of the executive schedule.

The scheduled rates of pay and allowances for members of the uniformed services were increased by

amounts ranging from 10 percent to 17 percent depending on pay grade in accordance with the provisions of sections 101 and 102 of the Uniformed Services Pay Act of 1981 (Public Law 97-60) approved October 14, 1981.

The order also reflects the effect of section 101(c) of Public Law 97-51 (the continuing resolution approved October 1, 1981), which contains limitations on payable salaries for certain top level Government positions.

I am transmitting herewith copies of the reports of my pay agent and the Advisory Committee on Federal Pay, the alternative plan, and the Executive order I promulgated to put these pay adjustments into effect.

RONALD REAGAN.

THE WHITE HOUSE, *November 16, 1981.*

PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 357, FURTHER CONTINUING APPROPRIATIONS, 1982

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 271 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 271

Resolved, That upon the adoption of this resolution it shall be in order to consider, clause 2(1)(6) of rule XI to the contrary notwithstanding, the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year 1982, and for other purposes, in the House. Debate on said joint resolution shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations, and the previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the usual 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 271 is the rule providing for consideration of House Joint Resolution 357 which makes further continuing appropriations for fiscal year 1982. The current continuing resolution under which the Federal Government is now being funded will expire at midnight, November 20, a few short days from now. According to an opinion of the Attorney General issued on April 25, 1980, Federal agencies must cease operations unless Congress enacts the necessary appropriations. Mr. Speaker, the rule reported from committee will permit this House to act expeditiously to insure the Government's continued operation.

Mr. Speaker, House Resolution 271 is a simple rule. It waives clause 2(1)(6) of rule XI which would otherwise force this continuing resolution to layover for 3 days, excluding Saturday and Sunday. The committee has granted this waiver because it feels that the Appropriations Committee report and the resolution are straightforward and easily comprehended, despite the magnitude of the expenditures involved. Mr. Speaker, this continuing resolution has been widely reported and discussed. Members have had more than sufficient time to acquaint themselves fully with all of its aspects. No purpose is served by delaying action any further.

Mr. Speaker, this rule provides for 2 hours of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations. In addition, the continuing resolution will be debated in the House and the previous question will be considered as ordered. The effect of this procedure will be to preclude the offering of any motion or amendment to the joint resolution. Nonetheless, the rule preserves the traditional rights of those in the minority opposed to the bill by providing for a motion to recommit. In this particular instance, because the resolution will not have been amended, a motion to recommit with instructions would be in order. Thus, the minority would be able to offer any single amendment or amendment in the nature of a substitute that would be germane to the bill.

Mr. Speaker, since the rules of the House provide for only 10 minutes of debate on a motion to recommit, the Committee on Rules has expanded the time of general debate so that the minority would have ample opportunity to discuss any alternative that it may wish to bring forth.

Mr. Speaker, the unique circumstances in which the House finds itself has dictated the rule which the committee is recommending. Of the 13 appropriations bills covered by this continuing resolution, 12 have been reported from committee and 11 have passed the House. The resolution provides that as each appropriations bill is enacted into law, it will be disengaged from the continuing. In most instances, then, the issues raised by the level of funding for each particular program or agency have been fully debated and the will of the House made known. In order to permit the legislative process to continue without severe disruptions to the orderly function of the Federal Government, this continuing resolution must be enacted without further delay.

Mr. Speaker, the Appropriations Committee should be commended for its yeoman's efforts in responding to ever-changing fiscal initiatives and their related economic assumptions. The level of spending reported by the committee in this continuing resolution is below that recommended by the administration in March.

Mr. Speaker, the rule which is before the House will not only permit the consideration of a continuing resolution which reflects the will of the House expressed on 11 different occasions but will also protect the position of the House in its negotiations with the other body on these important fiscal matters. If this resolution is enacted in its present form, the normal appropriations process will be allowed to continue so that rational and considered judgments may be made on these issues.

Mr. Speaker, I urge the adoption of this rule.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Massachusetts (Mr. MOAKLEY) has described the provisions of the rule, and we all are most anxious to get down to the debate on the continuing resolution.

However, I would like to point out to the Members of the House that when we had this measure before the Rules Committee, an amendment was offered to allow the gentleman from Illinois (Mr. MICHEL) to offer an amendment to cut across the board certain programs. The amendment had not been printed in the RECORD, but the proponent agreed that it would be a limited amount. The amendment to the rule was defeated.

Another amendment offered to the rule was to let the continuing resolution expire on March 31, 1982. That was defeated.

Mr. Speaker, it was obvious, from listening to the debate in the Rules Committee, that the continuing resolution was greased. I believe that this House will abrogate its position in controlling appropriations if a continuing resolution is passed without cuts for a period of the rest of this fiscal year. This is no criticism of the Appropriations Committee, which has met and voted out appropriations bills for all of the departments, with the exception of one. The House has acted on all but two. The others are being held up in the Senate or in conference.

And, Mr. Speaker, a motion to recommit will be offered, with a cut of 5 percent across the board on each program which is covered. I think this is significant because it will bring the total amount down closer to the proposal of the President of the United States and will not suffer, in my opinion, the tragedy of a veto.

So I would alert all Members of the House to be on the lookout when we get into the debate on the continuing resolution for this amendment on a motion to recommit.

I also understand that there will be a move on the other side of the aisle to vote down the previous question to provide for consideration of an amendment to allow the continuing resolution to expire on March 31.

So even though the resolution was greased in the Rules Committee, with all Republicans voting for each amendment offered and, on the other side, every member voting the other way, with the exception of one on one of the amendments. I hope the motion to recommit prevails.

Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. WALKER).

□ 1300

Mr. WALKER. I thank the gentleman from Tennessee for yielding to me, and Mr. Speaker, I rise because I think what we are doing here today on this bill is a travesty, and I think that the way in which we ought to deal with that travesty is to vote down this rule.

What we are literally doing is saying that the entire year of spending for the Federal Government is going to be wrapped into one bill and we are going to vote on that bill in a matter of a couple of hours, literally without amendments this afternoon.

Now, it seems to me that that calls into question exactly what we have been proceeding to do for months in this House, first of all, trying to make a budget and then trying to appropriate, and I mean this as no criticism to our Appropriations Committee, I think they have done pretty well. I think what they have done over a period of months in terms of getting our appropriations done is good, but we have had delays in the other body, we have had delays in the conference committee. But that should not be solved by 1 year of continuing appropriations.

I think what we should do, I think what we ought to be doing is legislating for a far less period of time, appropriating over a shorter period of time. Understandably we have to go with the continuing resolution, but to go with a continuing resolution for an entire year, which literally spends every dime of Federal money, it seems to me, wipes out what this legislative process is all about.

I am reminded of the kinds of things that were said when we considered another similar resolution on the floor a couple of months back, and I am reminded of the statement of the gentleman from New York (Mr. BINGHAM), who said:

> These are gloomy hours for those of us who believe in the dignity of the Congress of the United States * * *. The budget process has become a travesty, and it must be changed so that this kind of railroading of billions of dollars of program changes cannot happen again * * *

The gentlewoman from New York (Ms. FERRARO) who said:

> On top of that, we consider the "mystery package" under a rule—and when the Republicans draw up a gag rule, they mean for the whole Congress to choke on it—that allows no amendments at all from the floor except a package of technical amendments that are not subject to any points of order regarding germaneness of anything else * * * the process tramples 200 years of legislative traditions.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. WALKER) has expired.

Mr. QUILLEN. Mr. Speaker, I yield 1 additional minute to the gentleman from Pennsylvania.

Mr. WALKER. Then I remember the Speaker of this House, the gentleman from Massachusetts (Mr. O'NEILL) who said:

> There is no doubt that there is utter confusion. And why should there not be? Copies of the amendment are now available for the first time, and most of the members have not even seen the bill * * *. Now, I think in fairness to both sides of the aisle, the committee ought to rise at this particular time.

It is the same situation here. The Members do not know what is in the package we are considering and most Members are not aware we are considering a budget package that is going to continue for the entire year.

I think that process is wrong and I think the way we ought to proceed is, first of all, shorten the amount of time in the resolution; second, I would hope we do not have this kind of foolishness foisted on us again.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. I thank the gentleman for yielding.

Wonders of all wonders, this seems to be the week of mea culpas.

I thought I heard the gentleman say that none of us knew what we were voting on in Gramm-Latta. That is one of the reasons I voted against it at the time and perhaps the reason he voted for it.

When I came on the floor a few moments ago, I had the impression that we were talking about the rule on the continuing resolution until I heard the gentleman's preliminary remarks, and then it sounded very much like he was describing the midnight amendment of some thousand pages that we received last year, the Gramm-Latta amendment.

I am very happy that he cleared that up by pointing out that, indeed, he has learned a lesson from the way in which we adopted legislation controlling the level of support for all programs for 3, not 1, fiscal years.

Mr. WALKER. Mr. Speaker, I think I have the time and I take back my time.

The point I am making to the gentleman is that the procedure that he—I should not say he—some of his compatriots on the other side criticized a few months ago is precisely the procedure that they are using now, and if there is a mea culpa it seems to me in bringing this kind of resolution to the floor it points out that——

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. WALKER) has expired.

Mr. MOAKLEY. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. The gentleman from Pennsylvania (Mr. WALKER) and I are really in agreement, and I do want to be associated with those people who objected to the way the Gramm-Latta amendment hit the floor. But I just point out one very distinct difference. This resolution comes to the floor as the result of the normal committee action of all of the affected subcommittees and the full Committee on Appropriations with both parties in this House exercising their legislative responsibilities. That is the way legislation should come to the floor.

It affects only 1 year, not 3 years in advance, as in the Gramm-Latta amendment, which as my colleagues know, was not seen by anybody except its multiple authors over at OMB before it came to the floor.

Mr. WHITTEN. Mr Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Mississippi (Mr. WHITTEN), the chairman of the Appropriations Committee.

Mr. WHITTEN. May I call to the attention of the membership as well as my friend from Pennsylvania, that this continuing resolution continues only until we pass the individual bills, then they drop out from coverage of this resolution. We get another budget on January 15, unless we adopt a full year bill, we will face it again in spring. We have had six different budget recommendations submitted to the Appropriations Committee. We have worked hard to accommodate the President. It is imperative that we adopt this resolution, otherwise we would have two budgets before us.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from South Carolina (Mr. CAMPBELL).

Mr. CAMPBELL. There are two points that I think we ought to be cognizant of in this.

One, I would address to the gentleman who made the statement a while ago about the difference between the procedures of the Gramm-Latta legislation and the procedure of this one following the normal legislative process and touting that as a major difference.

I think that we should also be aware, as the distinguished gentleman from

Tennessee has pointed out, that in the normal process of legislating, things do go through committee. But, we should also be aware that the Committee on Rules is very disproportionate in its representation, and, therefore, is not representative of the whole body, and so, therefore, I do not think that the analysis given by the gentleman was accurate at all.

The second thing that I would like to point out is that if we pass this continuing resolution, and the gentleman from Mississippi is absolutely right, that other appropriations do govern; but if we pass it, and the President were to veto other appropriations bills going through, then in fact the resolution would govern and the programs would continue on the basis of however they were outlined in the resolution, either as a House passed or Senate whatever.

However, the thing that concerns me is that if we do pass it at the present level then we may be in fact precluding the Presidential veto that could come on any regular appropriations bill, because if he vetoed and was sustained, this resolution is going to control anyhow.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL. I yield to the gentleman from Mississippi.

Mr. WHITTEN. May I say I do not differ with the gentleman except that I believe our President will want the Government to keep running after Friday while we straighten this out. Should the President veto the individual bills we will have something to fall back on. This continuing resolution is substantially below the total of all the bills. We can operate at a lower level while we straighten out any differences with the President on the other bills, but I believe my President would want the Government to continue to operate.

Mr. CAMPBELL. If I may reclaim my time, I agree with the distinguished chairman except for one thing, and that is that I do not think that while letting this resolution go for a full year as opposed to cutting it off in March that we are doing the right thing because we are precluding the Presidents involvement and negating the right he has to exercise a veto on individual appropriation bills.

The SPEAKER pro tempore. The time of the gentleman from South Carolina (Mr. CAMPBELL) has expired.

Mr. QUILLEN. Mr. Speaker, I yield 1 additional minute to the gentleman from South Carolina.

Mr. CAMPBELL. But by cutting it off in March, then, in fact, we let the appropriations process go ahead and work and if the President does veto it is incumbent upon us to act on that and that would be the controlling factor.

Mr. WHITTEN. For 2 straight years we have been waiting for the appropriations process to work. We did not seek this job of coming here to keep the Government operating. The last time we faced a similar situation was in June, we had 422 amendments by the Senate. We got through it in 1 day. We got it through the House in 2 hours. Because of the delay in the Senate we are being drafted.

Mr. CAMPBELL. I would reclaim my time and say I compliment the chairman on the job that the House Appropriations Committee has done which has been tremendous. They are not in any way at fault, but I do not think we ought to cut off our options just because we are clean.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

I just want to thank the gentleman for his remarks, because I think he points out what we are doing is locking in higher levels of spending than the President may want.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, I think we ought to make clear that we are not trying to throw blame on anybody. We recognize that certain people are in very difficult situations here. But the question is whether we in the House will finally decide that it is necessary for us to do something.

As I pointed out in my 1-minute speech, last year we had for the first time an omnibus continuing resolution. We were told it was an exceptional circumstance, it had never been done before, it would not be repeated. So what happens? We come back the very next year and we do the very same thing and it carries us through a limited period of time. So we are back here again.

Again we have not done our duty, whether it is the Members of the House or of the Senate, or all of us combined. Now we are up against the question on Friday, and we hear the same arguments. If we do not vote for this continuing resolution, the social security checks will not go out, we will not be able to pay our soldiers overseas, we will not be able to do this or that; and after a while someone has to say, "Wait a minute. Let us just stop here and ask what we are doing."

Are we going to continue to create the excuses year after year so that we never really get down to the business of voting on specific levels of appropriations, and are we going to do an end run around a Presidential veto?

It is obvious that last week the House showed that the President could sustain a veto in this Chamber on the Interior appropriations.

What happens now? If we pass this continuing resolution as it is, the President can veto the Interior appropriation bill. Then it will come back here. We do not have to do a thing. The level which was in last week's bill—now contained in the continuing resolution—will control.

In other words, we will have taken away the Presidential veto as a prerogative of the President.

It seems to me a little strange that some on the other side of the aisle should be criticizing this President because the deficit is going to be higher than he had projected, and then take away the only tool he has to bring it down.

What we are saying here is we have done a lousy job this year and we think we are going to do a lousy job next year. We should not accept that type of reasoning.

Therefore, let us not give away the ability to deal with the problem.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, certainly the Appropriations Committee of the House and the other body have tried their best to get these appropriations bills through the whole process, but the fact remains that they have not, and therefore, they have gone to this procedure of a continuing resolution.

What worries me is that this whole process is basically wrong. For the second year in a row we are going to proceed on a continuing resolution. Are we ever again going to be able to get the regular appropriations bills through the process or are we going to continue forever on a continuing resolution?

It is being brought to the floor under what amounts to a closed rule.

Now the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL), went to the Rules Committee. He asked that an amendment be made in order that he could offer in the House, which was not made in order. That amendment would simply call for a 5-percent reduction in the eight broad categories not now at or below the President's budget requests. He came to the Rules Committee. He made that plea. But it was not made in order.

Therefore, an amendment by the minority to be offered by our leader, can only be offered as a motion to recommit with instructions, not the best procedural opportunity to offer such an amendment. But he will offer that motion to recommit with instructions at the appropriate time, which would make this 5-percent reduction.

I might also say that an amendment was offered in the Rules Committee that had been requested by a number of Members, both Democrats and Republicans, that would change the date

to March 31, but that also was rejected. In fact, all we got under this rule—and I appreciate that little bit—is instead of having only 1 hour to discuss this great big full year continuing resolution, we will have 2 hours in which to talk about what we are doing in this process.

So I just say that I think the rule is unfair. I think this procedure is ridiculous.

I would urge my colleagues to support the motion to recommit with instructions that the minority leader will offer to reduce these eight categories that are well over the President's budget requests in most instances. We are talking about March or September.

One thing that worries me is that it is hard to judge what we are really talking about in the way of figures. What happens if one of these bills is sent to the President and is vetoed and that veto is sustained? Then would we go back to the high level of the conference report? The answer is "Yes."

So I think that there are many inherent dangers in what we are doing here.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Illinois (Mr. YATES).

□ 1315

Mr. YATES. Mr. Speaker, can the gentleman tell us why in the motion of the distinguished minority leader there is no provision made for reducing either by 5 percent or a lesser figure any of the defense appropriations?

Mr. LOTT. I assume this will be discussed in the general debate, but I am advised that it is because defense, military construction, D.C., and foreign aid are now at or below the President's budget request already. In fact, instead of it being at the President's budget request, another 5 percent would take it well below that.

I would like very much not to have the foreign aid provision, for instance, excluded; but the fact is those four are already at or below the President's request.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I would be glad to yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding. I would like to compliment the gentleman on part of his statement.

I appreciate the leadership that the gentleman has given in terms of changing the September 30 to the March 31 date. As the gentleman knows, I will be offering an amendment, if it is made in order, allowing for a substitute motion to provide for only one additional amendment and that is that we change the date from September 30 to March 31.

I want to thank the gentleman for his support of that effort in the Rules Committee, but also would like to ask the gentleman if it is not the case that if we are successful in defeating the previous question and if the minority does have the opportunity to offer a substitute motion, that the only major change in that substitute motion will be the opportunity for the gentleman from Pennsylvania to offer an amendment to limit this resolution to March 31.

Mr. LOTT. Well, I think there are some questions in that regard that we need to clear up.

First of all, I assume if those circumstances should develop that the amendment by the distinguished leader, the gentleman from Illinois (Mr. MICHEL) will also be in order as an amendment, and not as the motion to recommit with instructions.

Mr. EDGAR. That is correct, and that will be in the motion that will be before the House, but I think those two areas are the only changes that will be made in the rule.

Mr. LOTT. That would be my understanding.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 5 minutes to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I would like to raise with my colleagues the following arguments for voting down the previous question on this rule. I do so because I think there is bipartisan agreement among a large number of Members of the House who believe that this 1 year continuing resolution process is very dangerous.

I think that the continuing resolution for all appropriations until September 30 of 1982 is unprecedented in terms of the length of time and it also thwarts, in my opinion, the congressional appropriations process.

I would hope that the House of Representatives would only use the continuing resolution for a very narrow set of days or weeks or months so that we have the pressure on the Senate to come forward and act its will.

It has been said several times in the opening debate that our Appropriations Committee has acted in good faith. We have passed our appropriation bills and sent them on to the Senate. It is the Senate of the United States that has not come back to the House with adequate agreement. It is the Senate of the United States that is thwarting action. I would hope that we would challenge the other body, not by giving an annual year-long continuing resolution, but narrowing that date.

If we are successful in voting down the previous question, I have received agreement on the part of the minority leader, the gentleman from Illinois (Mr. MICHEL) to offer an amendment which would be a substitute rule which would provide for two things: First, it would allow the gentleman from Pennsylvania to offer an amendment to change the date from September 30, 1982, to March 31.

Second, it would provide, as does this resolution, an opportunity for the gentleman from Illinois (Mr. MICHEL) to have a vote up or down on his 5-percent motion.

Mr. Speaker, I think that the open-ended continuing resolution removes any incentive for continued work on the regular appropriations bill. Issues remaining to be solved on many of these bills would be left entirely to a House-Senate conference committee on the continuing resolution.

Mr. Speaker, I think there is nothing left to this House, no real authority, unless we have only a temporary continuing resolution. I would prefer a December 15 date and put the pressure on the other body in the few days before Christmas to come to grips with all 13 appropriations bills. That is not possible; so I would hope that the House would give us an opportunity to act in an up or down vote on whether or not March 31 is a more reasonable temporary continuing resolution or whether we are going to eliminate all of our authority as an Appropriations Committee and as a House in simply moving to this year long appropriations process.

I make three specific points that I think have to be clear. This House only operates appropriately when it has deadlines. This continuing resolution to September 30 waives all deadlines and it is my belief that many of the appropriations bills will never find their way to the President's desk and that we will simply lag in our constitutional mandate in putting on the President's desk the annual appropriation.

The second point that I would like to make is that perhaps this action today is the best evidence of why we should move to a 2-year appropriation in the budget process. I think we are demonstrating to the American public that we simply cannot handle the legislative agenda in an annual appropriation.

Perhaps whichever way this resolution goes today, this will add some momentum to those who believe that we ought to have a 2-year appropriation process giving us adequate time to deal with budgets and appropriations and adequate time to deal with authorization.

One final comment that I would like to make. There is agreement that if we vote down the previous question, we will have the opportunity to vote not only on the Michel amendment, but also the opportunity to shorten the string, shorten the time frame, and commit ourselves to a more narrow focus on the continuing resolution,

thereby mandating pressure on the Senate and continuing the regular appropriation process.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, if anyone in the House is concerned about any cut in social security payments as a result of the amendment of the gentleman from Illinois (Mr. MICHEL), forget it. It does not cut social security. It does not cut veterans' benefits. It will not cut the food stamp program or the various agencies and programs mentioned by the gentleman from Mississippi (Mr. LOTT); so I think it is a reasonable motion to recommit and that it should be passed to bring spending down so that the measure could possibly be signed by the President.

After all, it is our responsibility and if we are going this route, we want to be sure that we are right.

Mr. Speaker, I have no further requests for time, but I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I would like to ask the gentleman from Mississippi (Mr. LOTT) a couple of questions about the minority proposal.

As I understand it, the Michel amendment, if offered, would make a 5-percent reduction in all programs; is that correct?

Mr. MICHEL. Mr. Speaker, if I might respond, if the gentleman will yield, the 5-percent across-the-board cut on discretionary programs excludes the entitlement programs, excludes the defense bill because it is considerably under what the President requested as it comes out of the committee, and excludes military construction.

Mr. SEIBERLING. Well, I would like to ask a further question. Will the President be able to decide perhaps within that overall percentage how it is to be allocated?

Mr. MICHEL. No, he will not. I would expect, anticipating the gentleman's question, that the amendment would operate just as the continuing resolution does now, except for making that additional 5-percent cut in each individual line item.

Mr. SEIBERLING. Well, let me ask the next question. Will the President retain the power of deferrals for the duration of the period covered by the continuing resolution, so that he can make further cuts, in effect, even though they go beyond this?

Mr. MICHEL. Of course, the President already has that authority under the Budget Act. We are not denying him any of that authority in this amendment.

Mr. SEIBERLING. Therefore, what is gained by making the 5-percent cuts now, since the President can, in effect, go way beyond them if he so desires?

Mr. MICHEL. Well, I would question that, because of what has happened in times past. I just think that this House has an obligation and an opportunity here to speak its own mind before we ever go to the other body.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. MOAKLEY. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, I wonder if the gentleman from Illinois (Mr. MICHEL) could explain to me one other thing. Why should we not have an assurance that if this 5-percent cut is applied to the various programs that there will be no deferrals on the part of the executive with respect to those same programs? Otherwise, we are just playing games here.

Mr. MICHEL. Well, I would not prejudge whatever the President would have in mind on this particular statement of the gentleman, other than to say that I think we have an obligation as responsible legislators to do what we think is right for the moment and then, of course, the next step would be up to the executive branch and whether or not we would attempt to negate what further deferrals the President might suggest to the Congress.

Mr. SEIBERLING. Well, we had the experience, under the current continuing resolution, that it was hardly passed before the President made his 12-percent deferral cuts, for the period covered by the continuing resolution.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I will be happy to yield to my friend, the gentleman from Mississippi, but before doing so, would simply say that, of course, on any rescission or deferral, the Congress has an opportunity to work its will, as we all know.

Mr. LOTT. Well, as a matter of fact, if the gentleman will yield, that was one question I wanted to ask, or statement I wanted to make, that as a matter of fact these deferrals can be overriden by a majority of one House; plus, is the gentleman aware that the language in this continuing resolution mandates spending at levels contained in the resolution, rather than setting these levels as ceilings, as in previous continuing resolutions.

Mr. SEIBERLING. Does that in effect cut out the deferral power with respect to those?

Mr. LOTT. Well, I guess I am propounding that as a question, because it mandates the spending levels contained in the resolution, rather than setting them at ceilings as in the past; so I think there is some question about that.

Mr. SEIBERLING. Well, if the gentleman will yield further, it seems to me that is a very important point and if they in effect are mandated and the deferrals cannot be applied to them, that makes quite a difference, it seems to me, and might make it much more palatable to some of us on this side of the aisle.

Mr. LOTT. Well, that is a very good point and I would have to agree. I wonder maybe if some member of the committee, maybe the chairman, could answer that question about language mandating the spending.

The SPEAKER pro tempore. does the gentleman care to restate the question?

Mr. LOTT. Well, the question was, I understand in the resolution that it mandates spending at levels contained in the resolution, rather than setting these levels as ceilings, as was the case in previous continuing resolutions. With that language in there, I have to wonder what effect deferrals would have or may be ruled out by this language.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Mississippi.

Mr. WHITTEN. It is my understanding that they are not ruled out. In the preceding continuing resolution we used the words, "not to exceed." That was used by the Office of Management and Budget to say that this was a ceiling, rather than a specific amount.

To obviate that and to keep it from arising again, and to require the Office of Management and Budget to comply with the Budget Act and require the President to send down a deferral or a rescission when necessary, we struck out "not to exceed" and fixed a flat amount.

Now, there is an argument, as the gentleman can realize, between the executive branch and the legislative branch as to how far the Office of Management and Budget should exercise control.

There is some argument on our side as to whether they have a right to cut that which has been mandated; but to make the record clear as to what the facts are, the other resolution, the one under which we are operating right now and expires Friday night, had the language "not to exceed." We eliminated those words and hope it will bring the OMB back within the law, so if there is any withholding it will be done through deferrals or rescissions as is provided by law.

□ 1330

Mr. CAMPBELL. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield.

Mr. CAMPBELL. Mr. Speaker, I would like to ask a question of the chairman if I might, just to make sure

the last point is clear. The intent of putting in the ceiling is not to take away or negate the Budget Act provision that allows the President to send up a deferral?

Mr. WHITTEN. That provision was mandated by the Congress some time ago. The Executive cannot waive all the requirements of the Budget Act in carrying out his program; he still must comply with the requirements of the law.

Mr. CAMPBELL. The intent in this continuing resolution is not to take away the right of the President to send up a deferral?

Mr. WHITTEN. No; it is to get him to do that instead of just holding the money.

Mr. CAMPBELL. That is the way I understood it, and I just wanted to make sure that we knew the President would have the right of deferral.

Mr. WHITTEN. That is a matter of law and for his judicial determination.

Mr. CAMPBELL. I would ask the gentleman when I finish my statement——

Mr. WHITTEN. I say to the gentleman from South Carolina that we are not trying to impose anything new on the executive branch. It is just that we do not want them imposing on us.

Mr. CAMPBELL. I understand that, and I think the gentleman is clear, but the argument took place right before that and I think may have clouded it. I wanted to make sure we understood that we, one, were not putting a ceiling on this thing, and they do not have an option not to spend it; and two, we do not take away their right to send up a deferral.

Mr. WHITTEN. The gentleman has described it properly, and may I say he deserves some considerable credit because he is the one who raised this point and made it clear.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield further?

Mr. MICHEL. Yes.

Mr. SEIBERLING. So it comes down to the gentlement's amendment, this, that if is adopted, the President can still go beyond that by sending up deferrals, and of course technically the House can reject them, but in fact under the existing continuing resolution I do not believe the House has rejected any of them bcause of the difficulties and, practically speaking, in rejecting such a deferral.

Mr. MICHEL. Well, if the recommendation of the committee is secured here of 1 year of life of the resolution, of course we still have an opportunity as a body to act in opposition to what the President has proposed.

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. EDGAR. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 185, nays 174, not voting 74, as follows:

□ 1345

The Clerk announced the following pairs:

On this vote:

Mr. Richmond for, with Mr. McDonald against.

Mr. Peyser for, with Mr. Erlenborn against.

Mr. Florio for, with Mr. Wampler against.

Mr. Guarini for, with Mr. Young of Alaska against.

Mr. Reuss for, with Mr. Dornan of California against.

Mr. Mitchell of Maryland for, with Mr. Rudd against.

Mrs. Chisholm for, with Mr. Gradison against.

Mr. Solarz for, with Mr. Petri against.

Mr. Leland for, with Mr. Siljander against.

Mr. Udall for, with Mr. Whittaker against.

Mr. Edwards of California for, with Mr. Wortley against.

Mr. John L. Burton for, with Mr. Hagedorn against.

Mr. Gilman for, with Mr. Lee against.

Mr. Williams of Ohio for, with Mr. Stangeland against.

Mr. Akaka for, with Mr. Madigan against.

Mr. Clay for, with Mr. Wylie against.

Mrs. HECKLER, Mr. FORD of Tennessee, Mr. JONES of Oklahoma, and Mr. STOKES changed their votes from "nay" to "yea."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 197, nays 169, not voting 67, as follows:

[Roll No. 300]

Mr. John L. Burton for, with Mr. Hagedorn against.

Mr. Akaka for, with Mr. Hyde against.

Mr. Williams of Ohio for, with Mr. Young of Alaska against.

Mr. Pritchard for, with Mr. Jeffries against.

Mr. Forsythe for, with Mr. Lee against.

Mr. Gilman for, with Mr. Stangeland against.

Messrs. HORTON, CHAPPELL, and HOYER changed their votes from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. WHITTEN. Mr. Speaker, pursuant to the resolution just adopted, I call up the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year 1982, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The Clerk read the joint resolution as follows:

H.J. RES. 357

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, and out of applicable corporate or other revenues, receipts, and funds, for the several departments, agencies, corporations, and other organizational units of the Government for the fiscal year 1982, and for other purposes, namely:

SEC. 101. (a)(1) Such amounts as may be necessary for projects or activities (not otherwise specifically provided for in this joint resolution) for which appropriations, funds, or other authority would be available in the following appropriation Acts:

Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, 1982, notwithstanding section 15(a) of the State Department Basic Authorities Act of 1956 and section 701 of

the United States Information and Educational Exchange Act of 1948, as amended;

District of Columbia Appropriation Act, 1982;

Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act, 1982;

Department of Transportation and Related Agencies Appropriation Act, 1982; and

Treasury, Postal Service and General Government Appropriation Act, 1982.

(2) Appropriations made by this subsection shall be available to the extent and in the manner which would be provided by the pertinent appropriation Act.

(3) Whenever the amount which would be made available or the authority which would be granted under an Act listed in this subsection as passed the House as of October 1, 1981, is different from that which would be available or granted under such Act as passed by the Senate as of October 1, 1981, the pertinent project or activity shall be continued under the lesser amount or the most restrictive authority: *Provided*, That where an item is included in only one version of an Act as passed by both Houses as of October 1, 1981, the pertinent project or activity shall be continued under the appropriation, fund, or authority granted by the one House, but at a rate for operations of the current rate or the rate permitted by the action of the one House, whichever is lower, and under the authority and conditions provided in applicable appropriation Acts for the fiscal year 1981: *Provided further*, That for the purposes of this joint resolution, when an Act listed in this subsection has been reported to a House but not passed by that House as of October 1, 1981, it shall be deemed as having been passed by that House: *Provided further*, That for the purposes of establishing a rate for operations, the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act, 1982, as passed the House on October 6, 1981, shall be deemed as having passed the House as of October 1, 1981: *Provided further*, That funds which would be available under H.R. 4121, entitled the Treasury, Postal Service and General Government Appropriation Act, 1982, for the Government payment of annuitants and employees health benefits, shall be available under the authority and conditions set forth in H.R. 4121 as reported to the Senate on September 22, 1981.

(4) Whenever an Act listed in this subsection has been passed by only one House as of October 1, 1981, the pertinent project or activity shall be continued under the appropriation, fund, or authority granted by the one House, but at a rate for operations of the current rate or the rate permitted by the action of the one House, whichever is lower, and under the authority and conditions provided in applicable appropriation Acts for the fiscal year 1981.

(5) No provision which is included in an appropriation Act enumerated in this subsection but which was not included in the applicable appropriation Act of 1981, and which by its terms is applicable to more than one appropriation, fund, or authority shall be applicable to any appropriation, fund, or authority provided in the joint resolution unless such provision shall have been included in identical form in such bill as enacted by both the House and the Senate.

(b) Such amounts as may be necessary for continuing programs and activities, not otherwise provided for, which were conducted in the fiscal year 1981, for which provision was made in section 101(b) of Public Law 96-536 regarding foreign assistance and related programs, notwithstanding section 10 of Public Law 91-672, and section 15(a) of the State Department Basic Authorities Act of 1956, at a rate for operations not in excess of the current rate or the rate provided for in the budget estimate, whichever is lower, and under the more restrictive authority.

(c) Such amounts as may be necessary for continuing activities which were conducted in the fiscal year 1981, for which provision was made in the Department of Defense Appropriation Act, 1981, at a rate for operations not in excess of the current rate or the rate provided for in the budget estimate, whichever is lower and under the more restrictive authority until such time that the Department of Defense Appropriation Act, 1982, is reported in or subsequently passed by the House of Representatives, whereupon such amounts as may be necessary shall become available at a rate for operations for activities and under the terms and conditions as provided for in such appropriation Act for the fiscal year 1982 as reported in or passed by the House of Representatives.

(d) Such amounts as may be necessary for projects or activities for which provision is made in the Energy and Water Development Appropriation Act, 1982, at a rate for operations and to the extent and in the manner as provided for in such Act as passed the House of Representatives on July 24, 1981.

(e) Such amounts as may be necessary for projects or activities for which provision is made in the Military Construction Appropriation Act, 1982, at a rate for operations and to the extent and in the manner as provided for in such Act as passed the House of Representatives on September 16, 1981.

(f) Such amounts as may be necessary for projects or activities provided for in the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1982 (H.R. 4034), at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference (H. Rept. No. 97-222) filed in the House of Representatives on September 11, 1981, as if such Act had been enacted into law.

(g) Such amounts as may be necessary for projects or activities provided for in the Department of Interior and Related Agencies Appropriation Act, 1982, at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference (H. Rept. No. 97-315) filed in the House of Representatives on November 5, 1981, as if such Act had been enacted into law.

(h) Such amounts as may be necessary for projects or activities provided for in the Agriculture, Rural Development, and Related Agencies Appropriation Act, 1982, at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference (H. Rept. No. 97-313) filed in the House of Representatives on November 4, 1981, as if such Act had been enacted into law.

(i) Such amounts as may be necessary for continuing the following activities which were conducted in fiscal year 1981 but at a rate for operations not in excess of the current rate—

activities of the Department of State for contributions to the United Nations Relief and Works Agency for Palestinian Refugees notwithstanding section 10 of Public Law 91-672, and section 15(a) of the State Department Basic Authorities Act of 1956.

(j) Such amounts as may be necessary, not in excess of the budget estimate transmitted on November 9, 1981, for operation, improvement, transfer, and closure of Public Health Service hospitals and clinics.

(k) The provisions of section 305(a), (b) and (d) of H.R. 4120, entitled the Legislative Branch Appropriation Act, 1982, shall apply to any appropriation, fund, or authority made available for the period October 1, 1981 through September 30, 1982, by this or any other Act.

SEC. 102. Appropriations and funds made available and authority granted pursuant to this joint resolution shall be available from November 20, 1981, and shall remain available until (a) enactment into law of an appropriation for any project or activity provided for in this joint resolution, or (b) enactment of the applicable appropriation Act by both Houses without any provision for such project or activity, or (c) September 30, 1982, whichever first occurs.

SEC. 103. Appropriations made and authority granted pursuant to this joint resolution shall cover all obligations or expenditures incurred for any project or activity during the period for which funds or authority for such project or activity are available under this joint resolution.

SEC. 104. Expenditures made pursuant to this joint resolution shall be charged to the applicable appropriation, fund, or authorization whenever a bill in which such applicable appropriation, fund, or authorization is contained is enacted into law.

SEC. 105. All obligations incurred in anticipation of the appropriations and authority provided in this joint resolution for the purposes of maintaining the minimum level of essential activities necessary to protect life and property and bringing about orderly termination of other functions are hereby ratified and confirmed if otherwise in accordance with the provisions of this joint resolution.

SEC. 106. No provision in any appropriation Act for the fiscal year 1982 that makes the availability of any appropriation provided therein dependent upon the enactment of additional authorizing or other legislation shall be effective before the date set forth in section 102(c) of this joint resolution.

The SPEAKER pro tempore. Pursuant to the rule the gentleman from Mississippi (Mr. WHITTEN) will be recognized for 1 hour, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 1 hour.

The Chair recognizes the gentlemen from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, in view of the fact that this continuing resolution affects all operations of Government, I shall yield for the purposes of debate only during the course of consideration of this resolution.

May I say that I am here not from choice but by the reason of being elected as chairman of the Appropriations Committee and due to the changes that we made in procedures

several years ago. We are faced with and have been faced with an almost untenable position this year.

Your Committee on Appropriations in the last Congress, the 96th Congress, had 10,215 witnesses before the committee. Because we are, in the final analysis, in the Congress and in the House particularly, the forum for the people of the United States, as a result, we must have hearings.

We have had before us this year some 30 or so messages from the Executive and the Office of Management and Budget in connection with the budget. We have done our best to hold hearings on these matters. We have passed 11 bills, have reported one other in September, and later today will report out the Defense appropriations bill.

In 1974 the Congress changed the fiscal year extending it 3 months from July 1 to October 1 so the Congress would have more time to complete their actions on budget matters. But that did not cure anything.

You will recall that last year the House passed all appropriation bills and for reasons best known to themselves, some of which I understand, the other body did not act on all of them. In checking the rules I saw no reason or anything to prohibit us from putting all of the bills that we had passed earlier into a comprehensive bill and send it back over to the Senate. We have done that in this continuing resolution to some extent so that the Government might continue to operate.

I would like to call to the attention of my colleagues two or three things. One of them is that the date of this continuing resolution is effective to the end of this fiscal year. This is in case it is needed because if any bill is enacted into law it comes out from under the resolution.

Last month I introduced another resolution, based on our earlier experience for 90 days. I introduced it over my name and on my own best judgment. It was for 90 days and would have expired February 20.

Then my attention was called to the fact that on January 15 we would have the next year's budget coming before the Congress and the committee. So then some of my colleagues asked me, what if the President vetoes these bills? What if this and what if that?

I do not think our President wants to let the Government shut down and be inoperative. So by having a continuing resolution that goes for a full year we backup the bills and I want to repeat again, it continues only if you do not pass the appropriation bill for a particular department, and if you do it drops out from under it immediately and automatically. So we are not trying to tie any bill to this resolution for the full fiscal year.

Not only that, but this bill is below the President's request of March and of September. Any motion to recommit and reduce another 5 percent is in addition to the reductions the President has requested. When the respective bills come up later, this may not be true. But it is true insofar as the resolution that we have before us today. That picture could and probably will change as the regular bills are acted upon and when this resolution goes to the other body. I say further to my colleagues who want to cut it 5 percent more at this time, you are taking the responsibility because you will be cutting an extra 5 percent not requested by the President.

Where are you cutting this? You are cutting it by 5 percent from the discretionary funds, you are surrendering your responsibility to the executive branch. I respectfully submit, and I thank my friend from Florida, Mr. PEPPER, who I first heard say this, our form of government is like the Russian troika, that is the three-horse chariot; the only way it could go forward is to all pull together.

I make no complaints about statements made by others that the President might veto this bill or another bill. I am a lawyer. That is within his authority. That is his responsibility. That is his obligation. If that is the way he feels, personally I have no complaint about it. Neither can I as the Appropriations Committee chairman complain. I cannot speak for all 55 Members, but should he do so there would be no bad feeling on my part.

But I would call attention to the fact if this resolution comes back from the President, for all purposes we start over again. There is no way under our system of government for items to be vetoed but the whole bill comes back and considering the current situation, I do not know what will come out.

I assure you personally I am and will be trying to make the Government work.

So I want to call attention to those facts. You may wonder when you read the bill that you have before us as to why you have a difference on this department, that department, and another. This is a resolution that I had to do with writing. We are trying to protect the House position. And since the bills have reached the various stages in the orderly procedure of becoming the law, we tried to write a resolution that fit each bill in order to best protect the House position.

□ 1415

Now, what will follow when we pass this resolution or a continuing resolution? We go to conference with the Senate. Now, is it smart business to tie the hands of the appropriations conferees in advance of a conference with the other body? We need all of the weapons we have to protect the position of the House. But speaking as chairman of the Appropriations Committee, once you have done the best you can, I find it is my responsibility to do my part to keep the faith with the House of Representatives so that when we go to conference we will have in front of us all of the possibilities to try and resolve the differences in the best possible manner.

Now, I do not now what the other body is going to do. I do read where there is quite a difference between segments of the Senate in the same party. And then, of course, we live in a political atmosphere and in a political world. But I assure you that my position here is not motivated by politics of any kind. It is a holding action forced on us about 2 years ago when we began to deviate from the Budget Act.

As Members know, I was chairman of the study committee, senior cochairman of the committee that came up with the Budget Act recommendations. We provided in these recommendations for the first budget resolution to provide targets, on the grounds that, with the beginning of the Congress, targets are all you can have on a sound basis. After you have worked through it you may have missed your target, then you reconcile what you have coming in with what you agreed to tentatively expend. But you do it at the end of the process, not at the beginning.

Now, the provisions of the Budget Act requiring that were waived this year and last. The Budget Committee has waived these requirements of the budget law. So they have fixed these figures at the beginning of the process contrary to the law itself.

Now, they acted in good faith, and we have tried for 2 years to wc¬k with it. But whatever you may feel about that approach, it has had the effect of me standing here on behalf of the Appropriations Committee and bringing you a continuing resolution of this magnitude. But wherever you stand on this, there are two or three things that you cannot get around. One of them, the bill before us is below President Reagan's recommendations of March and of September, and the 5-percent reduction in the proposed motion to recommit is additional to that. Not only is it an additional cut, which the folks are going to know was made by the House, not only that, but it leaves the executive branch running the business of the people's branch, the House of Representatives of the Congress of the United States. I cannot believe that that is a sound procedure. I cannot believe anybody wants tc go home and say that, after they have taken the fat out, we went further and took some bone and muscle.

Now, let me repeat what happened last fiscal year. The President request-

ed our Committee on Appropriations—listen to this—the President requested that we rescind $15.1 billion. We assigned in the Committee on Appropriations the respective parts to the appropriate subcommittees which knew the subject. We came up with and you adopted it here, a cut of $14.3 billion. I do not believe any legislative body ever cooperated more fully with any executive branch in the history of this Republic along this magnitude. The Congress cut $14.3 billion, with only about 4 months left of the fiscal year. And it did not create a ripple because the subcommittees knew where the cuts should be made. For addition, we also reduced the requests for supplemental appropriation so, in toto, we were under the figures submitted by the executive branch.

We lived within the March budget on a net basis and this resolution is within the September budget. From March they ask for a reduction of 12 percent more. Now, why? Primarily because the estimates on which the March budget based proved to be bad; primarily because they were trying to make up for the things that we read about, what the tax cut had done and where other economic assumptions proved to be far too optimistic. Maybe you read in the paper recently where IBM bought from Ford Motor Co. hundreds of millions of dollars of tax credits so as not to have to pay as much tax. I also saw where General Electric has bought the tax credits of Chrysler Corp., so as to avoid taxes. So we are placed in a bind.

But whatever you may feel about any of these things, I repeat: In the absence of this bill, at midnight, November 20, under the ruling of the Attorney General, at least four-fifths of the Government will come to a halt.

We do not have much time between now and Friday night. The Senate will not have much time to study it. What we have here is a holding action while we try to get the regular appropriation bills finalized. They are working on their side. We are working on our side.

The other thing to keep in mind is that we have cooperated fully.

Another thing to remember is that this bill as we bring it to you is below the President's recommendations of March and of September.

Not only that, but your Committee on Appropriations has dealt with many, many recommendations from downtown in dealing with this matter.

So I say to you again that this is the people's branch. I would not say it is illegal, but certainly it is unwise and not in keeping with the obligations under the Constitution to surrender to the executive branch or the judicial branch the responsibilities that are given to us under the Constitution. That is to fix the amounts of appropriations, to make the appropriations, to set out the purposes of the appropriations, and, under section 628 of title 31 of the United States Code, to see that the appropriations are used for the purposes for which they are appropriated.

So I expect to talk further in connection with this bill, before this is over; but I want you to know that we are bringing you a bill that comes from the heart. This is a holding action and we have done the best we can with things beyond our control. We have acted on 11 out of 13 appropriation bills, and yet none of them have been signed into law.

Mr. Speaker, I would like to summarize what is in this continuing resolution that we bring before you. I introduced this resolution on November 10 with the cosponsorship of Mr. CONTE, the ranking minority member. The full committee approved the resolution on November 12 without amendment. The resolution provides full-year funding through September 30, 1982. When regular appropriation bills are signed into law, the provisions of the continuing resolution automatically disengage, and the regular bill then becomes the funding device. This resolution covers 12 of the 13 regular appropriation bills. Since the legislative branch appropriation bill was provided for in the previous continuing resolution for the full year, it is not provided for in this measure. We extend the pay cap through September 30, 1982. Furthermore, this resolution carries existing provisions and limitations on abortions, school prayer, and the tax-exempt status of private schools.

This resolution provides funding for the following three appropriation bills at the rate of operations provided for in the conference reports: HUD-independent agencies, Interior, and Agriculture.

The Treasury-Postal Service bill is provided for at the House or Senate bill rate, whichever is lower.

The energy and water bill as well as the military construction bill are provided for at the House-passed rate.

The House bill rate or the current rate, whichever is lower, prevails for the following four bills: Commerce-Justice-State, District of Columbia, Labor-HHS, and Transportation.

Finally, we are providing funding at the current rate or the budget estimate, whichever is lower, for the Department of Defense, until such time it is reported or passed, then it goes at the House reported or passed level, and for the foreign assistance programs.

So I hope we may have your support of this resolution as presented. I want to say again that, in the event you vote to cut 5 percent lower, your name is going to be on that tag, and do not forget it; because I am telling you now, and it is a fact, that the bill you are voting on already is below the President's recommendations.

I will talk later on this, Mr. Speaker, I have made reference to various matters that have impacted on our work this year, and under general leave to revise and extend my remarks I submit the following chronology of major budget related events during 1981:

January 15: President Carter submits FY 1982 budget (including FY 1981 supplementals and rescissions) to Congress. Included in this proposal were 33 rescissions totaling $1,142 billion.

January 20: Ronald Reagan sworn in as President.

February 13: President Reagan withdraws 33 rescissions previously proposed by President Carter and converts them into deferrals.

February 18: President Reagan addresses a joint session of Congress and announces his "Program for Economic Recovery" identifying 83 major cuts resulting in $34.8 billion in savings. Additional savings to be identified at a later date.

February 25: President Reagan ordered additional budget reductions of from $3 to $6 billion after he was informed that his advisors had underestimated the growth in federal spending in FY 1982.

March 10: President submitted his FY 1982 Budget Revisions including his FY 1982 supplementals. President submitted 3 new rescissions totaling $128.0 million.

March 17: President submitted 81 new rescissions totaling $11.1 billion.

March 19: President resubmitted 33 rescissions previously withdrawn and converted to deferrals.

April 27: President revises 6 rescissions previously proposed and proposes 2 new deferrals.

May 7: House passes Gramm-Latta I as a substitute to the First Budget Resolution.

May 13: House passes 1981 Supplemental/Rescission and Continuing Resolution Appropriation.

May 21: Conference Report on First Budget Resolution agreed to directing House and Senate Committees to meet specified levels or reconciliation.

June 4: Congress clears 1981 Supplemental/Rescission and Continuing Resolution Appropriation.

June 8: President submitted 4 new rescissions totaling $114 million.

June 11: House Appropriations Committee approves 302 subdivisions to subcommittees pursuant to Budget Act.

June 11: House Appropriations Committee begins mark ups on FY 1982 bills.

June 12: Deadline for House Authorizing Committees to submit reconciliation provisions to Budget Committee.

June 19: President submitted 6 new rescissions totaling $321 million and 13 new deferrals totaling $220 million.

June 26: House approves Gramm-Latta II to the Reconciliation bill.

July 15: President submits his mid-session review of the budget.

July 31: Omnibus Reconciliation Act cleared by Congress for Presidential signature.

August 4: Tax Incentive Act cleared by Congress for Presidential signature.

Aug. 5–Sept. 8: August District Work Period.

September 16: House passed the FY 1982 Continuing Resolution.

September 30: Conference agreement on the FY 1982 Continuing Resolution cleared for Presidential signature.

September 30: President submits budget amendments reducing budget authority by $18.1 billion.

October 1: President submits 26 new deferrals totaling $737 million.

October 15: President submits budget amendments reducing budget authority by $7.6 billion.

October 20: President submits 59 new deferrals totaling $147 million (expire November 20, 1981).

October 23: President submits 72 deferrals totaling $483 million and 2 rescissions totaling $88 million.

October 29: President submits 51 deferrals totaling $1,261 million.

November 6: President submits 9 deferrals totaling $132 million and one rescission totaling $20 million.

November 13: President submits one deferral of $108,000.

The SPEAKER pro tempore (Mr. MOAKLEY). The gentleman from Mississippi (Mr. WHITTEN) has consumed 12 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have generally supported the continuing resolutions that the Committee on Appropriations has presented to the House.

However, I have taken the unusual step of cosponsoring the joint resolution which is before the House today.

My support is based on what the continuing resolution does not do, as well as its provisions.

First, let me briefly outline its major provisions.

When this committee presents a continuing resolution to the House, we must be sure that adequate funding is provided for any program that will not have an appropriation enacted, and that we resolve important issues that have been raised on individual appropriation bills.

In general, this resolution appears to me to meet those tests.

It covers 12 of our regular appropriation bills that have not been enacted into law.

It extends appropriations through September 30, 1982. I support the extension for 1 full year. During this session, we need to complete action on as many of the 1982 appropriation bills as possible. In the next session, we will be considering supplementals and rescissions for 1982, as well as the budget for 1983. There is no point whatever in burdening ourselves with the distraction of a third continuing resolution.

A number of Members have talked about extending the continuing resolution only through March. I ask these Members, what can the Congress or the President do under a resolution through March that cannot be done under this resolution?

Answer: Nothing.

Under this continuing resolution, 12 of the appropriation bills remain before the Congress and the President for action. We can and should proceed under the regular order.

It extends the pay cap for the full year, and includes current law language for Labor-HHS activities on abortion and school prayer.

It continues appropriations for the entire executive branch of the Federal Government—food stamps, social security, veterans benefits, the armed services—everything.

Second, I want to emphasize what the continuing resolution does not do.

It is a clean and simple continuing resolution, with virtually no special provisions, and with no special program reductions over and above the reductions we have made in the regular bills for fiscal 1982, which would be reflected in the spending rates for those bills established by the continuing resolution.

In my opinion, it is inappropriate to include special program reductions in this continuing resolution.

Twelve of the appropriation bills for 1982 are still before the Congress and the President. They are the appropriate vehicles for action on 1982 appropriations.

The administration has proposed additional cuts, based on changes in economic conditions and budget estimates, and these proposals will receive the consideration of this House and of the Congress.

These cuts were proposed in late September and in October, after 10 of the 13 appropriation bills had passed the House, and been sent to the other body.

Those 10 bills, as passed the House, were $2.8 billion under the estimates before the House at the time.

The House made substantial cuts in the estimates under consideration at the time.

Further cuts, based on the September and October budget revisions, should be made by the other body, which has considered those budget revisions, or by the conference committee.

I would also remind my colleagues that attempts have been made, in the House, to cut individual bills in line in with the September and October revisions.

A motion was made to cut the Labor-HHS bill, and it failed.

A motion was made to recommit the Interior conference report, and it failed.

My point is simply that there has been and will be ample opportunity for the Congress to consider the budget reductions proposed by the administration.

There is no justification for backdoor, meat-ax cuts in a continuing resolution.

Third, I must reluctantly address the inevitable questions of, "How much is in the continuing resolution?" and "How much is it over the budget?"

These questions are remarkable for their persistence, and for their misunderstanding of what continuing resolutions are all about.

A continuing resolution is intended only to provide minimum authority in the absence of an appropriation. The level of continuing appropriations and authority for a given project or activity is determined by rates and authority which in turn are based on the status of the applicable appropriation bill or act on the first day of the fiscal year, or on more recent action by the House or the Senate.

The Committee on Appropriations does not and should not draft a continuing resolution to establish budget priorities or totals, or to pass judgment on the President's budget estimates or his economic recovery program.

Those questions should be settled on the regular appropriation bills, and on entitlements and other spending and revenue legislation.

The question before the House is not, "How much is in the resolution?" and "Is it over budget?" but rather "Do we want to continue Federal activities at minimum levels that in general reflect the most recent action by the House and the Senate?"

However, knowing full well that Members will ask for numbers, I have asked the committee staff to crank up the computers, and I have some numbers, for what they are worth, which is not much, since the numbers will change when we report and pass the Defense bill, and when the Senate amends the provisions of the continuing resolution.

The committee estimates that total budget authority available under this continuing resolution will total $422.8 billion, which is $4.1 billion less than the latest House or conference action on the individual bills, and $727 million less than the President's revised budget estimates.

Finally, there is a special urgency to our consideration of this continuing resolution because of the Attorney General's opinion, and the implementing OMB bulletin, that once appropriations have lapsed, obligations cannot be legally incurred except for the orderly termination of Government programs, and where otherwise authorized by law.

In the past, continuing resolutions have included language validating all otherwise legal obligations incurred in anticipation of their passage. This device is no longer available to us, except for obligations for the termination of Government programs, consistent with the Attorney General's opinion.

This joint resolution contains language validating obligations incurred

in anticipation of its passage only to protect life and property, and to terminate the other functions of Government in an orderly manner.

With these exceptions, and except where balances remain available until expended, and where OMB has provided funds through reallocations and reallotments, all other Government activities funded from current appropriations that have not been enacted by November 20, will stop.

Considering its merits, as well as the urgency of the situation, this resolution deserves your support.

I cannot help but zero in on the "Labor, Health and Human Services, and Education" chapter of this continuing resolution with great concern, and to note the disastrous impact that this motion, with an across-the-board cut of 5 percent, would do to the vital, life supporting programs contained in this chapter.

When our subcommittee under BILL NATCHER's able guidance produced the fiscal 1982 Labor-HHS-Education bill we made tremendous and difficult compromises.

The Labor-HHS-Ed bill for fiscal 1982 that passed this House overwhelmingly on October 6 was already $1.4 billion below the fiscal 1981 levels.

The continuing resolution, House Joint Resolution 357 that we are debating here today, reduces these critical human programs an additional $1.3 billion from the House-passed level of October 6. That means if we accept the continuing resolutlion as reported here today, Health, Human Service, and Education programs will operate at a level $2.7 billion below fiscal 1981. When you add in some factor for inflation, these programs are already taking a real bath—in the neighborhood of $11 to $13 billion below last year.

We cannot cut any further here. Enough is enough.

This motion to recommit calls for an additional across-the-board cut of 5 percent, the result would be further reductions of $1.5 billion. In total, that would mean $4.3 billion below fiscal year 1981.

These programs cannot absorb those kinds of reductions. There is no fat left in the Health and Human Service programs. These programs have already had limbs amputated, they have already had to tighten their belts to the point of rupturing vital, life-sustaining internal organs. Further cuts, such as the across-the-board cut of 5 percent will put these humanitarian efforts in their coffins and nail the lid shut.

Do we want that to happen? No. Do we, the people's elected representatives, want to destory the very programs we created? No we do not. That is not the mandate we were given when we were elected to represent our constituents, and that is not the mandate that this administration received last November. Our mandate, the mandate that all elected officials of this Government must labor for is the well-being of our fellow man. To abdicate that responsibility by allowing this motion to carry would be worse than turning our backs on the American people—it would be as though this Congress, the greatest deliberative body in the world, struck a deadly blow against humanity.

I said it on October 6, and you, my colleagues heard me then; these Health and Human Services programs are America's investment in humanity. They represent stock in this Nation's most vital resource, its people—its children, its mothers, its elderly. They know no racial, economic, or ethnic bounds. We must support them.

Let us look at the facts:

Fact—the continuing resolution as reported cuts CETA programs by $4.1 billion. This motion would reduce them by an additional $175 million.

Fact—this resolution already reduces funding for community health centers by $67 million. This motion would reduce still further by $13 million. What will happen to our people in those medically underserved areas that count on these centers for proper medical care.

Fact—maternal and child health programs have already been cut by $125 million under the continuing resolution. This motion would put many more children at risk of crippling birth defects by reducing funding by an additional $17 million.

Fact—programs under the Alcohol, Drug Abuse, and Mental Health Administration have already been forced to absorb cuts totaling $104 million. This motion would reduce services to thousands of needy persons by an additional $42 million.

Fact—handicapped education programs are reduced already by $43 million under the continuing resolution. This motion would reduce them even further by an additional $52 million.

Fact—vocational education programs are already reduced by $22 million in an era when more and more youth are in need of vocational training in order to find employment. This would reduce it further by $39 million.

Fact—low-income energy assistance, a program that tens of thousands of needy citizens rely on during the harsh winters, has already been cut by $50 million. This motion would put thousands of our elderly citizens in the position of having to choose between heating their homes and eating properly because he is trying to cut these benefits by an additional $90 million.

Fact—the student financial aid program would also suffer. Pell grants are already reduced under this resolution by $180 million. The motion would cut Pell grants for next year by an additional $575 million.

Mr. Speaker, at this point, under my previous unanimous-consent request, I insert a staff memorandum outlining the specific provisions of the joint resolution.

STAFF MEMORANDUM 1349
NOVEMBER 13, 1981.

To: Hon. Silvio O. Conte, Ranking Minority Member, House Committee on Appropriations.
From: F. Michael Hugo, minority counsel.
Regarding: House Joint Resolution 357, second continuing resolution, fiscal 1982.

House joint resolution 357 was introduced by Chairman Whitten, for himself and Mr. Conte, on Tuesday, November 10th.

The resolution was reported without amendment, unanimously, by voice vote, on November 12.

On Friday, November 13, the Committee on Rules ordered reported a resolution making House Joint Resolution 357 in order in the House, notwithstanding the three-day rule, with two hours of general debate, equally divided between the Chairman and Ranking Minority Member of the Committee on Appropriations, and with the previous question considered as ordered except for one motion to recommit.

Floor action is expected on Monday, November 16.

In general, it is a clean continuing resolution which provides minimum funding through the end of the fiscal year for the 12 appropriation bills for fiscal 1982 which have not been enacted into law.

ISSUES AND PROVISIONS

Coverage: Covers 12 of the 13 regular appropriation bills for fiscal 1982. Does not include Legislative, which was enacted for the full fiscal year in the first continuing resolution for fiscal 1982, but does extend the pay cap through September 30, 1982.

Rates: 3 bills at the rate and conditions provided in the conference report and joint statement as filed in the House: Agriculture, HUD-Independent Agencies, Interior.

Rates: 1 bill at the House or the Senate rate, whichever is lower, and the more restrictive authority: Treasury-Postal Service.

Rates: 2 bills at the House rate and conditions: Energy and Water Development, Military Construction.

Rates: 4 bills at the House or the current rate, whichever is lower, and the 1981 conditions: Commerce-Justice-State-Judiciary, District of Columbia, Labor, Health and Human Services, and Education, Transportation.

Rates: 2 bills at the current rate or the budget estimate, whichever is lower, and the more restrictive authority: Defense (unless reported or passed, then at that rate), Foreign Operations.

Expiration date: Continuing appropriations are available through September 30, 1982, or until an appropriation bill is enacted, whichever occurs first.

Pay cap: Extended through September 30, 1982.

New starts: No general prohibition. Continuing appropriations for Foreign Aid are limited to programs and activities conducted in fiscal 1981. Continuing appropriations for Defense are limited to programs and activities conducted in fiscal 1981, until a bill has been reported to or passed by the House.

Abortion: Labor-HHS activities are subject to current law (exception for the life of the mother, "states' rights" provision).

Abortion: D.C. activities are subject to current law (exceptions for the life of the mother, and rape or incest where promptly reported).

Abortion: Foreign Aid activities are not subject to any abortion provision.

Abortion: Federal employees health benefits are not subject to any abortion provision.

Refugees: Activities of the State Department for contributions to the UNRWA for Palestinian Refugees are continued at the current rate.

PHS hospitals: The joint resolution provides necessary amounts, not to exceed the amount of the budget amendment transmitted on November 9, 1981 ($162,012,000), for 4 Public Health Service hospitals which have been closed or will be closed within the next ten days (San Francisco, Nassau Bay, Texas, New Orleans, Norfolk), and 4 hospitals proposed for closure (Boston, Baltimore, Statten Island, and Seattle).

Authorizations: The joint resolution provides that no language in any appropriation Act for fiscal 1982 that makes the availability of any appropriation dependent on the enactment of authorization legislation shall be effective during the period covered by the joint resolution.

Apportionment: Past continuing resolutions have waived certain provisions of the Anti-Deficiency Act relating to apportionment. Since OMB has now established procedures for the apportionment of continuing appropriations, this waiver is no longer necessary, and is not contained in the joint resolution.

BILLS, SECTIONS, AND RATE AND CONDITIONS

Agriculture: 101(h)—Rate and conditions provided in the conference report and joint statement as filed in the House.

Commerce-Justice: 101(a)(4)—The bill passed the House as of October 1, 1981, so the rate is the House or current rate, whichever is lower, under the 1981 terms and conditions.

Defense: 101(c)—The rate is the budget estimate or the current rate, whichever is lower, under the more restrictive authority, limited to programs and activities conducted in fiscal 1981.

Defense: 101(c)—House reported or passed rates and conditions take effect when a bill is reported to or passed by the House before or after November 20, 1982.

District of Columbia: 101(a)(4)—The bill passed the House as of October 1, 1981, so the rate is the House or current rate, whichever is lower, under the 1981 terms and conditions.

Energy and Water: 101(d)—House rate and conditions.

Foreign Operations: 101(b)—The rate is the budget estimate or the current rate, whichever is lower, under the more restrictive authority, limited to programs and activities conducted in fiscal 1981.

Foreign Operations: 101(i)—Activities of the State Department for contributions to the UNRWA for Palestinian Refugees are continued at the current rate.

HUD: 101(f)—Rate and conditions provided in the conference report and joint statement as filed in the House.

Interior: 101(g)—Rate and conditions provided in the conference report and joint statement as filed in the House.

Labor-HHS: 101(a)(3)—The bill as passed the House October 6, 1981, shall be considered as having passed the House on October 1, 1981.

Labor-HHS: 101(a)(4)—Under section 101(a)(3), the bill is considered as having passed the House as of October 1, 1981, so the rate is the House or current rate, whichever is lower, under the 1981 terms and conditions.

Labor-HHS: 101(j)—Necessary amounts, not to exceed the budget estimate of November 9 ($162,012,000) are provided for operation, improvement, transfer, and closure of Public Health Service hospitals and clinics.

Military Construction: 101(e)—House rate and conditions.

Transportation: 101(a)(4)—The bill passed the House as of October 1, 1981, so the rate is the House or current rate, whichever is lower, under the 1981 terms and conditions.

Treasury: 101(a)(3)—The bill was reported in the Senate as of October 1, 1981, so the rate is the House passed or Senate reported rate, whichever is lower, and the more restrictive authority.

Treasury: 101(a)(3)—Where an item is included by only one House, the rate is that provided by the one House, or the current rate, whichever is lower, and the 1981 conditions.

Treasury: 101(a)(3)—Federal employees health benefits are available as provided in the Senate reported bill, which strikes the House abortion language.

Treasury: 101(a)(5)—General provisions apply only if identical in the House passed and Senate reported bill.

Mr. RAILSBACK. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I thank my friend for yielding.

Am I correct that the motion to recommit would involve a 5-percent cut, is it in nondefense spending and discretionary social programs?

Mr. CONTE. No. The 5-percent cut, I understand—I have not seen the motion yet—but I understand it is a 5-percent cut in the discretionary fund, with the exception, the last I heard, of defense, foreign aid, and the District of Columbia, I believe.

Mr. RAILSBACK. Let me just say that if that is true, I, for one, as much as I want to support the administration, which I do, am very much concerned that we hear reports that we are going to have a B-1 bomber, the cost of which is now up to $300 million per plane, at a time when we are trying to cut out Legal Services and many other programs that I think are very valuable.

Mr. CONTE. I want to thank the gentleman for his contribution.

Mr. CAMPBELL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from South Carolina.

Mr. CAMPBELL. Just to clarify, if I might, for the gentleman from Illinois, my understanding is, from the earlier debate, that it would not include the District of Columbia, or veterans' medical benefits would not be included in the cut, social security is not included in the cut.

Mr. CONTE. I said discretionary funds. Those are all entitlements.

Mr. CAMPBELL. All of those are in there, military construction and the defense area, which were already well below and had already been cut.

□ 1430

Mr. CONTE. That is right, the gentleman is right, but in all fairness it has been in subcommittee. It goes to the full committee today. The subcommittee by one vote cut out the MX missile. I bet my botton dollar that is going to be back in there.

Mr. WHITTEN. Mr. Speaker, I yield 5 minutes to the gentleman from Kentucky (Mr. NATCHER).

Mr. NATCHER. Mr. Speaker, as the Members of the House know, on page 4 of the continuing resolution we have the following provision:

Whenever an Act listed in this subsection has been passed by only one House as of October 1, 1981, the pertinent project or activity shall be continued under the appropriation fund or authority granted by the one House but at a rate for operations of the current rate or the rate permitted by the action of the one House, whichever is lower, and under the authority and conditions provided in applicable appropriation Acts for fiscal year 1981.

This is the provision which applies to programs of the Departments of Labor, Health and Human Services, and Education.

Now, as my distinguished friend, the ranking minority member on the Committee on Appropriations and the ranking minority member on the Subcommittee on Labor, Health and Human Services, and Education, Mr. CONTE, has pointed out, adoption of the motion to recommit with an additional 5 percent would have a serious impact on these programs.

The continuing resolution as reported already funds Labor, Health and Human Services, and Education programs at a level $1,373 million lower than the level provided by the House on October 6 of this year.

The 5-percent reduction amendment would make further reductions totaling almost $1.5 billion. Here are a few specific examples of the impact of this amendment, some of which were pointed out by my friend from Massachusetts (Mr. CONTE).

CETA programs, including youth employment, the Job Corps, summer youth and private sector programs, would be cut by $164 million below the bill which passed, on October 6. Mr. Speaker, these programs have already been cut by almost $3.5 billion below the 1981 level.

Older Americans employment would be cut by $14 additional million, upon adoption of the motion to recommit, with the 5-percent cut across the board.

Community health centers would be cut by $13 million additional, as pointed out by the gentleman from Massachusetts (Mr. CONTE).

The new health block grants, which have already been cut to a level more

than $170 million below comparable 1981 funding, would be cut an additional $46 million.

These include maternal and child health, preventive health and alcohol/drug abuse, and mental health grants.

The budget of the National Institutes of Health would be reduced by $178 million below the 1981 level and $443 million below the House bill that passed on October 6 of this year.

Low-income energy assistance funds would be reduced from $1,800 to $1,710 million. The $1,800 million, Mr. Speaker, as the Members well know, is already $50 million below the 1981 level.

Aging programs would be reduced by $55 million. This includes funding for senior citizen centers, elderly feeding programs and elderly employment activities. Title I education grants would be cut an additional $150 million.

Education for the handicapped, Mr. Speaker, one of the most important programs presented to this House at any time during the year, would be reduced $51 million.

Student financial aid would go down under this 5-percent additional cut by $177 million.

Head Start in the bill that we presented to the House on October 6 was funded at $950 million. President Reagan in his September budget request provided for $831 million.

In other words, the President asked the Congress to appropriate $831 million for Head Start. If the 5-percent reduction is accepted and approved by this House, it will take Head Start down to $779 million which is $52 million below the President's request, and $171 million below the House bill.

Just briefly, Mr. Speaker, I would like to review the total numbers for the Members considering the motion to recount. The fiscal year 1981 comparable appropriations for the Departments of Health and Human Services, Education and Labor amounted to $88,546 million. In H.R. 4560, the bill that passed on October 6 of this year, we had the amount of $87,181 million, down from $88,546 million.

House Joint Resolution 357, as reported, calls for $85.808 million.

The SPEAKER pro tempore. The time of the gentleman from Kentucky (Mr. NATCHER) has expired.

Mr. WHITTEN. Mr. Speaker, I yield 1 additional minute to the gentleman from Kentucky (Mr. NATCHER).

Mr. NATCHER. Mr. Speaker, under the Michel amendment, as proposed, the estimate would be $84,308 million.

Now, Mr. Speaker, I think in all fairness to all of the Members of the House we ought to point out that it may appear to adopt a 5-percent across-the-board reduction. When you look at the particulars, however, the true impact is clear. The motion to recommit, when it is offered, should be turned down.

The SPEAKER pro tempore. The time of the gentleman from Kentucky (Mr. NATCHER) has again expired.

Mr. WHITTEN. Mr. Speaker, I yield 1 additional minute to the gentleman from Kentucky.

Mr. TRAXLER. Mr. Speaker, will the gentleman yield?

Mr. NATCHER. I yield to the gentleman from Michigan.

Mr. TRAXLER. I want to commend the chairman of the subcommittee, the gentleman from Kentucky (Mr. NATCHER), for that very fine statement and also my distinguished friend from Pittsfield, Mass., for his very fine statement.

I join them both in their eloquent remarks.

Mr. Speaker, we present to you today a resolution which will give us an agricultural appropriation which is $2.5 billion below the amount provided for fiscal 1981, and is below the President's March budget request by nearly $900 million. We have certainly done all that we can to provide a bill which holds down spending while providing essential assistance to American agriculture. This is an agreement of the House and Senate conferees.

I am particularly pleased that we were able to restore many of the special research programs that are of importance to the State of Michigan and the farmers that I represent. We have restored the $85,000 for the Saginaw Valley Bean & Beet Research Farm. This farm provides an essential research facility for two of the largest crops in the State of Michigan which provide my State's economy with over $1 billion worth of activity each year when one considers the combined values of seed, fuel, fertilizer, equipment, and the other elements that go into the farm multiplier.

We also restored $103,000 to continue a very important bean flour research project which is designed to help find new uses for dry beans. In the 2 years that this project has been underway, various food items containing bean flour have been developed, and are currently undergoing consumer testing. Once completed, this project may mean that our dry bean industry will have an entirely new market, while our milling and baking industries may also have some new products as a result.

We are again providing $35,000 for dairy photoperiod research in order to continue the evaluation of the light sensitivity of dairy animals. This project will help us to better understand ways in which dairy production can be temporarily controlled, and will also provide us with a better understanding of the health needs of dairy animals.

Under the Economics and Statistics Service, we are providing $25,000 to continue work on a dry bean acreage estimate project that was started in Michigan last year. The project is fully supported by the agency, and the funding will simply allow the project to continue at fiscal 1981 levels.

Mr. Speaker, we funded this project while the Secretary of Agriculture was in the process of reorganizing various USDA agencies. After the funds were approved, the Department advised us that the project should not properly be under the direction of the Statistical Reporting Service. Since this information came to us too late, and as a result we were unable to transfer the funds, the committee expects that the two agencies will arrange for the proper utilization of the funds, and will expect a report from the agencies as to their action.

Agricultural Research and Extension activities are essential. Our farmers are so successful today because for many years we have had a strong research base, and we have also had the ability to provide this information to our farmers through our Extension Service. It is extremely important that we maintain these functions in order to retain our ability to meet our growing demands for food in the future.

Frankly, I am disappointed that we could not hold to the House figures on some of the research and extension programs. However, the level provided is not significantly different from the House levels, and still represents a necessary increase over fiscal 1981. Additionally, we will fund for the first time the renewable resources extension program at a level of $3 million. This program holds great promise for the future, and provides an additional significant component to Extension activities.

Our agricultural conference report also adds some significant report language for the Department to follow in its administration of various programs. Of particular note is a reference to the need for the Farmers Home Administration to reevaluate its policy against refinancing short-term land contracts on homes. At the present time, FmHA refuses to refinance such a short-term agreement unless it is like a more traditional long-term contract, or unless the balloon payment at the end of the term is renewable at the buyer's option. The reasoning behind this policy is to avoid FmHA from becoming a refinancier of short-term mortgages granted by land developers and builders who took such financing in order to make a sale, allowing the buyer to depend on getting refinancing assistance at a later date.

We have no disagreements with FmHA's goals. We are concerned, however, that this blanket policy does not recognize the fact that this type of financing has become more prevalent in certain areas of the country in recent years. It also fails to provide exceptions for those instances in which a borrower might be fully qualified for

FmHA assistance but for the financing agreement, even when the seller was not one of those that FmHA was trying to avoid.

FmHA was established to be a lender of last resort. If FmHA is too unrealistic about refinancing such agreements, it effectively is telling many people that they will have to lose their homes because no bank or FmHA wants to handle this type of deal. This is particularly frustrating when one considers that the value of the home will usually be more than adequate to secure the financing.

We expect FmHA to take a more sensible view of this matter and to provide assistance to otherwise eligible borrowers, particulary when the original financier was not a member of the group of concern to FmHA.

We have once again funded the agricultural conservation program at $190 million in order to continue a program that is vital to the continued preservation of our farmland. Soil is erroding at alarming rates, and we need land if we expect farmers to grow crops. This is one investment that we must make, and this program must certainly rank as one of our very top budget priorities.

Our agricultural conference agreement provides responsible funding levels for the various feeding programs operated by the Department. Our funding levels are in accordance with both the provisions of the Omnibus Budget Reconciliation Act of 1981, as well as the pending provisions of the Food and Agriculture Act of 1981.

The President has proposed several stringent cuts in child nutrition programs this year, including school lunch and special milk. Congress has approved these cuts, and as a result our budget levels will be significantly reduced from fiscal 1981.

However, it is important for everyone to understand one simple fact: Spending less on these programs means that children will get less. Schools are already threatening to close their lunch programs, as many of us predicted. Many students find that they can no longer afford the lunch as a result of the significantly increased price, as many of us predicted. The lunch itself is in very serious risk of losing much of its nutritional value, as many of us predicted, particularly when those running the program have at times in the past suggested that we should serve 6 ounces of milk instead of 8 ounces, meaning that we would pay the same price, but this time the money would go to special packaging and not milk, and while they are also suggesting that tofu is meat and catsup is a vegetable. The administration claims to have withdrawn these proposals, but we have had no assurances that they will not once again be suggested.

Good nutrition is essential. It minimizes the need for health care, and it provides a better learning condition for students. Study after study has clearly demonstrated that a hungry student does not have a good school attitude, and that the attention span of the student is likely to be much shorter as the feelings of hunger interfere with the concentration on class matters. I suspect that many of our colleagues who supported the legislative cuts in child nutrition programs—and I was not among them—will soon regret their support of that action.

The conference agreement provides $942 million in fiscal 1982 funds for the women, infants, and children program. The House agreed to this level in view of the presence of significant unspent funds carried over from fiscal 1981. These unspent funds were built up when WIC participation was unnecessarily reduced from 2.2 million persons to 2 million persons in the last half of fiscal 1981, despite the presence of available funds and several votes in the Congress in support of the WIC program. It was agreed in conference that the Secretary would be required to spend in fiscal year 1982 the full $942 million in appropriated funds plus the full amount of carryover funds, so that WIC participation could be restored to the levels originally intended.

The original House bill for fiscal year 1982 was designed to serve 2.2 million women, infants, and children in WIC throughout the fiscal year. Since we are now into the second month of the year, this goal will not be fully accomplished.

Under the conference agreement, however, the Secretary must restore participation fully to the 2.2 million level as promptly as possible and keep participation at this level throughout the rest of this fiscal year. The conference agreement clearly provides sufficient funds—including the carryover balances—for this to be done. This will bring average particpation for the overall fiscal year close to the 2.2 million level.

The 2.2 million persons is a modest number of persons to serve in this program, since three to four times this many persons nationwide are in need of this program. Several hundred counties still have no program at all.

We are also concerned that the Secretary allocate WIC funds so that they can be fully utilized in fiscal year 1982 in an orderly fashion. The conference report requires one-fourth of the $942 million—about $235 million—to be allocated to States at the beginning of each quarter of fiscal year 1982. In regard to the first quarter of the fiscal year, this means that the funds must be allocated immediately upon enactment of this legislation—since the beginning of the first quarter is long past. The Department has issued about $90 million in fiscal year 1982 WIC funds to date under the continuing resolution, so an additional $145 million must be allocated upon enactment of this bill.

It is especially critical that the Secretary follow the congressional directive of this matter and allocate these funds immediately. Many States have only enough WIC money to operate until November 20. If funds are not provided to States immediately, some WIC programs will shut down entirely or begin removing participants from the program. It should be clear that any such action would be contrary to congressional intent, and that the conference clearly requires sufficient funds to be made available for States to return promptly to the historic 2.2 million caseload level. The Secretary needs to allocate all remaining first quarter funds no later than the end of the current month to assure that WIC programs remain open in December and that States beginning in December to restore participation to the 2.2 million level, as the continuing resolution and the agricultural appropriations conference report intended.

We also provide $31 million for the commodity supplemental feeding program—CSFP—of which up to $500,000 shall be available for two pilot senior citizen CSFP's, to be operated in accordance with the terms specified in the report to H.R. 3603 and the report to H.R. 4119. This means that the basic CSFP will be able to continue without any reduction in caseload, and we fully expect the Department and OMB to heed this fact.

Many of us are extremely concerned that OMB has failed to take proper care in the administration of CSFP under the continuing resolution. The amounts specified as available for the program bear no resemblance to the levels specified as available, and create severe jeopardy of the program having an insufficient amount of food in its inventory. This action is clearly against the will of Congress, and I know that the Subcommittee on Agriculture and Related Agencies of the House Appropriations Committee will hold the Food and Nutrition Service fully accountable for the management of the program, and the problems created by this style of management.

With respect to this appropriation, the Secretary must supplement the $31 million with any carryover—either in the form of funds or of inventories that are larger than needed—and must fully utilize all available resources to serve the maximum number of participants. In information provided to Congress several weeks ago, the Department informed us that some additional resources—in the form of inventories—are available, and we intend for these to be used. The Secretary must base caseload authorizations on total

resources available. This will allow an average of 125,000 to 135,000 persons to be served throughout the fiscal year, and we expect such caseloads to be maintained.

We are providing funding for two pilot senior citizen CSFP's. The level of funding is expected to be sufficient for fiscal 1982 to meet the likely participation level in these programs. The project will provide nutritious foods to those seniors who participate in it, with the food package being similar to the one available for the current CSFP, but modified to reflect the nutritional concerns of the elderly.

It is this committee's intention to see this program operated, and any delay by the Department in its implementation will be frowned upon severely. It is expected that the Food and Nutrition Service will implement the program immediately upon authorization since the funds are provided and directed for that program. The handling of this pilot program by FNS will be a specific item of direct review during our hearings on the fiscal 1983 budget, and we will expect FNS officials and the appropriate Department officials to be fully prepared to discuss their handling of these projects.

We are providing $10.3 billion for the food stamp program. This money will be available only until August 15, 1982. It is likely, however, that this level of funds will be insufficient because of increasing unemployment which will place larger numbers of people on food stamps. If this funding level proves to be insufficient, the Secretary should notify Congress and should not assume that he must reduce food stamp benefits. The Congress has always provided the necessary funds to avoid reductions in past years, and the conference report signals our intention to do so again. The Secretary does not have any basis for reducing benefits. Unemployed Americans need responsible assistance, and the revisions in the food stamp program are geared toward providing such assistance only to those who truly need the program. But it is a pure fact that the size of this program follows unemployment. The more Americans who lose their jobs, the more will they need this program. Assistance is not large because it has demonstrated that the food stamp program is based on the cheapest meal plan conceivable. The size increases with the need, and we expect that the Department will maintain this understanding of the program.

Mr. Speaker, this is a very difficult budget year, indeed. Many could make statements about the need for fiscal responsibility and their own perceptions about the individual programs that we fund. But the fact is that this bill provides basic assistance. It helps our farmers to produce food while maintaining the quality of rural life. It assures our consumers of our Nation's ability to produce food at the lowest prices in the world. It also attempts to assure those in need that be they children, the unemployed, or the elderly, that their Government is prepared to provide them with the assistance that they need until those better days ahead come to pass.

I cannot emphasize too strongly that we have cut spending in this bill. We have made very responsible effort to reduce spending where possible. We are not playing a budgetary game of who has the lower number. We are making efforts to understand that the budget has a far larger impact than simply the numbers it presents. We are under budget targets and have worked dilligently to accomplish this goal. As a result, I believe that all Members can support this conference agreement in good faith, and I urge a vote in support of this agreement.

□ 1445

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Speaker, I continue to be concerned about the apparent failure of this Congress to address the question of removing the pay cap on the salaries of top Government workers. When the House considered the continuing resolution on legislative appropriations on September 16, I was precluded from offering an amendment to remove the pay cap because the House leadership would not permit any amendments. That would have been an excellent opportunity for the House to remove the cap on executive salaries and correct the inequity which is having a devastating impact on the Federal work force.

The Senate had approved language in their legislative appropriations measure which would have removed the cap on executive salaries but the House conferees squashed this opportunity because they were too intent in giving themselves a hefty pay increase. What resulted from that conference was a substantial tax deduction on Washington living expenses for Members of Congress and a voice vote in the House on the conference report so that their constituents could not point the finger. The pay cap is being kept in place even though the Reagan administration and the Senate is in support of its removal.

Now that the continuing resolution on legislative appropriations is about to expire, Congress has another opportunity to end the brain drain and remove the pay cap. We have just learned, however, that the House leadership is again calling for a closed rule which will prohibit me from offering my amendment to raise the salaries of senior executives in the Federal Government. This is another deliberate attempt by the House leadership to deny Members of the House to correct a very serious problem which is facing the Federal Government.

As many of my colleagues know, 9 out of 10 top Government officials are retiring as soon as they become eligible and employee morale is at an all time low. Our Government is no longer able to retain its top officials or attract qualified people from the private sector to fill a vacancy in the top ranks of Government. At a time when we all desire to make Government more efficient, we no longer have access to the private sector talent which we need. I have been told by various agency officials that they are having a difficult time recruiting and retaining executives.

Executives in the top seven civil service categories are now getting the same maximum pay. A promotion no longer means that an employee will receive a pay increase. The only benefactor of this situation are firms in the private sector which can pay much more in salary and not have to make an investment in training. Within the last 3 years, retirement of the highest ranking employees, aged 55–59, has risen from 18.2 percent to 95 percent. Many younger civil servants are quitting their jobs because positions in the private sector are paying three times as much as their Government salaries.

Another factor which the House leadership has failed to recognize is the excessive cost the American taxpayer is required to pay to maintain the pay cap. The General Accounting Office has recently determined that the executive turnover rate is now over 90 percent. This abnormally high retirement rate of executives will cost the Federal Government about $67,000 per executive, per year, over the next 3 years. Another report just released by the General Accounting Office concludes that it is cost effective to remove the pay cap.

At the present time, we have the top seven civil service categories receiving the same rate of pay. Unless we take steps to remove the cap on executive salaries, we can expect low employee morale to continue and we can expect poor performance if we are not going to provide some incentives. Today, our best young executives, aged 35 to 45, are among the most likely to resign. The longer the pay cap is retained, the worse the situation becomes for the Federal Government.

If we want the Government to function effectively, we must correct this inequity by removing the pay cap. I feel that raising the salaries of top Government employees will allow us to retain highly skilled individuals and save the taxpayers money by avoiding the high retirement rates and the high cost of executive replacement.

Now, once again, I am frustrated by the parliamentary situation which

continues to prohibit my offering an amendment to remove the pay cap on executive salaries. Unfortunately, there is nothing I can do to change this situation. I have been informed however, that the Senate intends to remove the pay cap when it considers this resolution. Since we are prevented from addressing this issue now, I urge the House conferees on this resolution to accede to the Senate's position, support the removal of the cap on executive salaries, and return for final adoption by this House a conference report consistent with that position. Only in that way can we correct this intolerable situation.

Mr. WHITTEN. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Speaker, I am very much concerned about the effect of the proposed 5-percent cut on the Interior and related agencies appropriation bill, which comes before the appropriations subcommittee of which I am chairman. The receipts for the bill are estimated to be $17 billion. New budget authority is $7.5 billion. Revenues come from timber receipts, from mineral leasing, from Outer Continental Shelf leasing, and from sales of petroleum products from the naval petroleum reserve.

When we went through conference and the House voted on the bill last week, the conferees were careful to make reductions so that the revenue potential would not be diminished. What would be the effect of a 5-percent cut on the revenue potential? A 5-percent reduction in budget authority saves approximately $375 million in the whole bill. A 5-percent reduction in receipts from the programs. I am not trying to indicate there is a direct relationship between the amount that is cut, the 5 percent and the maximum amount of cost to the Treasury; yet that maximum amount might be as high as $850 million. The net loss to the Treasury then is $475 million.

The naval petroleum reserve provides a good example of this. Revenue resulting from an investment of $222 million in budget authority is $2.4 billion. Although we will save $11 million in budget authority by the 5-percent reduction, the potential maximum revenue loss is $120 million. Thus, instead of saving $11 million, the Treasury will suffer a loss of $109 million.

The 5-percent cut will result in the reduction of employees. It will result in the reduction of potential leasing. It will result inevitably in some kind of reduction in revenues.

What will be the effect on coal leasing and on oil and gas leasing, on oil shale, on grazing management, on the Forest Service?

A 5-percent reduction could eliminate certain unbudgeted items, like the firescope project in southern California. Rural fire control is down 25 percent from 1981. A 5-percent reduction would include the reduction of forest pest control activities.

A 5-percent reduction could result in a reduction of timber sales from 11.9 billion board feet to 11 billion board feet.

Finally, Mr. Chairman, as I indicated in my remarks last Thursday before the House about fish hatcheries, I indicated that we had received a call from the gentlewoman from Nebraska (Mrs. SMITH) about the potential closing of a fish hatchery in her district. I assume that is Crawford, Nebr.

Yes, a 5-percent reduction could result in closing of the Crawford fish hatchery, or one in New London, Minn., or the Chattahoochee Forest in Georgia, or Inks Dam, Tex., or Jones Hale, Utah; Pittsford, Vt., or White River, Vt.

A 5-percent reduction could result in the closing of so many of the hatcheries that mean so much to the people of the districts represented by Members of the House.

On land acquisitions, $4 million was included in the bill for Valley Forge, Pa.

Four million dollars was included for the Channel Islands in California.

Trustom Pond in Rhode Island was placed in the bill for overbudget funds. That could be eliminated as well.

The point I am making, Mr. Chairman, is that the bill that the House approved last Thursday, in my judgment, was a well-reasoned, well-fashioned bill for the people of all the country. It is a bill that would return $17 billion into the Treasury of the United States—$17 billion, a net gain to the Treasury of approximately $10 billion plus.

A 5-percent reduction will have its effect upon that. What the amount will be, we do not know.

I would hope that the 5-percent reduction would not be approved by the House.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I thank the gentleman from Massachusetts for yielding.

Mr. Speaker, it seems to me as we have heard some of these figures discussed here today that we need to remember what the critical point is in this whole matter of cutting the budget. I certainly want to go on record as being in favor of that 5 percent across-the-board cut, because what we are trying to achieve here is not just some kind of change from last year's budget or some kind of change from this year's proposed budget, but rather a change in the way we have been proceeding for the last 25 years in this country. That is the critical point. The increases that we are talking about cutting back have to be looked at in terms of a massive overspending by the Federal Government over a period of a number of years.

As a matter of fact, if you look back over that 25 year period, you find out that we have increased spending in the Federal Government by 841 percent during that period of time. Then take a look at some of the programs that have been discussed here today as being the kinds of cuts that we really would not want to make. For instance, one of the gentlemen discussed the fact that we really do not want to cut in the health and medical care area and, of course, that is of very grave concern; however, I think we have got to look at the spending being talked about against that 25-year perspective. In 25 years we have increased the health spending by the Federal Government by 8,077 percent, over 10 times what the total Federal costs have gone up.

We also heard about the food and nutrition issue. We have increased spending in the food and nutrition area over that period of time by 3,800 percent.

If you take a look at the educational area, we have increased that by 914 percent, somewhat less but still well over the increases that the Government as a whole was spending.

We also take a look at some other areas. If you take a look at the areas of HUD and the independent agencies, you find out that the budget resolution we are considering today is some $2 billion over the September request of the President.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania has expired.

Mr. CONTE. Mr. Speaker, I yield 1 additional minute to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman very much.

In this one additional area, in this area of housing and similar kinds of programs, Federal Government spending over the last 25 years has gone up by 8,627 percent.

What I am saying is that if you look at the way in which the Federal Government has spent its money over that 25-year period of time and look at places to make cuts, some of these areas where you have had absolutely massive increases are the areas that we should be looking at and a modest reduction beyond this continuing resolution proposal of 5 percent seems to me to be totally acceptable.

I thank the gentleman for yielding.

Mr. CONTE. Mr. Speaker, I yield 3 minutes to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I will be very brief; but I would like to say again some of the

things I said when we took up the rule.

I realize that the Appropriations Committee has tried very hard to deal with a difficult situation. The only avenue they have to go right now is a continuing resolution. But at the same time, this is a continuing resolution that would go for a year unless we should pass finally some appropriation bills and get them through the whole process; but the chances of that do not look very good in most instances, or if they do go to the President, in the case of HUD and independent agencies and the Interior appropriations, we are talking about bills that very likely will be vetoed and that they would then come back and be sustained. We would be stuck while those bills would have been vetoed and sustained, we would be stuck with that higher conference level under the continuing resolution until we pass something else.

My friends, if you want to really help those people and those programs that have been enumerated here by the distinguished ranking member, the gentleman from Massachusetts, and the distinguished gentleman from Kentucky, you need to take into consideration the fact that if this bill goes to the President in the form that it is in now for a year, a second year of continuing resolution without the 5-percent reduction, it will be vetoed and we will have the votes to sustain it and then we are going to have a mess on our hands.

All that the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL) is trying to do here, is to get some control on these bills. We must get them closer to what the President asked for in the continuing resolution. A 5-percent reduction should be accepted.

We are talking about a relatively small amount on these programs, almost all of which exceed the President's budget level; so I urge you, vote for the motion to recommit with instructions. We have a bill then that can go to the President and that the President can sign and if we do pass appropriations bills and they go through the process, that will be fine. Let us not lock ourselves into this higher figure for a continuing resolution for a full year.

Mr. WHITTEN. Mr. Speaker, I yield 5 minutes to the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Speaker, I realize that it is always popular to vote for these across-the-board cuts. That way one is for spending reductions without having to deal with the specific effects.

I want to point out that the energy and water appropriations bill reflected months of hearings dealing with specific issues. The House bill was under the budget. We have always been under the budget. But the bill deals with specific issues.

If you vote to cut 5 percent across the board on the energy and water appropriations, this is what the effect will be. This bill, I might say, should be on the President's desk next week. The continuing resolution then, in that event, would not have any effect, if the bill is signed.

But I want to point out what the 5-percent cut will mean to the funds in the continuing resolution. It would cut $235 million below the House level for nuclear weapons, which will delay production of the cruise missile, the Trident, and the MX strategic warheads.

It will reduce the R. & D. program to the point where critical research on advanced nuclear weapons cannot be performed.

A 5-percent across-the-board reduction in the fiscal year 1982 appropriation for the Department of Energy Power Marketing Administrations, that is the Alaska Power Administration, Southeastern Power Administration, Southwestern Power Administration, and the Western Area Power Administration, would make it impossible for these administrations to meet their contract commitments to deliver electric power to the municipalities and other users of the hydroelectric power from the Corps of Engineers and the Bureau of Reclamation dams.

Next, a 5-percent reduction in the Nuclear Regulatory Commission would require an additional cut, we have already cut it down to the bone, but this would cut it down another $24 million that would reduce the Nuclear Regulatory Commission staff necessary for such things as critical safety inspections at the operating nuclear powerplants in the Nation.

□ 1500

It will cut the ongoing inspection of nuclear powerplants that are now under construction, and it is going to cut the personnel that will be monitoring the nuclear materials shipments throughout the Nation. So, the Members can see that a 5-percent cut on these items could have a disastrous effect, and I urge that you vote against a 5-percent across-the-board cut.

Mr. YOUNG of Florida. Mr. Speaker, I yield 10 minutes to the gentleman from Illinois (Mr. MICHEL), the minority leader.

Mr. MICHEL. Mr. Speaker, I rise in opposition to this resolution.

There is no choice but to recommit it with instructions for further work on discretionary spending.

I know that the prospect of recommittal is not universally popular. Time runs out on Friday. We have here a mish-mash of current-year spending, conference reports the President has not signed, appropriation bills passed by the House, but not the other body, and several appropriation bills that have not even made it through this House yet.

I believe I know the political dynamics here, having served on the Appropriations Committee. And I know the economic dynamics. Discretionary spending consumes only 16 percent of the budget. We have made reductions already. Why then make more? Why not pass this resolution, in spite of it, and go home? Why consume more bitter medicine when the real issues are entitlements and taxes?

The temptation to take the easy way out is strong, but the easy way is not always the best way.

There are many compelling reasons for recommitting this resolution, and we had better give them a full airing here and now. All of us have to be reminded why these very difficult decisions rest on our shoulders, and why we cannot escape from them or shift the burden some place else.

Over the last two decades the Congress has forced the people of this country into a fiscal lifestyle that would have bankrupted any American family or any American business long ago. No family or business with limited resources could have endured spending increases of over 600 percent during the past 20 years or failed to balance their budget in all but 2 or those 20 years.

The Congress has loaned out, spent out, and borrowed so much against our future that we simple have nothing left to draw.

No Member of this House, Republican or Democrat, conservative or liberal, can deny that. We cannot run away from it anymore.

No one likes to be reminded of past mistakes, but those past mistakes are more the reason we are here today than any other. No faulty economic assumptions last spring, no overly generous tax bill last summer, no votes on the floor of this House or policy decisions of the administration are the cause of this tragic fiscal mess we find ourselves in.

I guess I have had my fill of the rhetoric, the finger-pointing and the political opportunism in recent weeks and months over everything from social security to the infamous Stockman article. It counts for naught. We are here considering serious reductions in Government spending because of years and years and years of fiscal irresponsibility and political greed.

The advent of the Reagan administration was supposed to change all of that. According to the game plan we were supposed to be on our way to economic recovery this fall through a combination of responsible budgeting, tight disciplines, and some largely untried economic theories. We set out on this new course with some dynamic and unparalleled success last summer.

We made the first giant leap in decades toward controlling Government growth, knowing full well one leap would have to be followed by another.

Then we adopted a historic tax cut that far surpassed the President's recommendations and certainly exceeded his expectations.

We did, it is true, overestimate the psychological value of what we accomplished. There was not the expected rebirth of confidence in the American economy. There was only diminished skepticism. And when you consider the performance of the Congress over the last 20 years, I guess we had no reason to expect otherwise.

Now to the present. We know what brought us to this point.

The President reacted to the worsening economic assumptions in September with a request to do more in the way of reducing the deficit. He proposed more changes in entitlements, discretionary spending, defense spending, and tax revenues.

The Democratic leadership offered in response to the President one crack at reconciliation in the next year on the issues of entitlements and tax revenues. It was a choice between engaging in full reconciliation this fall and nothing next spring, or waiting until the new budget came down from the administration. There was no other choice and we opted for next spring.

That left us with the discretionary spending issue, encompassing both domestic and defense-related programs.

The President requested a total of $10 billion in reductions in these categories, $8 billion in discretionary through a 12-percent across-the-board reduction, and $2 billion in defense.

As I see it, the Appropriations Committee overreacted on the defense and underreacted on the rest.

Neither side in our debates over economic policy have been able to produce reliable statistics or assumptions.

What we do know is what we have learned from past experience. If you take the most favorable estimates and projections, you usually wind up in deeper trouble down the road. And this Congress has always operated on the rosiest cost estimates, assumptions, and projections it could find.

It is about time we faced up to reality and predicate our actions accordingly.

That is what I have done with this continuing resolution. In my mind it is over budget by anyone's standard of measurement. We cannot leave here this fall without doing something about it.

There is no choice but to recommit. The 5-percent across-the-board reduction will achieve savings of less than $4 billion in outlays and $6.4 billion in budget authority, still $4 billion in outlays over what the President sought in September. In other words, in the nondefense areas we are giving the President half of what he requested. It is the absolute minimum we must do, and it can be done.

We will have time next year to debate the other pending issues, those of entitlements and revenues. We will address the defense issue before we leave.

This is the last opportunity, however, that we will have to make corrections in the appropriations process overall. Thus far the Congress has effectively usurped the constitutional prerogative of the President to veto three appropriations bills, and before all of this is over, I doubt he will even have a chance to work his will on the rest.

We can now put to rest the political pontificating about the administration usurping the rights of the Congress.

The President is providing the Nation with a consistent economic policy—something we have not had around here in a long time, tried or untried. And the President is carrying out that policy with courage and determination. We would be wise to follow his leadership. Congress has not offered the American people anything like it for the past 20 years.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to my friend from Mississippi.

Mr. WHITTEN. Mr. Speaker, may I say the gentleman is aware that it is the other body, which is dominated by his party, that has not sent the bills back. The gentleman realizes that, and he realizes that the whole thing comes to a halt Friday night at midnight, so I would like my colleague, who has spent many years on appropriations, to realize that we have 33 different items come down to us. We have had five or six budgets to consider this year, so we are faced with necessity. Here, the motion to recommit ties our hands just before we go to conference, and so help me, what we have here is a protection of the House position.

This talk about it lasting a year, it will not unless the whole thing breaks down. Then, it will have some level that we will continue to operate the Government until we can straighten out the difficulties. The gentleman knows that.

Mr. MICHEL. I appreciate the gentleman's remarks. I think we have an obligation in this body to make our case as best we can notwithstanding what the other body may or may not do and what would eventuate in conference. I just think we have to do the best we can here to fulfill the obligation to hold down Federal spending within the limits we think are prudent for the moment. So, I am just looking at it in a very practical way.

We are not giving the administration carte blanche authority to just cut willy-nilly. They are still going to have to conform to the pattern the gentleman from Mississippi has set out in this resolution. I think that is a good principle

Mr. WHITTEN. I compliment the gentleman and I have enjoyed working with him back through the years, and he is fine, but after he had worked for months and weeks and weeks, I do not recall his ever supporting across-the-board cuts when the bill was already below the President's level.

Mr. MICHEL. Well, of course, what the gentleman would also observe, I am sure, is that time and time again I offered amendments down here and supported amendments to cut very deeply in a bill which I was personally responsible for on my side of the aisle. So, I am just following through with that overall feeling of how much more we ought to cut it.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. LONG).

Mr. GRAY. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Pennsylvania.

Mr. GRAY. Mr. Speaker, I would like to inquire of the chairman of the Subcommittee on Foreign Operations about the African Development Foundation. As the chairman of the subcommittee knows, we provided $500,000 for the African Development Foundation for fiscal year 1981. These funds were to be taken out of funds provided for the Sahel development program in order not to increase the overall level of the foreign assistance appropriation. Because the funds for the Sahel program remain available until expended, it is my understanding that the funds which we provided for the African Development Foundation would also remain available until expended. While this continuing resolution would not include funds specifically for ADF, it is our understanding that it is the committee's intent that the administration proceed with the development of the program in fiscal year 1982. Is that the chairman's understanding as well?

Mr. LONG of Maryland. I thank the gentleman from Pennsylvania. That is my understanding. The gentleman from Pennsylvania will recall that the full Appropriations Committee adopted language in its consideration of the fiscal year 1982 foreign assistance bill, which reemphasized this point.

I have also been informed that AID, Agency for International Development, and OMB, the budget bureau, concur with this view. It is my hope that the administration would move ahead on this African development program. We have already suffered a needless delay in getting this program in operation.

Mr. GRAY. I want to thank the distinguished chairman of the subcommittee.

Mr. WHITTEN. Mr. Speaker, I yield 4 minutes to the gentleman from Oklahoma (Mr. JONES), chairman of the Budget Committee.

Mr. JONES of Oklahoma. Mr. Speaker, when I became Chairman of the Budget Committee I asked that we quit playing games over the budget. Many of us, after the policy debate was completed last spring, did decide to quit playing games and try to deal with real numbers and realistic figures. Unfortunately, I think today's debate would indicate that game playing still exists.

Let me refer first to the distinguished minority leader's comment that this House is holding up the President by not sending appropriations bills to him. It is generally known that almost all of the appropriations bills, 11 out of 13, have gone through this House; they are pending in the other body, and the reason those appropriations bills are not going to the President, as confirmed by a colloquy between the majority and minority leaders of the Senate last week, is the fact that an agreement between the White House and the Republican leaders of the other body is holding up those appropriations bills.

□ 1515

We should not be kidded into believing anything else. That is in the record.

Second, we get to this point of a 5-percent across-the-board cut. Here I wonder if some game playing or some deliberate confusion is being spread in this body. We have a situation where this 5-percent cut comes up at the last minute and we wonder who authorized that 5-percent cut.

I think it is important to review a little bit of what has happened this year—how we got here. The Atlantic Monthly article on Mr. Stockman is revealing. He concedes in that article that they really did not know where their numbers were coming from. And we have in the room right behind this Chamber, OMB trying to explain how they have come up with the numbers they furnished to the minority. They cannot explain it. It indicates that they are still doing what they did during the spring.

That magazine article also states that one of the administration's strategies is to spread confusion, have a lot of different budget bases and a lot of different cuts from different bases so that we never quite know what they are talking about. The strategy is to spread confusion. I think that may be what is going on here today.

Go back to last March when the President submitted his revised budget and then move to the spring and summer when Gramm-Latta I and Gramm-Latta II were passed with the express endorsement and approval of this administration and this President. Then move forward to September, when the President said that we have to cut 12 percent across the board, cut entitlement programs, and cut defense, and then bring it up to today. Where are we? We find, according to the CBO, which has been accurate in its projections and in its calculations—not any hook-or-crook calculations but calculations which have been borne out by time—that the Appropriations Committee is not only under the first budget resolution but it is under the President's September request.

Last Thursday morning the President told the leadership of the minority that he would accept postponing his September recommendations until next year, and that all we have to do for the second budget resolution is update the first budget resolution, and we did that. Now, 4 days later, we hear the minority saying that the administration has changed its mind and it wants to cut some magical 5 percent from some base that we cannot even figure out.

It seems to me that if we have learned nothing else from the debates so far this year and from the Atlantic Monthly article, it is that we ought to be honest and we ought to be straightforward with the American people and quit playing political games. We ought to support the Appropriations Committee when they act responsibly, as they have done in this case, and oppose them when they have not.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. JONES of Oklahoma. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding, and I just wanted to make one point.

The SPEAKER pro tempore. The time of the gentleman from Oklahoma (Mr. JONES) has expired.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Iowa (Mr. SMITH), a subcommittee chairman of the Committee on Appropriations.

Mr. SMITH of Iowa. Mr. Speaker, this is obviously not an ideal way to proceed, but the motion to recommit is much worse.

I want to point out, within the part of the bill that is handled by the subcommittee I am privileged to chair, some of the things that would happen. Let us take, for example, U.S. attorneys and marshals. A 5-percent cut would mean the loss of approximately 350 workyears for U.S. attorneys. It would result in a significant increase in the number of criminal cases that are declined for prosecution. We hear a great deal about law and order all over the country, and it is a major question. If the motion to recommit passes, it would increase the number of cases that could not be prosecuted and, under the Speedy Trial Act, the number of defendants who would be turned loose.

With regard to the FBI, a reduction of this magnitude would represent a loss of over 2,000 work years or the equivalent of 3,800 personnel; that is, 680 agents and 3,120 support personnel.

With regard to the Immigration and Naturalization Service, a 5-percent cut would result in the loss of 1,145 positions and would significantly reduce the border enforcement and detention and deportation programs against illegal aliens, which the administration has said in recent days it considers to be very important programs.

In the Drug Enforcement Administration, dealing with one of the big problems we have in this country, a 5-percent cut would result in the abolishment of all the regional offices, 24 resident offices, and all of the funded State and local task forces.

Well, the fact of the matter is that in an appropriations bill that we passed in this House many, many weeks ago and that languished in the Senate for several weeks until they just took it up last week, we met all of the requirements that were given to us for reductions. We came in below the President's reconciliation level. If we had this, I suppose we could cut some more, but we would not cut it in the way that is being done in this motion to recommit.

Mr. Speaker, this is not the way to cut this bill, if it is to be cut at all, and I urge that the motion to recommit be defeated.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I believe that House Joint Resolution 357 is an outright surrender to openhanded spending. And more importantly, it is absolutely unfair to this body and to the legislative process to ask us to make a decision of this size without proper debate and without the consideration of a single amendment.

We are passing most of the appropriations to run our entire Government for the rest of the fiscal year without even an amendment being allowed. I think that is scandalous legislative behavior.

The President says it is over the budget, and the committee says it is under the budget. We all know a lot about assumptions. I remember last year that the Budget Committee brought in a balanced budget resolution, and we wound up the year being $57 billion in the hole. So much for assumptions, and so much for committees' assumptions, and so much for OMB's assumptions.

I think that we have to look at the record. The record of the Appropriations Committee is perfect. With relentless, unswerving regularity, that committee has taken us over budget year after year after year. It has given us supplementals year after year after year.

So, if we support the work of the committee and support the continuing resolution, we will be funding the same kind of profligate fiscal policy that put us in this deficit mess in the first place.

If, on the other hand, we vote for the motion to recommit, or we vote against the resolution, we have a chance to help to return this country to some semblance of fiscal sobriety, and that, I submit, is what our constituents have asked of us.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to my great friend, the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, it is my hope that the administration and this body will recognize House Joint Resolution 357 as the proper and logical vehicle for addressing and solving one of the least understood problems facing the Government today. I am referring to the executive pay problem which directly affects recruitment, retention and morale of top managers in the Federal service.

The current appropriation restriction on the payment of legal salaries of career executives and other top Federal officials expires this Friday, so we have another opportunity to address the problem.

I am sure each and every one of us places a high priority on efficiency in the Federal Government. Unfortunately, at the very time we need these assets the most, we are losing many employees who make a great contribution to Government efficiency.

Since March 1977, the executive pay ceiling has been increased by only 5.5 percent. At the same time Federal white-collar pay rates have been increased by 38 percent, and in the private sector executive pay has increased about 40 percent.

Experienced Federal executives are leaving the Government at very high rates. Last year, 3,137 top executives retired. That compared with only 508 in 1977.

While there have been more complications, with this problem on the other side of the Capitol, I hope this body once again will demonstrate its good judgement by using the continuing resolution as the means for constructive action that would be cost effective in terms of more efficiency and productivity in government. In encouraging and retaining our best and our brightest we are keeping faith with the taxpayers.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. LOEFFLER).

Mr. LOEFFLER. Mr. Speaker, I rise today to urge the Members of this body to support the motion to recommit with instructions.

I think the time has come for us to be responsible, to attempt to avoid a veto, and to try to maintain the integrity of one part of our three-branch Government, the Congress. It is time that we understand that while numbers can be debated and numbers are used by one side to promote its arguments and by the other side to promote its arguments, the fact is that inflation is caused primarily by deficit spending.

No matter where the numbers may lie by whoever may argue whatever position, if we do not reduce the growth of Federal spending further, then we are going to see inflation rise, we are going to see interest rates rise, and we are going to see unemployment rise. There is no other game in town that I know of that can do the job to reduce inflation except reducing outlays of Federal expenditures.

When we compare the numbers that will further reduce the growth of Federal spending to be offered in the motion to recommit with instructions by the distinguished Republican leader, it is interesting to note this: that if we take the three conference reports on agriculture, on HUD, and on the Interior appropriation bills, the amount that those reports are over the President's September budget is the same amount that we are asking that we reduce across the board, $3.7 billion.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I am happy to yield to the minority leader.

Mr. MICHEL. Mr. Speaker, I might observe at this juncture that if there is any question about numbers, the numbers upon which I predicated my motion to recommit and which the gentleman uses for his statement, they are those that were checked out with the Appropriations Committee.

So, I trust that if the Members believe the committee, they have got to believe the figures that we have in our motion to recommit.

Mr. LOEFFLER. Mr. Speaker, I thank the distinguished minority leader.

Mrs. SMITH of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentlewoman from Nebraska.

Mrs. SMITH of Nebraska. Mr. Speaker, the distinguished minority leader, Mr. MICHEL of Illinois, has indicated that he plans to offer a motion to recommit House Joint Resolution 327, with instructions. Earlier, he indicated the instructions would mandate the Committee on Appropriations to cut most domestic discretionary programs by 5 percent.

As a member of the Committee on Appropriations, I welcome the opportunity to review and revise spending rates called for in the measures encompassed by this continuing resolution. For this reason, I plan to support the gentleman from Illinois' recommittal motion.

However, my support would be reluctant if the instructions apply only to cuts in certain domestic programs. Untouched by the reductions would be Defense, District of Columbia, and foreign assistance appropriations, as well as legislative branch and military construction funds.

The Department of Defense can surely operate this fiscal year with a 5-percent cut, Mr. Chairman. The Department itself projects that at the end of fiscal year 1982, $29 billion will remain unobligated—that there will not be a binding contractual obligation for the spending of such funds. Despite this projection, this recommital motion to cut "across the board" does not address the Defense appropriation. The increase over last year for the Defense appropriation is approximately the same as the total appropriation for the Department of Agriculture for fiscal 1982. And yet, this motion would further cut the already reduced Agriculture appropriation.

The District of Columbia can also move forward with a 5-percent cut, Mr. Speaker. Its operating funds in the fiscal 1982 bill are increased by $113 million over what was spent last year. If we reduce other domestic programs by 5 percent, why not include the District of Columbia?

As for foreign assistance, this would be the most difficult part of the "protected" appropriations for me to swallow. I appreciate the fact that most of the World Bank funds are deleted in the foreign assistance appropriation as covered by House Joint Resolution 327. I also appreciate the fact that the appropriation—the lower of the 1981 rate or the budget estimate—shrinks funding for assistance by $1.5 billion. But this is not nearly enough.

I would like to point out that the total is only slightly below the 1981 figure of $6.4 billion; in fact, it is less than a 4-percent reduction, to $6.1 billion. I find it impossible to explain this figure to the people of the Third District of Nebraska, when, for example, the bill containing agricultural programs—food stamp, child nutrition, and other worthy, related programs—are already reduced by more than 11 percent from the 1981 total of about $23.7 billion. An additional 5 percent would be outrageously unfair if some Federal programs are exempted.

I can neither understand nor justify making agricultural and many other domestic programs whipping boys in

favor of handing over more and more billions of dollars to foreigners, most of whom spend their time second guessing us in every possible way.

If I had my way, I would put all foreign assistance programs on hold, perhaps with certain important exceptions, and order Congress to reexamine them to see why most of them do not work and to overhaul them to see if they can be made to work at all.

As a former member of the Foreign Operations Subcommittee of the Appropriations Committee, my opposition to excesses of the annual foreign aid funding bill is consistent and well known.

Here we are with a bill that would pour ever more billions overseas while our small businessmen, farmers, and ranchers are recoiling from high interest rates caused mainly by deficit Government spending. Indeed, the President himself and his closest advisers have been worrying aloud about deficits far larger than they had expected—so large, in fact, that the Federal budget cannot possibly be balanced in fiscal 1984. In my view, bloated foreign aid funding is a big, fat target for the budget knife.

Mr. Speaker, I believe all programs should be cut 5 percent. I appreciate this opportunity to explain my position regarding the recommittal motion on House Joint Resolution 357.

Mr. LOEFFLER. Mr. Speaker, in looking at what we are confronted with today, I believe this is not yet the time to throw in the towel and it is not the time to take on the executive branch in a confrontation, because I believe the executive branch will win, and I will be a part of that momentum to try to sustain vetoes. I believe it would be responsible for us to do what is right, and that is to take steps now to avoid a veto and to avoid the problems and the pain that will be inflicted upon each and every one of us and the millions and millions of Americans who will be affected by a delay in the continuing resolution.

Let me make one final point. Here are numbers again—not the billions of dollars but, rather, the percentages. The motion to recommit to be offered by the distinguished Republican leader will basically cut certain categories of appropriation bills by 5 percent in budget authority for discretionary spending. Frankly, that is 1.5 percent of all domestic expenditures when we add discretionary funds to entitlements, which are not touched at all. That is a very small sacrifice to ask this body to come up with or to sustain in achieving true economic recovery for the people of this great Nation.

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I am happy to yield to the gentleman from New York.

Mr. PEYSER. Mr. Speaker, one question that has developed in my mind after listening before to the ranking minority member was that he was raising the issue that we are voting on this without the right of offering amendments, and that this was a very bad thing.

It seemed to me that when we did Gramm-Latta I and Gramm-Latta II, when basically the other side was in control, there was no right to take on individual votes either, because we just did not want to vote against guaranteed student loans and other things, and there was only one vote.

This is the same thing today. I do not see how the gentleman can use the argument both ways. In other words, there is one vote here, just the same as there was one vote on Gramm-Latta I and one vote on Gramm-Latta II. Is that not correct? Is that not the way we are operating?

Mr. LOEFFLER. There was basically one vote on the first resolution and one final vote on the reconciliation bill.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. LOEFFLER) has expired.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. OBEY), a member of the committee.

Mr. OBEY. Mr. Speaker, the Michel amendment would have us support a 5-percent reduction with exceptions for Pentagon spending, the District of Columbia, and foreign aid. I would respectfully suggest that is exactly backward from the way we ought to do it.

If there is going to be a 5-percent cut in spending, it would seem to me that equity would require that 5-percent cut to be applied against programs which escaped the budget ax the first time around, not the other way around, as the gentleman from Illinois is doing it.

□ 1530

The gentleman from Illinois would have us cut health research. He would have us cut education research. Why? Because we are not facing up to the need to repair the Kemp-Roth tax cut which was passed earlier in the year.

Members ought to know, if we are tossing figures around today, that just to give tax cuts to those making $50,000 a year or more, which are larger in dollar amount than the tax cut we are providing for average taxpayers in this country, will add $160 billion to the Federal debt over the next 5 years. That is where you ought to be looking if you want to balance the budget.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

The gentleman has hit two very key points. First, the President has not sent forward any recommendations for entitlement changes or for revenue changes, and yet here we are proceeding with a 5-percent cut without any kind of comprehensive plan in terms of approaching the budget. Second, why should we exempt any areas from reduction when we are willing to cut education and health care. Isn't it time we all share the burden of cuts.

In addition, we are dealing with the budget resolution targets that were presented to the Appropriations Committee by this House. The Appropriations Committee has met the targets contained in the resolution that was passed by the House. We have not changed it. As a matter of fact, Republicans had the opportunity in the Budget Committee to include the 12-percent cut and to include a 5- or 6-percent cut and they did not do so.

So we are operating under the budget resolution as adopted by this House and the Appropriations Committee has met those targets as provided by this House.

If we want to stand by the budget process, let us do so by voting with the Appropriations Committee.

Mr. OBEY. I thank the gentleman and I agree with his comments.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may require to the gentleman from New York (Mr. MCHUGH).

Mr. MCHUGH. Mr. Speaker, I rise in support of this continuing resolution, House Joint Resolution 357, and urge my colleagues to join me in voting for it. As we all know, this resolution provides continuing funds for most of the Federal Government's programs and activities. I would like to bring two of these programs to the attention of my colleagues. They are the supplemental feeding program for women, infants, and children (WIC) and food stamps.

I am pleased that the conference report on the Agriculture appropriations bill (H.R. 4119), which is incorporated into the continuing resolution, maintains a strong WIC program. WIC is one of the most valuable and effective programs established by the Congress.

For the WIC program, the conference report, and the continuing resolution provide $942 million in fiscal year 1982 appropriations, to which all unspent funds from fiscal year 1981 must be added. The combined funding available for the WIC program in fiscal year 1982, from appropriated funds and carryover funds, will be close to $1 billion.

The house version of the Agriculture appropriations bill had provided $1.037 billion for WIC, but our conference committee agreed to the lower number of $942 million in view of the availability of the unspent funds.

What is critical, however, is that the basic policy of the House bill was maintained in the conference. The House bill was designed to serve 2.2 million women, infants, and children in the WIC program throughout fiscal year 1982. The conference report and the continuing resolution also require a 2.2 million participation level.

One year ago, Congress provided funds sufficient to maintain through fiscal year 1981 the end-of-year fiscal year 1980 WIC caseload of 2.2 million persons. This is well under half of all persons who meet the WIC eligibility standards nationwide. However, during the last two quarters of fiscal year 1981, WIC caseloads were reduced by 200,000 persons while available funds went unused.

For this reason, there are sizable carryover balances, and WIC participation is now only slightly above 2 million participants. The conference report and the continuing resolution require that the Secretary fully utilize all $942 million in new funds, and all carryover funds, to return average WIC participation for the 12 months of fiscal year 1982 as close as possible to the 2.2 million level originally intended by the House. The Secretary is required to act promptly upon enactment of this legislation to restore participation, as expeditiously as possible, fully to the 2.2 million level—this may take 2 to 3 months—and to maintain participation at the 2.2 million level for the duration of the fiscal year. While we will be some months into the fiscal year before the 2.2 million level is fully restored, we will at least return to this level for over half of the fiscal year, and average participation for the entire year will be brought close to the 2.2 million benchmark. There clearly are ample funds—including the carryover funds—to return fully to the 2.2 million for the duration of this fiscal year.

The conferees on the Agriculture appropriations bill also directed that one-fourth of the $942 million in fiscal year 1982 funds—or about $235 million—be allocated to the States at the beginning of each of the fiscal quarters of fiscal year 1982. These quarterly allocations of $235 million are in addition to the carryover funds that are available.

About $85 to $90 million in fiscal year 1982 funds have been allocated to date under the first continuing resolution (Public Law 97-51). The Secretary will be required to allocate the remaining $145 to $150 million in 1982 funds provided for the first quarter of fiscal year 1982 promptly upon enactment of this continuing resolution, since the beginning of the current fiscal quarter—the point at which the allocation would normally be required under this legislation—is now long past.

It is particularly important that this allocation be made immediately after this legislation is enacted. Most States now have barely enough money to maintain their WIC programs to November 20. They certainly cannot continue to operate into December without additional funds. The Department's conduct in taking 3 weeks after passage of the first continuing resolution to allocate WIC funds cannot be repeated. The intention of the Congress should be clear on this matter. Any shutdown of a State WIC program due to failure by the Department to promptly allocate funds—or, for that matter, any action by the Department to prevent participation from being expeditiously restored to the 2.2 million level—would be a violation of the intent of this legislation. The Secretary must allocate all remaining first quarter WIC funds by the end of the current month, in the amount provided for in this resolution and the Agriculture appropriation conference report, in order that the States keep their programs open in December and operate their programs throughout December in the manner directed by the conference report. States must be duly allocated the prescribed amount of first quarter 1982 funds so that they may begin in December to restore participation to the intended 2.2 million level.

In addition, that conference report endorses the Senate language directing the Secretary to reallocate fiscal year 1982 funds during fiscal year 1982 to insure their maximum utilization. The Secretary is obligated to determine whether any States will be unable to use their entire allocation and to reallocate any such funds to States that can use the funding. Last year, the Department failed to carry out this obligation, and we have directed that this be remedied in fiscal year 1982.

Funds provided through the reallocation process should, like other WIC funds, be provided in the traditional manner in which approximately 80 percent is for WIC benefits and 20 percent for administrative costs. The 80 to 20 percent ratio has for years been a fundamental part of the WIC program, in accordance with section 17 of the Child Nutrition Act. USDA's action at one point last year of providing nearly half of reallocated funds for administration is not what the Congress had in mind when it authorized the WIC program or appropriated WIC funds.

FOOD STAMPS

I would also like to comment on the food stamp appropriation. The Congress, through passage of the Reconciliation Act, has made $1.65 billion in reductions in food stamp benefits for fiscal year 1982. Legislation recently passed by the House cuts yet another $600 or $700 million through postponement of the scheduled April 1, 1982, cost-of-living adjustment.

The continuing resolution and the Agriculture appropriations conference report provide $10.3 billion for the 10½-month period through August 15, 1982. This level should be adequate to maintain currently authorized benefits through that period.

This funding level is based on the administration's current economic assumptions. If unemployment remains above current OMB predictions, food stamp costs will increase. However, the administration should not simply proceed with benefit reductions if this should occur. To the contrary, we expect that the Secretary will give Congress ample time to consider supplemental funding should this become necessary to avoid benefit reductions. On every occasion in the past, including last June, the Congress has acted to avoid the specter of benefit reductions. The agriculture appropriations conference report continues in this tradition by stating that—

> The conferees are in agreement that such additional funds as may be required to carry out the food stamp program, as authorized by Congress, will be provided upon receipt of an official budget request from the Office of Management and Budget.

We expect that the Secretary will not decide that a benefit reduction is warranted until there is clear and convincing evidence from Congress that the necessary funding will not be forthcoming. Until that occurs, there is not a basis for the Secretary to order reductions. If a cut in benefits to millions of poor families and elderly individuals is to be considered, Congress wants a full opportunity to consider this matter prior to the time orders are given for any cut to be made.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Oregon (Mr. AuCoin).

Mr. AuCOIN. Mr. Speaker, I rise in support of the continuing resolution and against the Michel motion for very important reasons, not the least of which is the fraud that has been perpetrated in many of the arguments from the Republican side this afternoon.

If you listen to the other side, you would think that if the House socks it to that part of the budget which consumes only 17 cents out of the Federal dollar that somehow, in a very macho way, we are balancing the budget and stopping the Government overspending. Well, that is just a fraud.

The truth is that it is this small segment of the budget that has taken most of the cuts so far.

I want to say something to my friends on the Republican side: You are not going to balance the budget by following the path outlined in the Michel motion, by picking on that 17 cents on the dollar and forgetting that history's largest military buildup for

arms is exempt from this act. Forgetting that the largest tax cut in history, which has passed out goodies to more special interest groups than you can shake a stick at, is exempt from this act.

You people on that side of the aisle are trying to make the American people think that by tightening the screws on people programs, by coming down harder on programs that provide enforcement funds for clean air, clean water, and the environment, on funds for education and the handicapped, that you are balancing the budget. It is just absolutely a crock of baloney.

The truth is you will not and cannot balance the budget on this basis. You will only balance the budget if you get at the "feeding the hogs" syndrome—a term your own friend, David Stockman, used to describe the insane military arms expenditures in your platform. You will only balance the budget if you rethink and join Democrats in rethinking the incredible, irresponsible goodies that were passed out to the special interests in your tax bill.

I cannot help but note that the House has passed cuts of about $35 billion this year in domestic programs and the other body, the Republican Senate, has increased military spending over the Carter budget by $35 billion. This led conservative columnist George Will the other day to indicate that the cost of the conservative agenda in this Congress is about the same as the cost of the liberal agenda. You people on the other side of the aisle just want to spend the money in a different way.

What we are saying is do not turn your backs on the American people. They cannot take it any more. People who are handicapped cannot take it any more. People who depend on clean air cannot take it any more in your appropriation cuts.

Speaking of budget balancing, it is not the House Democrat who have thrown in the towel. It is the Republican President. He announced last week that he was giving up on a balanced budget by 1984 and he would not say when he will try to balance it. He was actually quoted as saying he "didn't come to Washington to balance the budget," but rather that he came to "reduce the role of Government generally."

So that clarifies everything. This fight is not over a fiscal agenda; it is over a political agenda. And David Stockman described the agenda of Reaganomics beautifully. He took stock of the wasteful military spending orgy and the tax cut giveaway for the special interests and the well to do; and he said "the hogs were really feeding." That agenda I urge the House to reject today, a radical agenda to "feed the hogs and starve the people."

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Speaker, I thank the gentleman for yielding. I rise in support of the motion to recommit.

Mr. Speaker, the issue here today is not whether or not this appropriation is within the guidelines of the May budget. There is not a Member of this body who does not know that our deficit today has gone far beyond the May budget.

The issue at stake in this vote is not the allocation of the cuts, except on a functional basis, because the committee of jurisdiction will have the obligation of making those distinctions and making those allocations.

What is at issue here is what are we going to do about the deficit. We can talk about the May budget. We can talk about the allocation of these cuts. But I think one thing is clear. If we cut 5 percent, as proposed by the gentleman from Illinois, we are going to have a smaller deficit than if we do not make those cuts. If the deficit is smaller, the competition for capital is going to be lower and interest rates are going to be lower and inflation rates are going to be lower. As a result, our rate of economic recovery is going to be greater. The building industry will be revitalized more quickly if we adopt this proposal to make cuts now than if we do not.

So in essence what we have here is a referendum on deficits and inflation rates and interest rates. If you want lower deficits, lower inflation rates, and lower interest rates, you ought to vote for the cut. If you do not want lower interest rates and lower inflation rates with lower deficits then do not vote for it. That is the issue.

I yield back the balance of my time.

Mr. CONTE. Mr. Speaker, I yield 3 minutes to the gentleman from South Carolina (Mr. CAMPBELL).

Mr. CAMPBELL. Mr. Speaker, before I make any comments regarding the budget let me say I have been very interested in listening to all of the speakers on the Democratic side start off by quoting the Atlantic Monthly magazine article. I think it is very important, since the chairman of the Budget Committee, Mr. JONES, quoted it, to go ahead a little further with that quote because it says that Mr. JONES' resolution was full of political numbers also and that Mr. Stockman conceded that. Mr. Stockman did not make a point of it because he conceded that nobody really had a handle on the budget number and that the Democrats were trying to jimmy their numbers to get their goals accomplished also.

So I think it is interesting to have that article put out in its full text since it is in its full text in the RECORD.

As we go a little further on, let me address the issue that is before us on the 5-percent cut that we are talking about.

The fact is the gentleman from Iowa a while ago made a great point when he said this is not the way to cut the 5 percent; we would not cut it this way if we had it in his committee. And I agree with him. But if we cut the 5 percent here, then it is going to be incumbent upon the committees to do their job and to allocate the funds the way they are supposed to. Because the committee will control ultimately if and when they pass their appropriation bills. So it does not take that right away.

But if we pass this and do not make the 5-percent cuts, we do take away the right of the President to veto and have any meaningful opportunity to sustain a veto on any bill.

So the gentleman from Texas is right. We do have a referendum on whether we are going to try to reduce spending responsibly or not.

Further, it is interesting to see the references to the tax programs. I am always interested to see someone get up and say cutting 70 to 50 percent aids the rich. Well that proposal came from the Democratic side of the aisle. But it is kind of unfair to say it came from the Republican side and blame the President. That was offered from the Democratic side of the aisle, the 70 to 50 percent cut in the top bracket. So let us keep it all in perspective.

But we do, in fact, have before us today an opportunity to reduce Federal spending. That is the bottom line. Are we going to vote to reduce it or are we not going to vote to reduce it? When it is all over, said, and done, will we have cut the budget or will we have increased the budget?

The gentleman from Texas (Mr. LOEFFLER), offered a while ago a very, very salient point. That was that three bills have come through conference committees. Of those three bills they have increased the President's request by $3.7 billion.

Yes; we have an opportunity, but will we avail ourselves of the opportunity or will we once again just pass it by and, in fact, even take away the tool that may be the President's, and that being the right to veto?

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, this continuing resolution we are now considering would provide funding for programs through the remainder of this year. I want to underscore what has already been said on this floor today. This continuing resolution provides funding that is not only under the total March budget request, it is under the September request. It is not only important that the Members of this House understand that, it is im-

portant that we share that knowledge with our people back home.

This fact and some others that I want to bring to your attention place a dark and ominous shadow of doubt over the President's credibility on economic and budget matters.

Even though the President said just last week that the reason for budget deficits is runaway spending by the Congress and not Reaganomics, the congressional track record for appropriating less money that President's have requested is well established. It stretches back almost four decades.

Today, though, I just want to deal with the years of this record that have been compiled during my service in the Congress. During calendar years 1969 through 1980, Congress appropriated $79.5 billion less than Presidents requested. Another way of saying this is that during those years Presidents have requested $79.5 billion more than Congress was willing to appropriate. The Democrats have been in the majority in Congress all these years. Furthermore, during 8 of these years, Republican Presidential years, the Presidents requested $40.5 billion more than Congress was willing to appropriate.

Last week, at this nationally televised press conference, the President said:

Fiscal Year 1982 is already 5 weeks old, but I have not received a single appropriation bill.

What the President did not tell the American public is that the House has passed 11 of the regular appropriations bills and that the Republican-controlled Senate has only passed 6 of them.

What the President did not tell the American public is that five of the House-passed appropriations bills lay awaiting Senate action for almost 3 months, under an agreement between the Reagan administration and the Senate Republican leadership, before the Senate passed them.

What the President did not tell the American public is that the Senate has delayed for almost 2 months passage of the conference report on Department of Housing and Urban Development and related agencies bill which the House approved September 15.

At his nationally televised press conference last week, the President said: "Most of the [appropriations] bills pending are over budget."

What he did not tell the American people last week, or when he made his nationally televised budget speech September 24, is that the House had already passed 9 of the 13 regular appropriations bills before that September speech, and that they had come in more than $3 billion under the President's March budget request.

There is another aspect of this whole budget debate that I find absolutely fascinating.

From 1943 through 1980, a period when Democrats held the majority in the Congress for most years, the Congress appropriated less money than Presidents requested in every year except one. Now, if this becomes a year in which we have the second occurrence since 1943 that the Congress appropriates more money than the President requested, it will be at a time when:

The Republican President, Ronald Reagan, has dramatically demonstrated that he can control the majority of the votes in the House as well as in the Senate;

It will come in a year when the President substantially reduced, in terms of billions, the budget requests that existed at the time the House was passing nine of the appropriations bills, and coming in $3 billion under the Reagan budget; and

It will come in a year when the strong and sometimes outraged objections of the Republican congressional leadership has thrown up obstacles to the President's new proposals to cut domestic programs for education, health care, housing, agriculture, and the like.

It seems to me that it is important for us to have these facts clear.

The House has, as its record for this year and past years shows, attempted to carry out its responsibility for passing appropriations bills in a timely manner.

The Congress has positively and consistently attempted to carry out its responsibility for making prudent decisions on Federal spending by regularly appropriating less than Presidents, Democratic and Republican, have requested.

The delay in getting appropriations bills to the President this year has not been caused by failure to act in the House, but by a deliberate policy of delaying actions in the Senate in which the Senate Republicans and the Reagan administration have concurred.

And, finally, this continuing appropriations resolution that we are dealing with here today, to provide funds for the remainder of this year, or until regular appropriations bills are enacted, is not only under the President's September budget request, it is $700 million under that request.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. BENJAMIN), the chairman of the Subcommittee on Transportation.

Mr. BENJAMIN. Mr. Speaker, I rise to focus on the impact of this resolution and the possible motion to recommit on the activities under the jurisdiction of the Transportation Subcommittee. I would point out to my colleagues in the House that of all of the functions of appropriations, Transportation has been one of hardest hit. Basically, at this point, the cut from the fiscal year 1981 level is about 32 percent, if one includes the impact of inflation. Under the Michel amendment that would be a 37-percent reduction.

In fiscal year 1981 Transportation appropriations were $12.8 billion. Under the House-passed bill in September it was $11.1 billion. The level of spending in the continuing resolution is $10.3 billion. Under the proposed Michel amendment it would be $9.8 billion.

I am particularly concerned about the operating function of the Coast Guard. Under the continuing resolution the spending of the Coast Guard would be at $2.1 billion. Under the Michel amendment that would be reduced to $1.95 billion.

Under the testimony delivered by the Commandant of the Coast Guard, he indicated that if we were to spend at that lower level that the west coast drug enforcement activity would be reduced 90 percent at a time when it should be dramatically upgraded, that marine environmental protection patrols for oil spills would be totally eliminated, that the Atlantic coast fisheries patrols would be reduced by 45 percent, and that small boat operations, Atlantic and Pacific, would be reduced by 20 percent.

This is not the time to cut the Coast Guard budget.

□ 1545

The entire fleet of the Coast Guard now averages more than 27 years in age. The average Coast Guard enlistee has less than 2 years of experience, and reenlistment rates have declined by half since 1976.

And, finally, I would say that if there ever is a focus, it should be on boosting the Coast Guard, and I would ask for your support against the Michel amendment.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to my good friend, the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Speaker, it was indicated a few minutes ago that the Michel motion to recommit with instructions would include an exemption for the foreign assistance programs. And I wanted to correct that misunderstanding. The foreign assistance programs would not be exempted from any reduction by the Michel amendment. In fact, they would enjoy a reduction.

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Speaker, I was the Member who made the statement that the foreign aid proposal was exempted from the reduction. We had been told by the minority side that it was going to exempt foreign aid. We did not know that they were changing their

plan as fast as they were changing their numbers.

Mr. YOUNG of Florida. I understand that, and I understand why the gentleman misunderstood. No criticism at all, but I just wanted to make the point that the foreign aid program is not exempted. And that is what prompts me to come to the microphone and to suggest that, since this Congress convened, we have authorized billions of dollars for the soft loan window of the World Bank, and none of us had an opportunity to vote yes or no on that subject. We have appropriated billions of dollars for the foreign assistance program, including the soft loan window of the World Bank, and none of us had an opportunity to vote on it. And a lot of specific programs that we would like to vote for or against, or that we would like to debate, we have been denied that opportunity.

As I listened to the debate that we are having today, good debate on both sides, it just strikes me that we really ought to be debating these issues and making these points on appropriations bills and not on continuing resolutions.

I want to say, Mr. Speaker, that we should not make it attractive to this House or to the other body to operate the Government of the United States on a continuing resolution. It is wrong to operate this Government on a continuing resolution. And every time we add more dollars or we make the resolution effective for a whole year instead of just for the weeks that are necessary to get our appropriations bills done, we are making it more attractive to operate by continuing resolution. I say again that is wrong.

Mr. WILSON. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. I yield very briefly to my friend, the gentleman from Texas.

Mr. WILSON. I was going to ask the gentleman, the 5-percent cut, that would apply to the IMF, for instance; is that right?

Mr. YOUNG of Florida. The IMF is not in this bill.

Mr. WILSON. It is not?

Mr. YOUNG of Florida. No.

Mr. WILSON. I thought it was.

Mr. YOUNG of Florida. That was last year. Last year we got taken in on the big IMF money.

The way this continuing resolution works, it makes all of the foreign aid money available for the fiscal year, and the truth is that the soft loan window of the World Bank could actually commit that now, all at once, not just a prorated share of it, but the whole year's amount.

Mr. OBEY. Mr. Speaker, will the gentleman yield on that point?

Mr. YOUNG of Florida. I yield to the gentleman from Wisconsin.

Mr. OBEY. Is the continuing resolution offered by the committee below or above the President's request for foreign aid?

Mr. YOUNG of Florida. I would say to the gentleman that it makes no difference to me——

Mr. OBEY. It is below; is it not?

Mr. YOUNG of Florida. Just a minute.

It makes no difference to me who made the request. I am telling you that the direction that this Government of ours has gone in the last 4 or 5 years in the field of foreign assistance has been wrong. It has not aided development in most of the Third World countries, and our direction was a mistake. We are trying to make that correction now. But that is not the point of my argument.

The point of my argument is that we ought not to be here with a continuing resolution. We ought to get our job done; we ought to insist that the other body get their job done. We ought to be holding these debates and making these decisions on regular appropriations bills and not on continuing resolutions.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Just for a point of clarification, is the gentleman saying that in this motion to recommit we would cut 5 percent in a number of domestic programs, but we are also asking for the same cut in foreign aid? Is that true?

Mr. YOUNG of Florida. That is exactly right.

Mr. ROEMER. I thank the gentleman.

Mr. YOUNG of Florida. We just believe that that is only fair.

I really do not want to get started on the subject of foreign aid in the short period of time that I have, because it takes a lot of time—and I have a lot of interest in that question. But the point is that if we are making reductions in other programs, we definitely ought to make similar reductions in the foreign aid program.

Mr. Speaker, I think we are making it too attractive to the other body and to ourselves to operate our Government by continuing resolution. I think that is a serious mistake, and we ought to make it as unattractive as possible so that we do not continue to operate this Government by continuing resolution. That should be reserved only as a matter of emergency, only when absolutely needed. But, unfortunately, in recent years it has become commonplace. It is not fair to the taxpayer.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

I wonder if the gentleman from Mississippi would answer a question.

We have just received a letter here from the National League of Cities, and they are opposed to the 5-percent cut. They mention that among the things that will be cut by the amendment is revenue sharing.

Now, the gentleman from Illinois says that revenue sharing is an entitlement.

Is that exempted here?

I always thought that our committee felt that revenue sharing was not an entitlement.

Mr. HORTON. Mr. Speaker, will the gentleman from Massachusetts yield to me?

Mr. CONTE. I yield to the gentleman from New York.

Mr. HORTON. I wanted to join with the gentleman in that question, because I have talked with the National League of Cities representatives, and I have a copy of the letter that the gentleman has, in which they have some concern about this. I have heard concern expressed from other public interest groups, concern about whether or not the so-called 5-percent cut would affect revenue sharing.

I think it would be appropriate to have an answer for that question.

Mr. WHITTEN. Insofar as I know, it is kind of in limbo. There are those who insist that it would be an entitlement program and, therefore, would be exempt. There are others who say that it is not, since it has to be appropriated by the Congress annually and that it would be included in the 5 percent.

I am not in a position to rule on that or to say, but it is open to question as to whether it is or is not, and only time will tell, insofar as I know.

Mr. HORTON. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. HORTON. I have been informed—and perhaps the sponsor of the motion to recommit might respond to this question—that the motion to recommit with instructions would include language that it would exempt activities involving new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974.

Now, that, of course, is the entitlement program.

So that it is my understanding that revenue sharing would be exempt under those provisions.

Mr. MICHEL. If the gentleman will yield, I will not take up extensive time of the House to quote verbatim here, but from page 705 of the House rules, paragraph 1007, a conference report containing new revenue sharing spending authorities in the form of entitlements under section 401(c)(2)(C) of the Congressional Budget Act to become effective in the fiscal years 1978 through 1980 and amounts increasing over that in fiscal year 1977 was ruled out on a point of order under section 303(a) of the Budget

Act, since the first concurrent resolution on the budget for those fiscal years had not yet been adopted and the increased entitlements could not be considered merely continuations of entitlement authority which became effective in fiscal year 1977, and it goes on with further citations. The thrust, however, of the rules of the House and precedents are that it is and has been considered entitlement.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

It is my understanding that OMB, however, considers revenue sharing to be a discretionary program. Is that correct?

Mr. CONTE. I believe so. And I do not see how it could be a parliamentary question. It is an OMB decision.

Mr. PANETTA. As I understand it, I think the gentleman from Illinois is correct in the interpretation of 242, as to the fact that we in the Congress consider it entitlement. But it is my understanding that OMB considers it to be discretionary spending. My concern is that, in terms of the total amounts that are being saved here, I believe that if the gentleman has used OMB figures, indeed OMB would consider revenue sharing to be included in this amendment, as far as the total number is concerned.

Mr. MICHEL. The gentleman from Illinois was using committee figures and not OMB. I would stand by the previous rulings and precedents of the House.

Mr. PANETTA. I thank the gentleman.

Mr. CONTE. Mr. Speaker, I include the letter from the National League of Cities at this point in the RECORD:

NATIONAL LEAGUE OF CITIES,
Washington, D.C., November 16, 1981.

Hon. JAMIE L. WHITTEN,
Chairman, House Appropriations Committee, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: The National League of Cities strongly opposes Congressman Michel's amendment to House Joint Resolution 357 to cut discretionary domestic programs by 5 percent.

Such an amendment would be extremely unfair to local governments that have already borne an inordinately high share of the first round of fiscal year 1982 cuts. Most localities are having a difficult time adjusting to those cuts, which were generally made without regard to any reasonable transition period. An additional five percent cut in such key discretionary programs as mass transit, housing assistance, employment and training, and social services would further disrupt thousands of local budgets which, as you know, are nearly half-way through their July 1 to June 30 fiscal years.

This would be particularly true to the extent that the general revenue sharing program is included in the amendment. Local governments have already budgeted and are spending the $4.6 billion in GRS funds to which they are entitled under the 1980 extension passed last year. A five percent cut in revenue sharing alone would require thousands of local governments to revamp their budgets midway through their fiscal years and to provide for service cutbacks.

The Michel amendment also unfairly focuses spending cuts on discretionary programs. Progams funded through the traditional authorization-appropriation process should not suffer inordinately relative to entitlement programs merely because of the technique used to provide spending. Adoption of the Michel amendment would compound an already inequitable situation for discretionary domestic programs.

We urge you to oppose the Michel Amendment.

Sincerely,

ALAN BEALS,
Executive Director.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina (Mr. HARTNETT).

Mr. HARTNETT. Mr. Speaker, I just wanted to mention to those who are so concerned about what damage we are doing to this country through our budget cuts and through the additional 5 percent that if they would look at the big figures, the total sum, we have a $700 billion-plus budget, and we cut approximately $35 million from this budget. Simple arithmetic tells you it is 5 percent. From all the cry that is going up, you would think that this Congress has cut the budget some 50 percent and, in fact, we probably should have. All we have done with the total budget is cut 5 percent. Now we are talking about an additional 5 percent. The silk stocking and limousine liberals who have had a stranglehold on the taxpayers of this country would even have to admit that we can survive at least another 5-percent cut.

Let me assure them and my colleagues on this side of the aisle that another 5-percent cut would be all right; the Sun would still rise in the morning, the Lord would still be in His heaven, and everything would still be right with the world, in spite of a small 5-percent additional cut.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Speaker, I rise in support of the continuing resolution, and oppose the motion to recommit.

First of all, the motion to recommit should have the defense bill, because if anyone can find a 5-percent cut, it would be in the defense bill. As a matter of fact, we have already cut in our subcommittee markup 3 percent.

But I rise mainly in opposition to the motion to recommit. In cutting Treasury-Post Office, this 5 percent would reduce the Secret Service, which is so necessary for the protection of our President, below levels, below OMB levels, below the House and Senate levels. It would reduce IRS and Customs. And this is pennywise and dollar foolish because both IRS and Customs are tax-collecting agencies. It has been proven that for every dollar we spend in those agencies, we receive $9 back. So a $125 million cut in IRS would actually cost us $8 billion. And in our fight against drugs, we cut Customs, which we so need in our great fight against drugs.

Mr. Speaker, the motion to recommit makes an additional 5-percent cut on all other agencies for education, health, handicap, veterans and many more needed people programs. And should be defeated.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Speaker, I rise in opposition to this motion to recommit.

It is hard for me to understand that an administration which in the next 5 years is going to give back to the well-to-do of this country nearly a trillion dollars now insists on grinding out another 5 percent from the elderly, the poor, and the ill of America.

The words that come to my mind are those that the Master uttered from the cross: Father, forgive them, for they know not what they do.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, I take this time as the chairman of the Post Office and Civil Service Committee to engage the chairman in a colloquy.

The resolution reported by your committee and those appropriation bills which have passed both Houses provide funding levels. These funding levels reflect congressional judgments as to the appropriate levels for the various agencies. However, my committee has learned that the administration may be planning to authorize or require agencies to separate or furlough employees in order to achieve spending rates below those specified in the continuing resolution or the various appropriation bills now pending in the Congress. Such personnel actions would severely affect employee morale, unnecessarily disrupt programs, may even result in curtailment of programs and perhaps affect the legal rights of employees not intended by the Congress. I would appreciate having the chairman's views on the propriety of the described personnel actions.

Mr. WHITTEN. The matter of fundir.g is one for the Congress to determine, subject of course to the President's right to veto or to recommend a rescission or deferral. To separate or furlough employees for longer than 30 days to comply with an administration directed funding level below that authorized under this resolution or the applicable appropriation act could impact on the legal rights of employ-

ees. It is the responsibility of Congress to determine the appropriate funding levels for the agencies, and any personnel action which is undertaken to comply with a requested funding level which has not yet been authorized or has been rejected by the Congress is clearly improper.

□ 1600

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. Mr. Speaker, I think that we need to look at this debate from the standpoint of the American people rather than the standpoint of American politicians or the American bureaucracy.

When interest rates are high, the American people, the small businessman, the automobile dealer, all have to change their habits. They have to adopt new budgets. They have to cut their spending.

When inflation is high, the American people have to change their habits, their budgets, and their spending. When unemployment rises and people lose their jobs, they have to change their habits and their budget and their spending.

Let no one make any mistake about it, the issue on the Michel motion is, "Are you in favor of setting a separate standard for the American bureaucracy? Are you willing to give the Federal Government that which the American people do not have? Are you willing to protect the redtape, the Washington system, the game as it goes on?"

Our colleagues who have been running this country for the last 26 years make much fun of numbers and quotes yet the simple reality is that every Budget Committee chairman we have heard from has consistently been wrong, that this Government has been consistently out of control, and that the issue is do we want to vote with liberalism, with big budgets, big deficits, and the ultimate decay of this country, or do we want to subject Government to the same discipline, the same standard, the same habits as the American people have to suffer under?

Mr. BLILEY. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Virginia.

Mr. BLILEY. Mr. Speaker, I thank the gentleman for yielding and I would like to associate my remarks with his remarks.

Mr. Speaker, you may have noticed, as I have, that the congressional appropriations process is in a shambles. Today we are considering a continuing resolution that is really not what that title implies. It does not merely continue until we have the opportunity to appropriate each of the 13 separate pieces of legislation required. Instead it seeks to accomplish for an entire fiscal year what we have failed to do in an entire calendar year.

By the end of fiscal 1981, the Congress had not sent a single appropriations bill to the President. One continuing resolution and more than a month later, the Congress has still not sent a single appropriations bill to the President.

I look at this second resolution, and am admittedly confused. We are asked to accept the House version of this bill, the Senate version of that bill, the March budget recommendation here, a conference agreement there—is this what we want to be governed by for an entire fiscal year?

I may be mistaken, but I thought that this body decided this past summer that we wanted to move toward a balanced budget, at long last. But now I look not at the first resolution asking for more time to fulfill that promise, but the second resolution, and what is it asking for? Not for more time to develop better budget plans—it is asking to discharge itself from its responsibilities. I realize we have had troubles and so has the other body. But a continuing resolution is to gain a little time in the interest of making better decisions. I would like to conclude by asking a simple question. Is the purpose in passing this resolution to gain time to make better choices and decisions that will bring us closer to our balanced budget goals? Or is it a copout which mandates, not limits funding to levels that are unacceptable and will invite veto? I cannot support this resolution in its present form. I hope that my colleagues cannot, either.

Mr. GINGRICH. Mr. Speaker, let me close by saying that those of our friends and colleagues who decide to vote against change, to vote in favor of the past, to vote in favor of decay and inflation, to vote in favor of higher taxation and higher inflation and unemployment, when this comes back to haunt them, and I believe it will, because they are voting for the bureaucracy and against the people, remember well this day.

Mr. CONTE. Mr. Speaker, I would like to propound a question to the chairman of the Subcommittee on HUD and Independent Offices, the gentleman from Massachusetts (Mr. BOLAND).

I have a letter here from the League of Cities complaining about the 5-percent cut, what it would do to general revenue sharing, and there was a colloquy here on the floor between the minority leader and the gentleman from New York (Mr. HORTON), that revenue sharing is an entitlement and not discretionary funding, and, therefore, is exempted from this cut.

I would like to have the gentleman's opinion.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I appreciate the gentleman yielding.

It has been the feeling of this subcommittee, ever since the 1976 amendment to the Revenue Sharing Act was put on the statute books, that the program is a discretionary account and not an entitlement program. Since we do consider it discretionary, the 5-percent reduction, which will be offered by the motion to recommit, would reduce general revenue sharing to the extent of $228 million. When the 1980 supplemental appropriation, rescission and deferral bill was on the floor there was a discussion with respect to entitlement and discretionary funds. I think the distinguished chairman of the Government Operations Committee, the gentleman from Texas (Mr. BROOKS) agreed with the position that our subcommittee took at that time and the position the gentleman from Massachusetts takes now.

Mr. CONTE. I thank the gentleman.

Mr. CAMPBELL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from South Carolina.

Mr. CAMPBELL. I am not really sure I understand whether the subcommittee considers something as discretionary and whether the rules of the House and others have it as an entitlement. I wonder if we could get some clarification on which is going to be dominant.

Mr. CONTE. That is a very good question.

OMB, in my study of this issue, considers revenue sharing as discretionary funds and not as an entitlement.

Mr. CAMPBELL. What do we consider it here in the House as a House?

Mr. CONTE. OMB will decide that question.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. ROE).

Mr. ROE. I thank the distinguished chairman for yielding me the time and I want to call to the attention of the committee on both sides of the aisle a great concern that has arisen.

This House voted 382 to 18 in support of the Clean Waters Act. My understanding is that there is no funding or any authorization whatsoever, either in the continuing resolution or the budget authority for this program.

Now that would mean that there are already 30 States out of funding right now. We are in the middle of the final conference with the Senate on this issue and where are we going?

Can we can get some reassurance that the committee will support and provide the funding for this purpose?

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Our subcommittee appreciates the position of the authorization committee and the work that the distinguished gentleman from New Jersey has done in the construction grant program. We are also concerned about the future of the construction grant program—particularly with reference to its immediate funding—and what the gentleman has said is absolutely correct with reference to it.

I do not know how many States are running out of money now—estimates vary between 20 and 30.

The SPEAKER pro tempore. The time of the gentleman from New Jersey (Mr. ROE) has expired.

Mr. WHITTEN. I yield 30 seconds to the gentleman from New Jersey.

Mr. BOLAND. If the gentleman will yield further, if the Senate restores funds in this program then the gentleman from New Jersey has my assurance that I would work to support that particular position in conference—providing the authorization conference agreement is acceptable to the administration and providing the Senate has not complicated the issue by making funds available contingent upon other actions.

Mr. ROE. I thank the gentleman.

Mr. MINETA. Mr. Speaker, will the gentleman yield?

Mr. ROE. I yield to the gentleman from California.

Mr. MINETA. I thank the gentleman for yielding.

The other part is the fact that the budget resolution will be able to accommodate the $2.4 billion in budget authority that the gentleman is looking toward.

Mr. ROE. I thank the gentleman.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Texas (Mr. STENHOLM).

Mr. STENHOLM. Mr. Speaker, the issue that we are discussing today is Federal spending. I serve on the small Business Committee and the small business men and women of this Nation are asking us to reduce Federal spending.

I have a letter which I have inserted into the CONGRESSIONAL RECORD from the National Federation of Independent Business on behalf of its 500,000 members, urging us as a key small business vote to support the motion to recommit with a 5-percent reduction.

The issue today is reducing Federal spending. According to the Congressional Budget Office, we will be spending in fiscal year 1982, if we make no additional cuts, $734.9 billion. That is $74.4 billion more than we spent in fiscal year 1981. If we the Members of this body cannot meet the needs of the poor and the elderly and the disabled and those who cannot help themselves by spending 5 percent less, I think the 226 million Americans we represent ought to be asking us, "Why not?"

The letter follows:

NATIONAL FEDERATION OF INDEPENDENT BUSINESS,
November 16, 1981.

Hon. CHARLES W. STENHOLM,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN STENHOLM: The present economic situation, especially high interest rates, is having a devastating impact on the nation's small business community. This problem is the result of decades of poor governmental policies which have weakened small firms to the point where they are unable to withstand current economic conditions.

Small business owners believe that excessive government spending and the high deficits it creates are at the heart of their problem. Because of this, they have supported every attempt over the last year to reduce government spending. To further this end, they have accepted an almost thirty percent reduction in Small Business Administration funding, and are willing to support even deeper cuts.

NFIB and its membership in excess of 500,000 firms believe that Congress must make every effort to hold down fiscal 1982 spending. Therefore, we urge you, as a key small business vote, to support Rep. Michel's motion to recommit the Continuing Resolution with instruction to the Committee to reduce its spending levels by five percent.

Sincerely,
JAMES D. "MIKE" MCKEVITT,
Director, Federal Legislation.

Mr. WHITTEN. Mr. Speaker, I yield myself 3½ minutes.

Mr. SAM B. HALL, JR. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Texas.

Mr. SAM B. HALL, JR. Mr. Speaker, I noticed on page 4, lines 12 through 14, it states that under whichever is lower, under the authority and conditions provided in applicable appropriations act for the fiscal year 1981—prefacing my remarks, earlier this year under the Legal Services Corporation Reauthorization Act, H.R. 3480, we voted several restrictions on Legal Services.

One was that they would not handle any abortion cases unless the life of the mother was endangered. It prevented LSC lawyers from taking any case to promote or defend homosexuality and prevented them from filing any class actions against local, State, or Federal governments, and one or two others.

My question is this: In the event that the continuing resolution passes in its present form, would these Legal Services restrictions on spending provided for in the fiscal year 1982 appropriations no longer be applicable?

□ 1610

Mr. WHITTEN. Mr. Speaker, I yield one-half minute to the gentleman from Iowa (Mr. SMITH) for an answer.

Mr. SMITH of Iowa. Mr. Speaker, I think the answer is that it only applies to the amount of money, which is $241 million, and it will no more be restricted under the Michel amendment than it would be under the bill.

Mr. SAM B. HALL, JR. Mr. Speaker, if the gentleman will yield further, is the gentleman stating that if the continuing resolution passes, the restrictions that we voted against Legal Services would still be in effect?

Mr. SMITH of Iowa. No. I do not think that is necessarily so, but the Michel amendment does not change that in any respect. We will have to work that out in conference what the limitation involves.

Mr. WHITTEN. Mr. Speaker, as we come to the conclusion of this discussion and consideration of this motion to recommit, I would like to call attention once again that we are up against reality. The Government comes to a halt at midnight on Friday night this week.

When your conferees go to the Senate, this motion would tie the hands of your conferees.

I want to repeat again that the Appropriations Committee has brought a bill that is below the President's recommendation in March and in September. Remember this resolution is a holding action and those who are disturbed that this will last for a year should not worry because once a bill is signed into law it drops out from this resolution. It may be necessary for a short time, and the President should join us in wanting to have something to fall back on instead of letting the Government come to a close.

So I just want to state the situation we find ourselves in. If you adopt this motion to recommit you are tying our hands with an additional cut. Our friends who vote for this are voting to cut those activities that were already cut below the President's level, and then 5 percent more. This motion leaves the discretion in the hands of the executive branch, which under the Constitution is one requirement that we are saddled with and the people should stand up to the requirements of the Constitution.

So I repeat again, I hope you will vote against this motion to recommit. It is thoroughly unsound and you are tying your hands at a time when we should realize that we are facing necessities.

Please vote against it when the time comes.

● Mr. GONZALEZ. I rise in support of House Joint Resolution 357, a bill to provide for continuing appropriations for fiscal year 1982. I commend the Appropriations Committee for refusing to reduce appropriations for programs that were funded by the conference report to accompany H.R. 4034, the HUD-independent agencies appropriations bill. I note that there was some discussion in the Appropriations Committee about reducing some of the HUD programs. I am pleased that the

distinguished gentleman from Massachusetts (Mr. BOLAND), has gone along with his original conference report numbers. It is vital, Mr. Speaker, that the public housing operating subsidies—both the $148 million in supplemental funding for fiscal year 1981 and the $1.2 billion for fiscal year 1982—be retained and I am pleased that this resolution retains these levels. But I am concerned that when the conferees meet on this resolution that efforts will be made by the other body to reduce the fiscal year 1982 level to just a little over $1 billion.

Based on hearings before my Subcommittee on Housing and Community Development, this administration-inspired reduction will mean the complete closing down of a large number of public housing authorities by late spring of 1982. If the Congress wants the burden of operating these public housing authorities to fall to the Federal Government or worse still closing them down completely and letting many thousands of elderly and disadvantaged people fend for themselves without heat or light, then the level suggested by the Reagan administration is the one Congress should appropriate.

Mr. Speaker, I note that our colleagues in the other body are leaving open the possibility of supplemental appropriations for public housing operating subsidies until early next year, but there is no commitment from the administration with regard to this nor from the other body that they would look favorably upon this request. We must provide the absolute minimum funding in this continuing resolution if we are not to give directions to public housing administrators not to close down their operations by late spring of next year.●

● Mr. McEWEN. Mr. Speaker, I would like to express my support of the motion to recommit the continuing resolution with instructions to provide for a 5-percent across-the-board reduction in funding contained in the resolution for discretionary domestic programs.

However, I would like to express my complete agreement with the Parliamentarian and the traditions of the House of Representatives that funding for the general revenue-sharing program represents an entitlement and not discretionary funding.

Therefore, it is my understanding that the 5-percent across-the-board reduction in funding for discretionary programs will in no way affect the level of funding for this most important and vital entitlement program.

The revenue-sharing program has proven itself to be one of the most effective and efficient programs we have, and the funding it provides to local government units is essential to the effective functioning of our cities, counties, and other local government bodies. Any effort to reduce funding for this program would be most unwise, and I would strongly oppose such a proposal.●

● Mr. BIAGGI. Mr. Speaker, I rise in tepid support for the pending legislation making further continuing appropriations for the balance of fiscal year 1982. I am distressed over the fact that we must again resort to this process to keep the Government functioning. The pace of the House with respect to enactment of appropriations bills has been more than satisfactory. The problem rests with the other body.

In any event, the bill before us provides continued funding, in some cases at fiscal year 1981 levels, in other cases at House-passed appropriations bill levels and still in other cases, at conference report levels.

I do take this opportunity to register my strong opposition to the motion to recommit which would institute a 5-percent across-the-board cut in most programs except national defense, military construction, and foreign aid. The question we must ask ourselves very simply is: How much more will we ask the poor, the elderly, and the disadvantaged to sacrifice before we stop?

According to statements presented by my colleagues Mr. NATCHER and Mr. CONTE, the specific impact of an additional 5-percent cut will be most pronounced in those programs under the auspices of the Departments of Labor, Health and Human Services, and Education. Some examples: Another $164 million cut in programs under the authority of the Comprehensive Employment and Training Act—CETA—including cuts in youth employment programs at a time when unemployment among America's young, especially the minority youth, is indefensibly high. A cut of this magnitude will only intensify this problem. Community health centers funding will be slashed by an additional $13 million. This would impose untold hardships across this Nation, for these centers provide a direct service for those who are in need of limited health care, and therefore do not need the full-time services of a hospital.

Other cuts: $150 million additional for the worthwhile programs funded by title I of the Elementary and Secondary Education Act. More than $170 million for the various student financial aid programs which allow a college education to be within the grasp of more Americans. This 5-percent cut would slash an additional $51 million from programs providing education for the handicapped.

Two other cuts which I would be most disturbed about if this motion is to prevail. An estimated $65 million would have to be cut from the various programs under the Older Americans Act. These would include such vital services as daily meals at congregate settings as well as meals for the homebound, senior center services and part-time employment opportunities. Related to this directly would be an additional estimated loss of more than $120 million in the social service block grant which includes the title XX program providing similar services to the elderly. These cuts, if imposed would subject thousands of elderly citizens to new perils in their path for survival. In the case of those seniors participating in the nutrition program—it is, for many the only regular form of nutrition in their lives. For the homebound elderly it would be especially serious. If we are going to be true to our stated commitment of maintaining the independence and dignity of our senior population we cannot support and allow to be implemented cuts of this magnitude.

One final observation: If this motion to recommit is successful there may be another $50 million cut in the low-income energy assistance program. This would be on top of an already reduced appropriation for this program. In case the proponents of this motion have forgotten, the low-income energy assistance program was created by Congress to try and provide assistance to poor and elderly individuals who were having problems paying their utility bills due to rapidly rising heating costs. In the winter of 1981 all indications show the supply of oil will be plentiful but the price will skyrocket. In fact, according to a report in this morning's New York Times, the price of No. 2 heating oil in New York City is up 24 cents from last year. How can Congress in good conscience slash another $50 million from this program thus telling our poor elderly you must choose between heating and eating?

Let me add as a caveat. It is vital that we take expeditious action on this legislation, as many States have already filed their plans for the low-income energy program. Winter's cold winds have already blown into many areas of the United States and not 1 cent of assistance can be released until we complete action on an appropriations bill.

Mr. Speaker, I reiterate my total opposition to the motion to recommit this legislation and cut an additional 5 percent from social and human service programs. Congress has already approved spending reductions of some $35 billion—we may need to do more—but equity must begin to be shown in how the cuts are made. I suggest the recommittal motion is an anathema to the principle of equity and will do nothing more than drive more and more Americans deeper into poverty and misery.

● Mrs. SCHROEDER Mr. Speaker, I rise in opposition to this continuing resolution, because I think adoption of this resolution will serve to affirm the abdication of congressional authority

so zealously being pursued by the White House and the majority leadership in the other body. The Senate leadership has held up final action on appropriations bills until the White House tells them what to do. And the White House, already overburdened with the jobs of containing Alexander Haig's paranoia, containing David Stockman's candor, and containing Richard Allen's foreign press relations, cannot figure out what it wants in the appropriations bills.

So here we are, nearly 7 weeks into the fiscal year, with only 1 of the 13 appropriations bills passed by the Senate. Even that one was passed only by being secreted away in the first continuing resolution. Only 2 of the 12 remaining bills have not been passed in the House and in the case of 1 of them, the reason for nonaction is that it was appropriate to await the conference agreement on the defense authorization bill before moving the appropriation bill. Again here, White House delay in deciding what to do about the out of control defense budget delayed action. So, 10 appropriations bills have passed the House; 4 of these have not even been taken to the Senate floor, even though all of them have been out of the House for at least 6 weeks. Of the six passed by the Senate, three remain in conference, pending clearer instructions from the White House, one is awaiting House floor action on the conference report, and two have had their conference reports passed by the House while the Senate has not acted, awaiting clear signals.

I have two fundamental objections to this procedure. First, it is appalling to have the House frustrated in its efforts to discharge its legislative functions by the paralysis in the other body. Second, and far more troubling, it is inappropriate for the White House to dictate appropriations levels to the Congress and it is even more inappropriate for the Congress to take the dictation. Despite what some might wish, we do not live in a parliamentary system where the legislature has the simple option of accepting or rejecting the Executive's budget. In this country, the legislature reigns supreme in the spending of tax dollars. We should and must review the requests of the administration; we must not allow ourselves to become rubberstamps.

New Reagan budgets seem to be revealed daily. In the latest of these budgets, the White House abandoned all pretense of rational decisionmaking and announced a 12 percent across-the-board cut in all domestic programs without any justification. The sound of teeth gnashing began immediately all around us. I went to investigate the source of this sound and found that it was coming from majority party members of the other body. They were wailing and moaning about the destruction of programs dear to them and their constituents. Negotiations began with the White House to restore money to preferred programs. Appropriations bills were delayed while Senators pleaded with the White House to lighten up.

The public perception of elected Senators, afraid to vote to restore the money themselves, pleading with the White House to relent, undermines the congressional budget process and recent efforts to insure congressional sovereignty in budget and appropriations issues. This continuing resolution is the unavoidable result of the unseemly activities of some of the other body. I shall vote against it because I do not wish to condone, affirm, or ratify this activity.●

● Mr. PORTER. Mr. Speaker, the entire concept of appropriating by continuing resolution for an entire year, indeed for any purpose other than a temporary period to allow appropriations bills to be adopted, must be abhorrent to all who believe in representative and deliberative government.

It is for these reasons that I opposed the previous question and the rule on this resolution. The House chose otherwise—chose an up or down, yes or no vote on most appropriations for the entire year, which, if adopted, could end all opportunities for a choice on priorities for spending.

For example, Mr. Chairman, clearly there is a great need for the administration to come to grips with reality regarding defense expenditures. I advised the House at the time of adoption of the reconciliation bill there was no way that we could cut taxes, raise military spending by $1.5 trillion over the next 5 years and balance the budget. Mr. Stockman has acknowledged this in the Atlantic Monthly interview.

Yet the administration either clings to the view that this can somehow be accomplished, or has chosen the vast increase in armaments as a higher priority than ending the pressures on the economy resulting from continuing huge Federal deficits.

For my own part, the primary danger to our Nation at this time comes not from direct confrontation with the Soviets or indirect confrontation through their proxies—though these dangers are real and must be fully and realistically met—but rather from a stagnant economy dragged to a halt by cancerous government growth.

The fact is that we face a critical danger to our Nation unless we gain control over Federal spending. And we cannot gain such control by giving a blank check to any department of government, including especially one as large as the Department of Defense. For this reason I will oppose today in the Appropriations Committee, funding for the MX missile basing mode. The MX program is one priced currently at $30 billion and, if adopted, will probably amount to a drain on national revenues of twice that amount in its final form. Not only can we not afford an expenditure of this magnitude in this time of necessary fiscal restraint, but the placing of 100 MX missiles in hardened silos adds nothing, in my judgment, to the credibility of our deterrence, and with increases in Soviet throw weight and accuracy, little, even with hardened silos, to our missiles' survivability. Long-range air-sea and land-based cruise missiles, which can be produced for $2.3 million each at the rate of up to 60 per month, can fill this needed deterrence at far less cost and far more quickly than the MX.

But should this continuing resolution be adopted, it could end for this year any opportunity to bring commonsense to bear on the question of defense expenditures, or indeed on the expenditures of almost every department and agency of government. The resolution provides that if the Appropriations Committee reports the DOD bill to the House, as it undoubtedly will today, and even if the House never takes up the bill, the level and priorities of expenditures passed by the committee will be those that will be followed for the entire fiscal year. This is not only legislating in the dark, but is an abdication of our authority to judge the work of the committee regarding this appropriation and many others.

Mr. Chairman, the appropriations process should be allowed to proceed. The Congress should retain its constitutional responsibility of judging national priorities and the President should retain his responsibility of disagreeing by vetoing those appropriations that he feels are excessive. I am confident that a proper path for meeting the dangers to our economy will result from this course.

Plainly, a continuing resolution is needed for a temporary period to allow the other body to act and for the House to finish the few appropriations bills that we have not yet enacted. But a resolution for the entire year, ending the appropriations process, is not only not warranted but is destructive of the deliberative nature of our representative form of government, something which separates our Nation from most of the others found anywhere on this Earth.●

CALL OF THE HOUSE

Mr. PANETTA. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

□ 1620

The SPEAKER pro tempore. On this rollcall, 371 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call are dispensed with.

□ 1630

FURTHER CONTINUING APPROPRIATIONS, 1982

The SPEAKER pro tempore. The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield the remaining time on our side to the distinguished Speaker of the House of Representatives, the gentleman from Massachusetts (Mr. O'NEILL).

Mr. O'NEILL. Mr. Speaker, it does look like David Stockman and I were correct.

Mr. Speaker, August 4 was a day of glee on one side of this House. It was the day of a new beginning.

Well, what do we have? Nearly a million more Americans are unemployed than were unemployed as of last August 4, and only yesterday the President's chief economic adviser predicted that another 1 million Americans will be unemployed. I trust, hope, and pray that that does not happen.

The press is full of speculation as to whether David Stockman will be a victim of the Atlantic Monthly article and lose his job. Well, I do not know who among the White House supporting cast are going to lose their jobs. I do know that as a result of this administration's program of tight money and flaky economics, a million more Americans could lose their jobs. The Members know that I care more about the hard-working American who has lost his job than I do about the credibility of Dave Stockman.

The winter is nearly upon us. I ask you these questions: Do you want to reduce the funds for fuel assistance another 5 percent? You have already reduced them. I see a couple of gentleman nodding that they do want to do that. Probably they have never been the victims of a hard winter.

With the health programs already reeling from previous cuts, do you want to reduce the funding for maternal and child care? The pollsters say, by 67 to 33 percent, that the people think this Congress went too far. Americans are concerned that the President's budget cutting has gone too far. Yet you want one final blow of the meat ax.

In funding for the handicapped, you have already cut 25 percent. The American people feel, by 69 to 31 percent, that you have cut too severely. With more Americans unemployed than at any time since the Great Depression, do you want to cut the budget some more? With the evidence mounting that the Reagan economic program is not working, you are advocating the same things you advocated early in the year.

I was around in the 1930's, and that is the same line that Hoover used in the depression of 1930. It is the same line that Nixon used in the 1974 recession.

I say to my colleagues, America is responding, they think enough is enough. Let us defeat this motion to recommit and force this administration to face the facts The economics of Reagan is not working. It is time to come up with a new plan.

I am concerned about the future of America. I am certain that you are, too. I trust you will vote against the motion to recommit. I think the gentleman from Mississippi (Mr. WHITTEN) has done an honorable, a decent, and a fair job, and I hope this House will support the committee.

The SPEAKER pro tempore. All time having expired, pursuant to the provisions of House Resolution 271, the previous question is ordered on the joint resolution.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. MICHEL

Mr. MICHEL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the joint resolution?

Mr. MICHEL. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. MICHEL moves to recommit House Joint Resolution 357 to the Committee on Appropriations with instructions to report

the same back forthwith with the following amendment:

On page 9, following line 7, add the following new section:

SEC. 107. Notwithstanding any other provision of this joint resolution, the appropriations, funds or other authority for projects or activities covered by this joint resolution, except for those activities involving new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974, and except for those projects or activities provided for under the Defense, Military Construction and District of Columbia Appropriations Acts, and except for the Social Security Administration account entitled "Limitation on Administrative Expenses", veterans' medical care and the food stamp program, shall be available at a rate for operations of 95 per centum of the amounts otherwise provided for in this joint resolution.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. MICHEL) is recognized for 5 minutes in support of his motion to recommit.

Mr. MICHEL. Mr. Speaker, let me say to my colleagues that I am offering this motion to recommit to avoid a Presidential veto of the continuing resolution.

Now, admittedly, if the joint resolution should pass in its present form in this House, we are not aware of what the other body might do. None of us knows that. What I think we have to do is do the best job we know how in this body and do what we can to get a continuing resolution that will pass muster downtown.

The President has asked us, as the Members recall, for some further cuts because of the deteriorating situation with respect to the deficit. There was an arbitrary figure put forth of 12 percent across the board, plus some other things we did not give any consideration to in this body. I am not arguing that point, because, frankly, I think the timeframe was such that it would have been very difficult to have the individual committees and subcommittees go back and rework what they had already put in place. I thought it was impractical, and I argued against it.

I said that there would be one other opportunity, however, when we would have a chance to take a step in the right direction, and that is in connection with this continuing resolution. So what I am proposing is to simply take one step toward what the President asked us to do in September.

□ 1640

If my figures are correct, and I am using the same ones that we used in the Appropriations Committee, we will make a significant savings here of about $4 billion in outlays from what is called for in the continuing resolution.

Several areas are expected from the cut. We exempted defense because, as I look at the table prepared in part by the committee itself, the House subcommittee level is $6,300,000,000 under the President's budget of September. That is why I do not feel another 5-percent cut there adding $10 billion over and above what the committee has already cut, is warranted. That is why it is exempt.

In military construction, that item, according to the committee bill, is $413 million under what the President asked for. Here again we have exempted it on those grounds.

The District of Columbia bill is normally an entirely separate item, and this is not included.

In the social security area, when the amendment was offered in full committee there was a question of whether or not the administrative expenses for the Social Security Administration would be adversely affected. That is why we single it out in the text of the motion to recommit, to make absolutely sure that we are not tampering with social security benefits or with the administration of that program.

Veterans medical care also is exempt because of Members' concern. Even though normal benefits are considered an entitlement, medical care is not an entitlement.

Why are food stamps excluded? Because food stamps are not considered to be an entitlement under section 401(c)(2)(C). You can bet your bottom dollar if we did not leave the money in there we would be back with a monumental supplemental at the first of the year to cover the cost because in practical terms it is an entitlement. So if we cut 5 percent here, I think it would be just a sham. We would be kidding ourselves, and that is what we have been doing around here far too long, kidding ourselves.

Here we are at that juncture now to make some significant savings with one vote. We do not know what the other body will end up doing on this continuing resolution. But we could at least go home feeling confident that we had made a start and given them a vehicle upon which either to build or detract. I do not know what their position is going to be. But I think for us it is the right thing to do. It puts us in the right posture and it is not going to be all that disastrous to have this or that program cut a little bit.

The Speaker a few moments ago made mention of the fuel assistance program. If my memory serves me correctly, the State of New Hampshire had money left over and put it in the bank for this coming year. That is the case repeatedly, time after time, on any number of programs around here. Five percent is not going to damage any single program.

I would implore Members to support my motion to recommit. They will be doing the Nation and themselves a great favor.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN) for 5 minutes.

Mr. WHITTEN. Mr. Speaker, I rise in opposition to the motion to recommit.

My colleagues, a few days ago attention was called to the length of time that I have served in the House. I want to say thank you for the friendship and all of the courtesy you have shown me.

I have a very good district. The constituents of my district enable me to do what I believe is right and to promise only that I will do the very best I can.

Let me call your attention to the fact that the Constitution provides that the power of the purse shall be held by the Congress and in particular by the U.S. House of Representatives. The procedures that have been set up require that we confer with the other body in connection with all of these matters.

I want you to know that we have taken our duties seriously on the Appropriations Committee. Let me repeat to my friends on the minority side, particularly, that this is a continuing resolution, and unless a resolution is adopted by Friday night at midnight the Government comes to a halt. So we are working against time.

Not only that, but last fiscal year, as I told you, this committee, at the request of the President, was asked to rescind $15.1 billion. We came up with a reduction of $14.3 billion. We also cut the supplementals. I do not believe history will ever show greater cooperation then what we did in that instance.

Not only is that true, but over 30 different actions have been requested that made our committee work day and night throughout this year.

You may ask why we have this resolution here. We have it here because we have to see that the Government does not come to an end. By passing this resolution you are sending us over to meet with our colleagues in the other body. I know what they feel only by the fact that they have not acted upon appropriation bills until the last few weeks.

But here we bring you a bill, and it was not easy, that is below the President's request of March and below his request of September, below all his requests. He has not sent us any request for a 5-percent reduction across the board.

These 5-percent cuts would affect programs such as: CETA programs, including youth employment, Job Corps, summer youth and private sector programs; new health block grants, which already have been cut below the 1981 level; title I education grants; student financial aid; assisted housing; community development block grants; and NASA appropriations. Since, the chairman of the subcommittee has

stated that revenue sharing is not an entitlement local governments would lose revenue sharing funds. The nuclear weapons program of the Department of Energy would be reduced.

Mr. Speaker, the most disturbing aspect of this motion is that it would allow the executive branch to select where to make the reductions—executive impoundment in effect in discretionary programs—a concept rejected by the Congress with the passage of the Congressional Budget Control and Impoundment Act of 1974.

Our burden as legislators is to make Government work for the people. In Congress, we are directly responsible to the people and the committee's appropriations bills are responsive to their needs as justified in the hearings. The Office of Management and Budget does not have to answer to the people and should not be granted blanket impoundment authority over discretionary funds.

Members of this body have sworn an oath to support and defend the Constitution—the same Constitution which vests the "power of the purse" in the House of Representatives. If the Members of this body were to allow the motion to be adopted, they would be shirking their consitutional responsibility by relinquishing the "power of the purse" to the executive branch. Remember we have already cooperated with the executive branch far beyond any point in history and if we adopt this motion some sound programs may have to be reduced below acute need.

If you have heard from home, the cuts already made are hitting hard. Remember that much of it is because we cut taxes and gave away our revenues. Every day you read it in the paper, where IBM, to keep from paying hundreds of millions of dollars, bought tax credits from Ford.

Now we are asked to make a further 5-percent cut which the President has not asked for. I am just saying to you that we in Congress have the obligation to act responsibly because we swore to support the Constitution. The Constitution says that the money powers of this Government rest in the Congress of the United States.

I say it is a mistake, with the Court's encroaching on our power as the people's branch, with the executive encroaching on our powers, that we as the legislative branch, the people's branch, not to see to it that we discharge our functions.

This motion to recommit would turn over the discretionary programs of this Government for an additional cut of 5 percent after we have held below the recommendations of the President. I am talking about the official recommendations.

Let me tell you this: We need to cut our wastes, sure; but it is just as essential to keep up investment programs, productive programs, and programs of vital interest to the American people as it is to cut out those things that are unnecessary.

I say to you as chairman of the Appropriations Committee, I am proud of the record we on both sides of the aisle have. May I say to all of you here I do not believe 25 percent of the committee voted against this resolution which we present before you.

So, in conclusion, I would just say keep in mind that you are sending us to conference. Do not tie our hands behind us when we have cooperated with the President. Do not add another 5 percent which he has not requested, certainly not officially.

We must think of the American people and put them first. But, above all, we swore that we would discharge the constitutional obligations to deal with the money and not surrender it to any President. I would say that whatever party he might belong to. I would say the same thing to you. Do not tie our hands before we go to conference. We have a wonderful track record, my friends. You will not find in history where any Congress has yielded to $15.1 billion in requests of reductions and with 4 months to go to come up with $14.3 billion.

We bring you a resolution that is below the President's official recommendation in March and in September. Do not add another 5 percent that he has not asked for.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. MICHEL. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were—ayes 189, noes 201, not voting 43, as follows:

□ 1700

The Clerk announced the following pairs:

On this vote:

Mr. Dornan of California for, with Mr. Richmond against.

Mr. Forsythe for, with Mr. Mitchell of Maryland against.

Mr. Gradison for, with Mr. Solarz against.

Mr. Hagedorn for, with Mrs. Chisholm against.

Mr. Young of Alaska for, with Mr. Edwards of California against.

Mr. Jeffries for, with Mr. Florio against.

Mr. Petri for, with Mr. Leland against.

Mr. Lee for, with Mr. Ratchford against.

Until further notice:

Mr. Long of Lousiana with Mr. Sawyer.

Mr. Blanchard with Mr. Rudd.

Mr. Fithian with Mr. Wampler.

Mr. Mattox with Mr. Goldwater.

Mr. Hertel with Mr. Wylie.

Mr. Daschle with Mr. Coleman.

Mr. Hatcher with Mr. Hance.

Mr. Brown of California with Mr. Lehman.

Mr. John L. Burton with Mr. Rose.

Mr. Brooks with Mr. Leath of Texas.

Mr. Bedell with Mr. Byron.

Mr. Gore with Mr. Hefner.

Mr. Santini with Mr. Holland.

Mr. GINN and Mr. ECKART changed their votes from "aye" to "no."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 195, nays 187, not voting 51, as follows:

[Roll No. 303]

Mrs. Byron with Mr. Lujan.
Mr. Leath with Mr. Hertel.
Mr. Hatcher with Mr. Hubbard.
Mr. Gore with Mr. Hefner.
Mr. Lehman with Mr. Holland.

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the consideration of House Joint Resolution 357, and that I may include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

COMMUNICATION FROM STAFF DIRECTOR, COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT

The SPEAKER pro tempore laid before the House the following communication from the staff director, Committee on Standards of Official Conduct:

COMMITTEE ON STANDARDS OF
OFFICAL CONDUCT
Washington, D.C., November 13, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: This is in further reference to my letter of November 3, 1981, informing you of my receipt of a subpoena ad testificandum issued by the United States District Court for the District of Columbia.

I have determined, after consultation with the General Counsel to the Clerk, that compliance would be consistent with the provisions of House Rule L. Therefore, this is to notify you that absent instruction from the House to the contrary, compliance will be effected.

Furthermore, my testimony is sought to authenticate public documents (financial disclosure statements) filed with the Committee on Standards of Official Conduct.

Sincerely,

JOHN M. SWANNER,
Staff Director.

WHY OUR ECONOMY HAS SLIPPED INTO RECESSION

(Mrs. HOLT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. HOLT. Mr. Speaker I hear a lot of political howling about the recession we are in, but I do not hear anybody saying why our economy has slipped into a recession.

Our country is enduring a recession today because this Congress delayed the tax cuts proposed by the President last March. Because of this Congress, the personal income tax reductions are coming too late to prevent the recession.

I invite your attention to the tax-reduction program the President presented to this Congress early in the year. He asked for a 10-percent reduction in personal income tax rates on July 1, followed by equal rate cuts on July 1 of 1982 and 1983.

With the Federal Reserve Board pursuing a tight monetary policy throughout this year to fight inflation, it was of critical importance that we cut taxes as quickly as possible to prevent recession. In fact, a tight monetary policy was almost certain to produce a recession if we failed to move rapidly to reduce Government spending and taxes.

Congress failed to do the job. It enacted personal tax rate reductions of only 5 percent effective October 1, to be followed by another 10 percent next July 1 and 10 percent on July 1, 1983. The first increment in the tax reduction program was too little and came too late.

No measurable tax relief for the American worker is provided until the middle of the next calendar year. Meanwhile, his income will continue to be eroded by inflation, tax bracket creep, and the social security tax increase scheduled for January 1. His purchasing power has already been sharply eroded by the same factors in recent years.

The fundamental fact is this: Congress has postponed the economic recovery of our Nation. We have had years of stagnation caused by rising inflation and an increasing tax burden driven by inflation, and relief was needed quickly to avoid recession.

The Reagan program for economic recovery depended on monetary policy to reduce inflation while we stimulated productive economic growth by reducing Government spending and cutting taxes.

But the Reagan economic program has been knocked out of synchronization by Congress. The economic recovery is being delayed by a recession caused by actions of this Congress. The goal of achieving a balanced budget by 1984 is being rendered unachievable by the recession. And a swarm of Congressmen are blaming the President for the mess.

The Republican majority on the other side of Capitol Hill is in a panic to raise taxes, which is precisely the wrong direction to take if we ever want economic growth and a balanced budget. The economy is already dragging the anchor of a heavy tax burden.

There is something we can do that makes sense. We can make January 1 the date for the 10-percent tax cut now scheduled for next July 1. My colleage from Pennsylvania (Mr. WALKER) has introduced legislation to accomplish that purpose.

If you are as concerned about rising unemployment as I am, then all of us will work together to enact this legislation with dispatch.

For those of you who are worried about the budget deficit, I would remind you that the recession is reducing revenues.

The device to achieve economic growth, increase employment, and improve the tax base is immediately available to us. The 10-percent tax cut should be made effective January 1 instead of next July 1.

But many would rather complain than take action. Many are hoping for political reasons that the President's economic program will fail. I hope we can put aside partisan fighting to enact the best antirecession medicine available to us.

THE SAUDI ARABIAN EIGHT-POINT PLAN IS NOT A PLAN FOR PEACE

The SPEAKER pro tempore (Mr. FARY). Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 30 minutes.

● Mr. LAFALCE. Mr. Speaker, a Saudi Arabian peace initiative that is the basis for real movement toward a solution of Mideast problems would be a welcome contribution. An analysis of the underlying reasons why the Camp David accords produced results shows that the recent, eight-point Saudi statement does not form the basis of a productive approach.

The essence of the Camp David agreement was the relinquishment of substantial territory by Israel—territory it acquired in a defensive war started by Nasser's Egypt—in exchange for vital but intangible promises of peaceful relations. The relinquishment of territory from which Israel's enemies struck in three wars—1956, 1967, and 1973—is obviously a threat to Israel's security unless believable assurance of a truly peaceful relationship is forthcoming. Without an assurance of sincere peaceful acceptance of Israel, how can she believe that the relinquishment of territory will not simply be a device to place enemies closer to strike at her heart?

Camp David was founded upon a striking and earth-shaking gesture that gave assurance that Egypt truly meant to establish a peaceful relationship. President Sadat, without precondition, went personally to Jerusalem, to the seat of the Israeli parliament, the Knesset, and offered recognition, security, and peace. He, without the intervention of any Western or Soviet bloc nation, proposed to negotiate a true peace. The impact of his offer of not just a cease fire, but normal commercial and neighborly relations, convinced Israel that it was indeed receiv-

ing the intangible—peace—in exchange for its surrender of strategically invaluable territory.

Compare the Saudi plan.

Nowhere is there a willingness expressed to sit down at the table with Israel to establish peace. Nowhere is there recognition that Israel's integrity as a state is recognized. Nowhere is that gesture that is needed to insure sincere desire for peace, for normal commercial, diplomatic, and people to people relations that constitute peace. Tangible concessions—all from Israel—are described explicitly. The notion of absence of overt hostilities may even be implied. But nowhere is there expressed a recognition of Israel's sovereignty, let alone the true solid relations that are necessary to assure lasting peace. Examine the points of the Saudi plan and ask what is there to reassure Isreal that can ever compare with Sadat's dramatic proof of a desire to establish a truly friendly interrelationship.

Let us consider the so-called plan point by point.

POINT 1: ISRAEL SHOULD WITHDRAW FROM ALL ARAB TERRITORY OCCUPIED IN 1967 INCLUDING ARAB JERUSALEM

The plan begins, not with a preamble directed to Israel indicating Saudi Arabia's respect for and recognition of that nation, along with a brief discussion of the positive aspects of peace between Israel and Saudi Arabia, but with an unrealistic demand. This requirement and those that follow are not new. They are positions announced at numerous Arab summit conferences, even prior to Camp David, at which the hostile and negative attitudes toward the "enemy" Israel were reinforced.

Those well-known positions are now packaged and presented to the United States and any other country willing to attempt to coerce Israel into submission to them.

Neither the United Nations nor Egypt asks for so much. U.N. Resolution 242, which is regarded by the United States and Israel as the basis for a settlement in the region, calls for the "withdrawal of Israeli Armed Forces from territories occupied in the recent conflict," (1967 Israeli-Arab war). The resolution does not specify the extent of such withdrawal. The U.N. resolution and the Camp David agreement purposefully omitted the word "all," because Egypt and the U.N. recognize that Israel could not be secure with a withdrawal to the undefensible 1949 armistice lines; that she would be jeopardizing her security by leaving the land completely vulnerable.

That is not to say that Israel is unwilling to relinquish conquered territory. By April 24, 1982, Israel will have returned all of the Sinai Peninsula to Egypt. In so doing, Israel is relinquishing claim to important strategic positions, including airfields, control of the Gulf of Suez, the Strait of Tiran, and the Gulf of Aqaba, and is dismantling Jewish settlements. Israel is willing to withdraw from this land because she is satisfied with the Egyptian agreements providing for border security, such as the stationing of U.N. forces in the Suez. This same need to insure defensible borders must be present in any Saudi plan. Israel cannot give up territory without receiving guaranteed security in return. Even such a guarantee would not have been enough without the token that Egypt desires normal friendly relations with Israel. Security plus acceptance of Israel and meaningful gestures in support of peace must be offered in exchange for territory.

The Camp David agreement states: "Security is enhanced by a relationship of peace and by cooperation between nations which enjoy normal relations." Steps to be taken under Camp David, to establish such relationships among nations at peace include, "full recognition, abolishing economic boycotts, and guaranteeing citizens the protection of the due process of law."

A peace plan must be entered into with a spirit of cooperation and conciliation by both parties. Saudi Arabia is well aware that Israel is adamantly opposed to dividing Jerusalem. To suggest this, at the very beginning, in a proposal lacking in recognition of and security for Israel, immediately raises a serious question about the sincerity on the part of Saudi Arabia of establishing a true peace. The spirit of friendship is completely missing. In its place is this knowingly unacceptable statement—which is followed by others.

POINT 2: ISRAELI SETTLEMENTS BUILT ON ARAB LAND AFTER 1967 SHOULD BE DISMANTLED

These settlements were built to protect and defend Israeli-Arab borders and thus are considered by Israel critical to her security. Without an unquestionable belief that security would be guaranteed by Saudi Arabia through other means, Israel could not give the settlements up. Egypt realized the security importance of these settlements and thus left the future of them for further negotiation. There does not seem to be an opportunity for any negotiation in the Saudi plan—certainly no face to face dialog to discuss this critical sensitive issue.

POINT 3: FREEDOM OF WORSHIP AND RELIGIOUS PRACTICES FOR ALL RELIGIONS IN THE HOLY PLACES SHOULD BE GUARANTEED

There is no argument on this point. Freedom of worship should be guaranteed in a peace agreement. However, the underlying implications of this point are unclear and certainly warrant direct discussions—an ingredient to peace missing in the plan. When the holy places were under Jordan's administration, Jews and Christians faced restrictions and prohibitions in their exercise of religious rights. Jews were not allowed to visit their holy places. Jewish cemeteries were desecrated. Only under Israeli control has full religious freedom been extended. In fact, Moslem holy places have been under Moslem administration and control.

POINT 4: THE RIGHT OF THE PALESTINIAN PEOPLE TO RETURN TO THEIR HOMES AND OF COMPENSATION TO THOSE PALESTINIANS WHO DO NOT WANT TO RETURN SHOULD BE AFFIRMED

Again, discussion and understanding of the issue between both parties is necessary. Up to this point in the plan there has been no indication that Saudi Arabia recognizes Israel's sovereignty; her right to exist as a Jewish state. If this point means the return of all Palestinians to Israel, they would undoubtedly outnumber the Jews and thus effectively eliminate the existence of a Jewish state.

Israel has compensated Palestinians in the past. Compensation for all Palestinians is an appropriate subject for reasonable negotiation.

POINT 5: THE WEST BANK AND GAZA STRIP SHOULD HAVE A TRANSITIONAL PERIOD UNDER THE AUSPICES OF THE UNITED NATIONS, FOR A PERIOD NOT EXCEEDING SEVERAL MONTHS

To insure a peaceful and orderly transfer of authority and to arrange for the security concerns of the parties, a transitional period for the West Bank and the Gaza Strip is desirable. However, a transitional period of only several months is hardly sufficient for making such provisions, and there is no mention of providing security measures during that period.

Establishing this period under the United Nations as opposed to under joint Israeli-Saudi Arabian and other Arab State auspices, indicates the Saudi's unwillingness to recognize Israel or to deal directly with her. Under the Camp David agreements, transitional arrangements were discussed for a period, not exceeding 5 years. Provisions were made to enter into direct negotiations between Israel, Egypt, and Jordan and the need to insure "the legitimate security concerns of the parties involved" was stressed. It would appear that point 5 is meant only to lead to point 6, the establishment of an independent Arab State from the West Bank and Gaza Strip.

POINT 6: AN INDEPENDENT PALESTINIAN STATE SHOULD BE ESTABLISHED, WITH JERUSALEM AS ITS CAPITAL

There could be no greater threat to Israel's existence. The entire thrust of this plan, up to and including this point, is to take from Israel and give to Saudi Arabia. There has been no attempt to alleviate or eliminate Israeli fears that are based upon past virulent Saudi Arabian rhetoric against Israel. Israel can only assess this point in terms of what is present reality—a

fierce anti-Israel campaign on the part of all Arab countries, except Egypt—since no new reality has been put forth. Under these conditions, an independent Arab State would most directly threaten Israel's very existence. As was stated at the beginning of this analysis, Israeli withdrawal from all Arab territory occupied in 1967 would severely threaten her security. Creating an Arab State from this territory would leave her completely vulnerable to extinction.

Such a state could become another base for Arab terrorism and Soviet expansion. Without words of assurance from Saudi Arabia, that she will cease to support terrorism and will take steps to convince other Arab nations to end hostilities and acts of terrorism against Israel, there is every reason to believe that terrorism will continue and if an Arab State is established, be strengthened by an even more strategically located launching pad.

Rather than calm Israeli fears, the plan reinforces them. While the original eight points do not mention a Palestine Liberation Organization (PLO) role, and accompanying list of conditions essential to their implementation included acceptance that PLO Chairman Yasser Arafat is the spokesman of the Palestinian people. In introducing these conditions, Prince Fahd said:

I cannot imagine that a Palestinian state could be set up without the approval of the PLO's leadership. Hence, no peace without the Palestinian people and no Palestinian state without the Palestine Liberation Organization.

How could Israel agree to the establishment of a PLO state on its vulnerable borders?

Certainly, the issue of the status of the West Bank and Gaza strip cannot be summarily dismissed by simply stating they should become an Arab State. The subject requires much discussion, negotiation, and compromise. The discussion must be directly between the parties. To come to any agreement at all, Saudi Arabia must directly assure Israel, in personal gestures and actions that are meaningful and sincere, that if a Palestinian state is to be created, it will be a friendly one recognizing Israel's right to exist as a Jewish state and therefore providing for necessary security arrangements and normal relations between the two. So too, there should be a willingness on the part of Saudi Arabia to accept something less than the establishment of an Arab State. Camp David talks about autonomy. The entire subject must be open for compromise and accommodation. Such is the art of relationships between friendly countries truly seeking peace.

The Camp David agreement emphasized the need for assuring internal and external security. It established a framework for granting full autonomy for the inhabitants of the areas, establishing joint patrols to assure security of borders, and entering into negotiations to determine the final status of the territory.

POINT 7: THE RIGHT OF ALL STATES IN THE REGIONS TO LIVE IN PEACE SHOULD BE REAFFIRMED

To date, there has been no clear direct statement by Saudi Arabia that Israel is one of the "states in the regions" included in this plan. In fact, there have been direct statements issued before and after the plan was presented that indicate Israel is definitely not included.

Interpretations of the meaning of this point are numerous and conflicting. There have even been two different translations handed to correspondents. One uses the word "people" in the regions, the other says, "states" in the regions. "People" would not imply recognition of the State of Israel in any way.

What is required, immediately, is for Prince Fahd to state directly and publically that Israel is one of the states in the regions whose right to live in peace should be reaffirmed. Mentioning Israel by name would clarify the questions and be a significant gesture toward recognition. This particular issue is critical. If Saudi Arabia does not recognize Israel as a state and then recognize its right to exist, there is little reason to even read this plan, let alone consider it seriously.

Most recently, Saudi Arabia's ranking diplomat in the United Nations, Gaafer M. Allagany, asserted that the proposal does recognize Israel. Mr. Allagany said:

It says "all states," We are not afraid to say that it does recognize Israel. We are not shying away from that word "Israel" in any sense.

Allagany's assertion is in direct conflict with prior official positions and statements.

Saudi Arabia has never regarded Israel as a state but rather, as the Zionist enemy. Chedli Klibi, Secretary General of the Arab League, said (the Middle East, October 1981):

There is not one word in Prince Fahd's plan indicating that Saudi Arabia or any Arab party is ready to recognize Israel.

There is no mention in the Saudi plan of U.N. Resolutions 242 and 338 which call for negotiations with Israel and, therefore, imply recognition of the Jewish state. The plan is noteworthy in its ability to discuss peace without mentioning Israel by name except to mandate Israeli withdrawal from territories. As stated before, the plan contains no mention of the need to conduct negotiations with Israel—precisely because to do so would imply recognition.

In discussing the conditions that must be met for the implementation of a peaceful settlement, Fahd stated:

The United States should cease its unlimited support of Israel. Israel arrogance, whose ugliest manifestation is embodied in Menachem Begin, should be put to an end. The Palestine factor, as Yasser Arafat says, should be recognized as the basic factor in the Middle Eastern equation.

These statements do little to support the conclusion that Israel is one of those states in the region guaranteed to live in peace; nor do they qualify as gestures for friendship.

In discussing the Saudi plan, Prince Saud, the Saudi Foreign Minister, would not explicitly say that Saudi Arabia or any other Arab country was ready to formally recognize Israel provided an agreement was reached. He indicated that first Israel must agree to discuss the Fahd plan and reach agreement. Then, perhaps the Saudis would discuss recognizing Israel. An official Saudi press agency report on October 2, 1981, stated that Fahd expressed the hope that when the plan is discussed at the Arab League summit in Morocco in November, it will become the united will of the Arabs in the face of the "enemy." If Israel is considered the enemy even at the time of introducing a peace plan, how seriously can such a plan be considered?

In an interview published in the leading Beirut daily, An Nahar, on October 30, 1981, Yasser Arafat, the head of the Palestine Liberation Organization, said he welcomed the peace plan proposed by Prince Fahd of Saudi Arabia because it calls for coexistence between Israel and the Arabs. But Mr. Arafat would not say directly that he would acknowledge the existence of Israel. The Minister of Information, Sheik Mohammed Abdo Yamani stated on November 1, 1981, in an interview with the Kuwaiti newspaper, Rai Al-Amn:

The principles on which the plan of Prince Fahd stands emphasize the need to wrest Palestinian rights from the claws of the enemy.

Prince Fahd held a dialog on his peace initiative on November 2, 1981, which was published in the Saudi press. He stated:

The world has only to be guided by its conscience to force the Zionist aggressors to return the land to its lawful owners.

He reiterated the Baghdad summit rejection of Camp David:

No to Camp David in both form and content.

He went on:

We very much hope that the Saudi declaration of principles will become a tool for unity and unification with which we can face our enemies and a means toward ending their domination of the conflict.

He refers to his plan as "categorically" different from Camp David. Indeed it is.

Even if it were agreed that this point in the Saudi plan accepts, by implication, Saudi recognition of Israel as a state, other points that have been dis-

cussed would mean Israel's destruction. Among these are: Israel evacuation of all Arab territories, including East Jerusalem and the setting up of a Palestinian state with East Jerusalem as its capital.

In addition, there has been no attempt to define peace. Granted, peace is an intangible, but there are specific gestures and actions that assist in clarifying its meaning. Personal relationships probably mean more than any written word. Even a written clarification can be meaningless unless the individuals who must agree to that piece of paper have mutual respect, admiration, confidence, and trust in each other. Such was the case between Anwar Sadat and Menachem Begin. As the prior discussion indicates, such is not the case between any leader in Saudi Arabia and the Israeli Prime Minister.

But written clarifications are missing as well. Camp David spells out some of the ingredients for peace by talking in terms of "respect for the sovereignty, territorial integrity, and political independence of every state in the area and their right to live in peace within secure and recognized boundaries free from threats or acts of force." Camp David talks about "special security arrangements," such as, "joint patrols;" "good neighborly relations;" involving "all those who have been most deeply affected to settle disputes;" "abolishing economic boycotts;" exploring "possibilities for economic development with the objective of contributing to the atmosphere of peace, cooperation, and friendship which is their common goal."

POINT 8: THE UNITED NATIONS OR SOME MEMBER STATES SHOULD GUARANTEE THE IMPLEMENTATION OF THESE PRINCIPLES

This point is another example of Saudi Arabia's refusal to recognize Israel and to deal directly with her. Under the Camp David agreements, the U.N. Security Council is "requested to endorse the peace treaties to insure that their provisions shall not be violated." But the actual implementation of the principle is left up to Egypt and Israel. They guarantee to each other that the principles and provisions will be adhered to and pledge to "establish among themselves relationships normal to states at peace with one another."

Israel would hardly agree to the U.N. serving as the body able to guarantee its security and right to exist. The General Assembly has condemned Zionism as racism. It has consistently treated Israel as a pariah. Its recent resolutions have been aimed at destruction of Israel. Certainly the policy making body, the Security Council, with its membership—including the Soviet Union—could not be trusted with this obligation.

CONCLUSION

This eight-point plan is presented against an historical background of Saudi Arabian contempt and hatred for Israel. To erase that past and to prove that friendship and peace is now the desired path, will take extraordinary efforts. Through the Camp David process, Israel has indicated her willingness to make concessions for true peace. Saudi Arabia has been invited to offer a real peace plan to receive similar concessions. The present Saudi plan fails to prove anything more than that history is repeating itself. As such, it fails to contribute to peace in the Mideast. Much more is needed. I hope it will be forthcoming.●

THE UNIQUE CHARACTERISTICS OF THE FEDERAL RESERVE BOARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, I continue on the subject matter that I enlarged somewhat upon last week with respect to the resolutions I have introduced, as well as the proposed bills that I have introduced, having to do with, in one case, the impeachment of the Chairman of the Federal Reserve Board, and in the second case an impeachment resolution directed at the Open Market Committee, which in effect, means not only the five known Federal Board members but all the Federal Board members because they constitute the so-called Open Market Committee; and the three specific bills having to do with restructuring and attempting to catch up from the congressional standpoint with a duty that has been imposed on the Congress particularly within the last 20 years but which actually, from its inception and the effective date of the 1913 Federal Reserve Act, has been incumbent upon Congress, and that is to bring it in keeping with the accountability and the responsiveness to the needs of the industry and to the finances and credit of the Government.

After all, that is what the Federal Reserve Board really is. It is the fiscal agent of the Government. It is, in today's terminology, the equivalent of the Central Bank for the United States of America. It is for this reason that I must continue the discussion, because it is obvious that much has been lost sight of, such as the basic significant elemental aspects that define the so-called Federal Reserve System.

In order to understand that, I am amazed at the lack of awareness and knowledge, even among the members of the pertinent committees, the Banking Committee, and its corresponding subcommittee in the appropriation process and now the Budget Committee.

□ 1630

I point this out because I must say that further complicating the situation from the standpoint of overview by the Congress have been all these innovations and attempts to bring about some kind of consistency and coherency in the financial appropriation and authorization processes, and they are all so interrelated that they impact, just as I said last week, the domestic policy. No matter how wisely we act, no matter how timely we evolve, we still must confront the impact of the international forces which up to now our country has been either unable or unwilling to do anything about. Only time will bring about a decisive turn of events which, unfortunately, in my opinion, has reached a point of no return.

I frankly speak at a time when the outlook is extremely pessimistic. It is very difficult for me to say so and assess the situation because I am by nature a bubbling optimist. But I have always also had to be a realist or I do not think I would have been celebrating my 20th year in the Congress on November 4 past.

So all of these things, which result from a myriad of forces, of procedures, of laws, and statutes that are interrelated, must be understood, but the first and the primordial thing is that we must understand the history. Why do we have a Federal Reserve Board? Why is it structured the way it is, and why is it conducting its business the way it is now? In fact, it is an almost impossible task because even on our level, the congressional level, there does not seem to be much interest on a sustained basis to get some kind of an accounting of how the Federal Reserve Board really operates, what its procedures internally speaking are, and how its members account for those actions and activities that are conducted under its procedural process such as it has evolved.

I have been a member of the Committee on Banking for 20 years, since the time I came here, and at no time that I can recall has any board member or Chairman ever come to give us an accounting of the decision-making process. It is all enveloped in secrecy, and you and I know that secret government, like fast government, can be very dangerous government.

Dangerous to what? Well, dangerous to the democratic process, dangerous to our most informed and participatory democracy, and, above all, inimical to the public control.

After all, our country, thank God, is still amenable to the people, at least up to now. The reason I am a pessimist is that I see how this in itself,

this residual power of the people to determine, is eroding and has eroded, particularly since last year's election when we had $128 million worth of political action committee money greatly influencing congressional elections. Better than $128 million was spent just for congressional elections. Now, I do not think it is generally known that this has not really happened before, and only time is going to determine finally what the ultimate impact of that is.

But there is no question in my mind that when we dovetail that development with the inextricable link, with the powerful interests, the most powerful financial interests in the world, not only in our country, that are really the ones that are pulling hither and yon, we will find such entities as the Federal Reserve Board and not the actual government managers and administrators.

This is the only reason why we can say that the Government will continue to pay. Even when it was broke at its inception, in 1789, it did not allow that, but now the Government has to pay. It is incredible. It is unbelievable. Europeans cannot quite grasp this, and for a good reason—because it not only is not right but it does not make sense. The Government is paying and has reached the point where it pays more than 15-percent interest. That is interest not on just short-term bills or notes but long term. It is incredible. It is a real plundering of the people and the Republic.

There are bound to be definite reasons why this is happening now as compared to World War II and the sequelae—Korea, for instance—when we had Presidents Roosevelt and Truman financing world wars and where, as I said before, we had in the case of World War II—and I am not speaking now as though it is over with, because World War II is not over with; it has not been settled yet, and this is another thing that is very puzzling and surprising—a different situation. How could those Presidents, at a time when we were using over 46 percent of our gross national product on the Federal level, finance the war and finance the Government's operations, never paying over 2 percent? And the average was less than 2 percent.

Now, why is it? Is it that the Government is weaker today? Is it that the Congress, included in the general term of "our Government," is inept? Is it that it just does not know how, whereas Secretary Morgenthau and President Roosevelt and President Truman, in the case of the Korean war, did know?

Well, I think there are reasons which at this point would be extraneous to the discussion, but we must understand the history. In fact, we have to go to the very beginning of the country at its inception. We must remember that for the first 10 years of our existence as a nation there was not even such a thing as the office of the Presidency. During the first 10 years of our national life, people did not bother with such a thing as a Presidency. In fact, they feared any such office. They did not want to think in terms of that.

And we had the Continental Congresses. That Continental Congress, right then at the tail end, before we adopted the Constitution, had to finance, and it did, and it created the Bank of North America. And even then, by the method of its creation and the way it was handled, it was done a lot more responsibly than the way we are doing it today in the handling of our central bank, the Federal Reserve Board, believe it or not. At least in those days our Founding Fathers did not turn it over to the bankers. They did not turn it over to the unrestrained special interests, because even though that Continental Congress was attacked from the judicial standpoint, it, therefore, had to provide for the chartering or the equivalent chartering of the Bank of North America in the State of Pennsylvania because there was a question, as it properly should have been questioned, whether or not the Continental Congress had the power to charter a bank. And, of course, this is one of the reasons why the Articles of Confederation failed, and the Continental Congresses had to emerge into the new Constitution with the new powers. Also in the First Congress, 1789–91, they had to think in terms of financing, and they created the First United States Bank.

The history of that Bank is one of success, and it essentially gave us the pattern of what Government financing is all about.

We are the only country, let me say parenthetically, that handles our money matters and our currency the way we do. There is no other country that does it. If you look at that dollar bill you may have in your pocket, you will not see "Treasury Note" or "Silver Certificate" as we had it up until 1965. I remember being on the committee then and raising questions that were never answered and that nobody wanted to contemplate.

□ 1740

We had the experts, great experts, and this is where I lost faith in that so-called expertise. That reminded me of what one Pope said in the Middle Ages when he said, "If only the faithful knew how the church was governed, they might lose their faith."

I have seen those so-called experts, like Secretary Dillon coming in the first year that I was assigned to the Committee on Banking, and in one of the few meetings we had that year we were talking about the repeal of the so-called silver transaction tax. I was the only one that asked questions and voted against recommending its repeal. I asked the pertinent question that would not be answered, because I had gone into the history of that silver transaction tax which is a war tax, and there are good reasons for it, just like there are good reasons for everything else that surrounds the history of our banking institutions.

When we stray from those, when we stray from the principles, when we stray from the Constitution, we can expect serious trouble. Primarily, I think that is why we are in trouble in our country today.

But if you go back to the history of that first bank, you find one thing for sure. After the Constitution was enacted, and in order for the Government to gain credibility and creditworthiness and faith and trust from the people, it assumed the war debts that were incurred during the Revolutionary War of the individual States. In order to finance, they created beyond the Bank of North America the First United States Bank. Remember that all of these are private institutions but have governmental aspects, because the Government is using them as its instrumentality or fiscal agents, agents for the Government.

But the Government also, being broke, had to resort to a mechanism in order to not only finance but to do so in a way that would not be contrary to the spoilation of people's economic well-being. That bank was so successful that in its years of existence, not only was the Government able to finance and include a 6 percent share in its interest in the bank, but also pay the interest thereof, which was no more than 6 percent, through its able management and fiscal ability. But most of all, it was because they did not turn it over. They did not give unrestrained right to fractional reserves.

Today you hear a lot about printing press money as if the Government of the United States has been profligate, as if you had those liberals in charge. I wish to God it was guys like myself who are labeled liberals; and I am proud of that label, I am not ashamed of it, because I think that if it is defined as I define it, in the light of America's history, that is the American tradition. But when you hear all of this talk about printing press money, what is not stated is that the Congress has delegated the right to make money to the bankers. Under our fractional system, banks manufacture money every day, and that is not controlled. This is what the current situation is all about.

When you have the central banker, the fiscal agent of the Government acting like a usurious moneylender, in fact worse than a usurious moneylend-

er, I compare them in fact to the Mafioso, to the Cosa Nostra. I said it was acting like a junta, but it is more like a Cosa Nostra. In fact, it is not even half as good because at least you can get some of the witnesses from the Cosa Nostra to come in hooded in disguise, but you cannot get these bankers to come in even under a hood. Therefore, you have no accountability.

You look at your dollar bill, and you will see "Federal Reserve Note." For every one of those issued, you, the taxpayer, have to pay interest on that. You have to pay for its manufacture; you have to pay interest on its issuance. We are the only country in the world that does it that way. There is no other country, England, France, Germany, Japan, you name it, that does that. They do it the way it ought to be done. That is, in our case it would be the Treasury. This is why one of my bills will abolish the Federal Reserve Board and bring its activities, its institutions, its buildings, its vaults, and everything else under the Department of Treasury of the United States. In that way the people will know who is responsible.

As it is now, the poor people back home say, "Henry, what is the Congress going to do about high interest rates? The Congress can do something. Surely you can. How in the world can I stay in business?"

Now, this is the case of a man who has since declared bankruptcy.

But I am speaking of what he was telling me earlier this year. He is asking, "Why should I have to pay 22 percent to borrow $12,000 in order to have a floor inventory? I cannot afford it. How in the world am I going to pay 22 percent. I cannot even pay 10 percent without at least making the lender a part of my business to where I will be working for him. I will not be an independent businessman."

If you are a consumer and you wish to purchase an automobile, and Detroit is wanting to know how in the world they are going to sell cars, and why GM is losing $500,000 and are in the red, and Ford, by an almost like amount and, of course, you know the history of Chrysler. The reason is very simple. If you do not sell the cars you manufacture, there is no way that you are going to stay in business and make a profit. No corporation can. This is why the so-called Reaganomics or ERP, the economic recovery plan, has never been quite explained to the satisfaction of hard-headed businessmen.

Their heart belongs to daddy. They voted for Mr. Reagan, and most of them are Republicans, and that is great. I think what my colleagues on both sides had better recognize, because I know that depending on who is in power at the time they blame economics on partisanship, but let me say that economics is a bipartisan matter, like corruption. I remember, I am old enough to remember when Harry Truman had that general and they had the 15 percenters. I think that he charged 15 percent, or at least he was accused of it. All of the Republicans talked about Truman's corruption. Then they came in and here comes the loved, the loved Ike, and he ends up with Sherman Adams. Sherman Adams I think was 5 percent.

The point is that corruption, none of us should take or boast who is exempt and who is not, or who is to blame when there but for the grace of God is I. Corruption is bipartisan. So is economics. Economics is not Democratic, it is not Republican. It is like mathematics, you are either right or you are wrong. No two ways between.

□ 1750

When you look at the history here—and we have had it before us—we had Government that was in no less, in fact, in a far more precarious position than anything we could conceive confronts us right now, even though what confronts us right now, especially now, is pretty bad.

I do not think that the American people or even if the administrators realize—they do not want to say it—but I have been privy to testimony that the regulators have given us that has been most disturbing. They would not give us that information when they should have so that the Congress could, within the extent of its jurisdiction, have addressed itself. Some of us have been trying to elicit, extract—in fact, it is like trying to pull teeth—this information for that last 15 years, because we have had these events foreshadowed by definite trends and activities. But today the thing is so complicated, and it is further aggravated by this sort of cuckoo-land aspect of finances that I do not know what is going to happen other than that the only thing I feel we can do at this point, like those serving on the level that I am—amd I have instructed the staff of the subcommittee to do so—is to get anticipatory suggestions and legislative programs so that we will not be, at least on the congressional level, flailing around when the house of cards collapses.

The only thing I am afraid to report that is in issue is when, not will it—especially now. And I said this 2 years ago. I said 2 years ago that, for the first time since 1930, all of the variables are in this equation that can and will make it possible to have the kind of economic catastrophe that we call the depression.

Now, I think anybody from that generation—and I am a depression kid—would want that as a last thing. Like war, you pray to God that it be avoided. But, on the other hand, you cannot bury your head in the sand when you see these awesome resemblances and parallels between the period immediately preceding and what is happening now. And I pointed out that, even though we have all of these mechanisms, these stabilizers—social security, and the like—you now have some additional factors on the international level, as well as domestically.

For example, I pointed out 2 years ago, better than 2 years ago, that we have now reached that point that bankers, ever since the goldsmiths, who became the first lenders, the first bankers, in the Middle Ages, in the 13th century—let me explain a little there. The goldsmiths were the ones who were the keepers of the gold, which was the medium of exchange. And they, in effect, ended up in using techniques defined in the banking world as "fractional reserves," because they would issue a note. They would keep the gold and they would issue a note to the owner thereof, saying, "This is what you are worth, and this note reflects it." And it got to where they would issue the trusted clients notes in excess of the actual value of the gold held. That is what is known as fractionalization. This is what banks do today. This is why, when I said 2 years ago that we were violating that formula, that equation, where it was now that we had violated in our banking world, you took all of your total banking structure, your 14,000 commercial banks, plus the others, and you had less than 20-to-1 ratio on structuralization and capitalization value, and what you had as liability, and when you reach that, traditionally, ever since the Middle Ages, you are in trouble.

Maybe it will not happen, but maybe it will. And if it does, you are in very serious trouble.

The first runs—you know, we call them bank runs today—well, the first runs in the Middle Ages were when these goldsmiths overextended and all of a sudden they had a call for that gold, and they just did not have enough gold to cover those notes. Well, the same thing happened in our beginning, except that the Founding Fathers, being honest and being responsible and knowing better—because, after all, our Nation, and the concept of our Government is founded on the fact that you have a balance, a countervailing of powers. We know that power not only tends to, it does, corrupt. And no man is exempt. There is no man who is wise enough, good enough, who can resist the corrupting influence of power.

This is why our country is predicated on the balance, so that that horrible thing that the Founding Fathers were mostly afraid of, the Executive, the king, and all that that reflected, but they also knew there could be such a thing as judicial tyranny or congressional or legislative tyranny, and we have had periods in our history

when we have been victimized by all three, except not as severe because, after all, it has worked, we have had countervailing balancing of this tripartite, equal, coequal, and separate and independent branches.

Even today, we had a good illustration of what so many of the Members here were losing sight of, the fact that we are not inferior to the President. We are coequal and independent. And if we forgo our independence, that is our responsibility. And this is what we have done. When those first Congresses and those first managers appointed by the Congress worked, they were well aware of this; and even though the people they were entrusting the financial fate were great and honorable people, they did not give them all that power because they knew that, no matter how good they were, and especially among bankers, the more they had the more they would want. This is why you have had laws against usurious interest rates all through history. Even before the time of Jesus Christ it was illegal to charge anywhere what we now nonchalantly say it is all right to the Federal Reserve to legalize. This is one of the charges I have, that the Chairman and the Federal Reserve Board have legalized usury in a manner that is shocking, unbelievable, to me. Unbelievable. Even during the Civil War—what greater period of stress have we shown in the history of our Government?—You never had to pay a prime interest rate such as anywhere near what is taken for granted today. And you did have national usury laws.

We undid the national usury law after the Civil War, in fact, about 1865, and it was done sort of left handedly. You remember the Nation was convulsed, it was trying to live over it, it was trying to heal wounds. It was still very bitter. And it is during those times that those interests—I call them the moths and the scarabs of the States—always hovering, but always looking out for their particular interest, and to hell with the general interest, the greatest interest of the greatest number.

This is why we have the Government. And when the Congress sits back and abdicates that trusted responsibility, should we be surprised because we are being punished, flagellated, beaten out of our American standard of living, reduced to compete with the peons and the coolies of the world? And this is what we are confronting. We are confronting with the erection of a class that in Europe they call them the lumpenproletariat, where you have rigid caste systems, even in our kith and kin countries, in England. The average American cannot understand the class system there until you talk to some of the escapees from it, and many of them who made up our country.

□ 1800

This is what is the process now. This is what America is facing and it has done because in this dry-as-dust subject matter who remembers or wishes to recall history. But when you examine it, when you see what has happened to start the practice, the extent of the Congress, what was plainly obvious in the discussions, in the private papers and memoirs of the then President Woodrow Wilson, his greatest concern, and he said so, was when he summoned the bankers to talk to them and Senator Carter Glass, and he said, he said he could tell immediately that cold, hostile gaze in the bankers' eyes when he said, "Gentleman, not over my dead body are you going to get what you are seeking in this structure that is being worked out in the Halls of the Congress."

But the Congress did, it did not learn from the First United States Bank, from the Second United States Bank.

You know those were successful even though there was a lot of commotion and you had a depression and coincidentally the reason for it was that as fiscal agents for Government it was not that they were not set up right or accountable or that they did not even return moneys to the taxpayers and the Government, but that they perhaps were restrained to such a point, because of the private bankers' interest, that they did not respond to the demands of a burgeoning economy, the country was growing, it was expanding, it was moving, the age of invention of which America is a hallmark—it is our great country, is what it is, because of that nobility of vision, and accountability of the men in that period of time.

But even at that, even as late as 1913, when it was finally formulated and shaped into what we call the Federal Reserve Board—even then it was in effect left with an open-ended power by the very interests that this mechanism is supposed to supervise and control.
